About ExamBible

[Your Partner of IT Exam](#)

Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

Adrian is the project manager of the NHP Project. In her project there are several work packages that deal with electrical wiring. Rather than to manage the risk internally she has decided to hire a vendor to complete all work packages that deal with the electrical wiring. By removing the risk internally to a licensed electrician Adrian feels more comfortable with project team being safe. What type of risk response has Adrian used in this example?

- A. Avoidance
- B. Mitigation
- C. Acceptance
- D. Transference

Answer: D

NEW QUESTION 2

You work as a project manager for BlueWell Inc. You are involved with the project team on the different risk issues in your project. You are using the applications of IRGC model to facilitate the understanding and managing the rising of the overall risks that have impacts on the economy and society. One of your team member wants to know that what is the need to use the IRGC. What will be your reply?

- A. IRGC addresses questions such as the understanding of the secondary impacts of a risk.
- B. IRGC models aim at building robust, integrative inter-disciplinary governance models for emerging and existing risks.
- C. IRGC addresses the development of resilience and the capacity of organizations and people to face unavoidable risks.
- D. IRGC is both a concept and a tool.

Answer: B

NEW QUESTION 3

You are the project manager of the GHY Project for your company. You need to complete a project management process that will be on the lookout for new risks, changing risks, and risks that are now outdated. Which project management process is responsible for these actions?

- A. Risk planning
- B. Risk identification
- C. Risk monitoring and controlling
- D. Risk analysis

Answer: C

NEW QUESTION 4

Your organization has a project that is expected to last 20 months but the customer would really like the project completed in 18 months. You have worked on similar projects in the past and believe that you could fast track the project and reach the 18 month deadline. What increases when you fast track a project?

- A. Resources
- B. Costs
- C. Communication
- D. Risks

Answer: D

NEW QUESTION 5

Frank is the project manager of the NHQ project for his company. Frank is working with the project team, key stakeholders, and several subject matter experts on risks dealing with the new materials in the project. Frank wants to utilize a risk analysis method that will help the team to make decisions in the presence of the current uncertainty surrounding the new materials. Which risk analysis approach can Frank use to create an approach to make decisions in the presence of uncertainty?

- A. Monte Carlo Technique
- B. Qualitative risk analysis process
- C. Quantitative risk analysis process
- D. Delphi Technique

Answer: C

NEW QUESTION 6

Jeff, a key stakeholder in your project, wants to know how the risk exposure for the risk events is calculated during quantitative risk analysis. He is worried about the risk exposure which is too low for the events surrounding his project requirements. How is the risk exposure calculated?

- A. The risk exposure of a risk event is determined by historical information.
- B. The probability of a risk event times the impact of a risk event determines the true risk exposure.
- C. The probability of a risk event plus the impact of a risk event determines the true risk exposure.
- D. The probability and impact of a risk event are gauged based on research and in-depth analysis.

Answer: B

NEW QUESTION 7

You are working with Anna on your project to determine and map the probability distributions of risk within the project. You have indicated that you will use the uniform distribution method for a portion of the project. Which part of your project is most likely to have a uniform risk distribution?

- A. Late completion stages of a project
- B. Project phases that deal with "cutover" technologies
- C. Early concept stage of design
- D. Project initiating

Answer: C

NEW QUESTION 8

You are interviewing members of a project team to test their understanding of the assigned risk responses as risk owners. You and the project manager are working together to evaluate the risk responses to determine their effectiveness in the project. What project management technique are you performing with the project manager in this scenario?

- A. Risk audits
- B. Stakeholder analysis as the project team is a stakeholder
- C. Risk identification with the project team
- D. Risk analysis

Answer: A

NEW QUESTION 9

You are the project manager of the BJA Project for your company. Management is worried about one of the identified risks in your project. The risk event has a probability of 90 percent and a cost impact of \$85,000. Management and you discuss possible solutions to address the risk. You share with them that for \$75,000 you can reduce the probability of the risk event to 15 percent and the impact to \$25,000. This solution will add three weeks to the project schedule. Management thinks this is a good idea and they would like you to add the time and cost additions to your project plan. What type of risk response is used?

- A. Avoidance
- B. Acceptance
- C. Exploit
- D. Mitigation

Answer: D

NEW QUESTION 10

During qualitative risk analysis you want to define the risk urgency assessment. All of the following are indicators of risk priority except for which one?

- A. Cost of the project
- B. Risk rating
- C. Warning signs
- D. Symptoms

Answer: A

NEW QUESTION 10

Gary is the project manager of his organization. He is managing a project that is similar to a project his organization completed recently. Gary has decided that he will use the information from the past project to help him and the project team to identify the risks that may be present in the project. Management agrees that this checklist approach is ideal and will save time in the project. Which of the following statement is most accurate about the limitations of the checklist analysis approach for Gary?

- A. The checklist analysis approach is fast but it is impossible to build an exhaustive checklist.
- B. The checklist analysis approach saves time, but can cost more.
- C. The checklist analysis approach only uses qualitative analysis.
- D. The checklist is also known as top down risk assessment.

Answer: A

NEW QUESTION 11

Management has asked you to perform a risk audit and report back on the results. Bonny, a project team member asks you what a risk audit is. What do you tell Bonny?

- A. A risk audit is a review of all the risks that have yet to occur and what their probability of happening are.
- B. A risk audit is a review of the effectiveness of the risk responses in dealing with identified risks and their root causes, as well as the effectiveness of the risk management process.
- C. A risk audit is a review of all the risk probability and impact for the risks, which are still present in the project but which have not yet occurred.
- D. A risk audit is an audit of all the risks that have occurred in the project and what their true impact on cost and time has been.

Answer: B

NEW QUESTION 12

Harry works as a project manager for the NHQ Project. He is performing quantitative risk analysis for his project. One of the project risks has a 40 percent probability of happening, and it will cost the project \$65,000 if the risk happens. What is the expected monetary value of this risk event?

- A. Negative \$26,000
- B. Negative \$67,000
- C. Zero - the risk event has not yet occurred
- D. \$27,000

Answer: A

NEW QUESTION 14

Fred is the project manager of the CPS project. He is working with his project team to prioritize the identified risks within the CPS project. He and the team are prioritizing risks for further analysis or action by assessing and combining the risks probability of occurrence and impact. What process is Fred completing?

- A. Risk identification
- B. Perform qualitative analysis
- C. Perform quantitative analysis
- D. Risk Breakdown Structure creation

Answer: B

NEW QUESTION 18

David is the project manager of HGF project for his company. David, the project team, and several key stakeholders have completed risk identification and are ready to move into qualitative risk analysis. Tracy, a project team member, does not understand why they need to complete qualitative risk analysis. Which one of the following is the best explanation for completing qualitative risk analysis?

- A. It is a cost-effective means of establishing probability and impact for the project risks.
- B. Qualitative risk analysis helps segment the project risks, create a risk breakdown structure, and create fast and accurate risk responses.
- C. All risks must pass through quantitative risk analysis before qualitative risk analysis.
- D. It is a rapid and cost-effective means of establishing priorities for the plan risk responses and lays the foundation for quantitative analysis.

Answer: D

NEW QUESTION 19

You are the project manager for your organization. You are preparing for the quantitative risk analysis. Mark, a project team member, wants to know why you need to do quantitative risk analysis when you just completed qualitative risk analysis. Which one of the following statements best defines what quantitative risk analysis is?

- A. Quantitative risk analysis is the process of numerically analyzing the effect of identified risks on overall project objectives.
- B. Quantitative risk analysis is the planning and quantification of risk responses based on probability and impact of each risk event.
- C. Quantitative risk analysis is the review of the risk events with the high probability and the highest impact on the project objectives.
- D. Quantitative risk analysis is the process of prioritizing risks for further analysis or action by assessing and combining their probability of occurrence and impact.

Answer: A

NEW QUESTION 24

Joan is a project management consultant and she has been hired by a firm to help them identify risk events within the project. Joan would first like to examine the project documents including the plans, assumptions lists, project files, and contracts. What key thing will help Joan to discover risks within the review of the project documents?

- A. The project documents will help the project manager, or Joan, to identify what risk identification approach is best to pursue.
- B. Lack of consistency between the plans and the project requirements and assumptions can be the indicators of risk in the project.
- C. Poorly written requirements will reveal inconsistencies in the project plans and documents.
- D. Plans that have loose definitions of terms and disconnected approaches will reveal risks.

Answer: B

NEW QUESTION 26

Lamont is the project manager of a project that has recently finished the final project deliverables. The project customer has signed off on the project deliverable and Lamont has a few administrative closure activities to complete. In the project, there were several large risks that could have wrecked the project but Lamont and his project team found some creative methods to resolve the risks without affecting the project costs or project end date. What should Lamont do with the risk responses he identified during the project's monitoring and controlling process?

- A. Include the risk response in the project risk management plan.
- B. Include the responses in the project management plan.
- C. Nothin
- D. The risk responses are included in the project's risk register already.
- E. Include the risk responses in the organization's lessons learned database.

Answer: D

NEW QUESTION 31

You are working as a project manager in your organization. You are nearing the final stages of project execution and looking towards the final risk monitoring and controlling activities. For your project archives, which one of the following is an output of risk monitoring and control?

- A. Quantitative risk analysis
- B. Risk audits
- C. Requested changes
- D. Qualitative risk analysis

Answer: C

NEW QUESTION 35

You are the project manager of the HJK Project for your organization. You and the project team have created risk responses for many of the risk events in the project. Where should you document the proposed responses and the current status of all identified risks?

- A. Stakeholder management strategy
- B. Risk management plan
- C. Risk register
- D. Lessons learned documentation

Answer: C

NEW QUESTION 36

Rachel is the project manager of the KJH Project for her company. She needs a method to create a quick and simple approach to risk identification to communicate the project risk with the stakeholders. Which one of the following approaches to risk identification should Rachel choose to provide a quick and simple listing of the project risks?

- A. Delphi Technique
- B. Checklist analysis
- C. Assumptions analysis
- D. Brainstorming

Answer: B

NEW QUESTION 41

You work as a project manager for SoftTech Inc. You are working with the project stakeholders to begin the qualitative risk analysis process. You will need all of the following as inputs to the qualitative risk analysis process except for which one?

- A. Stakeholder register
- B. Project scope statement
- C. Risk management plan
- D. Risk register

Answer: A

NEW QUESTION 43

Which of the following are parts of SWOT Analysis? Each correct answer represents a complete solution. Choose all that apply.

- A. Opportunities
- B. Tools
- C. Weaknesses
- D. Threats
- E. Strengths
- F. Optimism

Answer: ACDE

NEW QUESTION 45

What risk identification technique allows participants to identify the project risks and to remain anonymous?

- A. Influence diagrams
- B. Assumptions analysis
- C. Surveys
- D. Delphi technique

Answer: D

NEW QUESTION 49

When does the Identify Risks process take place in a project?

- A. At the Planning stage.
- B. Throughout the project life-cycle.
- C. At the Initiating stage.
- D. At the Executing stage.

Answer: B

NEW QUESTION 51

You work as a project manager for TechSoft Inc. You are preparing to plan risk responses for your project with your project team. How many risk responses are available for a positive risk event in the project?

- A. Three
- B. Four
- C. Seven
- D. One

Answer: B

NEW QUESTION 54

Sammy is the project manager for her organization. She would like to rate each risk based on its probability and affect on time, cost, and scope. Harry, a project

team member, has never done this before and thinks Sammy is wrong to attempt this approach. Harry says that an accumulative risk score should be created, not three separate risk scores. Who is correct in this scenario?

- A. Harry is correct, because the risk probability and impact considers all objectives of the project.
- B. Harry is correct, the risk probability and impact matrix is the only approach to risk assessment.
- C. Sammy is correct, because organizations can create risk scores for each objective of the project.
- D. Sammy is correct, because she is the project manager.

Answer: C

NEW QUESTION 59

You are working with the project stakeholders to analyze and prioritize their requirements for the project. One of the project requirements is to achieve a high-level of customer satisfaction for the project deliverable. What is the danger in this project requirement?

- A. Achieving customer satisfaction is an assumption and should be documented in the project scope.
- B. Achieving customer satisfaction is a subjective requirement and entails a high level of risk of being successfully accomplished.
- C. Achieving customer satisfaction is a risk as the project manager cannot control how satisfied the customer will be with the project deliverables.
- D. Achieving customer satisfaction should always map to the quality requirements for the project.

Answer: B

NEW QUESTION 62

There are five outputs of the risk monitoring and controlling process. Which one of the following is NOT an output of the process?

- A. Organizational process assets updates
- B. Risk register updates
- C. Vendor contracts
- D. Change requests

Answer: C

NEW QUESTION 66

Harry is the project manager of the MMQ Construction Project. In this project, Harry has identified a supplier who can create stained glass windows for 1,000 window units in the construction project. The supplier is an artist who works by himself, but creates windows for several companies throughout the United States. Management reviews the proposal to use this supplier and while they agree that the supplier is talented, they do not think the artist can fulfill the 1,000 window units in time for the project's deadline. Management asked Harry to find a supplier who can fulfill the completion of the windows by the needed date in the schedule. What risk response has management asked Harry to implement?

- A. Mitigation
- B. Acceptance
- C. Avoidance
- D. Transference

Answer: A

NEW QUESTION 67

Which of the following risk responses delineates that the project plan will not be changed to deal with the risk?

- A. Exploitation
- B. Transference
- C. Acceptance
- D. Mitigation

Answer: C

NEW QUESTION 68

You are the program manager for your organization. Management is considering a new program but they are worried about the program risks that may affect the program success. You know that there are three positive risk responses and three negative risk responses that each risk can have. Management asks you which risk response would be most appropriate for a large risk event if they wanted to hire a third-party to own the risk event for the program. What risk event is most appropriate?

- A. Avoidance
- B. Sharing
- C. Transference
- D. Mitigation

Answer: C

NEW QUESTION 71

Holly is the project manager of the NSS Project for her company. She is discussing some of the project risks and the issues that have happened in the project. Holly has faxed the status report to her project client for their review. Based on the standard communication model, which component in this scenario is the decoder?

- A. Project customer
- B. Telephone wire
- C. Holly
- D. Project customer's fax machine

Answer: D

NEW QUESTION 73

You are the project manager for the NHH project. You are working with your project team to examine the project from four different defined perspectives to increase the breadth of identified risks by including internally generated risks. What risk identification approach are you using in this example?

- A. Root cause analysis
- B. SWOT analysis
- C. Influence diagramming techniques
- D. Assumptions analysis

Answer: B

NEW QUESTION 76

During which of the following processes, probability and impact matrix is prepared?

- A. Perform Qualitative Risk Analysis
- B. Monitoring and Control Risks
- C. Plan Risk Responses
- D. Perform Quantitative Risk Analysis

Answer: A

NEW QUESTION 81

Consider the risk probability-impact matrix in the figure given below:

If Risk B happens in this project, how much will be left in the contingency reserve?

- A. \$193,500
- B. -\$334,500
- C. It depends on the total budget of the project.
- D. \$148,300

Answer: A

NEW QUESTION 84

A high-profile, high-priority project within your organization is being created. Management wants you to pay special attention to the project risks and do all that you can to ensure that all of the risks are identified early in the project. Management has to ensure that this project succeeds. Management's risk aversion in this project is associated with what term?

- A. Quantitative risk analysis
- B. Risk conscience
- C. Risk mitigation
- D. Utility function

Answer: D

NEW QUESTION 85

Your project is an agricultural-based project that deals with plant irrigation systems. You have discovered a byproduct in your project that your organization could use to make a profit. If your organization seizes this opportunity it would be an example of what risk response?

- A. Enhancing
- B. Opportunistic
- C. Positive
- D. Exploiting

Answer: D

NEW QUESTION 87

You are the project manager of the YHG project for your company. Within the project, you and the project team have identified a risk event that could have a financial impact on the project of \$450,000. This risk event has a 70 percent chance of occurring in the project. The project identifies a solution that will reduce the probability of the risk event to ten percent, but it will cost \$260,000 to implement. Management agrees with the solution and asks that you include the risk response in the project plan. What risk response is this?

- A. This is mitigation because the response reduces the probability.
- B. This is not a risk response, but a change request.
- C. This is transference because of the \$260,000 cost of the solution.
- D. This is avoidance because the risk response caused the project plan to be changed.

Answer: A

NEW QUESTION 91

You are the project manager of QSL project for your organization. You are working with your project team and several key stakeholders to create a diagram that shows how various elements of a system interrelate and the mechanism of causation within the system. What diagramming technique are you using as a part of the risk identification process?

- A. Predecessor and successor diagramming
- B. System or process flowcharts
- C. Cause and effect diagrams
- D. Influence diagrams

Answer: B

NEW QUESTION 95

Frances is the project manager of a project in her organization. This project has a budget of \$567,000 and is scheduled to last for three years. Frances wants to examine the risk events to determine which risk events have the most potential impact on the project. Which modeling technique can help Frances to accomplish this goal?

- A. Expected monetary value
- B. Sensitivity analysis
- C. Quantitative risk analysis
- D. Modeling and simulation

Answer: B

NEW QUESTION 100

You work as a project manager for BlueWell Inc. You have declined a proposed change request because of the risk associated with the proposed change request. Where should the declined change request be documented and stored?

- A. Change request log
- B. Lessons learned
- C. Project archives
- D. Project document updates

Answer: A

NEW QUESTION 104

There are seven risk responses that a project manager can choose from. Which risk response is appropriate for both positive and negative risk events?

- A. Acceptance
- B. Sharing
- C. Transference
- D. Mitigation

Answer: A

NEW QUESTION 109

Ben works as a project manager for the MJH Project. In this project, Ben is preparing to identify stakeholders so he can communicate project requirements, status, and risks. Ben has elected to use a salience model as part of his stakeholder identification process. Which of the following activities best describes a salience model?

- A. Influence/impact grid, grouping the stakeholders based on their active involvement ("influence") in the project and their ability to affect changes to the project's planning or execution ("impact").
- B. Grouping the stakeholders based on their level of authority ("power") and their active involvement ("influence") in the project.
- C. Grouping the stakeholders based on their level of authority ("power") and their level of concern ("interest") regarding the project outcomes.
- D. Describing classes of stakeholders based on their power (ability to impose their will), urgency (need for immediate attention), and legitimacy (their involvement is appropriate).

Answer: D

NEW QUESTION 110

You are working with your project stakeholders to identify risks within the JKP Project. You want to use an approach to engage the stakeholders to increase the breadth of the identified risks by including internally generated risk. Which risk identification approach is most suited for this goal?

- A. Delphi Technique
- B. SWOT analysis
- C. Assumptions analysis
- D. Brainstorming

Answer: B

NEW QUESTION 113

Risks with low ratings of probability and impact are included on a list for future monitoring.

- A. Risk alarm
- B. Watchlist
- C. Observation list
- D. Risk register

Answer: B

NEW QUESTION 118

You are the project manager of the NHK Project. Management wants to know how often your risk identification process will occur during the project. Considering that your project is scheduled to last one year and involves five distinct phases, how often should risk identification take place?

- A. Monthly
- B. Once per project life cycle phase
- C. Quarterly
- D. Vary depending on the situations within the project

Answer: D

NEW QUESTION 119

Which of the following processes looks at the complex web of actors, rules, conventions, processes, and mechanisms concerned with how relevant risk information is collected, analyzed and communicated, and how management decisions are taken?

- A. Risk Communication
- B. IRGC
- C. Risk Response Planning
- D. Risk Governance

Answer: D

NEW QUESTION 121

Which of the following processes must be repeated after Plan Risk Responses, as well as part of the Monitor and Control Risks, to determine if the overall project risk has been satisfactorily decreased?

- A. Risk Limitation
- B. Perform Qualitative Risk Analysis
- C. Identify Risk
- D. Perform Quantitative Risk Analysis

Answer: D

NEW QUESTION 126

You are the project manager of the GGH Project in your company. Your company is structured as a functional organization and you report to the functional manager that you are ready to move onto the quantitative risk analysis process. What things will you need as inputs for the quantitative risk analysis of the project in this scenario?

- A. You will need the risk register, risk management plan, permission from the functional manager, and any relevant organizational process assets.
- B. You will need the risk register, risk management plan, cost management plan, schedule management plan, and any relevant organizational process assets.
- C. You will need the risk register, risk management plan, outputs of qualitative risk analysis, and any relevant organizational process assets.
- D. Quantitative risk analysis does not happen through the project manager in a functional structure.

Answer: B

NEW QUESTION 129

You are the project manager for the ABC organization. Your current project has 75 internal stakeholders and 245 external stakeholders. Many of the risks within your project will only affect the internal stakeholders, but several of the identified risk events will affect the external stakeholders. Management would like to know the total number of communication channels in the project. How many communication channels exist in this project?

- A. 245
- B. 51,040
- C. 102,080
- D. 320

Answer: B

NEW QUESTION 132

Sensitivity analysis is a technique for systematically changing parameters in a model to determine the effects of such changes and is useful for computer modelers for a range of purposes. Which of the following purposes does the sensitivity analysis include? Each correct answer represents a complete solution. Choose all that apply.

- A. Increased understanding or quantification of the system
- B. Estimating the average outcome
- C. Model development
- D. Decision making or the development of recommendations for decision makers

Answer: ACD

NEW QUESTION 136

You are the project manager of a large construction project. This project will last for 18 months and will cost \$750,000 to complete. You are working with your project team, experts, and stakeholders to identify risks within the project before the project work begins. Management wants to know why you have scheduled so many risk identification meetings throughout the project rather than just initially during the project planning. What is the best reason for the duplicate risk identification sessions?

- A. The iterative meetings allow the project manager and the risk identification participants to identify newly discovered risk events throughout the project.
- B. The iterative meetings allow all stakeholders to participate in the risk identification processes throughout the project phases.
- C. The iterative meetings allow the project manager to discuss the risk events which have passed the project and which did not happen.

D. The iterative meetings allow the project manager to communicate pending risks events during project execution.

Answer: A

NEW QUESTION 141

John is the project manager of the NHQ Project for his company. His project has 75 stakeholders, some of which are external to the organization. John needs to make certain that he communicates about risk in the most appropriate method for the external stakeholders. Which project management plan will be the best guide for John to communicate to the external stakeholders?

- A. Risk Response Plan
- B. Risk Management Plan
- C. Communications Management Plan
- D. Project Management Plan

Answer: C

NEW QUESTION 144

Bill is the project manager for a project that will last six months and has a budget of \$580,000. In this project a high-risk has been identified with the new materials the project will be using. Bill would like to assign one person, Beth, to be responsible to monitor this risk. Bill assigns Beth the authority to respond to the risk event if it appears in the risk events that is likely to happen. In addition, Bill hires a consultant to work with Beth on this area of the project. In this instance, who is the risk response owner?

- A. Bill, because he is the project manager
- B. Beth, because she has the authority to respond to the risk event
- C. Beth and the consultant are the risk owners
- D. The consultant working with Beth, because this is transference

Answer: B

NEW QUESTION 148

Amy is the project manager for her company. In her current project the organization has a very low tolerance for risk events that will affect the project schedule. Management has asked Amy to consider the affect of all the risks on the project schedule. What approach can Amy take to create a bias against risks that will affect the schedule of the project?

- A. She can create an overall project rating scheme to reflect the bias towards risks that affect the project schedule.
- B. She can filter all risks based on their affect on schedule versus other project objectives.
- C. She can have the project team pad their time estimates to alleviate delays in the project schedule.
- D. She can shift risk-laden activities that affect the project schedule from the critical path as much as possible.

Answer: A

NEW QUESTION 151

You are the project manager of the NHJ project for your company. This project has a budget at completion of \$1,650,000 and you are 60 percent complete. According to the project plan, however, the project should be 65 percent complete. In this project you have spent \$995,000 to reach this point of completion. There is a risk that this project may be late so you have taken some measures to recover the project schedule. Management would like to know, based on current performance, what the estimate at completion for this project will be. What is the estimate at completion?

- A. \$1,650,000
- B. \$1,666,667
- C. \$663,333
- D. -\$8,333

Answer: B

NEW QUESTION 154

Your organization, as part of its enterprise environmental factors, has established risk governance to be implemented in each project. Part of this governance is the reassessment of risks within each project. How much detail and repetition in approach for risks to be reassessed for probability and impact?

- A. Each risk reassessment should go into the same depth as the original risk assessment activity.
- B. The probability and impact of risk event should determine the level of reassessment throughout the project lifecycle.
- C. The amount of detail of repetition that is appropriate depends on how the project progresses relative to its objectives.
- D. The level of detail and reassessment should reflect the priority of the project.

Answer: C

NEW QUESTION 158

There are seven risk responses for any project. Which one of the following is a valid risk response for a negative risk event?

- A. Enhance
- B. Exploit
- C. Acceptance
- D. Share

Answer: C

NEW QUESTION 161

Joan is the project manager of the KYU project for her company. She is working with management on defining a contingency reserve for her project. Currently the project is scheduled to last 18 months and it has a cost budget of \$2.5 million. What two areas of the project can the contingency reserve address in regard to risk management?

- A. Quality and costs
- B. Cost and resource management
- C. Risk and project planning
- D. Costs and schedule

Answer: D

NEW QUESTION 165

Your project uses a piece of equipment that if the temperature of the machine goes above 450 degree Fahrenheit the machine will overheat and have to be shut down for 48 hours. Should this machine overheat even once it will delay the project's end date. You work with your project to create a response that should the temperature of the machine reach 430, the machine will be paused for at least an hour to cool it down. The temperature of 430 is called what?

- A. Risk response
- B. Risk event
- C. Risk trigger
- D. Risk identification

Answer: C

NEW QUESTION 170

Fill in the blank with an appropriate phrase. The _____ is the risk or danger of an action or an event, a method or a (technical) process that still conceives these dangers even if all theoretically possible safety measures would be applied.

- A. residual risk

Answer: A

NEW QUESTION 172

Adrian is a project manager for a new project using a technology that has recently been released and there's relatively little information about the technology. Initial testing of the technology makes the use of it look promising, but there's still uncertainty as to the longevity and reliability of the technology. Adrian wants to consider the technology factors a risk for her project. Where should she document the risks associated with this technology so she can track the risk status and responses?

- A. Project scope statement
- B. Risk register
- C. Project charter
- D. Risk low-level watch list

Answer: B

NEW QUESTION 177
