You have a Microsoft Exchange Server 2019 organization that contains 200 mailboxes.
You need to add a second email address to each mailbox. The address must have a syntax that uses the first letter of each user's last name, followed by the user's first name, and then @fabrikam.com.

https://docs.microsoft.com/en-us/exchange/email-addresses-and-address-books/email-address-policies/email-add Email address policies define the rules that create email addresses for recipients in your Exchange organization.

The basic components of an email address policy are:
Email address templates: Define the email address format for the recipients (for example
<firstname>@contoso.com or <lastname>.<firstname>@contoso.com).
Recipient filter: Specifies the recipients whose email addresses are configured by the policy.
Priority: Specifies the order to apply the email address policies (important if a recipient is identified by more than one policy).
