

PSM-II Dumps

Professional Scrum Master II

<https://www.certleader.com/PSM-II-dumps.html>

NEW QUESTION 1

After several Sprints, a key stakeholder starts using the product. The stakeholder is surprised by the slow performance and complains to the Product Owner. The Product Owner comes to the Scrum Master asking for advice.

What is the best action for a Scrum Master to take?

- A. Wait until the next Sprint Retrospective as it is the most opportune time to modify the Definition of Done.
- B. Bring the concern to the testers in the Development Team and ask them to include performance testing.
- C. Explain to the Product Owner that it's up to the Development Team t
- D. decide on acceptable performance standards as they own the Definition of Done.
- E. Encourage the Product Owner to bring the performance concerns to the Development Team and work with them on how to improve performance, and ultimately have stronger Definition of Done.

Answer: D

Explanation:

The highest priority of agility is to satisfy the customer through early and continuous delivery of valuable software. Because the Development Team is the one doing the work and increments must meet performance standards, they can expand their Definition of Done to include more stringent criteria for higher quality.

NEW QUESTION 2

Steven is a Scrum Master employed by the engineering department. The Director of Engineering considers using Scrum for a new project but wonders about the value of having all of the Development Team members attend the Daily Scrum. He is concerned that the employees already attend a lot of mandatory company meetings.

What are two outcomes of the Daily Scrum that Steven should explain on why the Daily Scrum is important? (Choose two.)

- A. During the Daily Scrum the members of the Development Team will inform of problems that are hindering their progress, and for which they have no means to resolv
- B. They will inform Steven as a Scrum Master, so he can remove the impediments and help the team be more productive.
- C. Through the short, daily alignment of the Daily Scrum the members of the Development Team grow and improve a shared understanding of the most important work to be undertaken in the next 24 hours to achieve the best possible progress toward the Sprint Goa
- D. This daily opportunity to inspect and adapt will enable the Development Team to best tackle any unforeseen circumstances that might otherwise disrupt the team's progress.
- E. The Development Team members will produce a daily status report indicating how much time was spent working on individual tasks since the last Daily Scru
- F. The reports will help in discussing how theSprint went at the Sprint Review meetin
- G. It will provide detailed insights into the accuracy of estimates versusactual time spent, which can be used to create better estimates at the next Sprint Planning.
- H. The Daily Scrum serves for the Development Team to report to Steven, as a Scrum Master, all updates on the assigned tasks in the Sprint Backlo
- I. He can then use the team's updates to plan their work for the next day, making sure that every team member is assigned the right tasks.
- J. During the Daily Scrum, the Development Team needs to update the Scrum board with their current status and progress, at a task leve
- K. This is crucial to ensure that the Directory of Engineering knows the team's actual progress and control the work being done.

Answer: AB

Explanation:

The Development Team uses the Daily Scrum to inspect progress toward the Sprint Goal and to inspect how progress is trending toward completing the work in the Sprint Backlog. The Daily Scrum optimizes the probability that the Development Team will meet the Sprint Goal. Every day, the Development Team should understand how it intends to work together as a self-organizing team to accomplish the Sprint Goal and create the anticipated Increment by the end of the Sprint.

NEW QUESTION 3

What factors are best considered when defining the Sprint length?

- A. How often team membership changes and the size of the Development Team.
- B. Having consistent Sprint length across all Scrum Teams.
- C. The level of expertise over the technology to be used, ability to release an Increment to the end users, and the risk of being disconnected from the stakeholders.

Answer: C

NEW QUESTION 4

According to the Scrum Guide, where should the Daily Scrum be held?

- A. Wherever the Development Team decides is most suitable.
- B. In a room where management can attend.
- C. In the same location where the Development Team is seated.
- D. In front of the Scrum board.
- E. Wherever the Scrum Master decides is best.

Answer: A

Explanation:

Because the Daily Scrum is owned and managed by the Development Team, it is up to them to decide on the most effective place and time to hold the Daily Scrum.

NEW QUESTION 5

Technical Debt can lead to false assumptions about the current state of the system and the Increment reviewed at the end of the Sprint.

- A. True
- B. False

Answer: A

Explanation:

Technical debt is any shortcomings in the code. It is a natural by-product of software development (unavoidable) and can at best be managed. If neglected, it will compound and have a negative effect on the team's ability to deliver value. A team can have an artificially high velocity by taking shortcuts or introducing technical debt into the system. This can give a false assumption about the current state of the product. It can look good on the surface but underneath can be a mess.

NEW QUESTION 6

Steven is a Scrum Master for three Scrum Teams building the same product and working from the same Product Backlog. Management wants to standardize how velocity is calculated across all three teams in order to identify which teams are high performing and which teams need more support. What would be the best two responses Steven could provide to management? (Choose two.)

- A. There is no direct relationship between velocity and value.
- B. Standardizing velocity across teams is a good way to understand which teams are producing the most value.
- C. Providing incentives based on velocity can increase the Scrum Team's motivation to produce more value.
- D. Velocity is the amount of business functionality that a Scrum Team creates in a Sprint.
- E. It is unique to that team and used as an input to Sprint Planning.

Answer: AD

Explanation:

Working software is the primary measure of progress. Scrum is based on empirical process control theory where delivering working software frequently and measuring the impact helps the Product Owner maximize opportunity for the business to deliver value.

NEW QUESTION 7

How should a Scrum Master divide a group of 100 people into multiple Development Teams?

- A. Create teams based on their functional layer.
- B. Have the resource manager assign the people to teams.
- C. Ask the developers to divide themselves into teams.

Answer: C

Explanation:

A good first question for you to suggest the group thinking about when forming into teams is "How will we make sure all teams have the right amount of expertise?"

NEW QUESTION 8

As a Scrum Master, you observe that the Product Owner is not collaborating with the Development Team effectively. What action would you take?

- A. Send the Product Owner to training.
- B. Nominate a proxy Product Owner.
- C. Act as the go-between.
- D. Coach the Product Owner.

Answer: D

Explanation:

A Scrum Master coaches those inside and outside the team on the values of Scrum and incremental delivery.

NEW QUESTION 9

How should multiple Scrum Teams, working from the same Product Backlog, select the Product Backlog items their teams plan to work on?

- A. The Product Owner will present the work and the Development Teams will select the items they will work on.
- B. The Product Owner creates separate Product Backlogs for each Development Team.
- C. Each Scrum Team would select an equal number of items.
- D. The Product Owner assigns the work to each team.
- E. The Scrum Team with the highest productivity will select the items first.

Answer: A

Explanation:

The ones doing the work are the best ones to decide what they can do and how to do it.

NEW QUESTION 10

A key concern when multiple Development Teams are working for the same Product Backlog is minimizing dependencies between teams.

- A. True
- B. False

Answer: A

Explanation:

Minimizing dependencies reduces complexity and enhances agility.

NEW QUESTION 10

A Scrum Master teaches those who are interested in the Development Team's progress that progress in Scrum comes from inspecting an Increment at the Sprint Review.

- A. True
- B. False

Answer: A

Explanation:

Working software is the primary measure of progress.

NEW QUESTION 11

A time-box is:

- A. An event that starts at a specific time.
- B. An event with a minimum set time.
- C. An event that cannot take more than a maximum amount of time.
- D. An event that must happen by a specific time.

Answer: C

Explanation:

All events are time-boxed events, such that every event has a maximum duration. Once a Sprint begins, its duration is fixed and cannot be shortened or lengthened. The remaining events may end whenever the purpose of the event is achieved, ensuring an appropriate amount of time is spent without allowing waste in the process.

NEW QUESTION 15

What would be good ways of creating Development Teams that would support the Scrum values?

- A. Project Managers will allocate individuals to specific teams.
- B. Bring all the developers or existing teams together and let them propose how to organize into the new structure and self-organize into Development Teams.
- C. The operations manager determines the new team structures and assignments.
- D. Direct managers personally re-assign current reports to new teams.

Answer: B

Explanation:

The ones that will be doing the work are the best ones to decide on what Development Team structures work best.

NEW QUESTION 16

What would be the main benefits of self-organization?

- A. Increased rule compliance, self-accountability, commitment.
- B. Increased rule compliance, self-accountability, output.
- C. Increased capacity, accuracy of estimates, output.
- D. Increased creativity, self-accountability, commitment.

Answer: D

Explanation:

Self-organized teams allow teams to creatively solve difficult problems, be accountable for the work they do, and commit to each other and the goals of the team.

NEW QUESTION 17

Scrum promotes self-organization.

Which of these statements would NOT support self-organizing?

- A. The Development Team deciding what work to do in a Sprint.
- B. Removing the need for documentation.
- C. Being a lightweight framework.
- D. Removing titles for Development Team members.

Answer: B

NEW QUESTION 21

A Development Team, that has remote team members, typically spends time before the Daily Scrum to setup the meeting rooms and conference calling equipment and tools in order to have their Daily Scrum.

How should the Scrum Master handle this situation?

- A. Allow the Development Team to self-manage and decide for itself what to do.
- B. Setup the meeting and tell the Development Team that is how it will be done.
- C. Ask the Development Team members to alternate who is responsible for meeting setup.
- D. Inform management and ask them to solve it.

Answer: A

Explanation:

As a self-organized team, they will decide for themselves how to best manage communication between team members. The Scrum Master will only take action if requested OR if he/she observes that there is a potential problem.

NEW QUESTION 25

Kevin is a senior developer that has recently joined an existing Scrum Team. The existing team members are unable to get along with Kevin and conclude that he is not a culture fit.

If necessary, who is responsible for removing the new team member, and why?

- A. The Scrum Master because he/she is responsible for removing Impediments.
- B. The Development Team is responsible because it is an internal team issue, and may request help from the Scrum Master.
- C. The HR department, as they are responsible for the hiring process.
- D. The Product Owner because he/she is responsible for managing the team.

Answer: B

Explanation:

The ones closest to the problem are the best ones to understand and solve the problems. The Scrum Master can remove members (if empowered). The QUESTION NO: is focused on the ownership of the root problem. The Development Team is responsible for addressing internal conflicts and may request help from the Scrum Master if needed. Because this is a localized issue, they are the ones that must initiate the actions for the results they desire.

NEW QUESTION 27

A Scrum Team has been working on the same product for twelve Sprints. What would likely be the immediate impact on the original Scrum Team if two new Scrum Teams are to be added the same product?

- A. Its productivity is likely to decrease.
- B. Its productivity is likely to increase.
- C. Its productivity is likely to stay the same.

Answer: A

Explanation:

The productivity of the original Scrum Team would likely decrease as they would need to take time to assist and support the new Scrum Teams in order for them to perform optimally.

NEW QUESTION 32

How should a Scrum Master coordinate the work when more than one Scrum Team is working on one product?

- A. Teach them that it's their responsibility to coordinate with the other teams to integrate and create a shippable product Increment at the end of every Sprint.
- B. Identify and manage the dependencies between Scrum Teams.
- C. Have the Product Owner work with the tech leads of each team to parse the Product Backlog and minimize overlap in User Stories.
- D. Merge the teams and work from a single Sprint Backlog.

Answer: A

Explanation:

One of the benefits of self-organized teams is the ability to decide how best to work together to produce a shippable Increment.

NEW QUESTION 35

Your organization requires all Increments to pass user acceptance testing (UAT) before it is allowed to be released to production.

Is it a good idea to postpone UAT until the end of the project to prevent the Development Team from being disrupted during the Sprints?

- A. No, because the state of the Product Increment won't be transparent and the feedback loop would be too long.
- B. It depends on the team's Definition of Done.
- C. Yes, because the Development Team is a self-organizing team and should not be disrupted during development.
- D. Yes, because UAT is done in a hardening Sprint before the release Sprint.

Answer: A

Explanation:

The purpose of each Sprint is to deliver Increments of potentially releasable functionality that adhere to the Scrum Team's current definition of "Done". At the end of a Sprint, the new Increment must be "Done", which means it must be in useable condition and meet the Scrum Team's definition of "Done". An increment is a body of inspectable, done work that supports empiricism at the end of the Sprint. If UAT is a part of the team or organizational standard, then any delay in this activity will reduce transparency and increase risk.

NEW QUESTION 40

At the eighth Sprint Review, the stakeholders are upset that the product being built is not what they expected and will incur additional costs that was not planned for.

What may have led to this?

- A. The Scrum Master has not been reporting on the progress of the Scrum Tea
- B. The Product Owner has not been managing the Development Team's tasks effective
- C. The Development Team has not been improving their velocity.
- D. The Scrum Master has not ensured that the project is transparen
- E. The Product Owner has not made the stakeholders aware of the progress of the projec
- F. The stakeholders have not been attending the Sprint Reviews.
- G. The Scrum Master has not been attending the Daily Standu
- H. The Product Owner has not been using the Gantt chart correctl
- I. The Stakeholders has not been invited to the Sprint Retrospectives.

Answer: B

Explanation:

Scrum requires significant aspects of the process to be visible to those responsible for the outcome. This includes transparency with internal and external stakeholders.

NEW QUESTION 45

Every Development Team should have the competencies and skills needed to deliver a Done Increment in a Sprint.

- A. True
- B. False

Answer: A

Explanation:

Development Teams are self-organized and cross-functional.

NEW QUESTION 48

An organization is planning to form five new Scrum Teams to work on building a single product. A few of the future team members ask the Scrum Master who will coordinate the work between the different Scrum Teams.

What action should the Scrum Master take?

- A. Visit the five Development Teams daily to ensure alignment and that all Sprint Backlogs remain synchronized.
- B. Teach them that it is their responsibility to form the teams such that each team will have the necessary skills, knowledge, and competencies to create an integrated Increment by the end of every Sprint.
- C. Advise the teams to minimize dependencies by working on separate development branches and integrate at the end of four Sprint cycles.
- D. At the end of Sprint Planning, collect all Sprint tasks and create a consolidated plan for the entire Sprint.
- E. Teach the Product Owner to work with the technical leads on ordering Product Backlog in a way to avoid too much technical and development overlap during a Sprint.

Answer: B

Explanation:

Development Teams are structured and empowered by the organization to organize and manage their own work. This includes deciding how to form teams when multiple teams are needed. The resulting synergy optimizes the Development Team's overall efficiency and effectiveness. They are self-organizing. No one (not even the Scrum Master) tells the Development Team how to turn Product Backlog into Increments of potentially releasable functionality.

NEW QUESTION 49

Your organization has formed a new Scrum Team and has assigned you as the Scrum Master. In what ways would you help the team start?

- A. Ensure the Scrum Team members have compatible personalities, have the tech leads clarify the expectations and responsibilities of each role, and propose a performance rewards system.
- B. Have the Scrum Team members introduce their background experience with each other, ask the Product Owner to discuss the product and answer QUESTION NO:s, and ensure the team understands the need for a Definition of "Done."

Answer: B

Explanation:

Scrum Teams should have all of the competencies and skills to do the work in the Product Backlog which includes understanding the goals and history of the product and ensuring that they all know what "done" means.

NEW QUESTION 54

How much work must a Development Team do to a Product Backlog item it selects for a Sprint?

- A. An equal amount of time on analysis, design, programming, testing and documentation.
- B. As much as it has informed the Product Owner will be done for every Product Backlog item it selects in conformance with the definition of "Done".
- C. All development work and at least some testing.
- D. As much as it can fit into the Sprin
- E. Any remaining work will be moved to a subsequent Sprint.

Answer: B

NEW QUESTION 57

Who determines how to do the work during the Sprint?

- A. The Scrum Master.
- B. The Technical Architects.
- C. The Development Team.
- D. The Team Leads.
- E. The engineering director.

Answer: C

NEW QUESTION 60

You are the Scrum Master for four Scrum Teams working on one product. Several of the developers notify you that their teams will need full-time help of an external technical specialist in the upcoming two Sprints.

What key concerns should the Scrum Master take into account?

- A. Having enough work for all Development Team members.
- B. The benefit of Development Teams solving the problem themselves and the ability to produce integrated Increments.
- C. Maintaining a consistent velocity.
- D. Hiring additional resources to fill the void in skillset.

Answer: B

NEW QUESTION 63

The director of engineering in your organization always stresses the importance of meeting deadlines in order for the engineering department to be seen as a reliable source for the product management department. The director has calculated that the team's velocity needs to increase an additional 15% to meet the commitment he made to management for the release date of the product.

He asks Steven, the team's Scrum Master, to increase his team's velocity. Which would be the best two responses for Steven to take? (Choose two.)

- A. He explains how a team uses the velocity of a Sprint primarily to forecast work for the next Sprint, not to perfectly predict future productivity.
- B. He refers the director to the Product Owner for all information concerning the progress of development.
- C. He informs the director of organizational impediments he is aware of that prevent the team from being more productive.
- D. He suggests collaborating with him on how to remove these impediments.
- E. He educates his director how it is part of a team's self-organization to improve velocity.
- F. He invites the director to the next Sprint Retrospective to brainstorm on how they can improve.
- G. He helps the director understand that it typically takes a few Sprints for a team to gradually increase the velocity up to the level expected.
- H. Meanwhile he presents this to the team as a challenge and a company goal, leaving it however up to them to figure out exactly how to achieve this.
- I. He tells the director that this is not his responsibility in Scrum.
- J. He tells the director to work with the Product Owner to check whether the estimates on the Product Backlog are being respected during implementation.

Answer: AB

Explanation:

The Scrum Master serves the organization by helping employees and stakeholders understand and enact Scrum and empirical product development and causing change that increases the productivity of the Scrum Team.

NEW QUESTION 64

Steven, the Scrum Master, is approached by one of the Development Team members saying that they are not completing regression tests for all of the work they are performing to the level defined in the Definition of Done. They have discussed this with the Product Owner and decided to remove regression testing from the Definition of Done.

Which two actions are the most appropriate for Steven to take? (Choose two.)

- A. Reject the decision as the long term maintainability of the product will be negatively impacted by modifying the Definition of Done.
- B. Accept the decision as a mutual agreement has been made between the Development Team and the Product Owner.
- C. Ask the Development Team and the Product Owner what problem they are trying to solve by altering the Definition of Done and removing regression testing from it.
- D. In what ways will this decision impact transparency and quality?
- E. Ask the Development Team and the Product Owner if they are still able to produce potentially shippable product increments by altering the Definition of Done?

Answer: CD

Explanation:

As a servant/leader, the Scrum Master facilitates conversations through open ended QUESTIONS in order to help the team members make the best possible decisions according to what is known at the time. He/she does not approve or reject team decisions but ensures the team stays within the boundaries of the Scrum framework.

NEW QUESTION 65

Steven is a Scrum Master on a new Scrum Team.

What would be the best way for him to determine if the Product Owner is interacting enough with the Development Team during a Sprint?

- A. Check whether the Product Owner is actively engaged at the Daily Scrums.
- B. Check whether the Increment presented at the Sprint Review meets the Product Owner's expectations.
- C. See whether the Product Owner has provided enough information at the Sprint Planning to make his/her presence optional during the Sprint.
- D. The level of autonomy within Development Team can be the result of having the right presence from the Product Owner.
- E. The Product Owner must always be present with the Development Team.
- F. Unavailability of the Product Owner is prohibited in Scrum.

Answer: C

Explanation:

Outcomes of the Scrum Team are affected by the Product Owner's participation and availability. During a Sprint he/she is responsible for answering QUESTIONS from the Development Team about items in the current Sprint and optimizing the value of the work the Development Team does.

NEW QUESTION 67

Which of the following is true about the Product Owner role?

- A. Can be shared between multiple people on a Scrum Team, Is the same as a Project Manager.
- B. Is played by a committee or a team of people.
- C. Is one person.
- D. Can be influenced by a committee.
- E. Is accountable for ordering the Product Backlog.

Answer: B

NEW QUESTION 71

Peter, the Product Owner, has been giving positive recognition to individual Development Team members who have moved their work to 'done' during the Daily Scrum. Peter wants to ensure the team is adhering to the ideal guideline on the burndown chart. What would be two valid actions for Steven, the Scrum Master, to take? (Choose two.)

- A. Steven talks with Peter about concerns of how his behavior might impact the team members and request that he stop attending for now.
- B. Steven coaches Peter on best practices for updating the burndown chart as it provides accurate information on how well the team is performing.
- C. Nothin
- D. Steven is optional at the Daily Scrum and it is the responsibility of the team to decide how to best run it.
- E. Steven coaches the Scrum Team about the purpose of the Daily Scrum.

Answer: AD

Explanation:

The Scrum Master is responsible for promoting and supporting Scrum as defined in the Scrum Guide. Scrum Masters do this by helping everyone understand Scrum theory, practices, rules, and values.

The Scrum Master is a servant-leader for the Scrum Team. The Scrum Master helps the Scrum Team understand which of their interactions are helpful and which aren't.

The Scrum Master helps everyone change these interactions to maximize the value created by the Scrum Team.

NEW QUESTION 75

What is a good way for a Scrum Team to ensure that security concerns are addressed and transparent?

- A. Add Security Sprints to resolve security concerns when needed.
- B. Have the Scrum Team create Product Backlog items for each concern and/or add security concerns to the definition of "Done".
- C. Create a separate backlog for security items and only work on the items when a specialist becomes available.
- D. Delegate the work to an external team.

Answer: B

Explanation:

The Product Backlog and the Definition of "Done" are artifacts that promote transparency.

NEW QUESTION 77

Successful use of Scrum depends on how well people behave and act in ways that reflect the Scrum values. What can the value of openness affect?

- A. Collaboration efforts.
- B. Level of product quality.
- C. Team member happiness.
- D. Time to market.
- E. Trust from stakeholders.
- F. All of the above.

Answer: F

Explanation:

The Scrum Team and its stakeholders agree to be open about all the work and the challenges with performing the work.

NEW QUESTION 80

Peter is a new Product Owner on a newly formed Scrum Team. Peter has projected a product completion date based on an estimated velocity of 21 completed points per Sprint. After the first 3 Sprints, the team has determined that their maximum velocity is 15 points and they are unable to create shippable increments at the end of each Sprint.

What is the best way to proceed?

- A. The Sprints have failed to produce shippable Increments there for opportunities to inspect and adapt is lost
- B. The Scrum Master would encourage the organization to add more team members in order to increase the team's capacity.
- C. The Scrum Master would coach the team on improving their estimations and commitment to completing the Sprint Backlog.
- D. Extend the Sprint in order to complete the Sprint Backlog items.
- E. Inform Peter that the projected completion date is not correct
- F. The Development team would estimate the remaining work to produce a shippable Increment and suggest making it "Done" before working on new feature
- G. Based on empirical data, Peter can adjust the completion date and decide how to continue.

Answer: D

NEW QUESTION 85

What is the recommended size for a Development Team (within the Scrum Team)?

- A. 3 to 9
- B. Minimal 5
- C. 7 plus or minus 2
- D. 9

Answer: A

NEW QUESTION 88

The Development Team should have all the skills and competencies needed to:

- A. Turn the Product Backlog items it selects into a potentially releasable product increment of functionality.
- B. Do all of the development work in order to handoff to the testers in the subsequent Sprint.
- C. Complete the project within the estimate as committed to the Product Owner.

Answer: A

NEW QUESTION 91

A key measure of success for the Product Owner is velocity.

- A. True

Answer: B

Explanation:

Velocity only measures the team's average speed and does not reflect how much value is being delivered to the customers. Even when it's considered inside the project, while it's important, it's not the key measure of success. The Product Owner should be focused on how much value is delivered to the customers.

NEW QUESTION 94

In what ways does the Scrum Master keep a Development Team working at its highest level of productivity?

- A. By removing impediments that hinder the Development Team and facilitating Development Team decisions.
- B. By helping the Development Team with user acceptance tests and tracking defects.
- C. By ensuring each member takes turns speaking at the Daily Scrum and ending the event on time.
- D. By keeping the Scrum board and burn-down chart updated daily.

Answer: A

Explanation:

The Scrum Master serves the Development Team by removing impediments to the Development Team's progress and facilitating Scrum events as requested or needed.

NEW QUESTION 97

Steven, the Scrum Master, observes that one of the Development Team members is not attending the Daily Scrum. The Development Team feels this is ok as they all sit in the same area and already have constant communication throughout the day. Which is the best action for Steven to take?

- A. Start running the Daily Scrum and require all members to be in attendance.
- B. Talk to the Development Team member privately and tell him that he needs to be a team player.
- C. Ask the Development Team, what value will result from having all team members present at the Daily Scrum and what are the risks if members don't attend.
- D. The Daily Scrum is owned by the Development Team and it is their responsibility to decide which team members must participate.

Answer: C

Explanation:

The Scrum Master is responsible for ensuring that the Scrum Team understands the purpose and value of the Scrum events. Because the Daily Scrum is owned by the Development Team, it will decide how best to run the event. And if needed the Scrum Master will coach the team to ensure the decisions stay within the boundaries of the Scrum framework.

NEW QUESTION 100

In order to start the first Sprint, Scrum only requires a Product Owner with enough ideas, a Development Team to execute on those ideas, and a Scrum Master to guide the process.

- A. True

Answer: A

Explanation:

In complex domains, you are only able to know the outcomes in hindsight. Empiricism, from which Scrum was founded on, asserts that knowledge comes from experience and making decisions based on what is known. New knowledge will emerge as work is being done.

NEW QUESTION 102

Select the correct Scrum Team roles defined in Scrum.

- A. Development Team, Scrum Master, Product Owner
- B. Engineers, Business Analyst, Product Owner
- C. Stakeholders, Scrum Master, Project Manager, Product Owner
- D. Product Manager, Business Analyst, Development Team, Stakeholders

Answer: A

Explanation:

The Scrum Framework only recognizes these three roles although others may be needed to help the team build the most valuable product possible.

NEW QUESTION 105

What could be a reason for a Product Owner to delay the start of a new Sprint after the conclusion of the previous Sprint?

- A. The QA team has not finished testing the previous Increment before declaring it ready to ship.
- B. The stakeholders were disappointed with the Increment produced in the previous Sprint.
- C. There is no acceptable reason.
- D. A new Sprint starts immediately after the conclusion of the previous Sprint.
- E. The Product Owner needs additional time to identify the next initiatives.
- F. There's not enough work in the Product Backlog to work on in the upcoming Sprint.

Answer: C

NEW QUESTION 109

Steven is a Scrum Master that was hired to help an organization, that is new to Scrum, understands and enacts Scrum effectively. Which three activities would be acceptable? (Choose three.)

- A. Require all teams in the organization to start using Scrum as soon as possible.
- B. Arrange 1:1 coaching sessions to discuss any identified concerns Steven may have.
- C. Schedule formal trainings.
- D. Penalize any Scrum Team members who are not staying within the Scrum Framework.
- E. Educate stakeholders and clients about Scrum.
- F. Extend Retrospectives to include formal training.

Answer: BCE

Explanation:

The Scrum Master serves the organization in several ways, including: Leading and coaching the organization in its Scrum adoption; Planning Scrum implementations within the organization; Helping employees and stakeholders understand and enact Scrum and empirical product development.

NEW QUESTION 112

In Scrum, how would budgeting and financial forecasting be performed? (Choose two.)

- A. Frequently inspect the outcomes of the delivered Sprint Increments to understand how much value is being produced per investment spent.
- B. A single release may be funded with several Sprints where every Sprint is producing shippable increments.
- C. Budgeting is not necessary as the only funding necessary is the operational costs of the Scrum Teams.
- D. Fixed budgets are not allowed in Scrum.

Answer: AB

Explanation:

The cost of developing, delivering, and sustaining products can impact how the flow of value is managed throughout the life of a product. Each Sprint is an opportunity to inspect the investment (financial, time, effort, etc.) against the returned value (customer satisfaction, revenue, etc.) of the work that has been delivered. The team can then decide on what it should do next to maximize the value of the investment.

NEW QUESTION 117

Which statement best describes Scrum?

- A. A clearly defined methodology that defines the software development process.
- B. A manual for defining best practices for software development.
- C. A clearly defined and predictable process that follows the principles of Computer Science.
- D. A framework to address complex products in complex environments.

Answer: D

Explanation:

Frameworks allow those closest to the problem the flexibility to creatively and productively deliver products of the highest possible value. Each component of Scrum serves a specific purpose and is essential to Scrum's success and your usage of Scrum to develop complex projects.

NEW QUESTION 119

Which Scrum Value is impacted by trust?

- A. Respect
- B. Courage
- C. Commitment
- D. Openness
- E. Focus
- F. All of the above

Answer: F

Explanation:

Without trust, team members will have difficulties acting and behaving in the ways that reflect the Scrum values and how effective they apply empiricism.

NEW QUESTION 120

A Development Team member has notified the Scrum Master of a potential data security risk. What action should the Scrum Master take?

- A. Notify the test team.
- B. Add a Product Backlog item to address the security issue.
- C. Ask the Development Team member to share the issue with the team as soon as possible.
- D. Wait until the Sprint Retrospective to add security to the definition of "Done".

Answer: C

Explanation:

It is best to coach the Development Team members to collaborate on issues regardless of severity. They may consult the Scrum Master or Product Owner if needed.

NEW QUESTION 121

Which of these tools is mandatory for the Product Owner to use?

- A. Release burnup chart.
- B. Burndown chart.
- C. Version control.
- D. Project Gantt chart.
- E. None of the above.

Answer: E

Explanation:

The Product Owner can use any tool, method or practice that he/she finds fit in order for him/her to make the best decisions possible.

NEW QUESTION 126

An organization wants to apply Scrum to build a new product and has hired Steven to be the Scrum Master of three new teams that will build the first release. The organization is new to Scrum and asks Steven for advice on how to start.

Which two things should Steven first advise? (Choose two.)

- A. Each Scrum Team has its own Product Backlog with items only their team will be working on.
- B. One Product Backlog to represent all of the known work needed to be done for the product.
- C. Three Product Owners, one for each Scrum Team.
- D. Having one Product Owner to be accountable for maximizing the flow of value throughout the development process and provide transparency on the overall progress.

Answer: BD

Explanation:

The Scrum Master serves the organization in several ways, including: Leading and coaching the organization in its Scrum adoption; Planning Scrum implementations within the organization; Helping employees and stakeholders understand and enact Scrum and empirical product development.

NEW QUESTION 128

Which of the following is required in Scrum?

- A. Sprint Retrospective
- B. All Development Team members answering the three QUESTION NO:s at the Daily Scrum
- C. Sprint Burndown Chart
- D. User Stories
- E. All of the above

Answer: A

NEW QUESTION 133

During the implementation of an item in the Sprint Backlog, a conflict arises between team members about what work is needed to make the item 'done'. Some say it is a part of the Definition of Done and others say it isn't. Steven, the Scrum Master, observes a debate forming and members beginning to take sides.

What is the best action for Steven to take?

- A. Bring the Development Team members together and interpret the Definition of Done for them so that there are no future conflicts on interpretation.
- B. Immediately end the discussion before it becomes worse
- C. Make the decision on what work is needed to make the item 'done' and teach the team about the importance of avoiding conflicts.
- D. Facilitate a session with all members on the Scrum Team to help them resolve the conflict, refine the Definition of Done, and become effective again
- E. Tell the team that conflicts are a natural occurrence and coach them on the value of resolving conflicts.
- F. Bring the Product Owner to the discussion and have him/her decide the work needed to make the item 'done.' It is the Product Owner's responsibility to manage the Development Team members.

Answer: C

Explanation:

The Scrum Master is a servant-leader for the Scrum Team. The Scrum Master helps the Scrum Team understand which of their interactions are helpful and which are not. The Scrum Master helps everyone change these interactions to maximize the value created by the Scrum Team.

NEW QUESTION 135

A high performing Scrum Team will have frequent Release Sprints.

- A. True
- B. False

Answer: B

Explanation:

There are no special Sprints. All Sprints are structured to produce potentially shippable product Increments.

NEW QUESTION 138

When multiple Scrum Teams are working from the same Product Backlog, also known as scaled Scrum, they must still work in conformance of the Scrum guide.

- A. True
- B. False

Answer: A

Explanation:

Scrum is a framework with built in flexibility to support multiple Scrum Teams working on a single product.

NEW QUESTION 142

What would be the responsibilities of a self-organizing Development Team?

- A. Update stakeholders on the daily progress and keep the burn-down chart updated.
- B. Select the Product Backlog items for the Sprint and do the work planned in the Sprint Backlog.
- C. Writing User Stories and reordering the Product Backlog.
- D. Deciding on the value of the product features and value estimations.

Answer: B

NEW QUESTION 144

Three Development Teams are currently building a single product and pulling work from the same Product Backlog. All three teams have identified that they will need Dan, a database specialist, to work full time in their team for the next several Sprints.

What should Steven, the Scrum Master, do to solve this potential problem?

- A. Manage the items in the Sprint Backlogs so that Dan can be utilized evenly for each team.
- B. Assign Dan to the team with the most urgent tasks first and then move him to the next team and so on until the required support is completed.
- C. Facilitate a discussion with all Development Teams on how they want to deal with this issue, and help them implement their preferred solution.
- D. Ask Dan to work with the HR department to recruit and hire additional database specialist
- E. In the meantime, have the Product Owner move items that do not depend on Dan to the top of the Product Backlog.

Answer: C

Explanation:

As a servant/leader, the Scrum Master facilitates conversations through open ended QUESTION NO:s in order to help the team members make the best possible decisions according to what is known at the time. He/she does not approve or reject team decisions but ensures the team stays within the boundaries of the Scrum framework.

NEW QUESTION 148

Cross-functional teams are specialized for working on specific system components (e.g. design, database, backend, frontend).

- A. True
- B. False

Answer: B

Explanation:

Cross-functional teams have all the skills and competencies needed to deliver end-to-end work.

NEW QUESTION 150

A Scrum Team must have a Product Owner and Scrum Master.

- A. Fals
- B. A Scrum Master is only necessary when requested or needed.
- C. Tru
- D. Each must be a full-time member on the Scrum Team.
- E. Tru
- F. Their participation and availability will impact the outcomes produced by the Scrum Team.
- G. Fals
- H. If a Product Owner is unavailable, he/she can be replaced by a Business Analyst.

Answer: C

Explanation:

A Product Owner or Scrum Master can be dedicated to one team OR participate as a member on more than one team. How much time they spend with each team will directly impact effectiveness of the team.

NEW QUESTION 153

Which stakeholder is the most important for the Product Owner to satisfy?

- A. The company founder
- B. The board of directors
- C. The Head of Product
- D. The Product's users

Answer: D

Explanation:

The highest priority is to satisfy the end users.

NEW QUESTION 156

What would likely happen if management only changed the organization's current terminology to fit Scrum without the proper understanding and support of Scrum as defined in the Scrum Guide?

- A. Very little change will happen as the vocabulary in Scrum is specifically defined for implementing Scrum.
- B. The organization may not realize the real benefits of Scrum as there would be no real change on the way the teams work.
- C. Organizations may feel less stressed as the behaviors would remain familiar to management.
- D. All answers apply.

Answer: D

Explanation:

The defined terminology in Scrum was selected, designed, and defined specifically for supporting the Scrum Framework. Understanding the differences between traditional methods and the Scrum Framework will help move teams in the right direction in Scrum adoption.

NEW QUESTION 157

Why is it important that there is only one Product Owner per product?

- A. The Scrum Master knows who will be his back-up whenever he is unavailable, it saves the organization time and money, and the Development Team knows who to request tasks from.
- B. It is clear who is accountable for the ultimate success of the product, the Development Team always knows who determines priorities, and it helps avoid barriers to effective communication and rapid decision-making.
- C. It isn't important as multiple Product Owners can easily share a single Product Backlog.

Answer: B

NEW QUESTION 159

The Development Team discovers that it doesn't have the tools and infrastructure to make each selected Product Backlog item done. What is the most appropriate action for the Scrum Master to take?

- A. Stop the Sprint and have the Development team work on the infrastructure before continuing.
- B. Encourage the Product Owner to accept partially done Increments and complete the work in the Hardening Sprint.
- C. Coach the Development Team to improve its skills, tools and infrastructure over time and establish a Definition of "Done" that is actually possible to achieve given the current circumstances.

Answer: C

Explanation:

The Scrum Master serves the Development Team by coaching it in self-organization and cross-functionality.

NEW QUESTION 160

Which two behaviors would reflect Servant Leadership in a Scrum Master? (Choose two.)

- A. Facilitating Scrum Events as requested or needed.
- B. Coaching the Development Team, the Product Owner and the organization on how to work empirically.
- C. Staying away from internal Development Team interactions, maximizing their autonomy and freedom.
- D. Resolving every impediment for the Development Team.

Answer: AB

Explanation:

The Scrum Master is responsible for serving the team by facilitating and removing impediments to ensure there are minimal roadblocks in the way of the team. The Scrum Master also coaches the Scrum Team and organization to ensure the benefits of Scrum is realized.

"Removing every impediment for the Development Team" may seem like the right thing to do but by doing it this way, the Dev Team's ability to self-organize would be limited. There are some impediments that will depend solely on the Scrum Master and there will be some that require collaboration with the Dev Team. The former might be working with the finance department to renew services that the team is using. The latter might be lack of skills to make a particular item done. The Scrum Master can coach the team on finding different solutions to resolve the issue.

"Removing impediments" is good. "Removing every impediment for the Development Team" is not so good and sometimes not even possible.

NEW QUESTION 161

What action can the Scrum Master take to ensure communication between the Development Team and Product Owner is effective?

- A. Ensure all communication goes through the Scrum Master first.
- B. Teach the Product Owner to talk in terms of technology and technical requirements.
- C. Observe the communications between them and facilitate discussions if needed or by request.
- D. Translate the technologies used by the Development Team in order for the Product Owner to make decisions.

Answer: C

Explanation:

One of the primary responsibilities of a Scrum Master is the ability to facilitate regardless of the context or setting.

NEW QUESTION 162

When does a Sprint end?

- A. When there is no work remaining in the Sprint Backlog.
- B. When the time-box expires.
- C. It depends on the Product Owner.
- D. Immediately after the conclusion of the Sprint Review.

Answer: B

NEW QUESTION 164

The purpose of a Sprint is to produce a potentially releasable product Increment.

- A. True
- B. False

Answer: A

Explanation:

Sprints promote iterative and incremental development.

NEW QUESTION 167

Which statement best describes the responsibility of the Product Owner?

- A. Optimizing the value of the work the Development Team does.
- B. Managing the Development Team.
- C. Ensuring that the work meets the commitments to the stakeholders.
- D. Acting as the go-between for the stakeholders.

Answer: A

Explanation:

The Product Owner is accountable for the flow of value that the Development Team selects to work on.

NEW QUESTION 172

What guideline should the Scrum Master provide if the Product Owner asks how estimations should be made in Scrum?

- A. Estimates must be made in Story Points.
- B. Estimates must be in relative units.
- C. The Development Team is responsible for estimates.
- D. Estimates are made by the Product Owner.
- E. Estimates must follow the Fibonacci Sequence.

Answer: C

Explanation:

The people who will perform the work make the final estimates.

NEW QUESTION 177

The Development Team has suggested to move the Daily Scrum to every other day instead of every day. What is the most appropriate action for the Scrum Master to take?

- A. Learn why the Development Team wants this, coach the team on why the Daily Scrum is important and work with them to improve the outcome of the Daily Scrum.
- B. Support the self-organizing team's decision.
- C. Have the Development Team members vote on which days the Daily Scrum should occur.

Answer: A

Explanation:

The Scrum Master is responsible for promoting and supporting Scrum as defined in the Scrum Guide. Scrum Masters do this by helping everyone understand Scrum theory, practices, rules, and values.

NEW QUESTION 182

Currently, your engineering department is organized in siloed teams that specialize by function (for example, design, front-end, back-end, database, and testing). What would you consider when moving away from component teams towards feature teams?

- A. You cannot begin Scrum without have feature team
- B. It is easier to measure and compare performancebetween feature team
- C. Feature teams should have an equal number of team members.
- D. Members within feature teams require compatible personalitie
- E. Feature teams should have a mix of junior and senior member
- F. Tasks are completed more quickly than component teams.
- G. Moving from component teams to feature teams could reduce, productivity in the initial stage
- H. Feature teams have less communication complexit
- I. Getting the support from the business side makes the transition easier.

Answer: C

Explanation:

The initial phase of forming a new team could cause short-term disruption as they need time to discover how to best work together. Because all the skills and competencies are inside the team the communication overhead is reduced. Having an environment that supports the Scrum values reduces complexity.

NEW QUESTION 183

At the Sprint Planning, the Development Team is not able to forecast the number of Product Backlog items it can do in the upcoming Sprint due to unclear requirements. The Product Owner, however, was able to clearly define the business objective he hopes to achieve in the Sprint. Which of the following two actions would you support? (Choose two.)

- A. The Development Team forecasts the most likely Product Backlog items to meet the business objective and create a Sprint Backlog based on a likely initial design and plan.
- B. Once the time-box for the Sprint Planning meeting is over, they start implementation and continue to analyze, decompose, and create additional functionality during the Sprint.
- C. If all agree they can extend the Sprint Planning until the Development Team can forecast enough Product Backlog items before starting the implementation.
- D. Allow the Development Team members as much time as needed to review the Product Backlog items and reconvene with the Product Owner when they are confident enough to make a forecast for the Sprint.
- E. They discuss in the upcoming Sprint Retrospective why this happened and what changes will make it less likely to occur again.

Answer: AD

Explanation:

All events are time-boxed events, such that every event has a maximum duration. The Development Team modifies the Sprint Backlog throughout the Sprint, and the Sprint Backlog emerges during the Sprint. This emergence occurs as the Development Team works through the plan and learns more about the work needed to achieve the Sprint Goal.

NEW QUESTION 188

A Scrum Team has been working on a product for several iterations and has an average velocity of 55 units of 'done' work per Sprint. A second team will be added to work on the same product. What might be the impact on the original team?

- A. Their velocity is likely not affected and will remain at 55.
- B. Their velocity is likely to drop and be less than 55.
- C. Their velocity is likely to rise and be more than 55.

Answer: B

Explanation:

Similar to membership changes within a single Scrum Team, adding or removing additional Scrum Teams working on the same product will impact productivity in the short term. Adding additional teams often go through recognizable stages as they change from being a collection of strangers to a united group with common goals. Bruce Tuckman's Forming, Storming, Norming, and Performing model describes these stages.

NEW QUESTION 189

How often should Development Team membership change?

- A. Frequently in order to share knowledge.
- B. As needed, while taking into account a short term reduction in productivity.
- C. Never, as it conflicts with the Scrum process.
- D. As needed, as long as it doesn't impact productivity.

Answer: B

Explanation:

It is not mandatory that the same team stay together, although it must be understood that any changes to the team will impact how they work together.

NEW QUESTION 190

Part of the team's Definition of "Done" requires creating or updating technical documentation in order to maintain the product and/or features in the future. The team's technical writer will be on vacation during the Sprint. What should you do?

- A. Encourage the technical writers from other teams to form a specialized team to organize and plan the work for multiple teams.
- B. The Development Team members will write it as they are still responsible for creating the documentation to make the Increment done in conformance with their Definition of "Done."
- C. Wait until the technical writer returns before continuing with related items.
- D. Complete all development work first while adding technical documentation to the Product Backlog to be done in a subsequent Sprint.

Answer: B

Explanation:

All Product Backlog items selected for the Sprint are owned by the Development Team as a whole. Although individual members may work on specific tasks, the Development Team is still accountable for doing the work to deliver a shippable Increment.

NEW QUESTION 195

Which of the following actions is appropriate for a Scrum Master at the Daily Scrum?

- A. Making sure each member has an opportunity to answer all three QUESTION NO:s.

- B. Leading the Daily Scrum.
- C. Teaching the Development Team to keep the Daily Scrum time-boxed to 15 minutes or less.
- D. Updating the Scrum board.
- E. All of the above.

Answer: C

NEW QUESTION 196

What is the most appropriate action for the Scrum Master to take if the Product Owner is having difficulties managing the Product Backlog?

- A. Have the Development Team order the work instead of the Product Owner.
- B. Have the Product Owner order the items based on size, having the Development Team work on the smallest items first.
- C. Offer the Product Owner help in understanding that the goal of ordering the Product Backlog is to maximize the flow of value.
- D. Delegate the work to the Assistant Product Owner.
- E. Delay the Sprint in order for the Product Owner to have enough time to prioritize the Product Backlog.

Answer: C

Explanation:

The Product Owner's primary concern is the flow of value reflected in the ordering of the Product Backlog.
