

Exam Questions MS-500

Microsoft 365 Security Administrator

<https://www.2passeasy.com/dumps/MS-500/>

NEW QUESTION 1

An administrator configures Azure AD Privileged Identity Management as shown in the following exhibit.

Exchange Administrator - Members

+ Add member
X Remove member
Access reviews
Export
Refresh

Assignment type
All

Search
Search by members name

Member	Email	ASSIGNMENT TYPE	EXPIRATION
Admin1	Admin1@M365x901434.onmicrosoft.com	Permanent	-
Admin2	Admin2@M365x901434.onmicrosoft.com	Eligible	-

What should you do to meet the security requirements?

- Change the Assignment Type for Admin2 to Permanent
- From the Azure Active Directory admin center, assign the Exchange administrator role to Admin2
- From the Azure Active Directory admin center, remove the Exchange administrator role to Admin1
- Change the Assignment Type for Admin1 to Eligible

Answer: D

NEW QUESTION 2

You need to recommend a solution that meets the technical and security requirements for sharing data with the partners.

What should you include in the recommendation? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- Create an access review.
- Assign the Global administrator role to User1.
- Assign the Guest inviter role to User1.
- Modify the External collaboration settings in the Azure Active Directory admin center.

Answer: AC

NEW QUESTION 3

You need to resolve the issue that targets the automated email messages to the IT team. Which tool should you run first?

- Synchronization Service Manager
- Azure AD Connect wizard
- Synchronization Rules Editor
- IdFix

Answer: B

Explanation:

<https://docs.microsoft.com/en-us/office365/enterprise/fix-problems-with-directory-synchronization>

Case Study: 2 Litware, Inc Overview

Litware, Inc. is a financial company that has 1,000 users in its main office in Chicago and 100 users in a branch office in San Francisco.

Existing Environment

Internal Network Infrastructure

The network contains a single domain forest. The forest functional level is Windows Server 2016. Users are subject to sign-in hour restrictions as defined in Active Directory.

The network has the IP address range shown in the following table.

Location	IP address range
Chicago office internal network	192.168.0.0/20
Chicago office perimeter network	172.16.0.0/24
Chicago office external network	131.107.83.0/28
San Francisco office internal network	192.168.16.0/20
San Francisco office perimeter network	172.16.16.0/24
San Francisco office external network	131.107.16.218/32

The offices connect by using Multiprotocol Label Switching (MPLS).

The following operating systems are used on the network:

- Windows Server 2016
- Windows 10 Enterprise
- Windows 8.1 Enterprise

The internal network contains the systems shown in the following table.

Office	Name	Configuration
Chicago	DC1	Domain controller
Chicago	DC2	Domain controller
San Francisco	DC3	Domain controller
Chicago	Server1	SIEM-server

Litware uses a third-party email system.

Cloud Infrastructure

Litware recently purchased Microsoft 365 subscription licenses for all users.

Microsoft Azure Active Directory (Azure AD) Connect is installed and uses the default authentication settings. User accounts are not yet synced to Azure AD.

You have the Microsoft 365 users and groups shown in the following table.

Name	Object type	Description
Group 1	Security group	A group for testing Azure and Microsoft 365 functionality
User1	User	A test user who is a member of Group1
User2	User	A test user who is a member of Group1
User3	User	A test user who is a member of Group1
User4	User	An administrator
Guest1	Guest user	A guest user

Planned Changes

Litware plans to implement the following changes: Migrate the email system to Microsoft Exchange Online Implement Azure AD Privileged Identity Management

Security Requirements

Litware identifies the following security requirements:

- Create a group named Group2 that will include all the Azure AD user accounts. Group2 will be used to provide limited access to Windows Analytics
- Create a group named Group3 that will be used to apply Azure Information Protection policies to pilot users. Group3 must only contain user accounts
- Use Azure Advanced Threat Protection (ATP) to detect any security threats that target the forest
- Prevent users locked out of Active Directory from signing in to Azure AD and Active Directory
- Implement a permanent eligible assignment of the Compliance administrator role for User1
- Integrate Windows Defender and Windows Defender ATP on domain-joined servers
- Prevent access to Azure resources for the guest user accounts by default
- Ensure that all domain-joined computers are registered to Azure AD

Multi-factor authentication (MFA) Requirements

Security features of Microsoft Office 365 and Azure will be tested by using pilot Azure user accounts. You identify the following requirements for testing MFA.

Pilot users must use MFA unless they are signing in from the internal network of the Chicago office. MFA must NOT be used on the Chicago office internal network.

If an authentication attempt is suspicious, MFA must be used, regardless of the user location Any disruption of legitimate authentication attempts must be minimized

General Requirements

Litware want to minimize the deployment of additional servers and services in the Active Directory forest.

NEW QUESTION 4

You need to implement Windows Defender ATP to meet the security requirements. What should you do?

- Configure port mirroring
- Create the ForceDefenderPassiveMode registry setting
- Download and install the Microsoft Monitoring Agent
- Run WindowsDefenderATPOnboardingScript.cmd

Answer: C

Explanation:

Case Study: 3 Contoso, Ltd Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and three branch offices in Seattle, and New York.

The company has the offices shown in the following table.

Location	Employees	Laptops	Desktops computers	Mobile devices
Montreal	2, 500	2, 800	300	3, 100
Seattle	1, 000	1, 100	200	1, 500
New York	300	320	30	400

Contoso has IT, human resources (HR), legal, marketing, and finance departments. Contoso uses Microsoft 365.

Existing Environment Infrastructure

The network contains an Active Directory domain named contoso.com that is synced to a Microsoft

Azure Active Directory (Azure AD) tenant. Password writeback is enabled.

The domain contains servers that run Windows Server 2016. The domain contains laptops and desktop computers that run Windows 10 Enterprise.

Each client computer has a single volume.

Each office connects to the Internet by using a NAT device. The offices have the IP addresses shown in the following table.

Location	IP address space	Public NAT segment
Montreal	10.10.0.0/16	190.15.1.0/24
Seattle	172.16.0.0/16	194.25.2.0/24
New York	192.168.0.0/16	198.35.3.0/24

Named locations are defined in Azure AD as shown in the following table.

Name	IP address range	Trusted
Montreal	10.10.0.0/16	Yes
New York	192.168.0.0/16	No

From the Multi-Factor Authentication page, an address space of 198.35.3.0/24 is defined in the trusted IPs list.

Azure Multi-Factor Authentication (MFA) is enabled for the users in the finance department. The tenant contains the users shown in the following table.

Name	User type	City	Role
User1	Member	Seattle	None
User2	Member	Sea	Password administrator
User3	Member	SEATTLE	None
User4	Guest	SEA	None
User5	Member	London	None
User6	Member	London	Customer LockBox Access Approver
User7	Member	Sydney	Reports reader
User8	Member	Sydney	User administrator
User9	Member	Montreal	None

The tenant contains the groups shown in the following table.

Name	Group type	Dynamic membership rule
ADGroup1	Security	User.city-contains "SEA"
ADGroup2	Office 365	User.city-match "Sea"

Customer Lockbox is enabled in Microsoft 365. Microsoft Intune Configuration

The devices enrolled in Intune are configured as shown in the following table.

Name	Platform	Encryption	Member of
Device1	Android	Disabled	GroupA, GroupC
Device2	Windows 10	Enabled	GroupB, GroupC
Device3	Android	Disabled	GroupB, GroupC
Device4	Windows 10	Disabled	GroupB
Device5	iOS	Not applicable	GroupA
Device6	Windows 10	Enabled	None

The device compliance policies in Intune are configured as shown in the following table.

Name	Platform	Encryption	Assigned
DevicePolicy1	Android	Not configured	Yes
DevicePolicy2	Windows 10	Required	Yes
DevicePolicy3	Android	Required	Yes

The device compliance policies have the assignments shown in the following table.

Name	Include	Exclude
DevicePolicy1	GroupC	None
DevicePolicy2	GroupB	GroupC
DevicePolicy3	GroupA	None

The Mark devices with no compliance policy assigned as setting is set to Compliant.

Requirements

Technical Requirements

Contoso identifies the following technical requirements:

- Use the principle of least privilege
- Enable User1 to assign the Reports reader role to users
- Ensure that User6 approves Customer Lockbox requests as quickly as possible
- Ensure that User9 can implement Azure AD Privileged Identity Management

NEW QUESTION 5

HOTSPOT

You are evaluating which finance department users will be prompted for Azure MFA credentials. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
A finance department user who has an IP address from the Montreal office will be prompted for Azure MFA credentials.	<input type="radio"/>	<input type="radio"/>
A finance department user who works from home and who has an IP address of 193.77.140.140 will be prompted for Azure MFA credentials.	<input type="radio"/>	<input type="radio"/>
A finance department user who has an IP address from the New York office will be prompted for Azure MFA credentials.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
A finance department user who has an IP address from the Montreal office will be prompted for Azure MFA credentials.	<input type="radio"/>	<input checked="" type="radio"/>
A finance department user who works from home and who has an IP address of 193.77.140.140 will be prompted for Azure MFA credentials.	<input checked="" type="radio"/>	<input type="radio"/>
A finance department user who has an IP address from the New York office will be prompted for Azure MFA credentials.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 6

What should User6 use to meet the technical requirements?

- A. Supervision in the Security & Compliance admin center
- B. Service requests in the Microsoft 365 admin center
- C. Security & privacy in the Microsoft 365 admin center
- D. Data subject requests in the Security & Compliance admin center

Answer: B

NEW QUESTION 7

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription that contains the users shown in the following table.

Name	Role
User1	Compliance Manager Contributor
User2	Compliance Manager Assessor
User3	Compliance Manager Administrator
User4	Portal Admin

You discover that all the users in the subscription can access Compliance Manager reports. The Compliance Manager Reader role is not assigned to any users. You need to recommend a solution to prevent a user named User5 from accessing the Compliance Manager reports.

Solution: You recommend modifying the licenses assigned to User5. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Case Study: 4 Mix Questions

NEW QUESTION 8

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription that is associated to a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com.

You use Active Directory Federation Services (AD FS) to federate on-premises Active Directory and the tenant. Azure AD Connect has the following settings:

- Source Anchor: objectGUID
- Password Hash Synchronization: Disabled
- Password writeback: Disabled
- Directory extension attribute sync: Disabled
- Azure AD app and attribute filtering: Disabled
- Exchange hybrid deployment: Disabled
- User writeback: Disabled

You need to ensure that you can use leaked credentials detection in Azure AD Identity Protection. Solution: You modify the Azure AD app and attribute filtering settings.

Does that meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 9

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 E5 subscription that is associated to a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com.

You use Active Directory Federation Services (AD FS) to federate on-premises Active Directory and the tenant. Azure AD Connect has the following settings:

- Source Anchor: objectGUID
- Password Hash Synchronization: Disabled

- Password writeback: Disabled
- Directory extension attribute sync: Disabled
- Azure AD app and attribute filtering: Disabled
- Exchange hybrid deployment: Disabled
- User writeback: Disabled

You need to ensure that you can use leaked credentials detection in Azure AD Identity Protection. Solution: You modify the Password Hash Synchronization settings.

Does that meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/security/azure-ad-secure-steps>

NEW QUESTION 10

You have a hybrid Microsoft 365 environment. All computers run Windows 10 and are managed by using Microsoft Intune.

You need to create a Microsoft Azure Active Directory (Azure AD) conditional access policy that will allow only Windows 10 computers marked as compliant to establish a VPN connection to the on- premises network.

What should you do first?

- A. From the Azure Active Directory admin center, create a new certificate
- B. Enable Application Proxy in Azure AD
- C. From Active Directory Administrative Center, create a Dynamic Access Control policy
- D. From the Azure Active Directory admin center, configure authentication methods

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows-server/remote/remote-access/vpn/ad-ca-vpn- connectivitywindows10>

NEW QUESTION 10

You have a Microsoft 365 subscription.

You need to ensure that all users who are assigned the Exchange administrator role have multi-factor authentication (MFA) enabled by default.

What should you use to achieve the goal?

- A. Security & Compliance permissions
- B. Microsoft Azure Active Directory (Azure AD) Privileged Identity Management
- C. Microsoft Azure AD group management
- D. Microsoft Office 365 user management

Answer: B

NEW QUESTION 14

You have a Microsoft 365 E5 subscription and a hybrid Microsoft Exchange Server organization.

Each member of a group named Executive has an on-premises mailbox. Only the Executive group members have multi-factor authentication (MFA) enabled. Each member of a group named Research has a mailbox in Exchange Online.

You need to use Microsoft Office 365 Attack simulator to model a spear-phishing attack that targets the Research group members.

The email address that you intend to spoof belongs to the Executive group members. What should you do first?

- A. From Azure ATP admin center, configure the primary workspace settings
- B. From the Microsoft Azure portal, configure the user risk settings in Azure AD Identity Protection
- C. Enable MFA for the Research group members
- D. Migrate the Executive group members to Exchange Online

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/attack-simulator>

NEW QUESTION 17

You have a Microsoft 365 tenant.

You have 500 computers that run Windows 10.

You plan to monitor the computers by using Windows Defender Advanced Threat Protection (Windows Defender ATP) after the computers are enrolled in Microsoft Intune.

You need to ensure that the computers connect to Windows Defender ATP. How should you prepare Intune for Windows Defender ATP?

- A. Configure an enrollment restriction
- B. Create a device configuration profile
- C. Create a conditional access policy
- D. Create a Windows Autopilot deployment profile

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/intune/advanced-threat-protection>

NEW QUESTION 20

You have a Microsoft 365 subscription.

You create an Advanced Threat Protection (ATP) safe attachments policy to quarantine malware. You need to configure the retention duration for the attachments in quarantine.

Which type of threat management policy should you create from the Security&Compliance admin center?

- A. ATP anti-phishing
- B. DKIM
- C. Anti-spam
- D. Anti-malware

Answer: D

NEW QUESTION 25

Your company has 500 computers.

You plan to protect the computers by using Windows Defender Advanced Threat Protection (Windows Defender ATP). Twenty of the computers belong to company executives.

You need to recommend a remediation solution that meets the following requirements: Windows Defender ATP administrators must manually approve all remediation for the executives

Remediation must occur automatically for all other users

What should you recommend doing from Windows Defender Security Center?

- A. Configure 20 system exclusions on automation allowed/block lists
- B. Configure two alert notification rules
- C. Download an offboarding package for the computers of the 20 executives
- D. Create two machine groups

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-atp/machine-groupswindows-defender-advanced-threat-protection>

NEW QUESTION 30

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 tenant. You create a label named CompanyConfidential in Microsoft Azure Information Protection.

You add CompanyConfidential to a global policy.

A user protects an email message by using CompanyConfidential and sends the label to several external recipients. The external recipients report that they cannot open the email message.

You need to ensure that the external recipients can open protected email messages sent to them. Solution: You create a new label in the global policy and instruct the user to resend the email message.

Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION 32

Note: This question is part of series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 tenant. You create a label named CompanyConfidential in Microsoft Azure Information Protection.

You add CompanyConfidential to a global policy.

A user protects an email message by using CompanyConfidential and sends the label to several external recipients. The external recipients report that they cannot open the email message.

You need to ensure that the external recipients can open protected email messages sent to them. Solution: You modify the encryption settings of the label.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 37

HOTSPOT

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the groups shown in the following table.

Name	Type	Email address
Group1	Security Group – Domain Local	Group1@contoso.com
Group2	Security Group – Universal	None
Group3	Distribution Group – Global	None
Group4	Distribution Group – Universal	Group4@contoso.com

The domain is synced to a Microsoft Azure Active Directory (Azure AD) tenant that contains the groups shown in the following table.

Name	Type	Membership type
Group11	Security group	Assigned
Group12	Security group	Dynamic
Group13	Office	Assigned
Group14	Mail-enabled security group	Assigned

You create an Azure Information Protection policy named Policy1. You need to apply Policy1.

To which groups can you apply Policy1? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

On-premises Active Directory groups:

Group4 only	V
Group1 and Group4 only	
Group3 and Group4 only	
Group1, Group3, and Group4 only	
Group1, Group2, Group3, and Group4	

Azure AD groups:

Group13 only	V
Group13 and Group14 only	
Group11 and Group12 only	
Group11, Group13, and Group14 only	
Group11, Group12, Group13, and Group14 only	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/information-protection/prepare>

NEW QUESTION 41

HOTSPOT

Your company has a Microsoft 365 subscription, a Microsoft Azure subscription, and an Azure Active Directory (Azure AD) tenant named contoso.com.

The company has the offices shown in the following table.

Location	IP address space	Public NAT segment
Montreal	10.10.0.0/16	190.15.1.0/24
Seattle	172.16.0.0/16	194.25.2.0/24
New York	192.168.0.0/16	198.35.3.0/24

The tenant contains the users shown in the following table.

Name	Email address
User1	User1@contoso.com
User2	User2@contoso.com

You create the Microsoft Cloud App Security policy shown in the following exhibit.

Create filters for the policy

Act on:

Single activity:
Every activity that matches the filters

Repeated activity:
Repeated activity by a single user

Minimum repeated activities:

Within timeframe: minutes

☐ In a single app

☐ Count only unique target files or folders per user

[Edit and preview results](#)

ACTIVITIES MATCHING ALL OF THE FOLLOWING

equals

OR

equals

From group equals

as

Alerts

☒ Create alert Use your organization's default settings

Daily alert limit

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

Statements	Yes	No
In the Monreal office, if User1 downloads 40 files in 30 seconds, an alert will be created.	<input type="radio"/>	<input type="radio"/>
In the Seattle, if User2 downloads one file per second for two minutes, an alert will be created.	<input type="radio"/>	<input type="radio"/>
In the New York office, if User1 downloads 40 files in 10 seconds, an alert will be created.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
 B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
In the Monreal office, if User1 downloads 40 files in 30 seconds, an alert will be created.	<input checked="" type="radio"/>	<input type="radio"/>
In the Seattle, if User2 downloads one file per second for two minutes, an alert will be created.	<input checked="" type="radio"/>	<input type="radio"/>
In the New York office, if User1 downloads 40 files in 10 seconds, an alert will be created.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 42

You have a Microsoft 365 subscription.

Some users access Microsoft SharePoint Online from unmanaged devices.

You need to prevent the users from downloading, printing, and synching files. What should you do?

- A. Run the Set-SPODataConnectionSetting cmdlet and specify the AssignmentCollection parameter
 B. From the SharePoint admin center, configure the Access control settings
 C. From the Microsoft Azure portal, create an Azure Active Directory (Azure AD) Identity Protection sign-in risk policy
 D. From the Microsoft Azure portal, create an Azure Active Directory (Azure AD) conditional access policy

Answer: B

NEW QUESTION 47

You have a Microsoft 365 subscription.

A user reports that changes were made to several files in Microsoft OneDrive.

You need to identify which files were modified by which users in the user's OneDrive. What should you do?

- A. From the Azure Active Directory admin center, open the audit log
- B. From the OneDrive admin center, select Device access
- C. From Security & Compliance, perform an eDiscovery search
- D. From Microsoft Cloud App Security, open the activity log

Answer: D

Explanation:

Reference:

<https://docs.microsoft.com/en-us/cloud-app-security/activity-filters>

NEW QUESTION 51

DRAG DROP

You have a Microsoft 365 subscription.

A customer requests that you provide her with all documents that reference her by name. You need to provide the customer with a copy of the content.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Close the case.	
Regenerate a report.	
View the results.	
Export the results.	
Create a Data Subject Request (DSR) case.	
Save the search.	
Download the results.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/gdpr-dsr-office365>

NEW QUESTION 55

You recently created and published several labels policies in a Microsoft 365 subscription.

You need to view which labels were applied by users manually and which labels were applied automatically.

What should you do from the Security & Compliance admin center?

- A. From Search & investigation, select Content search
- B. From Data governance, select Events
- C. From Search & investigation, select eDiscovery
- D. From Reports, select Dashboard

Answer: B

NEW QUESTION 60

You have a Microsoft 365 subscription.

You need to enable auditing for all Microsoft Exchange Online users. What should you do?

- A. From the Exchange admin center, create a journal rule
- B. Run the Set-MailboxDatabase cmdlet
- C. Run the Set-Mailbox cmdlet
- D. From the Exchange admin center, create a mail flow message trace rule.

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/enable-mailbox-auditing>

NEW QUESTION 65

You create a label that encrypts email data. Users report that they cannot use the label in Outlook on the web to protect the email messages they send. You need to ensure that the users can use the new label to protect their email. What should you do?

- A. Modify the priority order of label policies
- B. Wait six hours and ask the users to try again
- C. Create a label policy
- D. Create a new sensitive information type

Answer: B

NEW QUESTION 69

You have a hybrid Microsoft 365 environment.

All computers run Windows 10 Enterprise and have Microsoft Office 365 ProPlus installed. All the computers are joined to Active Directory.

You have a server named Server1 that runs Windows Server 2016. Server1 hosts the telemetry database. You need to prevent private details in the telemetry data from being transmitted to Microsoft.

What should you do?

- A. On Server1, run readinessreportcreator.exe
- B. Configure a registry on Server1
- C. Configure a registry on the computers
- D. On the computers, run tdadm.exe

Answer: C

NEW QUESTION 73

You have a Microsoft 365 subscription.

Yesterday, you created retention labels and published the labels to Microsoft Exchange Online mailboxes.

You need to ensure that the labels will be available for manual assignment as soon as possible. What should you do?

- A. From the Security & Compliance admin center, create a label policy
- B. From Exchange Online PowerShell, run Start-RetentionAutoTagLearning
- C. From Exchange Online PowerShell, run Start-ManagedFolderAssistant
- D. From the Security & Compliance admin center, create a data loss prevention (DLP) policy

Answer: C

NEW QUESTION 76

DRAG DROP

You have a Microsoft 365 subscription.

You have a site collection named SiteCollection1 that contains a site named Site2. Site2 contains a document library named Customers.

Customers contains a document named Litware.docx. You need to remove Litware.docx permanently.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
From PowerShell, run Remove-SPOUserProfile	
Delete Litware.docx from the Recycle Bin of Site2.	
From PowerShell, run Set-SPOSite.	
Delete Litware.docx from the Recycle Bin of SiteCollection1.	
From Powershell, run Remove-SPOUserInfo	
Delete Litware.docx from Customers.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Delete Litware.docx from Customers.

Delete Litware.docx from the Recycle Bin of Site2.

Delete Litware.docx from the Recycle Bin of SiteCollection1.

NEW QUESTION 81

Your company has a main office and a Microsoft 365 subscription.

You need to enforce Microsoft Azure Multi-Factor Authentication (MFA) by using conditional access for all users who are NOT physically present in the office. What should you include in the configuration?

- A. a user risk policy
- B. a sign-in risk policy
- C. a named location in Azure Active Directory (Azure AD)
- D. an Azure MFA Server

Answer: C

Explanation:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition>

NEW QUESTION 83

HOTSPOT

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table.

Name	Member of	Multi-factor authentication (MFA) status
User1	Group1, Group2	Disabled
User2	Group1	Disabled

You create and enforce an Azure AD Identity Protection sign-in risk policy that has the following settings:

- Assignments: Include Group1, Exclude Group2
 - Conditions: Sign in risk of Low and above
 - Access: Allow access, Require password multi-factor authentication
- You need to identify how the policy affects User1 and User2.

What occurs when each user signs in from an anonymous IP address? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

User1:

	▼
Blocked	
Can sign in without MFA	
Prompted for MFA	

User2:

	▼
Blocked	
Can sign in without MFA	
Prompted for MFA	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

User1: ▼

Blocked
 Can sign in without MFA

NEW QUESTION 84

You have a Microsoft 365 Enterprise E5 subscription.

You use Windows Defender Advanced Threat Protection (Windows Defender ATP).

You need to integrate Microsoft Office 365 Threat Intelligence and Windows Defender ATP. Where should you configure the integration?

- A. From the Microsoft 365 admin center, select Settings, and then select Services & add-ins.
- B. From the Security & Compliance admin center, select Threat management, and then select Explorer.
- C. From the Microsoft 365 admin center, select Reports, and then select Security & Compliance.
- D. From the Security & Compliance admin center, select Threat management and then select Threat tracker.

Answer: B

Explanation:

NEW QUESTION 85

HOTSPOT

You have a Microsoft 365 subscription that uses a default name of litwareinc.com.

You configure the Sharing settings in Microsoft OneDrive as shown in the following exhibit.

Links

Choose the kind of link that's selected by default when users share items.

Default link type

☒ Shareable: Anyone with the link

☐ Internal: Only people in your organization

☐ Direct: Specific people

External sharing

Users can share with:

SharePoint

Most permissive

Least permissive

OneDrive

Anyone

Users can create shareable links that don't require sign-in

New and existing external users

External users must sign-in

Existing external users

Only users already in your organization's directory

Only people in your organization

No external sharing allowed.

Your sharing setting for OneDrive can't be more permissive than your setting for SharePoint.

Advanced settings for external sharing

☒ Allow or block sharing with people on specific domains

Allow only these domains: Contoso.com, Adatum.com

Add domains

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

A user who has an email address of user1@fabrikam.com [answer choice]

	▼
cannot access OneDrive content	
can access OneDrive content after a link is created	
must be added to be a group before the user can access shared files	

If a new guest user is created for user2@contoso.com [answer choice]

	▼
the user cannot access OneDrive content	
the user can access OneDrive content after a link is created	
must be added to a group before the user can access shared files	

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 89

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You have a user named User1. Several users have full access to the mailbox of User1.

Some email messages sent to User1 appear to have been read and deleted before the user viewed them.

When you search the audit log in Security & Compliance to identify who signed in to the mailbox of User1, the results are blank.

You need to ensure that you can view future sign-ins to the mailbox of User1. You run the Set-Mailbox -Identity "User1" -AuditEnabled \$true command. Does that meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

NEW QUESTION 100

You have a Microsoft 365 subscription. You enable auditing for the subscription.

You plan to provide a user named Auditor with the ability to review audit logs. You add Auditor to the Global administrator role group.

Several days later, you discover that Auditor disabled auditing.

You remove Auditor from the Global administrator role group and enable auditing.

- A. Security operator
- B. Security reader
- C. Security administrator
- D. Compliance administrator

Answer: D

NEW QUESTION 103

DRAG DROP

You have a Microsoft 365 E5 subscription.

All computers run Windows 10 and are onboarded to Windows Defender Advanced Threat Protection (Windows Defender ATP).

You create a Windows Defender machine group named MachineGroup1.

You need to enable delegation for the security settings of the computers in MachineGroup1.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
From Windows Defender Security Center, create a role.	
From Windows Defender Security Center, configure the permissions for MachineGroup1.	
From the Azure portal, create an RBAC role.	
From the Microsoft Azure portal, create an Azure Active Directory (Azure AD) group.	
From Azure Cloud Shell, run the Add-HsolRoleMember cmdlet.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions	Answer Area
From Windows Defender Security Center, create a role.	
From Windows Defender Security Center, configure the permissions for MachineGroup1.	
From the Azure portal, create an RBAC role.	
From the Microsoft Azure portal, create an Azure Active Directory (Azure AD) group.	
From Azure Cloud Shell, run the Add-HsolRoleMember cmdlet.	

NEW QUESTION 108

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some questions sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have an on-premises Active Directory domain named contoso.com.
You install and run Azure AD Connect on a server named Server1 that runs Windows Server. You need to view Azure AD Connect events.
You use the Security event log on Server1. Does that meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:
