A. Home Premium
B. Starter
C. Ultimate
D. Professional

Answer: CD

Explanation:
Using Windows XP Mode, you can run programs that were designed for Windows XP on computers running Windows 7 Professional, Enterprise, or Ultimate

editions.

NEW QUESTION 22
- (Exam Topic 1)
You need to enable connection to a Bluetooth device.
What should you do? (To answer, move the four appropriate actions from the list of actions to the answer area and arrange them in the correct order.)

Find and pair the device.
Add a Bluetooth adapter to your computer.
Set up a new partnership in Sync Center.
Use the Add Bluetooth Device feature in Control Panel.
Turn on the Bluetooth device and make it discoverable.
Enable **Network Discovery** in Network and Sharing Center.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Add a Bluetooth adapter to your computer.
Box 2: Turn on the Bluetooth device and make it discoverable. Box 3: Use the Add Bluetooth Device feature in Control Panel. Box 4: Find and pair the device
Note:
Step 1: Add a Bluetooth adapter to your computer if it doesn't already have one. You can do this by plugging the adapter into a USB port.
Step 2: Set up the Bluetooth enabled device so that your computer can find it. To do this, you must first:
Turn the device on. Make it discoverable.
Step 3 – step 4: To add a Bluetooth enabled device
Once you've verified that a Bluetooth adapter is installed on your computer, and the device you want to connect with is discoverable, you can add most Bluetooth enabled devices to your computer. Here's how:
Open Devices and Printers by clicking the Start button Picture of the Start button, and then, on the Start menu, clicking Devices and Printers.
Click Add a device, and then follow the instructions.
Click the Bluetooth enabled device you want to add to your computer, and then click Next. If you don't see the device you want to add, make sure the device is turned on and discoverable. If you just turned on the device, it may take Windows several seconds to detect it.
Windows might ask you to enter a pairing code (sometimes called a PIN or passcode). Most Bluetooth enabled devices need to be paired with your computer before they can exchange information with each other. To do this, they must exchange protected pairing codes. This means that only the wireless devices you authorize can connect with your computer.

NEW QUESTION 23
- (Exam Topic 1)
You need to find out the amount of physical memory available to Windows 7. Which command should you use?

A. sysedit.exe
B. msinfo32.exe
C. msconfig.exe
D. wmimgmt.msc

Answer: B

NEW QUESTION 27
