

EC-Council

Exam Questions 312-38

EC-Council Network Security Administrator (ENSA)

NEW QUESTION 1

Daniel is monitoring network traffic with the help of a network monitoring tool to detect any abnormalities. What type of network security approach is Daniel adopting?

- A. Preventative
- B. Reactive
- C. Retrospective
- D. Defense-in-depth

Answer: B

NEW QUESTION 2

Sam wants to implement a network-based IDS in the network. Sam finds out the one IDS solution which works is based on patterns matching. Which type of network-based IDS is Sam implementing?

- A. Behavior-based IDS
- B. Anomaly-based IDS
- C. Stateful protocol analysis
- D. Signature-based IDS

Answer: D

NEW QUESTION 3

Timothy works as a network administrator in a multinational organization. He decides to implement a dedicated network for sharing storage resources. He uses a _____ as it separates the storage units from the servers and the user network.

- A. SAN
- B. SCSA
- C. NAS
- D. SAS

Answer: A

NEW QUESTION 4

A company has the right to monitor the activities of their employees on different information systems according to the _____ policy.

- A. Information system
- B. User access control
- C. Internet usage
- D. Confidential data

Answer: B

NEW QUESTION 5

You are responsible for network functions and logical security throughout the corporation. Your company has over 250 servers running Windows Server 2012, 5000 workstations running Windows 10, and 200 mobile users working from laptops on Windows 8. Last week 10 of your company's laptops were stolen from a salesman, while at a conference in Barcelona. These laptops contained proprietary company information.

While doing a damage assessment, a news story leaks about a blog post containing information about the stolen laptops and the sensitive information. What built-in Windows feature could you have implemented to protect the sensitive information on these laptops?

- A. You should have used 3DES.
- B. You should have implemented the Distributed File System (DFS).
- C. If you would have implemented Pretty Good Privacy (PGP).
- D. You could have implemented the Encrypted File System (EFS)

Answer: D

NEW QUESTION 6

Which of the following acts as a verifier for the certificate authority?

- A. Certificate Management system
- B. Certificate authority
- C. Directory management system
- D. Registration authority

Answer: D

NEW QUESTION 7

Management wants to calculate the risk factor for their organization. Kevin, a network administrator in the organization knows how to calculate the risk factor. Certain parameters are required before calculating risk factor. What are they? (Select all that apply) Risk factor =.....X.....X.....

- A. Vulnerability
- B. Impact
- C. Attack
- D. Threat

Answer: ABD

NEW QUESTION 8

Ross manages 30 employees and only 25 computers in the organization. The network the company uses is a peer-to-peer. Ross configures access control measures allowing the employees to set their own control measures for their files and folders. Which access control did Ross implement?

- A. Discretionary access control
- B. Mandatory access control
- C. Non-discretionary access control
- D. Role-based access control

Answer: A

NEW QUESTION 9

Malone is finishing up his incident handling plan for IT before giving it to his boss for review. He is outlining the incident response methodology and the steps that are involved. Which step should Malone list as the last step in the incident response methodology?

- A. Malone should list a follow-up as the last step in the methodology
- B. Recovery would be the correct choice for the last step in the incident response methodology
- C. He should assign eradication to the last step.
- D. Containment should be listed on Malone's plan for incident response.

Answer: B

NEW QUESTION 10

Geon Solutions INC., had only 10 employees when it started. But as business grew, the organization had to increase the amount of staff. The network administrator is finding it difficult to accommodate an increasing number of employees in the existing network topology. So the organization is planning to implement a new topology where it will be easy to accommodate an increasing number of employees. Which network topology will help the administrator solve the problem of needing to add new employees and expand?

- A. Bus
- B. Star
- C. Ring
- D. Mesh

Answer: B

NEW QUESTION 10

An US-based organization decided to implement a RAID storage technology for their data backup plan. John wants to setup a RAID level that require a minimum of six drives but will meet high fault tolerance and with a high speed for the data read and write operations. What RAID level is John considering to meet this requirement?

- A. RAID level 1
- B. RAID level 10
- C. RAID level 5
- D. RAID level 50

Answer: D

NEW QUESTION 12

An administrator wants to monitor and inspect large amounts of traffic and detect unauthorized attempts from inside the organization, with the help of an IDS. They are not able to recognize the exact location to deploy the IDS sensor. Can you help him spot the location where the IDS sensor should be placed?

- A. Location 2
- B. Location 3

- C. Location 4
- D. Location 1

Answer: A

NEW QUESTION 14

Larry is responsible for the company's network consisting of 300 workstations and 25 servers. After using a hosted email service for a year, the company wants to control the email internally. Larry likes this idea because it will give him more control over the email. Larry wants to purchase a server for email but does not want the server to be on the internal network due to the potential to cause security risks. He decides to place the server outside of the company's internal firewall. There is another firewall connected directly to the Internet that will protect traffic from accessing the email server. The server will be placed between the two firewalls. What logical area is Larry putting the new email server into?

- A. He is going to place the server in a Demilitarized Zone (DMZ)
- B. He will put the email server in an IPsec zone.
- C. Larry is going to put the email server in a hot-server zone.
- D. For security reasons, Larry is going to place the email server in the company's Logical Buffer Zone (LBZ).

Answer: A

NEW QUESTION 17

Identify the network topology where each computer acts as a repeater and the data passes from one computer to the other in a single direction until it reaches the destination.

- A. Ring
- B. Mesh
- C. Bus
- D. Star

Answer: A

NEW QUESTION 19

Management asked Adam to implement a system allowing employees to use the same credentials to access multiple applications. Adam should implement the-----authentication technique to satisfy the management request.

- A. Two-factor Authentication
- B. Smart Card Authentication
- C. Single-sign-on
- D. Biometric

Answer: C

NEW QUESTION 21

James is a network administrator working at a student loan company in Minnesota. This company processes over 20,000 student loans a year from colleges all over the state. Most communication between the company schools, and lenders is carried out through emails. Much of the email communication used at his company contains sensitive information such as social security numbers. For this reason, James wants to utilize email encryption. Since a server-based PKI is not an option for him, he is looking for a low/no cost solution to encrypt emails. What should James use?

- A. James could use PGP as a free option for encrypting the company's emails.
- B. James should utilize the free OTP software package.
- C. James can use MD5 algorithm to encrypt all the emails
- D. James can enforce mandatory HTTPS in the email clients to encrypt emails

Answer: A

NEW QUESTION 24

What command is used to terminate certain processes in an Ubuntu system?

- A. #grep Kill [Target Process]
- B. #kill-9[PID]
- C. #ps ax Kill
- D. # netstat Kill [Target Process]

Answer: C

NEW QUESTION 28

Consider a scenario consisting of a tree network. The root Node N is connected to two main nodes N1 and N2. N1 is connected to N11 and N12. N2 is connected to N21 and N22. What will happen if any one of the main nodes fail?

- A. Failure of the main node affects all other child nodes at the same level irrespective of the main node.
- B. Does not cause any disturbance to the child nodes or its transmission
- C. Failure of the main node will affect all related child nodes connected to the main node
- D. Affects the root node only

Answer: C

NEW QUESTION 32

John has implemented _____ in the network to restrict the limit of public IP addresses in his organization and to enhance the firewall filtering technique.

- A. DMZ
- B. Proxies
- C. VPN
- D. NAT

Answer: D

NEW QUESTION 34

Blake is working on the company's updated disaster and business continuity plan. The last section of the plan covers computer and data incidence response. Blake is outlining the level of severity for each type of incident in the plan. Unsuccessful scans and probes are at what severity level?

- A. High severity level
- B. Extreme severity level
- C. Mid severity level
- D. Low severity level

Answer: D

NEW QUESTION 36

Kyle is an IT consultant working on a contract for a large energy company in Houston. Kyle was hired on to do contract work three weeks ago so the company could prepare for an external IT security audit. With suggestions from upper management, Kyle has installed a network-based IDS system. This system checks for abnormal behavior and patterns found in network traffic that appear to be dissimilar from the traffic normally recorded by the IDS. What type of detection is this network-based IDS system using?

- A. This network-based IDS system is using anomaly detection.
- B. This network-based IDS system is using dissimilarity algorithms.
- C. This system is using misuse detection.
- D. This network-based IDS is utilizing definition-based detection.

Answer: A

NEW QUESTION 41

John has successfully remediated the vulnerability of an internal application that could have caused a threat to the network. He is scanning the application for the existence of a remediated vulnerability, this process is called a _____ and it has to adhere to the _____

- A. Verification, Security Policies
- B. Mitigation, Security policies
- C. Vulnerability scanning, Risk Analysis
- D. Risk analysis, Risk matrix

Answer: A

NEW QUESTION 44

As a network administrator, you have implemented WPA2 encryption in your corporate wireless network. The WPA2's _____ integrity check mechanism provides security against a replay attack

- A. CBC-32
- B. CRC-MAC
- C. CRC-32
- D. CBC-MAC

Answer: D

NEW QUESTION 47

A newly joined network administrator wants to assess the organization against possible risk. He notices the organization doesn't have a _____ identified which helps measure how risky an activity is.

- A. Risk Severity
- B. Risk Matrix
- C. Key Risk Indicator
- D. Risk levels

Answer: C

NEW QUESTION 48

Which of the following Event Correlation Approach checks and compares all the fields systematically and intentionally for positive and negative correlation with each other to determine the correlation across one or multiple fields?

- A. Automated Field Correlation
- B. Field-Based Approach
- C. Rule-Based Approach
- D. Graph-Based Approach

Answer:

A

NEW QUESTION 49

Alex is administrating the firewall in the organization's network. What command will he use to check the ports applications open?

- A. Netstat -an
- B. Netstat -o
- C. Netstat -a
- D. Netstat -ao

Answer: A

NEW QUESTION 53

John, the network administrator and he wants to enable the NetFlow feature in Cisco routers to collect and monitor the IP network traffic passing through the router. Which command will John use to enable NetFlow on an interface?

- A. Router(Config-if) # IP route - cache flow
- B. Router# Netmon enable
- C. Router IP route
- D. Router# netflow enable

Answer: A

NEW QUESTION 55

Management wants to bring their organization into compliance with the ISO standard for information security risk management. Which ISO standard will management decide to implement?

- A. ISO/IEC 27004
- B. ISO/IEC 27002
- C. ISO/IEC 27006
- D. ISO/IEC 27005

Answer: D

NEW QUESTION 56

You are monitoring your network traffic with the Wireshark utility and noticed that your network is experiencing a large amount of traffic from a certain region. You suspect a DoS incident on the network. What will be your first reaction as a first responder?

- A. Avoid Fear, Uncertainty and Doubt
- B. Communicate the incident
- C. Make an initial assessment
- D. Disable Virus Protection

Answer: A

NEW QUESTION 61

Which of the following is a best practice for wireless network security?

- A. Enabling the remote router login
- B. Do not changing the default SSID
- C. Do not placing packet filter between the AP and the corporate intranet
- D. Using SSID cloaking

Answer: D

NEW QUESTION 62

Frank installed Wireshark at all ingress points in the network. Looking at the logs he notices an odd packet source. The odd source has an address of 1080:0:FF:0:8:800:200C:4171 and is using port 21. What does this source address signify?

- A. This address means that the source is using an IPv6 address and is spoofed and signifies an IPv4 address of 127.0.0.1.
- B. This source address is IPv6 and translates as 13.1.68.3
- C. This source address signifies that the originator is using 802dot1x to try and penetrate into Frank's network
- D. This means that the source is using IPv4

Answer: D
