Exam Questions JN0-1332

Security Design. Specialist (JNCDS-SEC)

https://www.2passeasy.com/dumps/JN0-1332/

NEW QUESTION 1
You arc designing a high availability firewall solution You select an off-path design instead of an mime design. What arc two reasons for this decision? (Choose two.)

A. The off-path design is less complex
B. The off-path design is more flexible
C. The off-path design uses fewer interfaces at the adjacency layer
D. The off-path design requires a proper routing configuration for selecting traffic

Answer: B

NEW QUESTION 2
You arc asked to proud a design proposal to secure a service provider's network against IP spoofing As part of your design, you must ensure that only traffic sourced from the same subnet is followed on the
customer-facing interfaces. Which solution will satisfy this requirement?

A. BGP with source of origin community
B. unicast RPF with strict mode
C. unicast RPF with loose mode
D. BGP labeled-unicast using the resolve-vpn option

Answer: B

NEW QUESTION 3
As part of a design requirement you are asked to allow users in a specific department to authenticate only on their laptops and no other devices on the same network port. Which mode of 802 .1X authentication will you use to satisfy this requirement?

A. multiple
B. single-secure
C. single
D. MAC RADIUS

Answer: A

NEW QUESTION 4
Physical security devices are "blind" to which type of traffic?

A. bare metal server to VM
B. private VLAN
C. intra-server traffic
D. management

Answer: B

NEW QUESTION 5
When designing the security for a service provider core router, you are asked to add a firewall fitter on the to0 interface in this scenario, which two protocols would you want to allow through the filter? (Choose two.)

A. LLDP
B. SSH
C. BGP
D. STP

Answer: AC

NEW QUESTION 6
You are designing a central management solution Your customer wants a togging solution that will support the collection of up to 10.000 events per second from many SRX Series devices that will be deployed m their network. In this scenario. which solution should you include in your design proposal?

A. Log Oi rector
B. Network Director
C. Contrail Insights
D. Contrail Server Orchestration

Answer: A

NEW QUESTION 7
Exhibit.

In the 3-tier VPN design shown in the exhibit, which function are the Campus A and Campus B SRX Series devices performing?

A. Internet security gateway
B. data center firewall
C. WAN aggregation
D. VPN bridging

Answer: A

NEW QUESTION 8
According to Juniper Networks, what are two focus points when designing a secure network? (Choose two.)

A. performance
B. automation
C. distributed control
D. classification

Answer: AD

NEW QUESTION 9
You are designing an IP camera solution for your warehouse You must block command and control servers from communicating with the cameras. In this scenario. which two products would you need to include in your design? (Choose two)

A. SRX Series device
B. Security Director
C. Juniper ATP Cloud
D. IPS

Answer: CD

NEW QUESTION 10
You are a security architect for a small managed service provider. The marketing team has proposed providing firewall services to the customers.
The requirements for the solution are shown below
-- The customer must be able 10 manage their own security device.
-- You must provide segmentation using Layer 2 and Layer 3.
-- You need to implement dynamic routing
-- You need to provide UTM services
in this scenario. which product would you select to provide the firewall services?

A. cSRX
B. vSRX
C. vMX
D. vQFX

Answer: D

NEW QUESTION 10
You are asked to deploy a product that will provide east-west protection between virtual machines hosted on the same physical server with a requirement to participate with local routing instances. Which product would you use in this scenario?

A. cSRX
B. QFX
C. SRX
D. vSRX

Answer: D

NEW QUESTION 13
Which two statements describe Juniper ATP Cloud? (Choose two)

A. Juniper ATP Cloud can use a sandbox to detect threats that use evasion techniques.
B. Juniper ATP Cloud runs mime with network traffic to Nock all traffic before reaching endpoint.
C. Juniper ATP Cloud provides protection against zero-day threats
D. Juniper ATP Cloud is an added app that must be instated with Security Director

Answer: AD

NEW QUESTION 16
When two security services process a packet whether it is being processed in the first-packet path or the fast path? (Choose two.)

A. screen options
B. ALG
C. route lookup
D. policy lookup

Answer: CD

NEW QUESTION 19
Multiple customers use the shared infrastructure of your data center. These customers require isolation for compliance and security reasons.
What would you do to satisfy this requirement?

A. Isolate each customer by using different physical hard//are

B. Deploy multiple physical security control points
C. Deploy a single logical security control point.
D. Place each customers VLANs separate virtual router

Answer: C

NEW QUESTION 23
You are designing a service provider network. As part of your design you must ensure that the OSPF, BGP, and RSVP protocol communications are secured using the same authentication method. Which authentication protocol will accomplish this task?

A. HMAC-MD5
B. simple authentication
C. SHA-RSA
D. SHA-256

Answer: B

NEW QUESTION 27
When designing security for the service provider WAN. you are asked to implement unicast reverse path forwarding (uRPF) in this scenario. on which interfaces would you choose to implement loose mode uRPF?

A. On interfaces where the best forwarding path fee routes is through the receiving interface
B. On interfaces that are user access interfaces
C. On interfaces where all data originates on the same network as that of the router interface
D. On interfaces that participate in multihomes environments

Answer: B

NEW QUESTION 30
You must design a separate network within your trust network with added security and separation. What is the common name for this type of network?

A. guest
B. DMZ
C. enclave
D. trust

Answer: C

NEW QUESTION 35
You are asked to design an automated vulnerability scanner that can actively check to see which ports are open and report on the findings. Which Junker Networks product would you use in this scenario7

A. Security Director
B. Log Director
C. Policy Enforcer
D. JSA

Answer: C

NEW QUESTION 36
Which two steps should be included in your security design process? (Choose two)

A. Define an overall routing strategy
B. identity external attackers
C. Identify permitted communications
D. Identify security requirements for the customer's organization

Answer: BC

NEW QUESTION 39
