

Microsoft

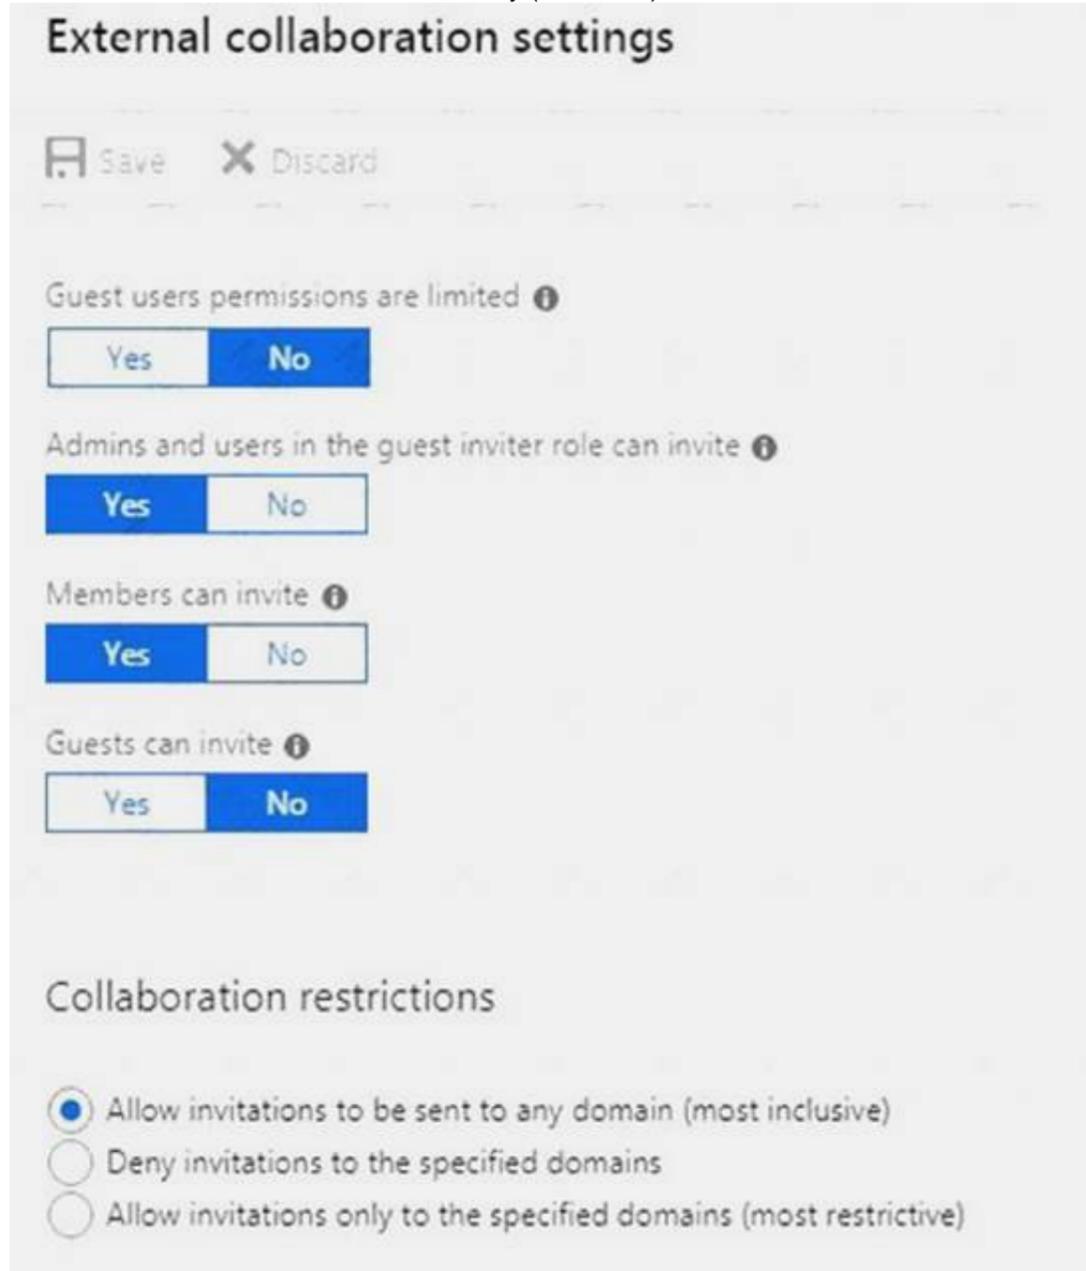

Exam Questions MS-100

Microsoft 365 Identity and Services

NEW QUESTION 1

You have a Microsoft 365 subscription that contains a guest user named User1. User1 is assigned the User administrator role. You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. Contoso.com is configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

User1 can [answer choice].

▼
open the Azure portal only
open the Azure portal and view users only
open the Azure portal, view users, and create new guest users only
open the Azure portal, view users, create new users, and create new guest users

All other guest users can [answer choice].

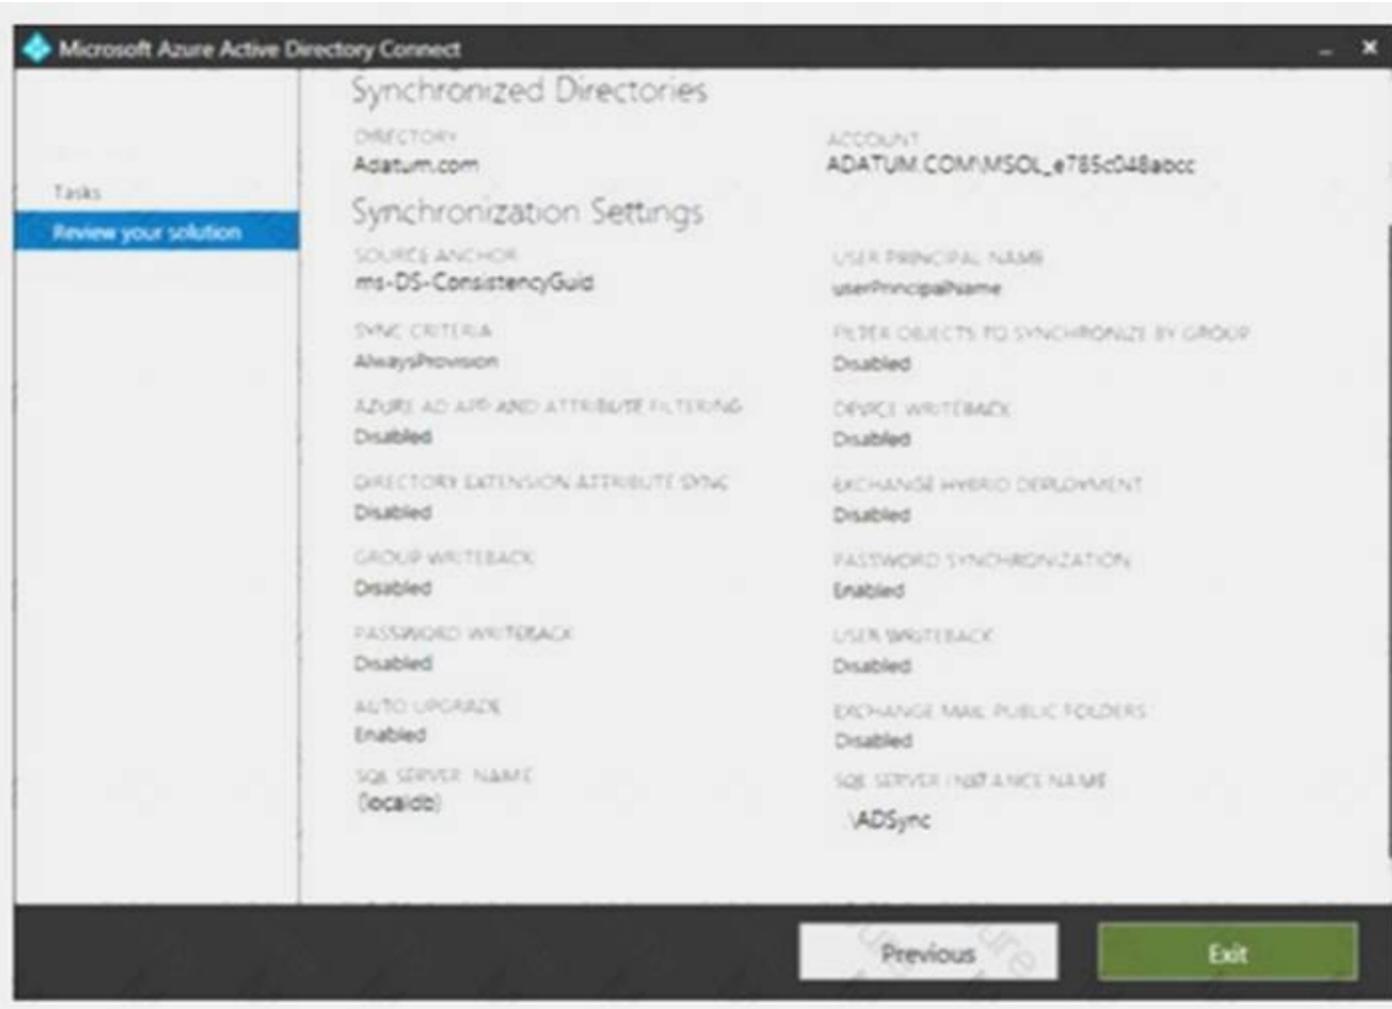

▼
open the Azure portal only
open the Azure portal and view users only
open the Azure portal, view users, and create new guest users only
open the Azure portal, view users, create new users, and create new guest users

Answer:

Explanation: References:
<https://docs.microsoft.com/en-us/azure/active-directory/b2b/delegate-invitations>
<https://docs.microsoft.com/en-us/azure/active-directory/fundamentals/users-default-permissions>

NEW QUESTION 2

Your company has a hybrid deployment of Microsoft 365. An on-premises user named User1 is synced to Microsoft Azure Active Directory (Azure AD). Azure AD Connect is configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

User1 [answer choice].

cannot change her password from any Microsoft portals
can change her password by using self-service password reset feature only
an change her password from the Office 365 admin center only

If the password for User1 is changed in Active Directory, [answer choice].

the password will be synchronized to Azure AD
a new randomly generated password will be assigned to User1
the password in Azure AD will be unchanged

Answer:

Explanation:

User1 [answer choice].

cannot change her password from any Microsoft portals
can change her password by using self-service password reset feature only
an change her password from the Office 365 admin center only

If the password for User1 is changed in Active Directory, [answer choice].

the password will be synchronized to Azure AD
a new randomly generated password will be assigned to User1
the password in Azure AD will be unchanged

NEW QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

Your company has a main office and three branch offices. All the branch offices connect to the main office by using a WAN link. The main office has a high-speed Internet connection. All the branch offices connect to the Internet by using the main office connection.

Users use Microsoft Outlook 2016 to connect to 4 Microsoft Exchange Server mailbox hosted in the main office.

The users report that when the WAN link in their office becomes unavailable, they cannot access their mailbox.

You create a Microsoft 365 subscription, and then migrate all the user data to Microsoft 365.

You need to ensure that all the users can continue to use Outlook to receive email messages if a WAN link fails.

Solution: You deploy a site-to-site VPN from each branch office to Microsoft Azure. Does this meet the goal?

- A. Yes
- B. NO

Answer: B

NEW QUESTION 4

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that includes the users shown in the following table.

Name	Usage location	Membership
User1	<i>Not applicable</i>	Group1
User2	United States	Group2
User3	United States	<i>Not applicable</i>

Group2 is a member of Group1.

You assign a Microsoft Office 365 Enterprise E3 license to User2 as shown in the following exhibit.

License options

Office 365 Enterprise E3

Azure Rights Management	<input type="checkbox"/> Off	<input type="checkbox"/> On
Exchange Online (Plan 2)	<input type="checkbox"/> Off	<input type="checkbox"/> On
Flow for Office 365	<input type="checkbox"/> Off	<input type="checkbox"/> On
Microsoft Forms (Plan E3)	<input type="checkbox"/> Off	<input type="checkbox"/> On
Microsoft Planner	<input type="checkbox"/> Off	<input type="checkbox"/> On
Microsoft StaffHub	<input type="checkbox"/> Off	<input type="checkbox"/> On
Microsoft Teams	<input type="checkbox"/> Off	<input type="checkbox"/> On
Office 365 ProPlus	<input type="checkbox"/> Off	<input type="checkbox"/> On
Office Online	<input type="checkbox"/> Off	<input type="checkbox"/> On
PowerApps for Office 365	<input type="checkbox"/> Off	<input type="checkbox"/> On
SharePoint Online (Plan 2)	<input type="checkbox"/> Off	<input checked="" type="checkbox"/> On
Skype for Business Online (Plan 2)	<input type="checkbox"/> Off	<input type="checkbox"/> On
Stream for Office 365	<input type="checkbox"/> Off	<input type="checkbox"/> On
Sway	<input type="checkbox"/> Off	<input type="checkbox"/> On
To-Do (Plan 2)	<input type="checkbox"/> Off	<input type="checkbox"/> On
Yammer Enterprise	<input type="checkbox"/> Off	<input type="checkbox"/> On

You assign Office 365 Enterprise E3 licenses to Group1 as shown in the following exhibit.

License options

Office 365 Enterprise E3

Azure Rights Management	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On
Exchange Online (Plan 2)	<input type="checkbox"/> Off	<input checked="" type="checkbox"/> On
Flow for Office 365	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On
Microsoft Forms (Plan E3)	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On
Microsoft Planner	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On
Microsoft StaffHub	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On
Microsoft Teams	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On
Office 365 ProPlus	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On
Office Online	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On
PowerApps for Office 365	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On
SharePoint Online (Plan 2)	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On
Skype for Business Online (Plan 2)	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On
Stream for Office 365	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On
Sway	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On
To-Do (Plan 2)	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On
Yammer Enterprise	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
User1 is licensed to use Microsoft Exchange Online.	<input type="radio"/>	<input type="radio"/>
User1 is licensed to use Microsoft Exchange Online and Microsoft Share Point Online.	<input type="radio"/>	<input type="radio"/>
If you add User3 to Group2, the user will be licensed to use Microsoft Exchange Online.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation: Group-based licensing currently does not support groups that contain other groups (nested groups). If you apply a license to a nested group, only the immediate first-level user members of the group have the licenses applied.

References:

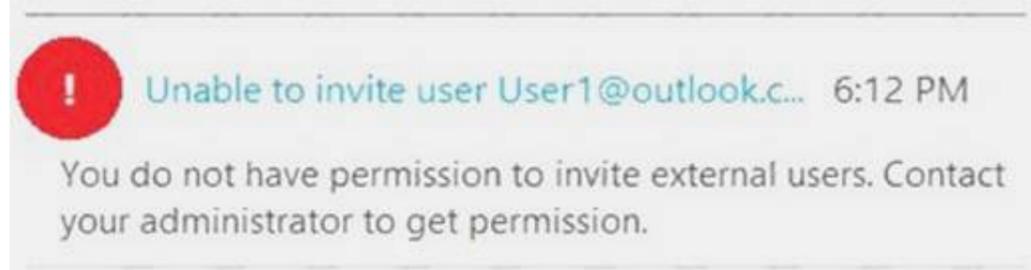

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/licensing-group-advanced>

NEW QUESTION 5

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com. An external user has a Microsoft account that uses an email

address of user1@outlook.com.

An administrator named Admin1 attempts to create a user account for the external user and receives the error message shown in the following exhibit.

You need to ensure that Admin1 can add the user.

What should you do from the Azure Active Directory admin center?

- A. Add a custom domain name named outlook.com.
- B. Modify the Authentication methods.
- C. Modify the External collaboration settings.
- D. Assign Admin1 the Security administrator role.

Answer: C

NEW QUESTION 6

Your network contains an Active Directory domain named contoso.com. All users authenticate by using a third-party authentication solution.

You purchase Microsoft 365 and plan to implement several Microsoft 365 services. You need to recommend an identity strategy that meets the following requirements:

- Provides seamless SSO
- Minimizes the number of additional servers required to support the solution
- Stores the passwords of all the users in Microsoft Azure Active Directory (Azure AD)
- Ensures that all the users authenticate to Microsoft 365 by using their on-premises user account

You are evaluating the implementation of federation. Which two requirements are met by using federation? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. minimizes the number of additional servers required to support the solution
- B. provides seamless SSO
- C. stores the passwords of all the users in Azure AD
- D. ensures that all the users authenticate to Microsoft 365 by using their on-premises user account.

Answer: BD

NEW QUESTION 7

Your network contains an Active Directory forest named local.

You have a Microsoft 365 subscription. You plan to implement a directory synchronization solution that will use password hash synchronization.

From the Microsoft 365 admin center, you verify the contoso.com domain name. You need to prepare the environment for the planned directory synchronization solution.

What should you do first?

- A. From the public DNS zone of contoso.com, add a new mail exchanger (MX) record.
- B. From Active Directory Domains and Trusts, add contoso.com as a UPN suffix
- C. From the Microsoft 365 admin center, verify the contoso.com domain name.
- D. From Active Directory Users and Computers, modify the UPN suffix for all users.

Answer: B

NEW QUESTION 8

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. You add an app named App1 to the enterprise applications in contoso.com.

You need to configure self-service for App1. What should you do first?

- A. Assign App1 to users and groups.
- B. Add an owner to App1.
- C. Configure the provisioning mode for App1.
- D. Configure an SSO method for App1.

Answer: A

Explanation: References:

<https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/manage-self-service-access>

NEW QUESTION 9

Your network contains an on-premises Active Directory domain. You have a Microsoft 365 subscription.

You implement a directory synchronization solution that uses pass-through authentication.

You configure Microsoft Azure Active Directory (Azure AD) smart lockout as shown in the following exhibit.

You discover that Active Directory users can use the passwords in the custom banned passwords list. You need to ensure that banned passwords are effective for all users.

Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. From a domain controller, install the Azure AD Password Protection Proxy.
- B. From a domain controller, install the Microsoft AAD Application Proxy connector.
- C. From Custom banned passwords, modify the Enforce custom list setting.
- D. From Password protection for Windows Server Active Directory, modify the Mode setting.
- E. From all the domain controllers, install the Azure AD Password Protection DC Agent.
- F. From Active Directory, modify the Default Domain Policy.

Answer: ACE

NEW QUESTION 10

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

Your company has a main office and three branch offices. All the branch offices connect to the main office by using a WAN link. The main office has a high-speed Internet connection. All the branch offices connect to the Internet by using the main office connection.

Users use Microsoft Outlook 2016 to connect to 4 Microsoft Exchange Server mailbox hosted in the main office.

The users report that when the WAN link in their office becomes unavailable, they cannot access their mailbox.

You create a Microsoft 365 subscription, and then migrate all the user data to Microsoft 365.

You need to ensure that all the users can continue to use Outlook to receive email messages if a WAN link fails.

Solution: For each branch office, you add a direct connection to the Internet. Does this meet the goal?

- A. Yes
- B. NO

Answer: A

NEW QUESTION 10

Your network contains an Active Directory domain named contoso.com. The domain contains five domain controllers.

You purchase Microsoft 365 and plan to implement several Microsoft 365 services.

You need to identify an authentication strategy for the planned Microsoft 365 deployment. The solution must meet the following requirements:

- Ensure that users can access Microsoft 365 by using their on-premises credentials.
- Use the existing server infrastructure only.
- Store all user passwords on-premises only.
- Be highly available.

Which authentication strategy should you identify?

- A. pass-through authentication and seamless SSO
- B. pass-through authentication and seamless SSO with password hash synchronization
- C. password hash synchronization and seamless SSO
- D. federation

Answer: A

NEW QUESTION 11

You have a Microsoft 365 subscription.

You use the Microsoft Office Deployment tool to install Office 365 ProPlus. You create a configuration file that contains the following settings.

```
<Configuration>
  <Add SourcePath="\\Server1\Office"
    OfficeClientEdition="32"
    Channel="Broad"
    AllowCdnFallback="False">
    <Product ID="0365ProPlusRetail">
      <Language ID="en-us" />
      <Language ID="ja-jp" />
    </Product>
    <Product ID="VisioProRetail">
      <Language ID="en-us" />
      <Language ID="ja-jp" />
    </Product>
  </Add>
  <Remove All="TRUE">
    <Product ID="0365ProPlusRetail">
      <Language ID="en-us" />
    </Product>
    <Product ID="VisioProRetail">
      <Language ID="en-us" />
    </Product>
  </Remove>
  <Updates Enabled="TRUE"
    UpdatePath="\\Server1\Office"
    Channel="Broad" />
  <Display Level="None" AcceptEULA="TRUE" />
  <Logging Level="Standard" Path="%temp%" />
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

The [answer choice] will be uninstalled from the computers.

▼
MSI version of Microsoft Visio only
C2R version of Microsoft Visio only
MSI and C2R versions of Microsoft Visio

If the Office share on Server1 is missing the Japanese language pack, Office 365 ProPlus will [answer choice].

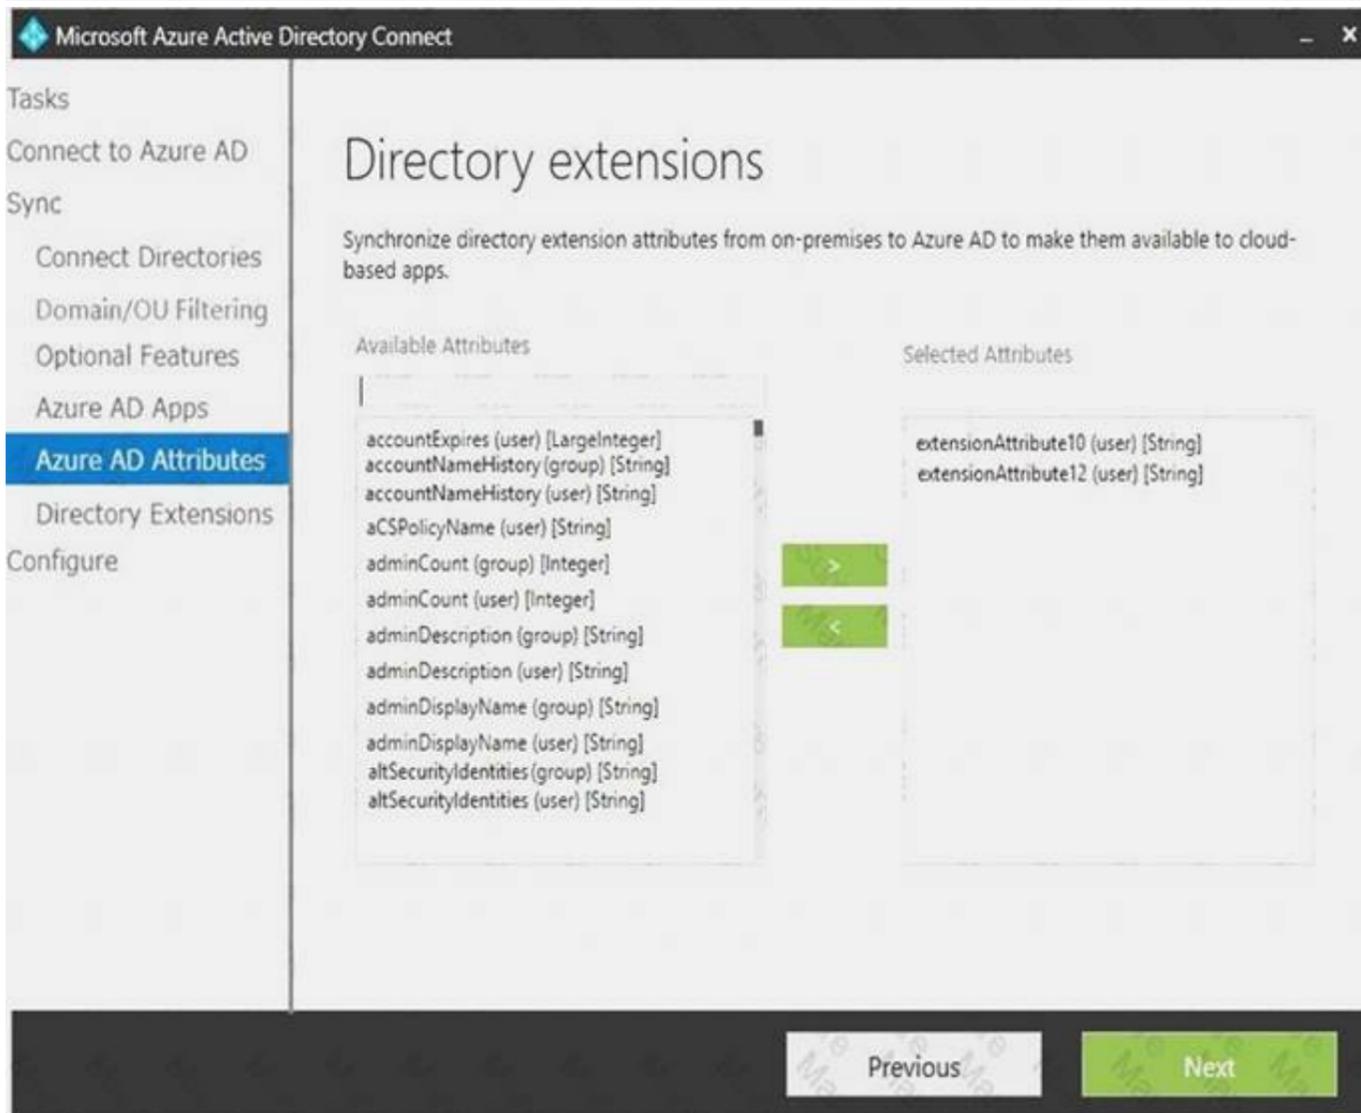

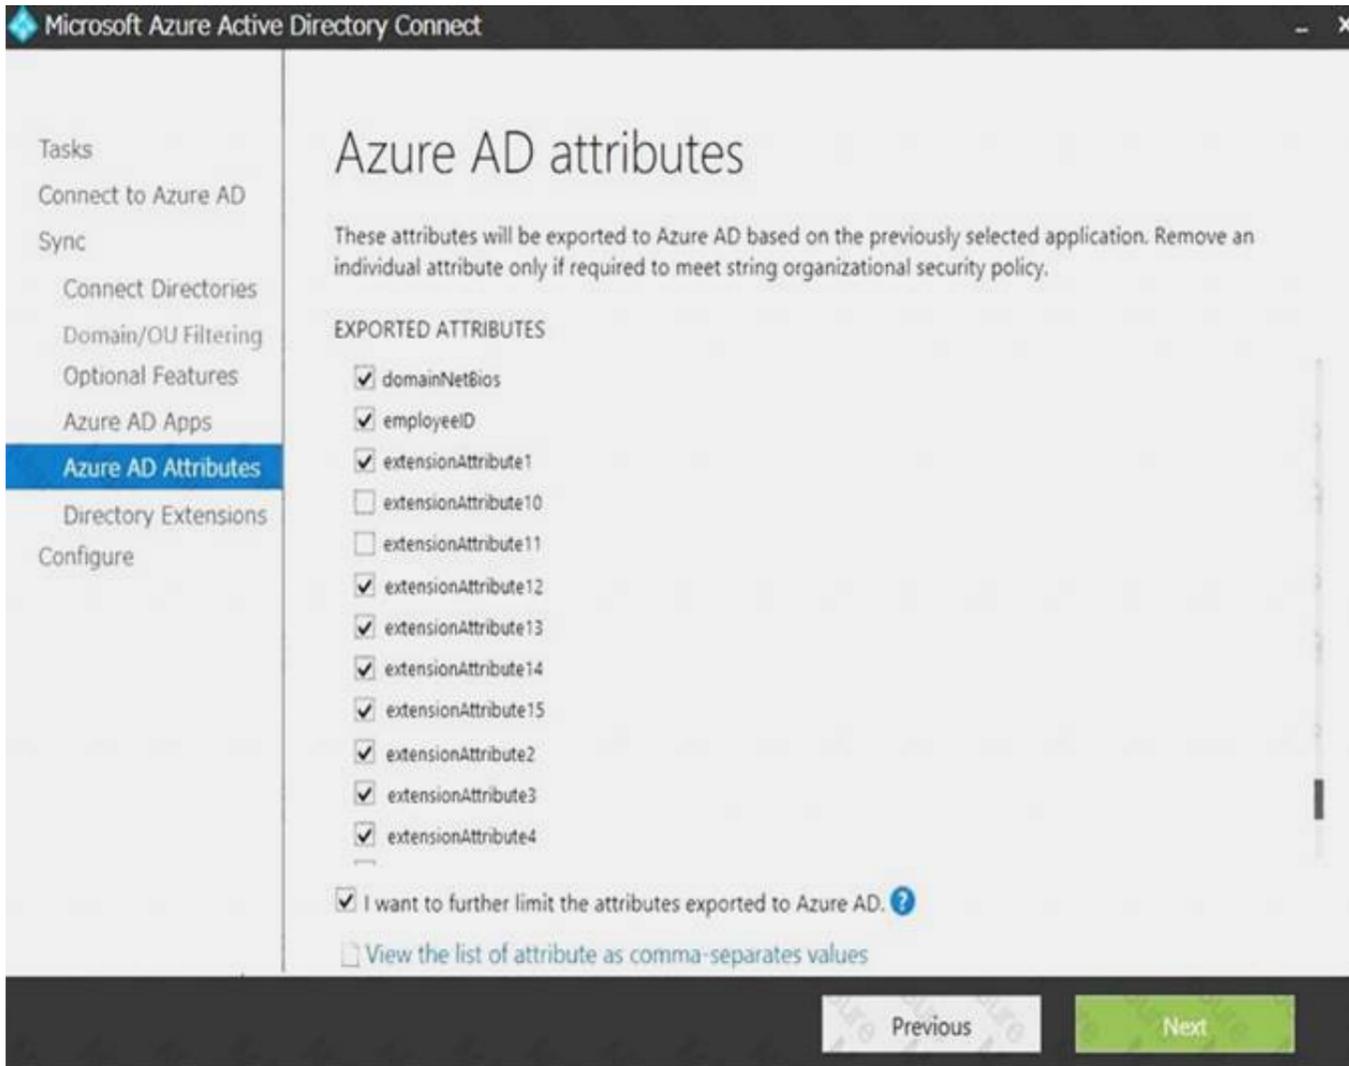

▼
be installed in English only
be installed in a randomly selected language
NOT be installed

Answer:

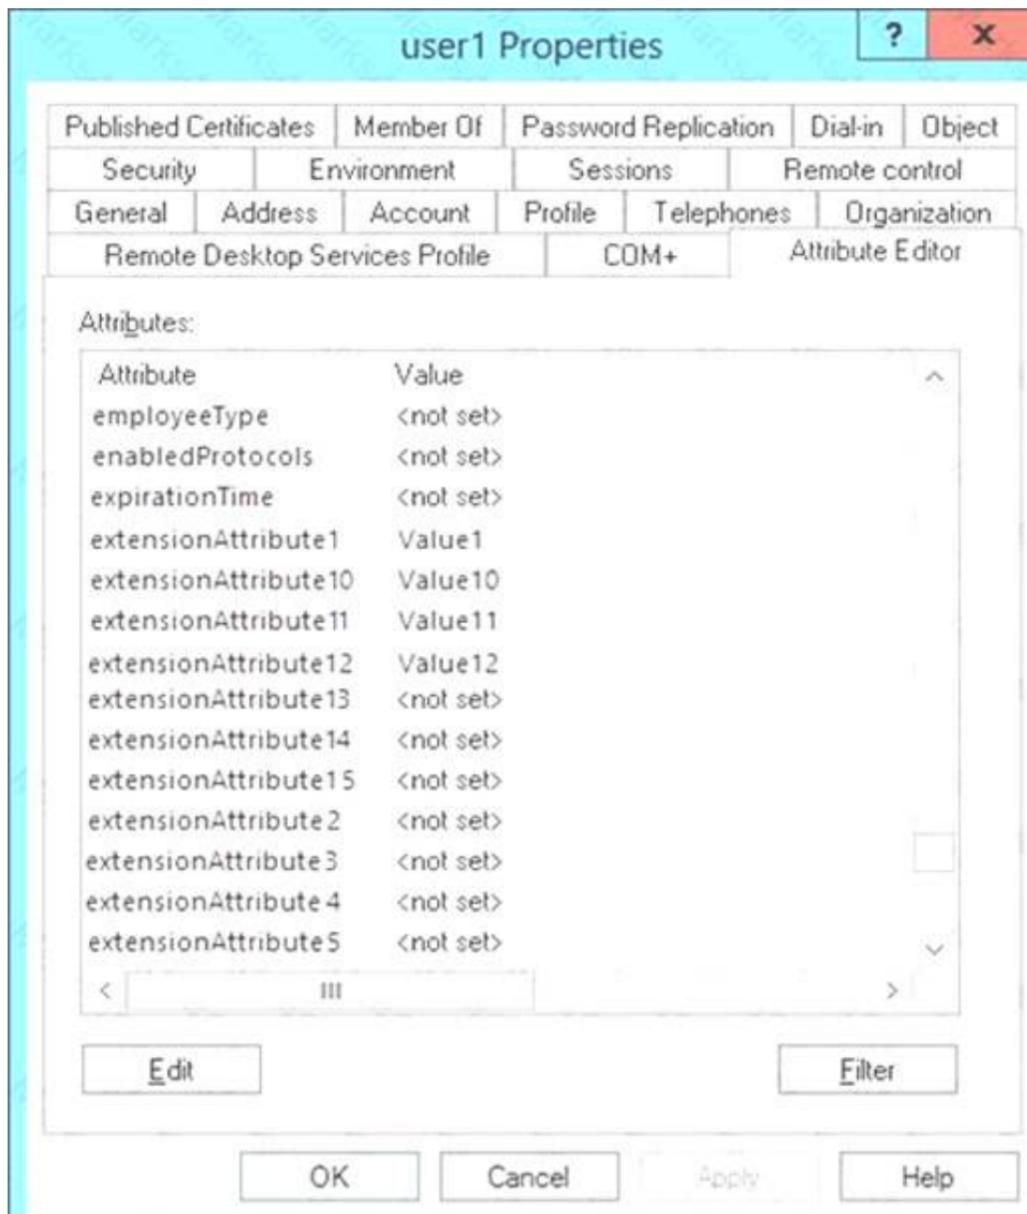

Explanation: References:
<https://docs.microsoft.com/en-us/deployoffice/configuration-options-for-the-office-2016-deployment-tool>

NEW QUESTION 13

Your network contains an on-premises Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD) as shown in the following two exhibits.

You create a user named User1 in Active Directory as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
The value of extensionAttribute1 is synchronized to Azure AD.	<input type="radio"/>	<input type="radio"/>
The value of extensionAttribute10 is synchronized to Azure AD.	<input type="radio"/>	<input type="radio"/>
The value of extensionAttribute11 is synchronized to Azure AD.	<input type="radio"/>	<input type="radio"/>
The value of extensionAttribute12 is synchronized to Azure AD.	<input type="radio"/>	<input type="radio"/>

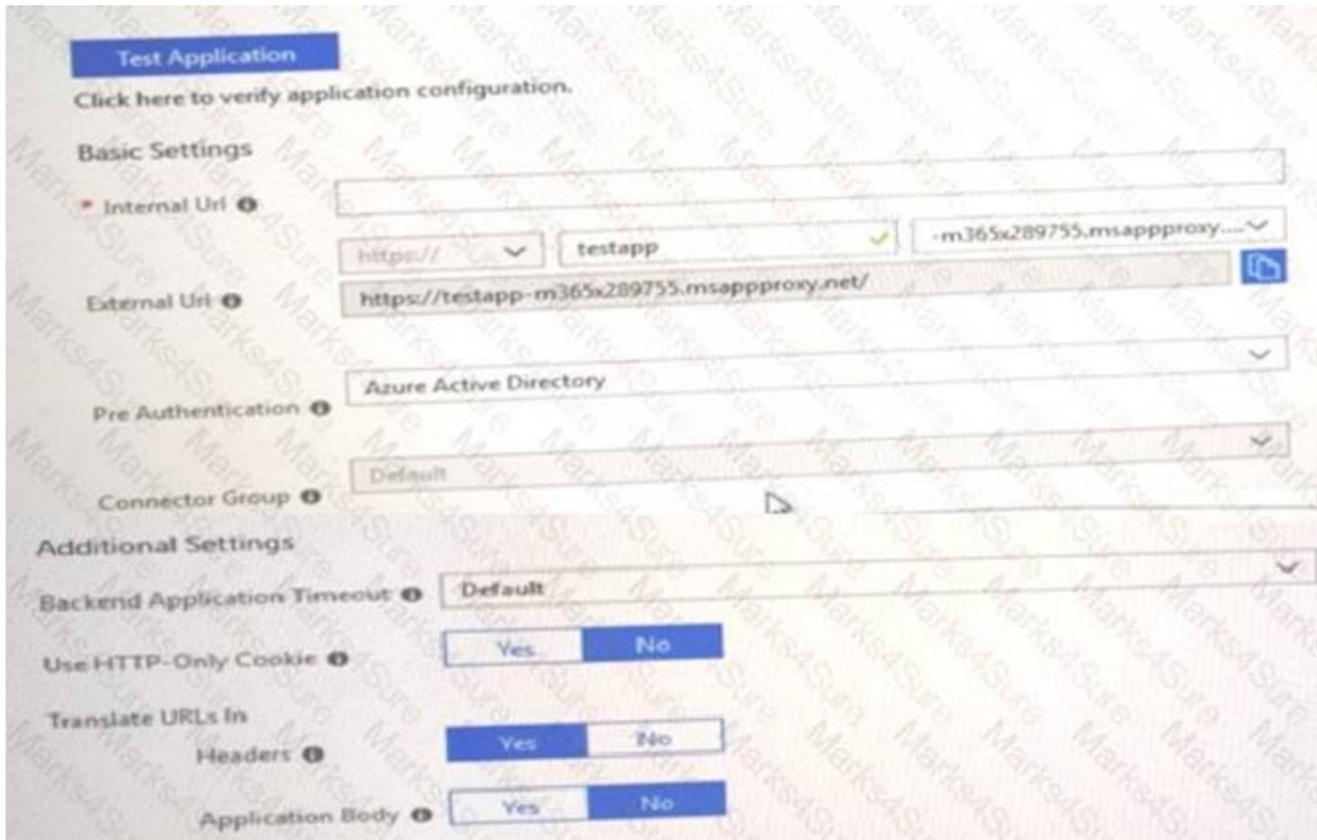

Answer:

Explanation:

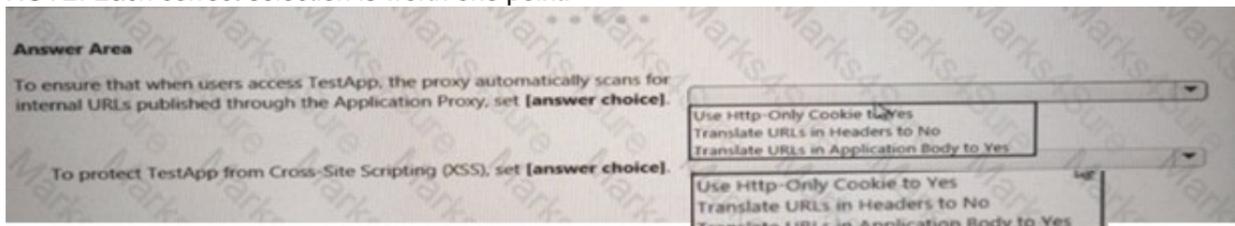

Statements	Yes	No
The value of extensionAttribute1 is synchronized to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>
The value of extensionAttribute10 is synchronized to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>
The value of extensionAttribute11 is synchronized to Azure AD.	<input type="radio"/>	<input checked="" type="radio"/>
The value of extensionAttribute12 is synchronized to Azure AD.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 18

You are confirming an enterprise application named Test App in Microsoft Azur as shown in the following exhibit.

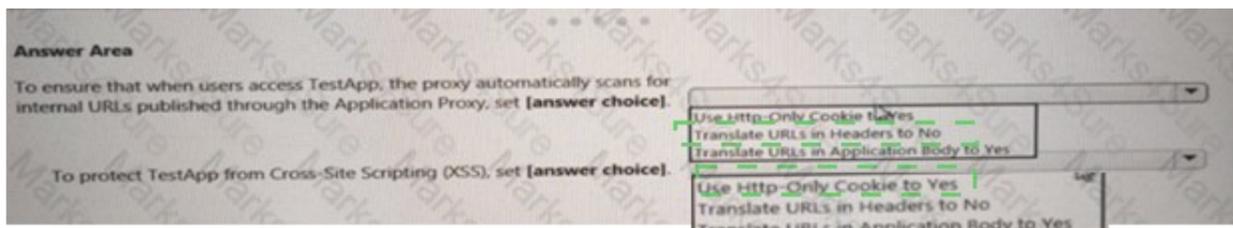

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION 22

Your company has a Microsoft 365 subscription. All identities are managed in the cloud. The company purchases a new domain name. You need to ensure that all new mailboxes use the new domain as their primary email address. What are two possible ways to achieve the goal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. From Microsoft Exchange Online PowerShell, run the Update-EmailAddressPolicy policy command.
- B. From the Exchange admin center, click mail flow, and then configure the email address policies.
- C. From the Microsoft 365 admin center, click Setup, and then configure the domains.
- D. From Microsoft Exchange Online PowerShell, run the Set-EmailAddressPolicy policy command.
- E. From the Azure Active Directory admin center, configure the custom domain names.

Answer: BD

NEW QUESTION 25

Your company has 500 client computers that run Windows 10. You plan to deploy Microsoft Office 365 ProPlus to all the computers. You create the following XML file for the planned deployment.

```
<Configuration>
  <Add OfficeClientEdition="64" Channel="Broad" ForceUpgrade="TRUE">
    <Product ID="0365ProPlusRetail">
      <Language ID="en-us"/>
      <ExcludeApp ID="Groove"/>
      <ExcludeApp ID="Publisher"/>
    </Product>
  </Add>
  <Updates Enabled="TRUE" Channel="Broad" Deadline="03/31/2019, 00:00"
UpdatePath="\\sccm\updates"/>
  <Display Level="Full" AcceptEULA="TRUE"/>
  <Property Name="FORCEAPPSHUTDOWN" Value="TRUE"/>
  <Property Name="SharedComputerLicensing" Value="0"/>
  <Property Name="PinIconsToTaskbar" Value="TRUE"/>
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

When the installation is complete [answer choice].

	▼
all users will be prompted to accept the EULA	
all users will be prompted to install several updates	
all semi-channel updates will be installed automatically	

Office 365 ProPlus will [answer choice].

	▼
include Microsoft OneDrive for Business and Microsoft Outlook only	
be installed on all the computers	
be installed only on the computers that run a 64-bit version of Windows 10	

Answer:

Explanation:

When the installation is complete [answer choice].

	▼
all users will be prompted to accept the EULA	
all users will be prompted to install several updates	
all semi-channel updates will be installed automatically	

Office 365 ProPlus will [answer choice].

	▼
include Microsoft OneDrive for Business and Microsoft Outlook only	
be installed on all the computers	
be installed only on the computers that run a 64-bit version of Windows 10	

NEW QUESTION 29

You create a Microsoft 365 subscription.

You plan to deploy Microsoft Office 365 ProPlus applications to all the client computers at your company. You prepare the following XML file for the planned deployment.

```
<Configuration>
  <Add OfficeClientEdition="32"
Channel="Broad">
    <Product ID="0365ProPlusRetail">
      <Language ID="en-us" />
    </Product>
  </Add>
  <Updates Enabled="TRUE"
UpdatePath=""
Channel="Targeted" />
  <Display Level="None"
AcceptEULA="TRUE" />
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

Office 365 ProPlus feature updates will be installed [answer choice].

▼
once a month
once every six months
once a year

Office 365 ProPlus security updates will be installed [answer choice].

▼
once a month
every six months in January and July
every six months in March and September

Answer:

Explanation: References:

<https://docs.microsoft.com/en-us/deployoffice/configuration-options-for-the-office-2016-deployment-tool#update> <https://docs.microsoft.com/en-us/deployoffice/overview-of-update-channels-for-office-365-proplus>

NEW QUESTION 30

Your company has a Microsoft 365 subscription.

You plan to move several archived PST files to Microsoft Exchange Online mailboxes. You need to create an import job for the PST files.

Which three actions should you perform before you create the import job? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a Microsoft Azure Storage account.
- B. From Security & Compliance, retrieve the SAS key.
- C. Run azcopy.exe to copy the PST files to Microsoft Azure Storage
- D. Use Microsoft Azure Storage Explorer to copy the PST files to Azure Storage.
- E. Create a PST import mapping file.

Answer: BCE

Explanation: References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/use-network-upload-to-import-pst-files>

NEW QUESTION 33

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

Your company has a main office and three branch offices. All the branch offices connect to the main office by using a WAN link. The main office has a high-speed Internet connection. All the branch offices connect to the Internet by using the main office connection.

Users use Microsoft Outlook 2016 to connect to 4 Microsoft Exchange Server mailbox hosted in the main office.

The users report that when the WAN link in their office becomes unavailable, they cannot access their mailbox.

You create a Microsoft 365 subscription, and then migrate all the user data to Microsoft 365.

You need to ensure that all the users can continue to use Outlook to receive email messages if a WAN link fails.

Solution: For each device, you configure an additional Outlook profile that uses IMAP. Does this meet the goal?

- A. Yes
- B. NO

Answer: B

NEW QUESTION 34

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com that contains a user named User1.

You suspect that an imposter is signing in to Azure AD by using the credentials of User1.

You need to ensure that an administrator named Admin1 can view all the sign in details of User 1 from the past 24 hours.

To which three roles should you add Admin1? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Security administrator
- B. Password administrator
- C. User administrator
- D. Compliance administrator

Answer: ABC

NEW QUESTION 38

You recently migrated your on-premises email solution to Microsoft Exchange Online and are evaluating which licenses to purchase.

You want the members of two groups named IT and Managers to be able to use the features shown in the following table.

Feature	Available to
Microsoft Azure Active Directory (Azure AD) conditional access	IT group, Managers group
Microsoft Azure Active Directory (Azure AD) Privileged Identity Management	IT group

The IT group contains 50 users. The Managers group contains 200 users. You need to recommend which licenses must be purchased for the planned solution. The solution must minimize licensing costs. Which licenses should you recommend?

- A. 250 Microsoft 365 E3 only
- B. 50 Microsoft 365 E 3 and 200 Microsoft 365 E5
- C. 250 Microsoft 365 E5 only
- D. 200 Microsoft 365 E3 and 50 Microsoft 365 E5

Answer: D

NEW QUESTION 42

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that includes a user named User1. You enable multi-factor authentication for contoso.com and configure the following two fraud alert settings: Set Allow users to submit fraud alerts: On

Automatically block users who report fraud: On

You need to instruct the users in your organization to use the fraud reporting features correctly. What should you tell the users to do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

A user can report fraud on her account by:

▼

Typing a special code after receiving an alert call

Sending an email message to an administrator

Using the Microsoft Authenticator app

If User1 reports fraud on his account, the account will be blocked automatically for:

▼

6 hours

1 day

7 days

90 days

Answer:

Explanation: References:
<https://docs.microsoft.com/en-us/azure/active-directory/authentication/howto-mfa-mfasettings#fraud-alert>

NEW QUESTION 47

You have an on premises web application that is published by using a URL of https://app.contoso.local. You purchase a Microsoft 36S subscription. Several external users must be able to connect to the web application. You need to recommend a solution for external access to the application. The solution must support multi-factor authentication. Which two actions should you recommend? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. From an on-premises server, install a connector, and then publish the app.
- B. From the Azure Active Directory admin center, enable an Application Proxy.
- C. From the Azure Active Directory admin center, create a conditional access policy.
- D. From an on premises server, install an Authentication Agent.
- E. Republish the web-application by using http://app.contoso.com

Answer: AB

Explanation: References:
<https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/application-proxy-add-on-premises-applic>

NEW QUESTION 52

Your network contains an Active Directory domain named contoso.com. You have a Microsoft 365 subscription. You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com. You implement directory synchronization. The developers at your company plan to build an app named App1. App1 will connect to the Microsoft Graph API to provide access to several Microsoft Office 365 services. You need to provide the URI for the authorization endpoint that App1 must use. What should you provide?

- A. https://login.microsoftonline.com/
- B. https://contoso.com/contoso.onmicrosoft.com/app1
- C. https://login.microsoftonline.com/contoso.onmicrosoft.com/
- D. https://myapps.microsoft.com

Answer:

C

NEW QUESTION 57

You have a Microsoft 365 Enterprise E5 subscription.
 You need to enforce multi-factor authentication on all cloud-based applications for the users in the finance department.
 What should you do?

- A. Create an activity policy.
- B. Create a Sign-in risk policy.
- C. Create a session policy.
- D. Create an app permission policy.

Answer: B

Explanation: References:
<https://docs.microsoft.com/en-us/azure/active-directory/identity-protection/howto-sign-in-risk-policy>

NEW QUESTION 60

You have a Microsoft 365 subscription.
 Your company deploys an Active Directory Federation Services (AD FS) solution. You need to configure the environment to audit AD FS user authentication.
 Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. From all the AD FS servers, run audltpol.exe.
- B. From all the domain controllers, run the set-AdminAuditLogConfig cmdlet and specify the –LogiLevel parameter.
- C. On a domain controller install Azure AD Connect Health for AD DS.
- D. From the Azure AD Connect server, run the Register-AzureADConnectHealthSyncAgent cmdlet.
- E. On a server, install Azure AD Connect Health (or AD FS).

Answer: DE

NEW QUESTION 62

You have an on-premises Microsoft SharePoint Server 2016 environment. You create a Microsoft 365 tenant.
 You need to migrate some of the SharePoint sites to SharePoint Online. The solution must meet the following requirements:

- Microsoft OneDrive sites must redirect users to online content.
- Users must be able to follow both on-premises and cloud-based sites.
- Users must have a single SharePoint profile for both on-premises and on the cloud.

When users search for a document by using keywords, the results must include online and on-premises results. From the SharePoint Hybrid Configuration Wizard, you select the following features:

- Hybrid business to business (B2B) sites
- Hybrid OneDrive
- Hybrid Search

Which two requirements are met by using the SharePoint Hybrid Configuration Wizard features? Each correct answer presents a complete solution.
 NOTE: Each correct selection is worth one point.

- A. Users must have a single SharePoint profile for both on-premises and on the cloud.
- B. OneDrive sites must redirect users to online content.
- C. Users must be able to follow both on-premises and cloud-based sites.
- D. When users search for a document by using keywords, the results must include online and on-premises results.

Answer: BD

NEW QUESTION 65

You have a Microsoft 365 subscription and a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. Contoso.com contains the users shown in the following table.

Name	Type	Role
User1	Member	None
User2	Member	Security administrator, Guest inviter
User3	Member	User administrator
User4	Guest	None

Contoso.com is configured as shown in the following exhibit.

External collaboration settings

Save Discard

Guest users permissions are limited ⓘ

Yes No

Admins and users in the guest inviter role can invite ⓘ

Yes No

Members can invite ⓘ

Yes No

Guests can invite ⓘ

Yes No

Collaboration restrictions

Allow invitations to be sent to any domain (most inclusive)

Deny invitations to the specified domains

Allow invitations only to the specified domains (most restrictive)

You need to ensure that guest users can be created in the tenant. Which setting should you modify?

- A. Guests can invite.
- B. Guest users permissions are limited.
- C. Members can invite.
- D. Admins and users in the guest inviter role can invite.
- E. Deny invitations to the specified domains

Answer: D

Explanation: References:

NEW QUESTION 69

You have a Microsoft 365 subscription that contains a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. The tenant includes a user named User1

You enable Azure AD Identity Protection.

You need to ensure that User1 can review the list in Azure AD Identity Protection of users nagged for risk. The solution must use the principle of least privilege.

To which role should you add User1?

- A. Security reader
- B. Compliance administrator
- C. Reports reader
- D. Global administrator

Answer: A

NEW QUESTION 71

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory forest. You deploy Microsoft 365.

You plan to implement directory synchronization.

You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:

- Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable.
- Users passwords must be 10 characters or more.

Solution: Implement password hash synchronization and configure password protection in the Azure AD tenant.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 76

Your company has a Microsoft 365 subscription.
 You upload several archive PST files to Microsoft 365 by using the Security & Compliance admin center. A month later, you attempt to run an import job for the PST files.
 You discover that the PST files were deleted from Microsoft 365.
 What is the most likely cause of the files being deleted? More than one answer choice may achieve the goal. Select the BEST answer.

- A. The PST files were corrupted and deleted by Microsoft 365 security features.
- B. PST files are deleted automatically from Microsoft 365 after 30 days.
- C. The size of the PST files exceeded a storage quota and caused the files to be deleted.
- D. Another administrator deleted the PST files.

Answer: B

Explanation: References:
<https://docs.microsoft.com/en-us/office365/securitycompliance/faqimporting-pst-files-to-office-365>

NEW QUESTION 78

You create a Microsoft 365 Enterprise subscription. You assign licenses for all products to all users.
 You need to ensure that all Microsoft Office 365 ProPlus installations occur from a network share. The solution must prevent the users from installing Office 365 ProPlus from the Internet.
 Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. From your computer, run setup.exe /download downloadconfig.xml.
- B. Create an XML download file.
- C. From the Microsoft 365 admin center, deactivate the Office 365 licenses for all the users.
- D. From each client computer, run setup.exe /configure installconfig.xml.
- E. From the Microsoft 365 admin center, configure the Software download settings.

Answer: BDE

NEW QUESTION 83

Your network contains an Active Directory domain and a Microsoft Azure Active Directory (Azure AD) tenant.
 You implement directory synchronization for all 10,000 users in the organization. You automate the creation of 100 new user accounts.
 You need to ensure that the new user accounts synchronize to Azure AD as quickly as possible. Which command should you run? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

	-PolicyType	
Start-ADSyncSyncCycle		Delta
Set-ADSyncScheduler		Initial
Invoke-ADSyncRunProfile		Full

Answer:

Explanation: **Answer Area**

	-PolicyType	
Start-ADSyncSyncCycle		Delta
Set-ADSyncScheduler		Initial
Invoke-ADSyncRunProfile		Full

NEW QUESTION 84

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
 After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
 Your company has a Microsoft Office 365 tenant.
 You suspect that several Office 365 features were recently updated.
 You need to view a list of the features that were recently updated in the tenant. Solution: You use Dashboard in Security & Compliance.
 Does this meet the goal?

- A. Yes
- B. NO

Answer: B

NEW QUESTION 85

Your company has on-premises servers and a Microsoft Azure Active Directory (Azure AD) tenant. Several months ago, the Azure AD Connect Health agent was installed on all the servers.
 You review the health status of all the servers regularly.
 Recently, you attempted to view the health status of a server named Server1 and discovered that the server is NOT listed on the Azure Active Directory Connect Servers list.
 You suspect that another administrator removed Server1 from the list. You need to ensure that you can view the health status of Server1.
 What are two possible ways to achieve the goal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. From Windows PowerShell, run the Register-AzureADConnectHealthSyncAgent cmdlet.
- B. From Azure Cloud shell, run the Connect-AzureAD cmdlet.
- C. From Server1, change the Azure AD Connect Health services Startup type to Automatic (Delayed Start).
- D. From Server1, change the Azure AD Connect Health services Startup type to Automatic.
- E. From Server1, reinstall the Azure AD Connect Health agent.

Answer: AE

NEW QUESTION 86

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
 After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
 Your network contains an Active Directory forest. You deploy Microsoft 365.
 You plan to implement directory synchronization.
 You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:

- Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable.
- Users passwords must be 10 characters or more.

Solution: Implement pass-through authentication and configure password protection in the Azure AD tenant.
 Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 87

Your company has a Microsoft 365 subscription.
 Your plan to add 100 newly hired temporary users to the subscription next week. You create the user accounts for the new users.
 You need to assign licenses to the new users. Which command should you run?

```
A. $NewStaff = Get-AzureADUser -All -Department "Temp" -UsageLocation "";
   $NewStaff | foreach {Set-AzureADUser -LicenseOptions "contoso:ENTERPRISEPACK"}

B. $NewStaff = Get-AzureADUser -All -Department "Temp" -UsageLocation "US" -UnlicensedUsersOnly;
   $NewStaff | foreach {Set-AzureADUserLicense -AddLicenses "contoso:ENTERPRISEPACK"}

C. $NewStaff = Get-AzureADUser -All -Department "Temp" -UsageLocation "";
   $NewStaff | foreach {Set-AzureADUserLicense -LicenseOptions "contoso:ENTERPRISEPACK"}

D. $NewStaff = Get-AzureADUser -All -Department "Temp" -UsageLocation "US" -UnlicensedUsersOnly;
   $NewStaff | foreach {Set-AzureADUser -AddLicenses "contoso:ENTERPRISEPACK"}
```

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Answer: B

Explanation: Topic 2, Contoso, Ltd

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York. The offices have the users and devices shown in the following table.

Office	Users	Laptops	Desktops	Mobile devices
Montreal	2,500	2,800	300	3,100
Seattle	1,000	1,100	200	1,500
New York	300	320	30	400

Contoso recently purchased a Microsoft 365 E5 subscription.

Existing Environment

The network contains an Active directory forest named contoso.com and a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com. You recently configured the forest to sync to the Azure AD tenant. You add and then verify adatum.com as an additional domain name. All servers run Windows Server 2016.

All desktop computers and laptops run Windows 10 Enterprise and are joined to contoso.com.

All the mobile devices in the Montreal and Seattle offices run Android. All the mobile devices in the New York office run iOS.

Contoso has the users shown in the following table.

Name	Role
User1	None
User2	None
User3	Customer Lockbox access approver
User4	None

Contoso has the groups shown in the following table.

Name	Type	Membership rule
Group1	Assigned	Not applicable
Group 2	Dynamic	(user.department –eq "Finance")

Microsoft Office 365 licenses are assigned only to Group2.

The network also contains external users from a vendor company who have Microsoft accounts that use a suffix of @outlook.com.

Requirements Planned Changes

Contoso plans to provide email addresses for all the users in the following domains:

- ▶ East.adatum.com
- ▶ Contoso.adatum.com
- ▶ Humongousinsurance.com

Technical Requirements

Contoso identifies the following technical requirements:

- ▶ All new users must be assigned Office 365 licenses automatically.
- ▶ The principle of least privilege must be used whenever possible.

Security Requirements

Contoso identifies the following security requirements:

- ▶ Vendors must be able to authenticate by using their Microsoft account when accessing Contoso resources.
- ▶ The members of Group1 must be required to answer a security question before changing their password.
- ▶ User3 must be able to manage Office 365 connectors.
- ▶ User4 must be able to reset User3 password.

NEW QUESTION 90

You need to Add the custom domain name* to Office 36S K> support the planned changes as quickly as possible. What should you create to verify the domain names successfully?

- A. three alias (CNAME) record
- B. one text (TXT) record
- C. one alias (CNAME) record
- D. three text (TXT) record

Answer: D

NEW QUESTION 92

You need to meet the security requirement for the vendors. What should you do?

- A. From the Azure portal, add an identity provider.
- B. From Azure Cloud Shell, run the New-AzureADUser cmdlet and specify the –UserPrincipalName parameter.
- C. From the Azure portal, create guest accounts.
- D. From Azure Cloud Shell, run the New-AzureADUser cmdlet and specify the –UserType parameter.

Answer: C

NEW QUESTION 95

You need to meet the security requirement for Group1. What should you do?

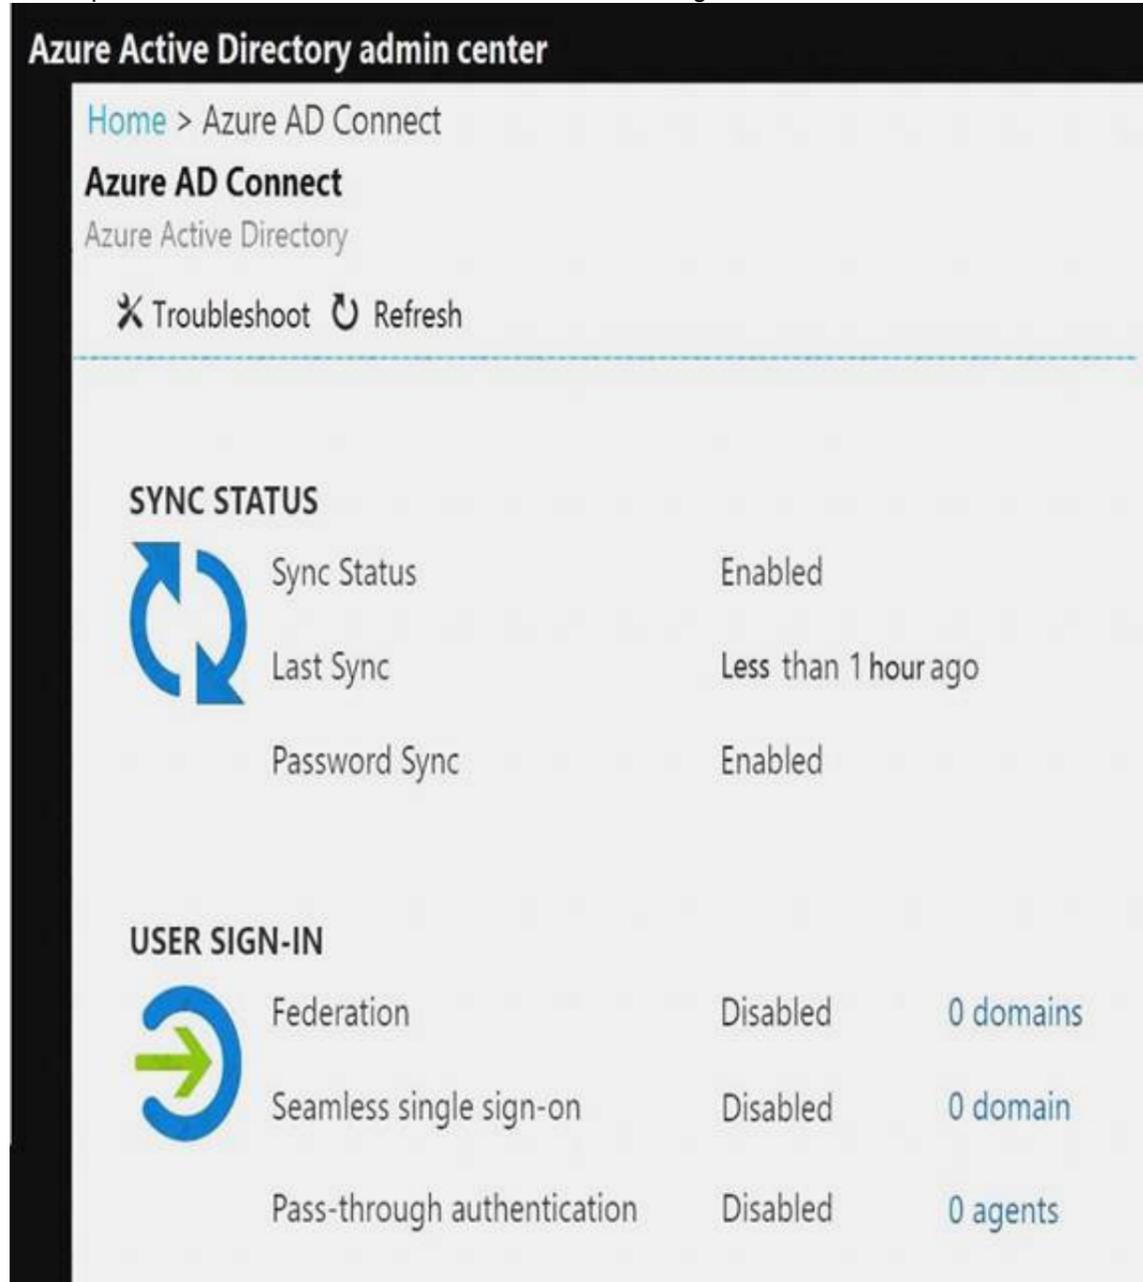

- A. Configure all users to sign in by using multi-factor authentication.
- B. Modify the properties of Group1.
- C. Assign Group1 a management role.
- D. Modify the Password reset properties of the Azure AD tenant.

Answer: D

Explanation: References:
<https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-sspr-howitworks>

NEW QUESTION 98

You create the Microsoft 365 tenant.
 You implement Azure AD Connect as shown in the following exhibit.

The screenshot shows the Azure Active Directory admin center interface. At the top, it says 'Home > Azure AD Connect' and 'Azure AD Connect' under 'Azure Active Directory'. There are 'Troubleshoot' and 'Refresh' buttons. Below this, there are two main sections: 'SYNC STATUS' and 'USER SIGN-IN'.

SYNC STATUS	
Sync Status	Enabled
Last Sync	Less than 1 hour ago
Password Sync	Enabled

USER SIGN-IN		
Federation	Disabled	0 domains
Seamless single sign-on	Disabled	0 domain
Pass-through authentication	Disabled	0 agents

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

Answer Area

Sales department users can access [answer choice] applications by using SSO.

▼

both on-premises and cloud-based

only cloud-based

only on-premises

If Active Directory becomes unavailable, users can access the resource [answer choice].

▼

both on-premises and in the cloud

in the cloud only

on-premises only

Answer:

Explanation:

in the cloud only
on-premises only

NEW QUESTION 99

You need to create the UserLicenses group. The solution must meet the security requirements. Which group type and control method should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Group type:

▼
Distribution list
Office 365 group
Security group

Control method:

▼
a conditional access policy
a retention policy
an access review
an alert policy

Answer:

Explanation: Answer Area

Group type:

▼
Distribution list
Office 365 group
Security group

Control method:

▼
a conditional access policy
a retention policy
an access review
an alert policy

NEW QUESTION 103

Which role should you assign to User1?

- A. Security Administrator
- B. Records Management
- C. Security Reader
- D. Hygiene Management

Answer: C

NEW QUESTION 108

You need to meet the application requirement for App1. Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. From the Azure Active Directory admin center, configure the application URL settings.
- B. From the Azure Active Directory admin center, add an enterprise application.
- C. On an on-premises server, download and install the Microsoft AAD Application Proxy connector.
- D. On an on-premises server, install the Hybrid Configuration wizard.
- E. From the Microsoft 365 admin center, configure the Software download settings.

Answer: ABC

Explanation: References:

<https://docs.microsoft.com/en-us/azure/active-directory/manage-apps/application-proxy#how-application-proxy->

NEW QUESTION 109

You are evaluating the required processes for Project1.

You need to recommend which DNS record must be created before you begin the project. Which DNS record should you recommend?

- A. mail exchanger (MX)
- B. alias (CNAME)
- C. host (A)
- D. host (AAA)

Answer: A
