

VMware

Exam Questions 2V0-81.20

Professional VMware Security

NEW QUESTION 1

A company has deployed a new application. Users are complaining they cannot connect. The administrator suspects there is an issue with the Distributed Firewall (DFW).

What three steps can be taken to troubleshoot the DFW? (Choose three.)

- A. The administrator should confirm that SLOT 2, which is used by the DFW, is configured under the vNICs of the VMs.
- B. The administrator should configure vRealize Log Insight using the Insight agent as the type and review the DFW rule logs in vRealize Log Insight.
- C. The administrator should confirm if the DFW rule is set to log, and then look on the hypervisor where the VMs reside and look at logs at /var/log/dfwpktlogs.log.
- D. The administrator should verify firewall rules exist to permit traffic and verify the hit counters are increasing.
- E. The administrator should configure vRealize Log Insight using syslog as the type and review the DFW rule logs in vRealize Log Insight.

Answer: CDE

NEW QUESTION 2
