

MD-101 Dumps

Managing Modern Desktops (beta)

<https://www.certleader.com/MD-101-dumps.html>

NEW QUESTION 1

What should you use to meet the technical requirements for Azure DevOps?

- A. An app protection policy
- B. Windows Information Protection (WIP)
- C. Conditional access
- D. A device configuration profile

Answer: C

Explanation: References:

<https://docs.microsoft.com/en-us/azure/devops/organizations/accounts/manage-conditional-access?view=azure-devops>

NEW QUESTION 2

You need to resolve the performance issues in the Los Angeles office.

How should you configure the update settings? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Change Delivery Optimization
download mode to:**

<input type="checkbox"/>
Bypass mode
HTTP blended with internet peering
HTTP blended with peering behind same NAT
Simple download mode with no peering

Update Active Hours Start to:

<input type="checkbox"/>
10 AM
11 AM
10 PM
11 PM

Update Active Hours End to:

<input type="checkbox"/>
10 AM
11 AM
10 PM
11 PM

Answer:

Explanation: Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization> <https://2pintsoftware.com/delivery-optimization-dl-mode/>

NEW QUESTION 3

You need to meet the technical requirements for the LEG department computers.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Configure the commercial iD on the LEG department computers.	
Create an Azure Machine Learning service workspace.	
Create an Azure Log Analytics workspace.	<input type="checkbox"/>
Install the Microsoft Monitoring Agent on the LEG department computers.	<input type="checkbox"/>
Add a solution to a workspace.	

Answer:

Explanation: Reference:
<https://docs.microsoft.com/en-us/windows/deployment/update/windows-analytics-azure-portal>

NEW QUESTION 4

You need to meet the technical requirements for the new HR department computers.
How should you configure the provisioning package? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Specify ComputerName as:

<input type="checkbox"/>	"HR"+ RAND(4)
<input type="checkbox"/>	"HumanResources-" + RAND(????)
<input type="checkbox"/>	HR-%RAND:4%
<input type="checkbox"/>	HR-????
<input type="checkbox"/>	HumanResources-%RAND:4%

Specify AccountOU as:

<input type="checkbox"/>	CN=Computers, CN=HR, DC=Contoso, DC=com
<input type="checkbox"/>	Computers/HumanResources/Contoso.com
<input type="checkbox"/>	Contoso.com/HR/Computers
<input type="checkbox"/>	OU=Computers, OU=HR, DC=Contoso, DC=com

Answer:

Explanation: Reference:
<https://docs.microsoft.com/en-us/windows/configuration/wcd/wcd-accounts>

NEW QUESTION 5

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You need to ensure that feature and quality updates install automatically during a maintenance window. Solution: From the Windows Update settings, you enable Configure Automatic Updates, select 4-Auto download and schedule the install, and then enter a time.
Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation: Reference:
<https://docs.microsoft.com/en-us/sccm/sum/deploy-use/automatically-deploy-software-updates>

NEW QUESTION 6

You have a computer named Computer1 that runs Windows 10. Computer1 has the users shown in the following table.

Name	Member of
User1	Administrators
User2	Replicator
User3	Guests

User1 signs in to Computer1, creates the following files, and then signs out:

- docx in C:\Users\User1\Desktop
- docx in C:\Users\Public\Public Desktop
- docx in C:\Users\Default\Desktop

User3 signs in to Computer1 and creates a file named File4.docx in C:\Users\User3\Desktop. User2 has never signed in to Computer1.

How many DOCX files will appear on the desktop of each user the next time each user signs in? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Number of documents that will appear for User1:

<input type="checkbox"/>	0
<input type="checkbox"/>	1
<input type="checkbox"/>	2
<input type="checkbox"/>	3
<input type="checkbox"/>	4

Number of documents that will appear for User2:

<input type="checkbox"/>	0
<input type="checkbox"/>	1
<input type="checkbox"/>	2
<input type="checkbox"/>	3
<input type="checkbox"/>	4

Number of documents that will appear for User3:

<input type="checkbox"/>	0
<input type="checkbox"/>	1
<input type="checkbox"/>	2
<input type="checkbox"/>	3
<input type="checkbox"/>	4

Answer:

Explanation:

Number of documents that will appear for User1:

	M
0	
1	
2	
3	
4	

Number of documents that will appear for User2:

	M
0	
1	
2	
3	
4	

Number of documents that will appear for User3:

	M
0	
1	
2	
3	
4	

NEW QUESTION 7

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. You need to ensure that feature and quality updates install automatically during a maintenance window. Solution: From the Maintenance Scheduler settings, you configure Automatic Maintenance Activation Boundary. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation: Reference:
<https://docs.microsoft.com/en-us/sccm/sum/deploy-use/automatically-deploy-software-updates>

NEW QUESTION 8

Your network contains an Active Directory domain named constoso.com that is synced to Microsoft Azure Active Directory (Azure AD). All computers are enrolled in Microsoft Intune. The domain contains the computers shown in the following table.

Name	Operating system
Computer1	Windows 8.1 Enterprise
Computer2	Windows 10 Enterprise without the latest feature update
Computer3	Windows 10 Enterprise without the latest feature update

You are evaluating which Intune actions you can use to reset the computers to run Windows 10 Enterprise with the latest update. Which computers can you reset by using each action? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Fresh Start action:

<input type="checkbox"/>	Computer1 only
<input type="checkbox"/>	Computer2 only
<input type="checkbox"/>	Computer3 only
<input type="checkbox"/>	Computer2 and Computer3 only
<input type="checkbox"/>	Computer1, Computer2, and Computer3

Wipe action:

<input type="checkbox"/>	Computer1 only
<input type="checkbox"/>	Computer2 only
<input type="checkbox"/>	Computer3 only
<input type="checkbox"/>	Computer2 and Computer3 only
<input type="checkbox"/>	Computer1, Computer2, and Computer3

Answer:

Explanation: Reference:

<https://docs.microsoft.com/en-us/intune/device-fresh-start> <https://docs.microsoft.com/en-us/intune/devices-wipe>

NEW QUESTION 9

Your company uses Microsoft Intune to manage devices. You need to ensure that only Android devices that use Android work profiles can enroll in Intune. Which two configurations should you perform in the device enrollment restrictions? Each correct answer presents part of the solution.

NOTE: each correct selection is worth one point.

- A. From Select platforms, set Android work profile to Allow.
- B. From Configure platforms, set Android Personally Owned to Block.
- C. From Configure platforms, set Android Personally Owned to Allow.
- D. From Select platforms, set Android to Block.

Answer: AD

Explanation: <https://docs.microsoft.com/en-us/Intune/enrollment-restrictions-set>

NEW QUESTION 10

You have a shared computer that runs Windows 10. The computer is infected with a virus.

You discover that a malicious TTF font was used to compromise the computer. You need to prevent this type of threat from affecting the computer in the future. What should you use?

- A. Windows Defender Exploit Guard
- B. Windows Defender Application Guard
- C. Windows Defender Credential Guard
- D. Windows Defender System Guard
- E. Windows Defender SmartScreen

Answer: A

Explanation: Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-exploit-guard/windowsd>

NEW QUESTION 10

Your company purchases new computers that run Windows 10. The computers have cameras that support Windows Hello for Business. You configure the Windows Hello for Business Group Policy settings as shown in the following exhibit.

Setting	State	Comment
Phone Sign-in		
Allow enumeration of emulated smart card for all users	Not configured	No
Turn off smart card emulation	Not configured	No
Use PIN Recovery	Not configured	No
Use a hardware security device	Not configured	No
Use biometrics	Enabled	No
Configure device unlock factors	Not configured	No
Configure dynamic lock factors	Enabled	No
Use Windows Hello for Business	Enabled	No
Use certificate on-premises authentication	Not configured	No

What are two valid methods a user can use to sign in? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Facial recognition
- B. A smartwatch that is Bluetooth-enabled
- C. A PIN
- D. A USB key

Answer: AC

Explanation: Reference:

<https://community.windows.com/en-us/stories/windows-sign-in-options> <https://fossbytes.com/how-to-unlock-windows-10/>

NEW QUESTION 13

You are creating a device configuration profile in Microsoft Intune. You need to implement an ADMX-backed policy. Which profile type should you use?

- A. Identity protection
- B. Custom
- C. Device restrictions
- D. Device restrictions (Windows 10 Team)

Answer: B

Explanation: Reference:

<https://blogs.technet.microsoft.com/senthilkumar/2018/05/21/intune-deploying-admx-backed-policies-usingmicr>

NEW QUESTION 15

Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). You have a Microsoft 365 subscription.

You create a conditional access policy for Microsoft Exchange Online.

You need to configure the policy to prevent access to Exchange Online unless is connecting from a device that is hybrid Azure AD-joined.

Which settings should you configure?

- A. Locations
- B. Device platforms
- C. Sign-in risk
- D. Device state

Answer: D

Explanation: Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/conditions#device-state>

NEW QUESTION 18

Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). All computers are joined to the domain and registered to Azure AD.

The network contains a Microsoft System Center Configuration Manager (Current Batch) deployment that is configured for co-management with Microsoft Intune. All the computers in the finance department are managed by using Configuration Manager. All the computers in the marketing department are managed by using Intune.

You install new computers for the users in the marketing department by using the Microsoft Deployment Toolkit (MDT).

You purchase an application named App1 that uses an MSI package.

You need to install App1 on the finance department computers and the marketing department computers.

How should you deploy App1 to each department? To answer, drag the appropriate deployment methods to the correct departments. Each deployment method may be used once, more than once, or not at all. You may need to drag the split bat between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Deployment Methods	Answer Area
From Intune, add a line-of-business app.	Finance department: <input type="text"/> Marketing department: <input type="text"/>
From Azure AD, add an application registration.	
From Configuration Manager, add an application.	
From Microsoft Store for Business, add an app to the private store.	

Answer:

Explanation: Reference:
<https://docs.microsoft.com/en-us/intune/apps-add>
<https://docs.microsoft.com/en-us/sccm/apps/get-started/create-and-deploy-an-application>

NEW QUESTION 23

Your company has an infrastructure that has the following:

- A Microsoft 365 tenant
- An Active Directory forest
- Microsoft Store for Business
- A Key Management Service (KMS) server
- A Windows Deployment Services (WDS) server
- A Microsoft Azure Active Directory (Azure AD) Premium tenant

The company purchases 100 new computers that run Windows 10. You need to ensure that the new computers are joined automatically to Azure AD by using Windows AutoPilot. What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Management tool:	<input type="checkbox"/>
	<input checked="" type="checkbox"/> Azure Active Directory admin center
	<input checked="" type="checkbox"/> Microsoft Store for Business
	<input type="checkbox"/> Volume Activation Management Tool console
	<input type="checkbox"/> Windows Deployment Services console
Required information from each computer:	<input type="checkbox"/>
	<input checked="" type="checkbox"/> Device serial number and hardware hash
	<input checked="" type="checkbox"/> MAC address and computer name
	<input type="checkbox"/> Volume License Key and computer name

Answer:

Explanation: Reference:
<https://docs.microsoft.com/en-us/intune/enrollment-autopilot>

NEW QUESTION 28

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company uses Windows AutoPilot to configure the computer settings of computers issued to users. A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company. You plan to transfer the computer to a user named User2.
You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.
Solution: You perform a remote Windows AutoPilot Reset. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation: <https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset-remote>

NEW QUESTION 32

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You need to ensure that feature and quality updates install automatically during a maintenance window. Solution: From the Maintenance Scheduler settings, you configure Automatic Maintenance Random Delay. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation: Reference:
<https://docs.microsoft.com/en-us/sccm/sum/deploy-use/automatically-deploy-software-updates>

NEW QUESTION 34

Your network contains an Active Directory named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10. Folder Redirection is configured for a domain user named User1. The AppData\Roaming folder and the Desktop folder are redirected to a network share. User1 signs in to Computer1 and performs the following tasks:

- ▶ Configures screen saver to start after five minutes of inactivity
- ▶ Modifies the default save location for Microsoft Word
- ▶ Creates a file named File1.docx on the desktop
- ▶ Modifies the desktop background

You need to identify what will be retained when User1 signs in to Computer2. What should you identify?

- A. File1.docx and the desktop background only
- B. File1.docx, the screen saver settings, the desktop background, and the default save location for Word
- C. File1.docx only
- D. File1.docx, the desktop background, and the default save location for Word only

Answer: B

Explanation: Reference:
<https://docs.microsoft.com/en-us/windows-server/storage/folder-redirect/folder-redirect-rup-overview>

NEW QUESTION 39

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company uses Windows AutoPilot to configure the computer settings of computers issued to users. A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company. You plan to transfer the computer to a user named User2.
You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.
Solution: You create a new Windows AutoPilot self-deploying deployment profile. Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation: Reference:
<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/self-deploying>

NEW QUESTION 44

You have computers that run Windows 10 as shown in the following table.

Name	Configuration
Computer1	Active Directory domain-joined
Computer2	Microsoft Azure Active Directory (Azure AD) –joined
Computer3	Hybrid Microsoft Azure Active Directory (Azure AD)-joined

Computer2 and Computer3 are enrolled in Microsoft Intune.

In a Group Policy object (GPO) linked to the domain, you enable the Computer Configuration/Administrative Templates/Windows Components/Search/Allow Cortana setting.

In an Intune device configuration profile, you configure the following:

- ▶ Device/Vendor/MSFT/Policy/Config/ControlPolicyConflict/MDMWinsOverGP to a value of 1
- ▶ Experience/AllowCortana to a value of 0.

Each of the following statement, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Computer1 can use Cortana for each.	<input type="radio"/>	<input type="radio"/>
Computer2 can use Cortana for search.	<input type="radio"/>	<input type="radio"/>
Computer3 can use Cortana for search.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation: Reference:

<https://blogs.technet.microsoft.com/cbernier/2018/04/02/windows-10-group-policy-vs-intune-mdm-policy-who->

NEW QUESTION 45

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune. You need to ensure that only applications that you explicitly allow can run on the computers. What should you use?

- A. Windows Defender Credential Guard
- B. Windows Defender Exploit Guard
- C. Windows Defender Application Guard
- D. Windows Defender Antivirus.

Answer: C

Explanation: Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/device-guard/introduction-to-device-guardv-based-security-and-windows-defender-application-control>

NEW QUESTION 49

Your company uses Microsoft Intune.

More than 500 Android and iOS devices are enrolled in the Intune tenant.

You plan to deploy new Intune policies. Different policies will apply depending on the version of Android or iOS installed on the device.

You need to ensure that the policies can target the devices based on their version of Android or iOS. What should you configure first?

- A. Corporate device identifiers in Intune
- B. Device settings in Microsoft Azure Active Directory (Azure AD)
- C. Device categories in Intune
- D. Groups that have dynamic membership rules in Microsoft Azure Active Directory (Azure AD)

Answer: B

Explanation: Reference:

<https://docs.microsoft.com/en-us/intune/compliance-policy-create-android> <https://docs.microsoft.com/en-us/intune/compliance-policy-create-ios>

NEW QUESTION 53

You have computers that run Windows 10 and are configured by using Windows AutoPilot. A user performs the following tasks on a computer named Computer1:

- ▶ Creates a VPN connection to the corporate network
- ▶ Installs a Microsoft Store app named App1
- ▶ Connects to a Wi-Fi network

You perform a Windows AutoPilot Reset on Computer1.

What will be the state of the computer when the user signs in? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The Wi-Fi connection will be:

<input type="checkbox"/>	Removed
<input type="checkbox"/>	Retained and the passphrase will be retained
<input type="checkbox"/>	Retained but the passphrase will be reset

App1 will be:

<input type="checkbox"/>	Reinstalled at sign-in
<input type="checkbox"/>	Removed
<input type="checkbox"/>	Retained

The VPN connection will be:

<input type="checkbox"/>	Removed
<input type="checkbox"/>	Retained and the credentials will be cached
<input type="checkbox"/>	Retained but the credentials will be reset

Answer:

Explanation: Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset>
