

# Microsoft

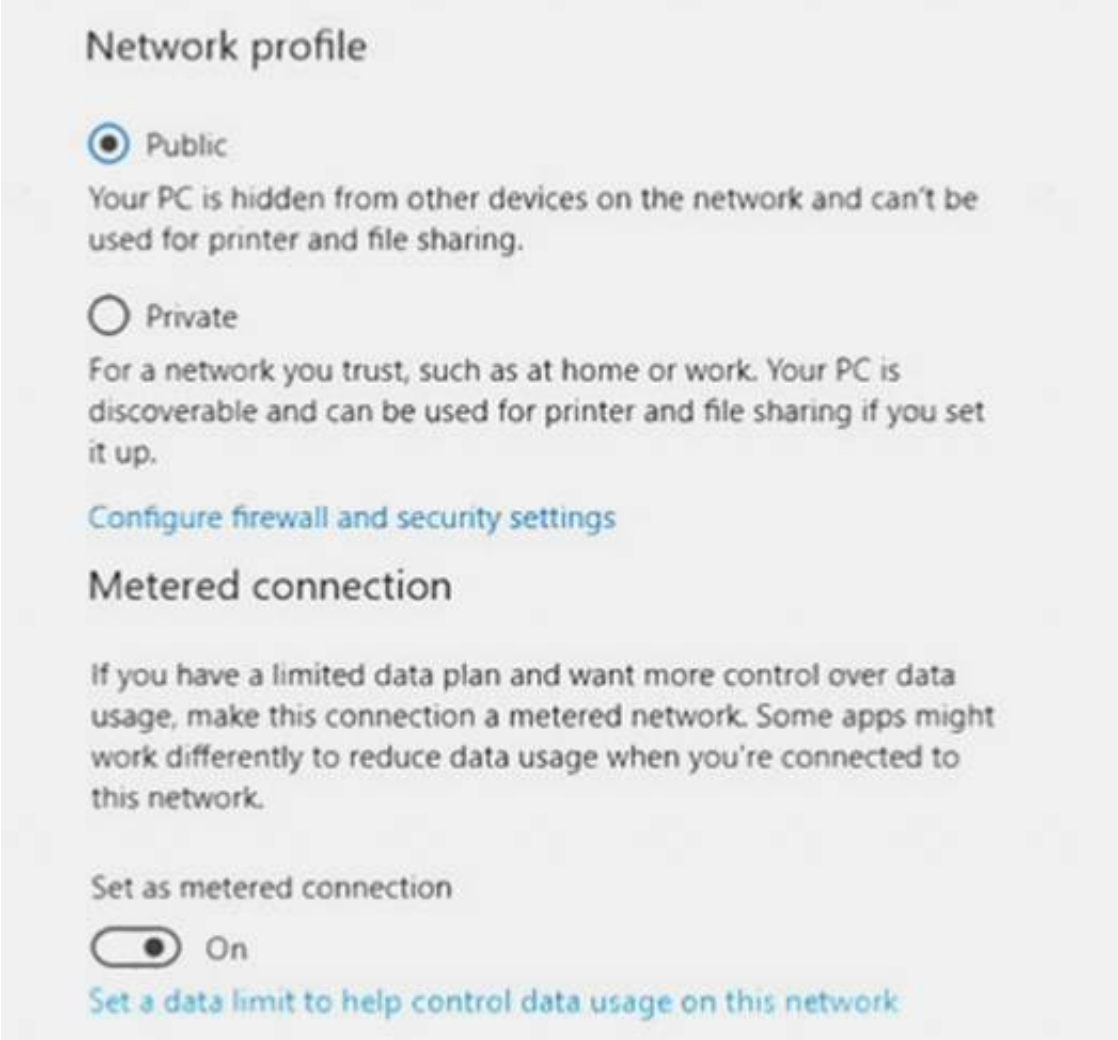

## Exam Questions MD-100

Windows 10

NEW QUESTION 1

You have a computer that runs Windows 10.  
From the Settings app, you view the connection properties shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

To enable Windows Remote Management (WinRM), you must first [answer choice].

set the Network profile to Private  
run winrm qc at the command prompt  
turn off Metered connection

To ensure that Microsoft OneDrive syncs, you must first [answer choice].

set the Network profile to Private  
run winrm qc at the command prompt  
turn off Metered connection

Answer:

Explanation:

To enable Windows Remote Management (WinRM), you must first [answer choice].

set the Network profile to Private  
run winrm qc at the command prompt  
turn off Metered connection

To ensure that Microsoft OneDrive syncs, you must first [answer choice].

set the Network profile to Private  
run winrm qc at the command prompt  
turn off Metered connection

NEW QUESTION 2

You are planning a recovery strategy for computers that run Windows 10.  
You need to create recovery procedures to roll back feature updates and quality updates.  
What should you include in the procedures? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

To roll back feature updates:

▼
Recovery from the Settings app
Windows Update from the Settings app
Programs and Features from the Control Panel
Troubleshoot from the Settings app

To roll back quality updates:

▼
Recovery from the Settings app
Windows Update from the Settings app
Programs and Features from the Control Panel
Troubleshoot from the Settings app

**Answer:**

**Explanation:** References:

<https://www.thewindowsclub.com/rollback-uninstall-windows-10-creators-update> <https://www.dummies.com/computers/pcs/undo-windows-update/>

### NEW QUESTION 3

You have a computer named Computer1 that runs Windows 10. Computer1 contains a folder named Data on drive C. The Advanced Security Settings for the Data folder are shown in the exhibit. (Click the Exhibit tab.)

You share C:\Data as shown in the following table. User1 is a member of the Users group.

Administrators are assigned Full control NTFS permissions to C:\Data.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 can read and write files when connected to \\Computer1\Data.	<input type="radio"/>	<input type="radio"/>
User1 can read and write files in C:\Data locally.	<input type="radio"/>	<input type="radio"/>
Administrators can change the NTFS permissions of files and folders when connected to \\Computer1\Data.	<input type="radio"/>	<input type="radio"/>

**Answer:**

**Explanation:**

Statements	Yes	No
User1 can read and write files when connected to \\Computer1\Data.	<input checked="" type="radio"/>	<input type="radio"/>
User1 can read and write files in C:\Data locally.	<input checked="" type="radio"/>	<input type="radio"/>
Administrators can change the NTFS permissions of files and folders when connected to \\Computer1\Data.	<input type="radio"/>	<input checked="" type="radio"/>

### NEW QUESTION 4

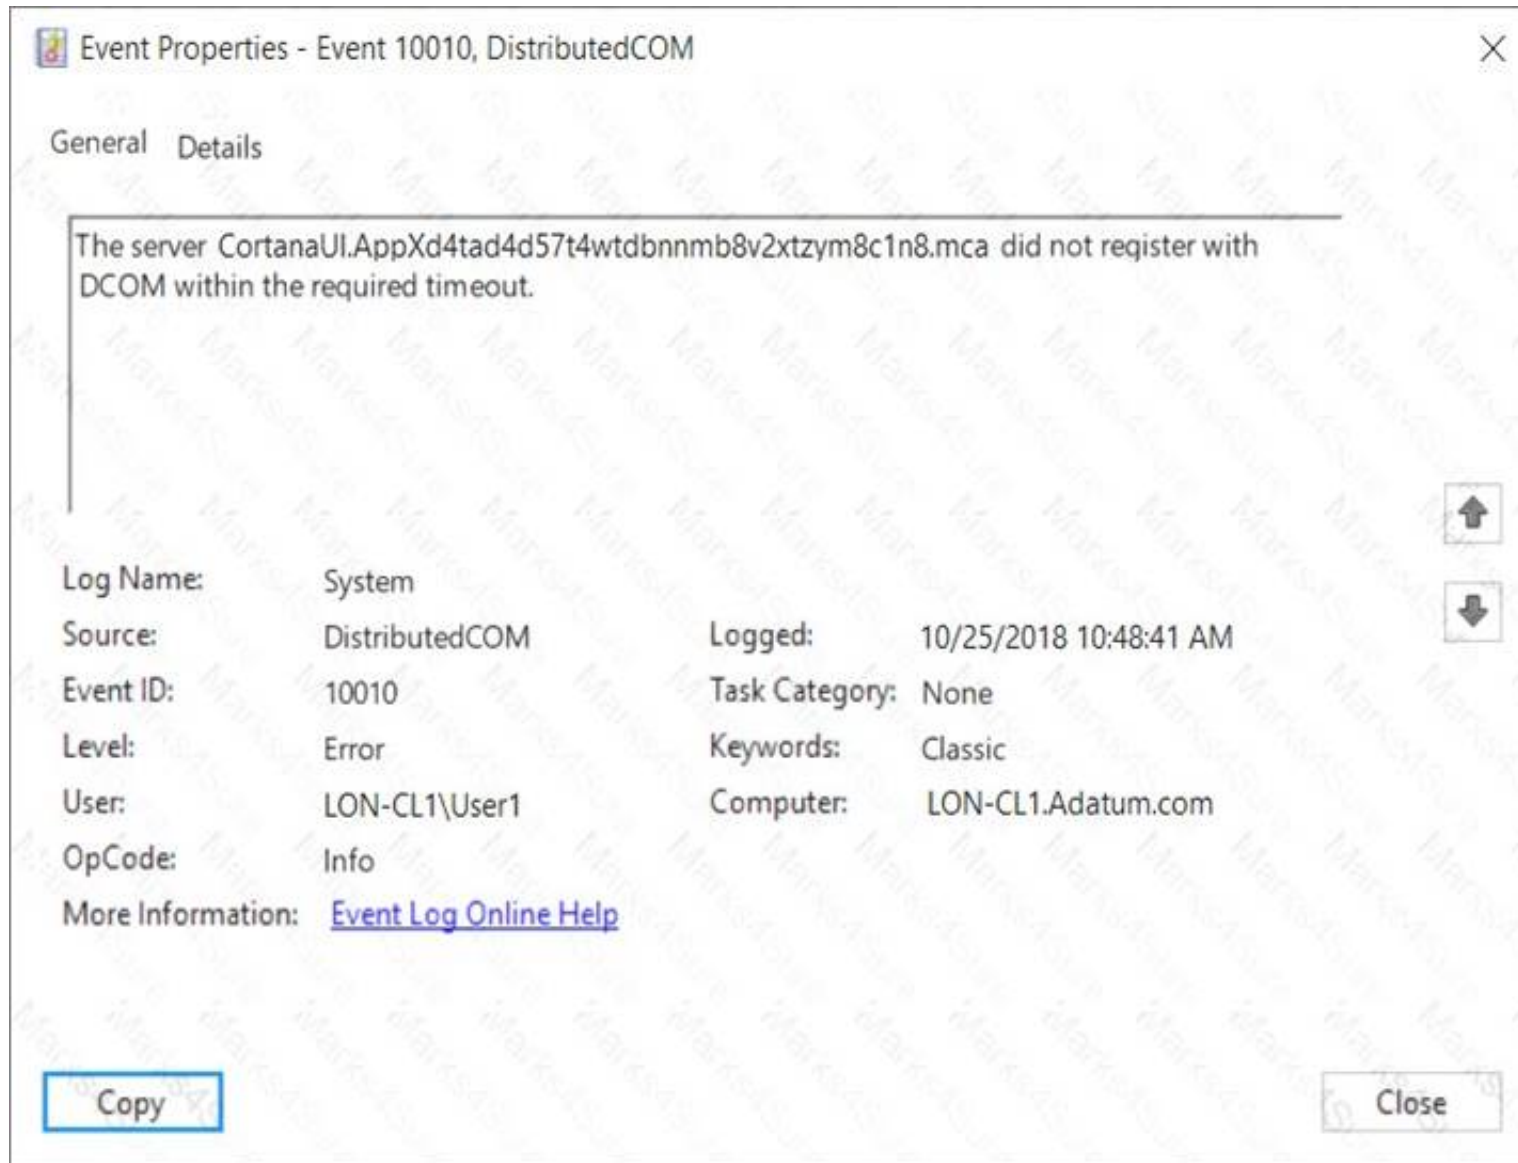

You have a computer named LON-CL1.Adatum.com that runs Windows 10.

From Event Viewer, you create a custom view named View1 that has the following filter:

- ▶ User: User1
- ▶ Logged: Any time
- ▶ Event logs: System
- ▶ Computer: LON-CL1
- ▶ Event IDs: 10000 – 11000
- ▶ Event level: Error, Verbose

You open Event Viewer and discover the event shown in the exhibit. (Click the Exhibit tab.)

The event does not appear in View1.  
 You need to ensure that the event appears in View1. What should you do?

- A. Add a Task Category setting to the filter.
- B. Add the computer account to the Event Log Readers group.
- C. Create an event subscription.
- D. Modify the Computer setting in the filter.

**Answer:** A

**Explanation:** References:  
<https://www.techrepublic.com/article/how-to-use-custom-views-in-windows-10s-event-viewer/>

#### NEW QUESTION 5

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that contain the users shown in the following table.

Name	Role
Admin1@contoso.com	Security administrator
Admin2@contoso.com	Cloud device administrator
User1@contoso.com	None

You have a computer named Computer1 that runs Windows 10.

Name	Member of
Admin1	Network Configuration Operators
Admin2	Power Users
User1	Administrator

User1 joins Computer1 to Azure AD by using user1@contoso.com.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin1@contoso.com can configure the firewall and Windows Defender on Computer1.	<input type="radio"/>	<input type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input type="radio"/>	<input type="radio"/>

**Answer:**

**Explanation:**

Statements	Yes	No
User1@contoso.com is a member of the local Administrators group on Computer1.	<input checked="" type="radio"/>	<input type="radio"/>
Admin1@contoso.com can configure the firewall and Windows Defender on Computer1.	<input type="radio"/>	<input checked="" type="radio"/>
Admin2@contoso.com can install software on Computer1.	<input checked="" type="radio"/>	<input type="radio"/>

#### NEW QUESTION 6

You have a computer named Computer1 that runs Windows 10.

You need to prevent standard users from changing the wireless network settings on Computer1. The solution must allow administrators to modify the wireless network settings.

What should you use?

- A. Windows Configuration Designer
- B. MSConfig
- C. Local Group Policy Editor
- D. an MMC console that has the Group Policy Object Editor snap-in

**Answer:** C

#### NEW QUESTION 7

You are a network administrator at your company.

A user attempts to start a computer and receives the following error message: "Bootmgr is missing." You need to resolve the issue.

You start the computer in the recovery mode.

Which command should you run next? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

▼	▼
Bootrec	/FixMbr
Diskpart	/RebuildBcd
Sfc	/ScanNow
	/offbootdir

**Answer:**

**Explanation:** References: <https://neosmart.net/wiki/bootmgr-is-missing/>

#### NEW QUESTION 8

You need to ensure that User10 can activate Computer10. What should you do?

- A. Request that a Windows 10 Enterprise license be assigned to User10, and then activate Computer10.
- B. From the Microsoft Deployment Toolkit (MDT), add a Volume License Key to a task sequence, and then redeploy Computer10.
- C. From System Properties on Computer10, enter a Volume License Key, and then activate Computer10.
- D. Request that User10 perform a local AutoPilot Reset on Computer10, and then activate Computer10.

**Answer:** D

**Explanation:** References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-requirements-lice>

#### NEW QUESTION 9

You need to sign in as LocalAdmin on Computer11. What should you do first?

- A. From the LAPS UI tool, view the administrator account password for the computer object of Computer11.
- B. From Local Security Policy, edit the policy password settings on Computer11.
- C. From the LAPS UI tool, reset the administrator account password for the computer object of Computer11.
- D. From Microsoft Intune, edit the policy password settings on Computer11.

**Answer:** A

**Explanation:** References:

<https://technet.microsoft.com/en-us/mt227395.aspx>

Topic 2, Contoso, Ltd

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

Contoso has IT, human resources (HR), and finance departments.  
Contoso recently opened a new branch office in San Diego. All the users in the San Diego office work from home.  
Existing environment  
Contoso uses Microsoft 365.  
The on-premises network contains an Active Directory domain named contoso.com. The domain is synced to Microsoft Azure Active Directory (Azure AD).  
All computers run Windows 10 Enterprise.  
You have four computers named Computer1, Computer2, Computer3, and ComputerA. ComputerA is in a workgroup on an isolated network segment and runs the Long Term Servicing Channel version of Windows

**NEW QUESTION 10**

Your network contains an Active Directory domain named contoso.com. The domain contains named Computer1 that runs Windows 10.  
On Computer1, you create an NTFS folder and assign Full control permissions to Everyone. You share the folder as Share1 and assign the permissions shown in the following table.

Name	Permission
User1	Full control
User2	Change

When accessing Share1, which two actions can be performed by User1 but not by User2? Each correct answer presents part of the solution.  
NOTE: Each correct selection is worth one point.

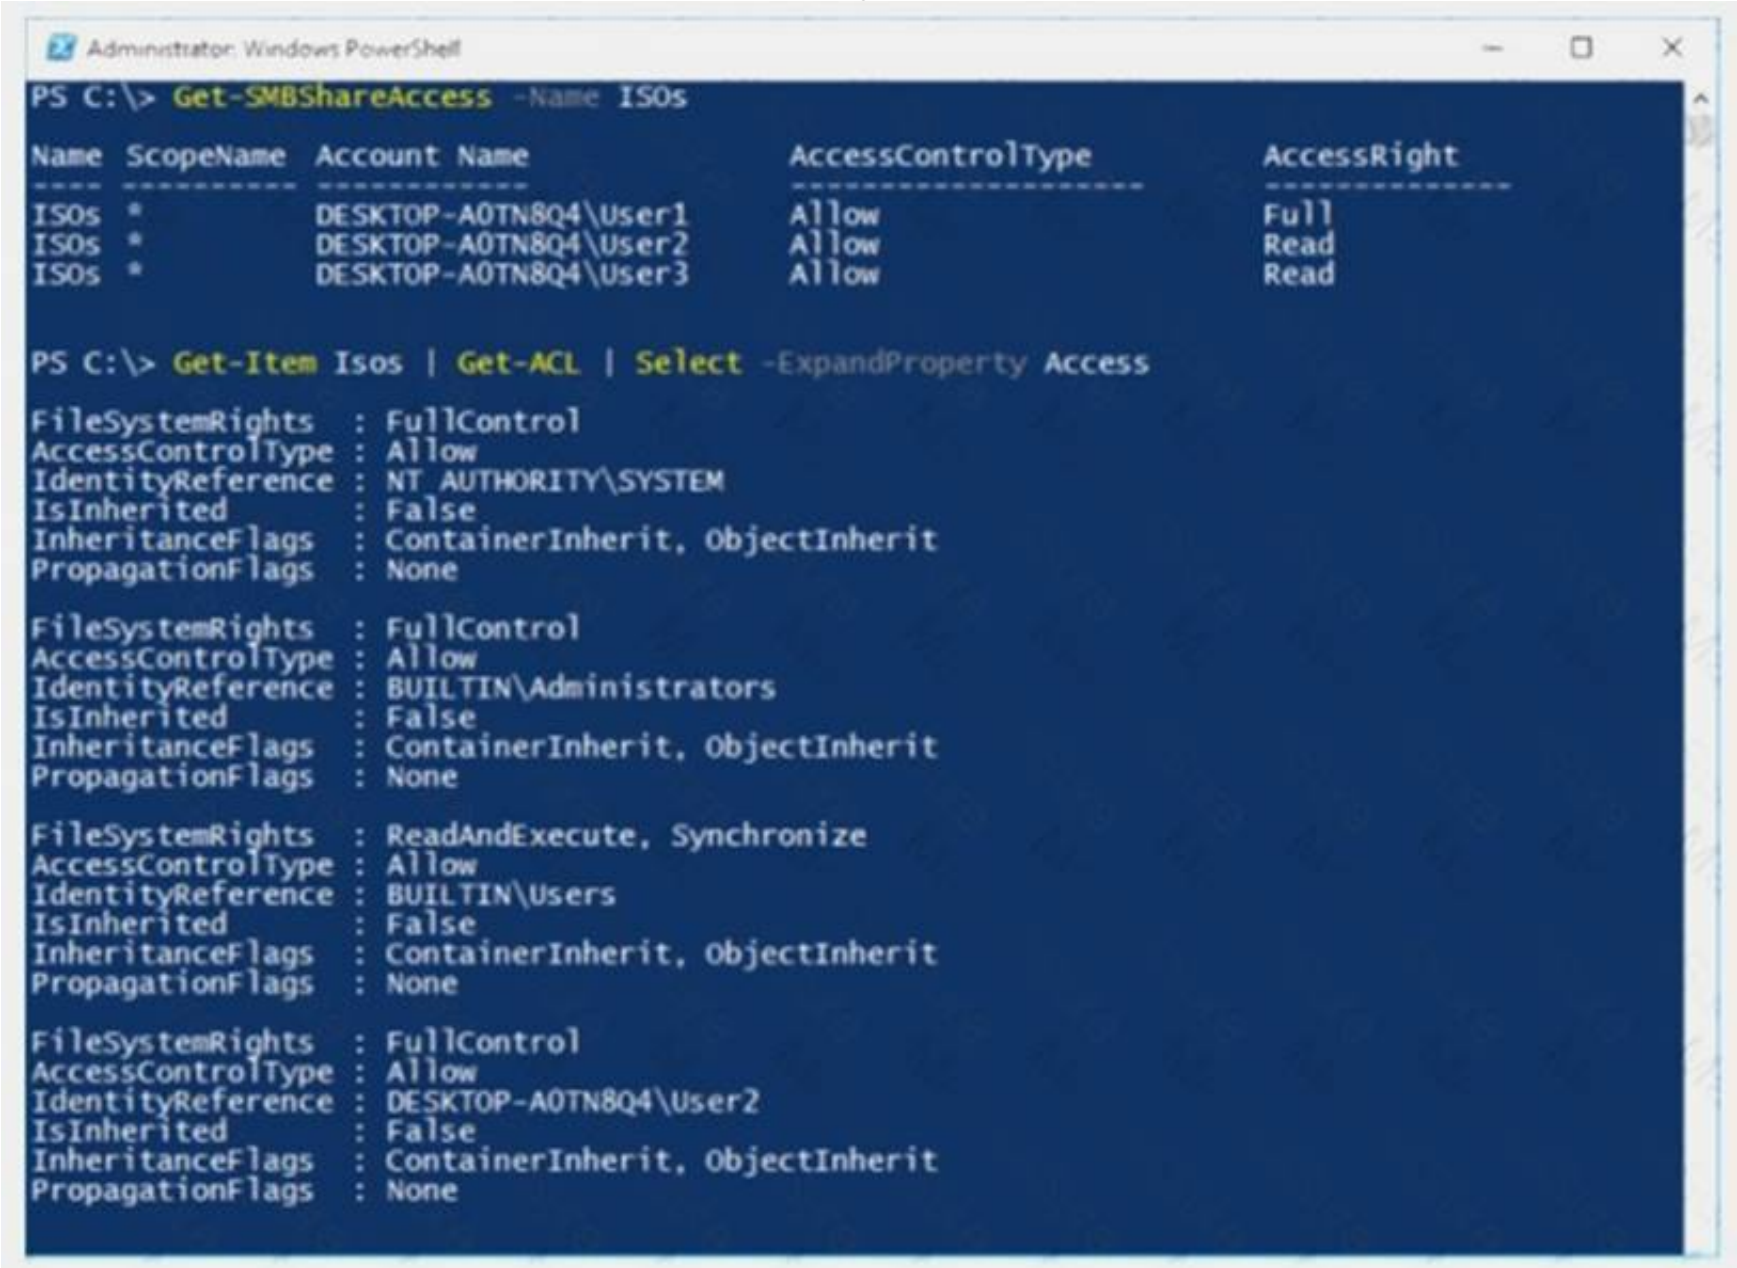

- A. Delete a file created by another user.
- B. Set the permissions for a file.
- C. Rename a file created by another user.
- D. Take ownership of file.
- E. Copy a file created by another user to a subfolder.

**Answer:** BD

**Explanation:** References:  
<https://www.varonis.com/blog/ntfs-permissions-vs-share/>

**NEW QUESTION 10**

You have a computer that runs Windows 10. The computer contains a folder named C:\ISOs that is shared in ISOs.  
You run several commands on the computer as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

[answer choice] can delete files in the ISOs share.

▼
None of the users
Only User1
Only User2
Only User3
Only User1 and User2
Only User1 and User3
Only User2 and User3
User1, User2, and User3

[answer choice] can read the files in the ISOs share.

▼
None of the users
Only User1
Only User2
Only User3
Only User1 and User2
Only User1 and User3
Only User2 and User3
User1, User2, and User3

Answer:

Explanation:

[answer choice] can delete files in the ISOs share.

▼
None of the users
Only User1
Only User2
Only User3
Only User1 and User2
Only User1 and User3
Only User2 and User3
User1, User2, and User3

[answer choice] can read the files in the ISOs share.

▼
None of the users
Only User1
Only User2
Only User3
Only User1 and User2
Only User1 and User3
Only User2 and User3
User1, User2, and User3

#### NEW QUESTION 15

You have several computers that run Windows 10. The computers are in a workgroup. You need to prevent users from using Microsoft Store apps on their computer.

What are two possible ways to achieve the goal? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. From Security Settings in the local Group Policy, configure Security Options.
- B. From Administrative Templates in the local Group Policy, configure the Store settings.
- C. From Security Settings in the local Group Policy, configure Software Restriction Policies.
- D. From Security Settings in the local Group Policy, configure Application Control Policies.

Answer: BD

Explanation: References:

<https://www.techrepublic.com/article/how-to-manage-your-organizations-microsoft-store-group-policy/>

#### NEW QUESTION 16

You have a computer that runs Windows 10. You can start the computer but cannot sign in.

You need to start the computer into the Windows Recovery Environment (WinRE). What should you do?

- A. Turn off the compute
- B. Turn on the computer, and then press F8.
- C. Turn off the compute
- D. Turn on the computer, and then press F10.
- E. From the sign-in screen, hold the Shift key, and then click Restart.
- F. Hold Alt+Ctrl+Delete for 10 seconds.

**Answer:** C

**Explanation:** References:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/windows-recovery-environment--win>

#### NEW QUESTION 17

Your company has an isolated network used for testing. The network contains 20 computers that run Windows 10. The computers are in a workgroup. During testing, the computers must remain in the workgroup.

You discover that none of the computers are activated.

You need to recommend a solution to activate the computers without connecting the network to the Internet. What should you include in the recommendation?

- A. Volume Activation Management Tool (VAMT)
- B. Key Management Service (KMS)
- C. Active Directory-based activation
- D. the Get-WindowsDeveloperLicense cmdlet

**Answer:** B

**Explanation:** References:

<https://docs.microsoft.com/en-us/windows/deployment/volume-activation/activate-using-key-management-servi>

#### NEW QUESTION 21

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You test Windows updates on Computer1 before you make the updates available to other users at your company.

You install a quality update that conflicts with a customer device driver. You need to remove the update from Computer1.

Solution: From System Restore, you revert the system state to a restore point that was created before the update was installed.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:** References:

<https://support.microsoft.com/en-us/help/934307/description-of-the-windows-update-standalone-installer-in-win>

#### NEW QUESTION 26

You have three computers that run Windows 10 as shown in the following table.

Name	TPM version	Operating system
Computer1	None	Windows 10 Enterprise
Computer2	2.0	Windows 10 Pro
Computer3	1.2	Windows 10 Enterprise

All the computers have C and D volumes. The Require additional authentication at startup Group Policy settings is disabled on all the computers.

Which volumes can you encrypt by using BitLocker Drive Encryption (BitLocker)? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

You can encrypt volume C on:

▼

- Computer1 only
- Computer2 only
- Computer3 only
- Computer1 and Computer3 only
- Computer2 and Computer3 only
- Computer1, Computer2 and Computer3

You can encrypt volume D on:

▼

- Computer1 only
- Computer2 only
- Computer3 only
- Computer1 and Computer3 only
- Computer2 and Computer3 only
- Computer1, Computer2 and Computer3

**Answer:**

**Explanation:** References:

<https://www.windowscentral.com/how-use-bitlocker-encryption-windows-10>

**NEW QUESTION 30**

You have a computer named Computer1 that runs Windows 10.  
 On Computer1, you create the local users shown in the following table.

Name	Member of
User1	Users
User2	Users, Guests
User3	Power Users, Guest
User4	Guests, Users, Administrators
User5	Users, Distributed COM Users

Which three user profiles will persist after each user signs out? Each correct answer presents part of the solution.  
 NOTE: Each correct selection is worth one point.

- A. User1
- B. User2
- C. User3
- D. User4
- E. User5

**Answer:** ADE

**NEW QUESTION 31**

You plan to deploy Windows 10 to 100 secure computers.  
 You need to select a version of Windows 10 that meets the following requirements:

- ▶ Uses Microsoft Edge as the default browser
- ▶ Minimizes the attack surface on the computer
- ▶ Supports joining Microsoft Azure Active Directory (Azure AD)
- ▶ Only allows the installation of applications from the Microsoft Store

What is the best version to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Windows 10 Pro in S mode
- B. Windows 10 Home in S mode
- C. Windows 10 Pro
- D. Windows 10 Enterprise

**Answer:** C

**Explanation:** References:  
<https://www.microsoft.com/en-za/windows/compare>

**NEW QUESTION 35**

A user has a computer that runs Windows 10.  
 When the user connects the computer to the corporate network, the user cannot access the internal corporate servers. The user can access servers on the Internet.  
 You run the ipconfig command and receive the following output.

```

Connection-specific DNS Suffix . : 
Description . . . . . : Ethernet 1
Physical Address. . . . . : 00-50-B6-7B-E4-81
DHCP Enabled. . . . . : Yes
Autoconfiguration Enabled . . . . : Yes
Link-local IPv6 Address . . . . . : fe80::5d56:3419:e83b:3c46%17(Preferred)
IPv4 Address. . . . . : 192.168.0.121(Preferred)
Subnet Mask . . . . . : 255.255.255.0
Lease Obtained. . . . . : Wednesday, October 31, 2018 8:07:14 AM
Lease Expires . . . . . : Wednesday, October 31, 2018 8:07:14 PM
Default Gateway . . . . . : 192.168.0.1
DHCP Server . . . . . : 192.168.0.2
DHCPv6 IAID . . . . . : 536891574
DHCPv6 Client DUID. . . . . : 00-01-00-01-22-AC-5F-64-00-50-B6-7B-E4-81
DNS Servers . . . . . : 131.107.10.60
                        192.168.0.3
NetBIOS over Tcpip. . . . . : Enabled
    
```

You send a ping request and successfully ping the default gateway, the DNS servers, and the DHCP server. Which configuration on the computer causes the issue?

- A. the DNS servers
- B. the IPv4 address
- C. the subnet mask
- D. the default gateway address

Answer: A

NEW QUESTION 36

You have a computer named Computer1 that runs Windows 10. Computer1 is in a workgroup. Computer1 contains the folders shown in the following table.

Name	Volume	File system	Permission
Folder1	C	NTFS	Full control to Everyone
Folder2	C	NTFS	Full control to Everyone
Folder3	D	NTFS	Full control to Everyone

On Computer1, you create the users shown in the following table.

Name	Member of
User1	Users
User2	Backup Operators, Users
User3	Cryptographic Operators, Users
User4	Administrators, Users

User1 encrypts a file named File1.txt that is in a folder named C:\Folder1.

What is the effect of the configuration? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Users who can move File1.txt to C:\Folder2:

User1 only

User1 and User2 only

User1, User2, and User3 only

User1, User2, User3, and User4

Users who can move File1.txt to D:\Folder3:

User1 only

User1 and User2 only

User1, User2, and User3 only

User1, User2, User3, and User4

Answer:

Explanation: References:  
<https://support.microsoft.com/en-za/help/310316/how-permissions-are-handled-when-you-copy-and-move-files->

NEW QUESTION 40

You have a file named Reg1.reg that contains the following content.

```
Windows Registry Editor Version 5.00

[HKEY_CLASSES_ROOT\Directory\Background\shell\Notepad]

[HKEY_CLASSES_ROOT\Directory\Background\shell\Notepad\command]
@="notepad.exe"
```

What is the effect of importing the file?

- A. A key named command will be renamed as notepad.exe.
- B. In a key named Notepad, the command value will be set to @="notepad.exe".
- C. In a key named command, the default value will be set to notepad.exe.

Answer: B

NEW QUESTION 43

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10. The computer contains a folder. The folder contains sensitive data.

You need to log which user reads the contents of the folder and modifies and deletes files in the folder. Solution: From the properties of the folder, you configure

the Auditing settings and from the Audit Policy in

the local Group Policy, you configure Audit directory service access.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation: References:  
[https://www.netwrix.com/how\\_to\\_detect\\_who\\_changed\\_file\\_or\\_folder\\_owner.html](https://www.netwrix.com/how_to_detect_who_changed_file_or_folder_owner.html)

NEW QUESTION 47

You have 100 computers that run Windows 10. You have no servers. All the computers are joined to Microsoft Azure Active Directory (Azure AD). The computers have different update settings, and some computers are configured for manual updates. You need to configure Windows Update. The solution must meet the following requirements:

- ▶ The configuration must be managed from a central location.
- ▶ Internet traffic must be minimized.
- ▶ Costs must be minimized.

How should you configure Windows Update? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Windows Update technology to use:

▼

Windows Server Update Services (WSUS)

Microsoft System Center Configuration Manager

Windows Update for Business

Manage the configuration by using:

▼

A Group Policy object (GPO)

Microsoft System Center Configuration Manager

Microsoft Intune

Manage the traffic by using:

▼

Delivery Optimization

BranchCache

Peer cache

Answer:

Explanation: References:  
<https://docs.microsoft.com/en-us/windows/deployment/update/waas-optimize-windows-10-updates> <https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization>

NEW QUESTION 48

You have a computer named Computer1 that runs Windows 10 and is joined to an Active Directory domain named adatum.com. A user named Admin1 signs in to Computer1 and runs the whoami command as shown in the following exhibit.

```

Command Prompt
c:\Users\admin1>whoami /user /groups /priv

USER INFORMATION
-----

User Name      SID
=====
adatum\admin1  S-1-5-21-4534338-1127018997-2609994386-4602

GROUP INFORMATION
-----

Group Name                                           Type              SI
=====
Everyone                                             Well-known group  S-
BUILTIN\Users                                       Alias             S-
BUILTIN\Administrators                             Alias             S-
NT AUTHORITY\INTERACTIVE                           Well-known group  S-

SeIncreaseWorkingSetPrivilege Increase a process working set
SeTimeZonePrivilege Change the time zone

C:\Users\admin1>
  
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.  
 NOTE: Each correct selection is worth one point.

On Computer1, if Admin attempts to open Device Manager, [answer choice].

▼

☐ Admin1 will be prompted for credentials
 ☐ Admin1 will be prompted for consent
 ☐ Admin1 will be denied access
 ☐ Device Manager will open without a prompt

On Computer1, if Admin attempts to run the command prompt as an administrator, [answer choice].

▼

☐ Admin1 will be prompted for credentials
 ☐ Admin1 will be prompted for consent
 ☐ Admin1 will be denied access
 ☐ Device Manager will open without a prompt

**Answer:**

**Explanation:**

On Computer1, if Admin attempts to open Device Manager, [answer choice].

▼

☐ Admin1 will be prompted for credentials
 ☐ Admin1 will be prompted for consent
 ☒ Admin1 will be denied access
 ☐ Device Manager will open without a prompt

On Computer1, if Admin attempts to run the command prompt as an administrator, [answer choice].

▼

☐ Admin1 will be prompted for credentials
 ☒ Admin1 will be prompted for consent
 ☐ Admin1 will be denied access
 ☐ Device Manager will open without a prompt

### NEW QUESTION 51

You have 200 computers that run Windows 10 and are joined to an Active Directory domain.

You need to enable Windows Remote Management (WinRM) on all the computers by using Group Policy. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Set the Startup Type of the Windows Remote Management (WS-Management) service to Automatic.
- B. Enable the Windows Firewall: Allow inbound remote administration exception setting.
- C. Enable the Allow remote server management through WinRM setting.
- D. Enable the Windows Firewall: Allow inbound Remote Desktop exceptions setting.
- E. Enable the Allow Remote Shell access setting.
- F. Set the Startup Type of the Remote Registry service to Automatic.

**Answer:** ACD

**Explanation:** References:  
<http://www.mustbegeek.com/how-to-enable-winrm-via-group-policy/>

#### NEW QUESTION 54

Your company has a wireless access point that uses WPA2-Enterprise. You need to configure a computer to connect to the wireless access point. What should you do first?

- A. Create a provisioning package in Windows Configuration Designer.
- B. Request a passphrase.
- C. Request and install a certificate.
- D. Create a Connection Manager Administration Kit (CMAK) package.

**Answer:** B

**Explanation:** References:  
<https://support.microsoft.com/en-za/help/17137/windows-setting-up-wireless-network>

#### NEW QUESTION 58

You have a computer named Computer1 that runs Windows 7. Computer1 has a local user named User1 who has a customized profile. On Computer1, you perform a clean installation of Windows 10 without formatting the drives. You need to migrate the settings of User1 from Windows7 to Windows 10.

Which two actions should you perform? To answer, drag the appropriate actions to the correct targets. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Actions	Answer Area
Run scanstate.exe and specify the C:\Users subfolder.	First action: <input type="text" value="Action"/>
Run loadstate.exe and specify the C:\Users subfolder.	Second action: <input type="text" value="Action"/>
Run scanstate.exe and specify the C:\Windows.old subfolder.	
Run loadstate.exe and specify the C:\Windows.old subfolder.	
Run usmutils.exe and specify the C:\Users subfolder.	
Run usmutils.exe and specify the C:\Windows.old subfolder.	

**Answer:**

**Explanation:** References:  
<https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-how-it-works>

#### NEW QUESTION 61

Your company purchases 20 laptops that use a new hardware platform. In a test environment, you deploy Windows 10 to the new laptops. Some laptops frequently generate stop errors.

You need to identify the cause of the issue. What should you use?

- A. Reliability Monitor
- B. Task Manager
- C. System Configuration
- D. Performance Monitor

**Answer:** A

**Explanation:** References:

<https://lifehacker.com/how-to-troubleshoot-windows-10-with-reliability-monitor-1745624446>

#### NEW QUESTION 64

You have 20 computers that run Windows 10. The computers are in a workgroup.

You need to create a local user named Admin1 on all the computers. Admin1 must be a member of the Remote Management Users group.

What should you do?

- A. From Windows Configuration Designer, create a provisioning package, and then run the provisioning package on each computer.
- B. Create a script that runs the New-ADUser cmdlet and the Set-AdGroup cmdlet.
- C. Create a Group Policy object (GPO) that contains the Local User Group Policy preference.
- D. Create a script that runs the New-MSolUser cmdlet and the Add-ADComputerServiceAccount cmdlet.

**Answer:** C

#### NEW QUESTION 67

You have a computer that runs Windows 10. The computer is in a workgroup. The computer is used to provide visitors with access to the Internet.

You need to configure the computer to meet the following requirements:

- ▶ Always sign in automatically as User1.
- ▶ Start an application named App1.exe at sign-in.

What should you use to meet each requirement? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Always sign in automatically as User1:

▼
Group Policy preferences
BCDEdit
Registry Editor
MSConfig

Start an application named App1.exe at sign-in:

▼
Group Policy preferences
BCDEdit
Registry Editor
MSConfig

#### NEW QUESTION 69

Your network contains an Active Directory domain. The domain contains 1,000 computers that run Windows 10.

You discover that when users are on their lock screen, they see a different background image every day, along with tips for using different features in Windows 10.

You need to disable the tips and the daily background image for all the Windows 10 computers. Which Group Policy settings should you modify?

- A. Turn off the Windows Welcome Experience
- B. Turn off Windows Spotlight on Settings
- C. Do not suggest third-party content in Windows spotlight
- D. Turn off all Windows spotlight features

**Answer:** D

**Explanation:** References:
