

# Exam Questions MD-101

Managing Modern Desktops (beta)

<https://www.2passeasy.com/dumps/MD-101/>

NEW QUESTION 1

What should you configure to meet the technical requirements for the Azure AD-joined computers?

- A. Windows Hello for Business from the Microsoft Intune blade in the Azure portal.
- B. The Accounts options in an endpoint protection profile.
- C. The Password Policy settings in a Group Policy object (GPO).
- D. A password policy from the Microsoft Office 365 portal.

Answer: A

Explanation: References:

<https://docs.microsoft.com/en-us/windows/security/identity-protection/hello-for-business/hello-manage-inorgani>

NEW QUESTION 2

You need to resolve the performance issues in the Los Angeles office.

How should you configure the update settings? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Change Delivery Optimization download mode to:

Bypass mode

HTTP blended with internet peering

HTTP blended with peering behind same NAT

Simple download mode with no peering

Update Active Hours Start to:

10 AM

11 AM

10 PM

11 PM

Update Active Hours End to:

10 AM

11 AM

10 PM

11 PM

Answer:

Explanation: Reference:

<https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization> <https://2pintsoftware.com/delivery-optimization-dl-mode/>

NEW QUESTION 3

You need to capture the required information for the sales department computers to meet the technical requirements.

Which Windows PowerShell command should you run first?

- A. Install-Module WindowsAutoPilotIntune
- B. Install-Script Get-WindowsAutoPilotInfo
- C. Import-AutoPilotCSV
- D. Get-WindowsAutoPilotInfo

Answer: A

Explanation: References:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/existing-devices>

Topic 2, Contoso Ltd

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the Question button to return to the question.

Overview

Contoso, Ltd, is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York. Contoso has the users and computers shown in the following table.

Location	Users	Laptops	Desktop computers	Mobile devices
Montreal	2,500	2,800	300	3,100
Seattle	1,000	1,100	200	1,500
New York	300	320	30	400

The company has IT, human resources (HR), legal (LEG), marketing (MKG) and finance (FIN) departments. Contoso uses Microsoft Store for Business and recently purchased a Microsoft 365 subscription.

The company is opening a new branch office in Phoenix. Most of the users in the Phoenix office will work from home.

Existing Environment

The network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure

Active Directory (Azure AD).

All member servers run Windows Server 2016. All laptops and desktop computers run Windows 10 Enterprise.

The computers are managed by using Microsoft System Center Configuration Manager. The mobile devices are managed by using Microsoft Intune.

The naming convention for the computers is the department acronym, followed by a hyphen, and then four numbers, for example, FIN-6785. All the computers are joined to the on-premises Active Directory domain.

Each department has an organization unit (OU) that contains a child OU named Computers. Each computer account is in the Computers OU of its respective department.

Intune Configuration

The domain has the users shown in the following table.

Name	Role	Member of
User1	Intune administrator	GroupA
User2	None	GroupB

User2 is a device enrollment manager (DEM) in Intune.

The devices enrolled in Intune are shown in the following table.

Name	Platform	Encryption	Member of
Device1	Android	Disabled	Group1
Device2	iOS	Not applicable	Group2, Group3
Device3	Android	Disabled	Group2, Group3
Device4	iOS	Not applicable	Group2

The device compliance policies in Intune are configured as shown in the following table.

Name	Platform	Require encryption	Assigned
Policy1	Android	Not configured	Yes
Policy2	iOS	Not applicable	Yes
Policy3	Android	Require	Yes

The device compliance policies have the assignments shown in the following table:

Name	Include	Exclude
Policy1	Group3	None
Policy2	Group2	Group3
Policy3	Group1	None

The device limit restrictions in Intune are configured as shown in the following table.

Priority	Name	Device limit	Assigned to
1	Restriction1	15	GroupB
2	Restriction2	10	GroupA
Default	All users	5	All users

Requirements Planned Changes

Contoso plans to implement the following changes:

- Provide new computers to the Phoenix office users. The new computers have Windows 10 Pro preinstalled and were purchased already.
- Start using a free Microsoft Store for Business app named App1.
- Implement co-management for the computers.

Technical Requirements:

Contoso must meet the following technical requirements:

- ▶ Ensure that the users in a group named Group4 can only access Microsoft Exchange Online from devices that are enrolled in Intune.
- ▶ Deploy Windows 10 Enterprise to the computers of the Phoenix office users by using Windows Autopilot.
- ▶ Monitor the computers in the LEG department by using Windows Analytics.
- ▶ Create a provisioning package for new computers in the HR department.
- ▶ Block iOS devices from sending diagnostic and usage telemetry data.
- ▶ Use the principle of least privilege whenever possible.
- ▶ Enable the users in the MKG department to use App1.
- ▶ Pilot co-management for the IT department.

#### NEW QUESTION 4

You need to meet the technical requirements for the iOS devices. Which object should you create in Intune?

- A. A compliance policy
- B. An app protection policy
- C. A Deployment profile
- D. A device profile

**Answer:** D

**Explanation:** References:

<https://docs.microsoft.com/en-us/intune/device-restrictions-configure> <https://docs.microsoft.com/en-us/intune/device-restrictions-ios>

#### NEW QUESTION 5

What is the maximum number of devices that User1 and User2 can enroll in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

User1 can enroll a maximum of:

<input type="checkbox"/>	5 devices
<input type="checkbox"/>	10 devices
<input type="checkbox"/>	15 devices
<input type="checkbox"/>	1,000 devices
<input type="checkbox"/>	An unlimited number of devices

User2 can enroll a maximum of:

<input type="checkbox"/>	5 devices
<input type="checkbox"/>	10 devices
<input type="checkbox"/>	15 devices
<input type="checkbox"/>	1,000 devices
<input type="checkbox"/>	An unlimited number of devices

**Answer:**

**Explanation:**

User1 can enroll a maximum of:

<input checked="" type="checkbox"/>	5 devices
<input checked="" type="checkbox"/>	10 devices
<input checked="" type="checkbox"/>	15 devices
<input type="checkbox"/>	1,000 devices
<input type="checkbox"/>	An unlimited number of devices

User2 can enroll a maximum of:

<input checked="" type="checkbox"/>	5 devices
<input checked="" type="checkbox"/>	10 devices
<input checked="" type="checkbox"/>	15 devices
<input checked="" type="checkbox"/>	1,000 devices
<input type="checkbox"/>	An unlimited number of devices

#### NEW QUESTION 6

You need to meet the technical requirements for the new HR department computers.

How should you configure the provisioning package? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Specify ComputerName as:

<input type="checkbox"/>
"HR" + RAND(4)
"HumanResources-" + RAND(????)
HR-%RAND:4%
HR-????
HumanResources-%RAND:4%

Specify AccountOU as:

<input type="checkbox"/>
CN=Computers, CN=HR, DC=Contoso, DC=com
Computers/HumanResources/Contoso.com
Contoso.com/HR/Computers
OU=Computers, OU=HR, DC=Contoso, DC=com

**Answer:**

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/windows/configuration/wcd/wcd-accounts>

#### NEW QUESTION 7

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to ensure that feature and quality updates install automatically during a maintenance window. Solution: From the Maintenance Scheduler settings, you configure Automatic Maintenance Activation Boundary.

Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/sccm/sum/deploy-use/automatically-deploy-software-updates>

#### NEW QUESTION 8

You have a shared computer that runs Windows 10. The computer is infected with a virus.

You discover that a malicious TTF font was used to compromise the computer. You need to prevent this type of threat from affecting the computer in the future.

What should you use?

- A. Windows Defender Exploit Guard
- B. Windows Defender Application Guard
- C. Windows Defender Credential Guard
- D. Windows Defender System Guard
- E. Windows Defender SmartScreen

**Answer:** A

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-exploit-guard/windowsd>

#### NEW QUESTION 9

You are creating a device configuration profile in Microsoft Intune. You need to implement an ADMX-backed policy.

Which profile type should you use?

- A. Identity protection
- B. Custom
- C. Device restrictions
- D. Device restrictions (Windows 10 Team)

**Answer:** B

**Explanation:** Reference:

<https://blogs.technet.microsoft.com/senthilkumar/2018/05/21/intune-deploying-admx-backed-policies-usingmicr>

#### NEW QUESTION 10

Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). You have a Microsoft 365 subscription. You create a conditional access policy for Microsoft Exchange Online. You need to configure the policy to prevent access to Exchange Online unless is connecting from a device that is hybrid Azure AD-joined. Which settings should you configure?

- A. Locations
- B. Device platforms
- C. Sign-in risk
- D. Device state

**Answer:** D

**Explanation:** Reference:  
<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/conditions#device-state>

#### NEW QUESTION 10

You have the 64-bit computers shown in the following table.

Name	Operating system	Memory	BitLocker Drive Encryption (BitLocker)
Computer1	32-bit version of Windows 7 Service Pack 1 (SP1)	1 GB	Enabled
Computer2	64-bit version of Windows 7 Service Pack 1 (SP1)	4 GB	Enabled
Computer3	32-bit version of Windows 8.1	2 GB	Enabled
Computer4	64-bit version of Windows 8.1	4 GB	Disabled

You plan to perform an in-place upgrade to the 64-bit version of Windows 10. Which computers can you upgrade to the 64-bit version of Windows 10 in their current state?

- A. Computer2 and Computer4 only
- B. Computer4 only
- C. Computer3 and Computer4 only
- D. Computer1, Computer2, Computer3 and Computer4
- E. Computer2, Computer3, and Computer4 only

**Answer:** A

**Explanation:** References:  
<https://docs.microsoft.com/en-us/windows/deployment/windows-10-deployment-scenarios>

#### NEW QUESTION 15

Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). All computers are joined to the domain and registered to Azure AD. The network contains a Microsoft System Center Configuration Manager (Current Batch) deployment that is configured for co-management with Microsoft Intune. All the computers in the finance department are managed by using Configuration Manager. All the computers in the marketing department are managed by using Intune. You install new computers for the users in the marketing department by using the Microsoft Deployment Toolkit (MDT). You purchase an application named App1 that uses an MSI package. You need to install App1 on the finance department computers and the marketing department computers. How should you deploy App1 to each department? To answer, drag the appropriate deployment methods to the correct departments. Each deployment method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

Deployment Methods

From Intune, add a line-of-business app.

From Azure AD, add an application registration.

From Configuration Manager, add an application.

From Microsoft Store for Business, add an app to the private store.

Answer Area

Finance department:

Marketing department:

Answer:

Explanation: Reference:  
<https://docs.microsoft.com/en-us/intune/apps-add>  
<https://docs.microsoft.com/en-us/sccm/apps/get-started/create-and-deploy-an-application>

NEW QUESTION 20

Your company has an infrastructure that has the following:

- ▶ A Microsoft 365 tenant
  - ▶ An Active Directory forest
  - ▶ Microsoft Store for Business
  - ▶ A Key Management Service (KMS) server
  - ▶ A Windows Deployment Services (WDS) server
  - ▶ A Microsoft Azure Active Directory (Azure AD) Premium tenant
- The company purchases 100 new computers that run Windows 10. You need to ensure that the new computers are joined automatically to Azure AD by using Windows AutoPilot. What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Management tool:

Azure Active Directory admin center

Microsoft Store for Business

Volume Activation Management Tool console

Windows Deployment Services console

Required information from each computer:

Device serial number and hardware hash

MAC address and computer name

Volume License Key and computer name

Answer:

Explanation: Reference:  
<https://docs.microsoft.com/en-us/intune/enrollment-autopilot>

NEW QUESTION 24

Your company has a Microsoft 365 subscription. All the users in the finance department own personal devices that run iOS or Android. All the devices are enrolled in Microsoft Intune.

The finance department adds new users each month.  
The company develops a mobile application named App1 for the finance department users. You need to ensure that only the finance department users can download App1.  
What should you do first?

A. Add App1 to Intune.  
B. Add App1 to a Microsoft Deployment Toolkit (MDT) deployment share.  
C. Add App1 to Microsoft Store for Business.  
D. Add App1 to the vendor stores for iOS and Android applications.

Answer: A

Explanation: Reference:  
<https://docs.microsoft.com/en-us/intune/apps-add>

NEW QUESTION 25

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.  
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.  
Your company uses Windows AutoPilot to configure the computer settings of computers issued to users. A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company. You plan to transfer the computer to a user named User2.  
You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.  
Solution: You perform a remote Windows AutoPilot Reset. Does this meet the goal?

- A. Yes  
B. No

Answer: B

Explanation: <https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset-remote>

NEW QUESTION 26

Your company has a Microsoft Azure Active Directory (Azure AD) tenant.  
The company uses Microsoft Intune to manage iOS, Android, and Windows 10 devices.  
The company plans to purchase 1,000 iOS devices. Each device will be assigned to a specific user.  
You need to ensure that the new iOS devices are enrolled automatically in Intune when the assigned user signs in for the first time.  
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area
Create a device compliance policy.		
Add a Device Enrollment Program (DEP) token.		
Assign an enrollment profile.		
Create a device enrollment manager (DEM) account.		
Create a Windows AutoPilot self-deploying deployment profile.		
Create an Apple enrollment profile.		

Answer:

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/intune/device-enrollment-program-enroll-ios>

#### NEW QUESTION 28

You have 1,000 computers that run Windows 10 and are members of an Active Directory domain. You create a workspace in Microsoft Azure Log Analytics. You need to capture the event logs from the computers to Azure.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Azure service to provision:

<input type="checkbox"/>	An Azure Storage account
<input type="checkbox"/>	Azure Cosmos DB
<input type="checkbox"/>	Azure SQL Database
<input type="checkbox"/>	Log Analytics

Action to perform on the computers:

<input type="checkbox"/>	Create a collector initiated subscription
<input type="checkbox"/>	Install the Microsoft Monitoring Agent
<input type="checkbox"/>	Enroll in Microsoft Intune
<input type="checkbox"/>	Register to Azure Active Directory (Azure AD)

**Answer:**

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/agent-windows>

#### NEW QUESTION 33

You have 100 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune. You need to configure the following device restrictions:

- ☐ Block users from browsing to suspicious websites.
- ☐ Scan all scripts loaded into Microsoft Edge.

Which two settings should you configure in Device restrictions? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

### NEW QUESTION 36

Your network contains an Active Directory domain. The domain contains 2,000 computers that run Windows 10.

You implement hybrid Microsoft Azure Active Directory (Azure AD) and Microsoft Intune.

You need to automatically register all the existing computers to Azure AD and enroll the computers in Intune. The solution must minimize administrative effort. What should you use?

- A. An Autodiscover address record.
- B. A Windows AutoPilot deployment profile.
- C. An Autodiscover service connection point (SCP).
- D. A Group Policy object (GPO).

Answer: B

**Explanation:** Reference:

<https://techcommunity.microsoft.com/t5/Windows-IT-Pro-Blog/Windows-Autopilot-Hybrid-Azure-AD-join-and>

**NEW QUESTION 39**

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to ensure that feature and quality updates install automatically during a maintenance window. Solution: From the Maintenance Scheduler settings, you configure Automatic Maintenance Random Delay. Does this meet the goal?

- A. Yes
- B. No

**Answer:** A

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/sccm/sum/deploy-use/automatically-deploy-software-updates>

**NEW QUESTION 40**

Your network contains an Active Directory domain named contoso.com. The domain contains 200 computers that run Windows 10.

Folder Redirection for the Desktop folder is configured as shown in the following exhibit.

**Desktop Properties** ? X

**Target** **Settings**

Select the redirection settings for Desktop.

☒ Grant the user exclusive rights to Desktop.

☒ Move the contents of Desktop to the new location.

☐ Also apply redirection policy to Windows 2000, Windows 2000 Server, Windows XP, and Windows Server 2003 operating systems.

**Policy Removal**

☒ Leave the folder in the new location when policy is removed.

☐ Redirect the folder back to the local userprofile location when policy is removed.

OK Cancel Apply

The target is set to Server1.

You plan to use known folder redirection in Microsoft OneDrive for Business.

You need to ensure that the desktop content of users remains on their desktop when you implement known folder redirection.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Clear the Grant the user exclusive rights to Desktop check box.
- B. Change the Policy Removal setting.
- C. Disable Folder Redirection.
- D. Clear the Move the contents of Desktop to the new location check box.

**Answer:** AB

**Explanation:** References:

<https://docs.microsoft.com/en-us/onedrive/redirect-known-folders>

**NEW QUESTION 45**

You have a Microsoft 365 subscription.

All computers are enrolled in Microsoft Intune.

You have business requirements for securing your Windows 10 environment as shown in the following table.

Requirement	Detail
Requirement1	Ensure that Microsoft Exchange Online can be accessed from known locations only.
Requirement2	Lock a device that has a high Windows Defender Advanced Threat Protection (Windows Defender ATP) risk score.

What should you implement to meet each requirement? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

Requirement1

A conditional access policy

A device compliance policy

A device configuration profile

Requirement2

A conditional access policy

A device compliance policy

A device configuration profile

**Answer:**

**Explanation:** Reference:  
<https://github.com/MicrosoftDocs/IntuneDocs/blob/master/intune/advanced-threat-protection.md>

**NEW QUESTION 49**  
 Your company has a Microsoft 365 subscription.  
 The company uses Microsoft Intune to manage all devices.  
 The company uses conditional access to restrict access to Microsoft 365 services for devices that do not comply with the company's security policies.  
 You need to identify which devices will be prevented from accessing Microsoft 365 services.  
 What should you use?

- A. The Device Health solution in Windows Analytics.
- B. Windows Defender Security Center.
- C. The Device compliance blade in the Intune admin center.
- D. The Conditional access blade in the Azure Active Directory admin center.

**Answer:** C

**NEW QUESTION 50**  
 Your network contains an Active Directory named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10. Folder Redirection is configured for a domain user named User1. The AppData\Roaming folder and the Desktop folder are redirected to a network share. User1 signs in to Computer1 and performs the following tasks:

- Configures screen saver to start after five minutes of inactivity
- Modifies the default save location for Microsoft Word
- Creates a file named File1.docx on the desktop
- Modifies the desktop background

You need to identify what will be retained when User1 signs in to Computer2. What should you identify?

- A. File1.docx and the desktop background only
- B. File1.docx, the screen saver settings, the desktop background, and the default save location for Word
- C. File1.docx only
- D. File1.docx, the desktop background, and the default save location for Word only

**Answer:** B

**Explanation:** Reference:  
<https://docs.microsoft.com/en-us/windows-server/storage/folder-redirection/folder-redirection-rup-overview>

**NEW QUESTION 52**  
 You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. All Windows 10 devices are enrolled in Microsoft Intune. You configure the following settings in Windows Information Protection (WIP):

- Protected apps: App1
- Exempt apps: App2

Windows Information Protection mode: Silent App1, App2, and App3 use the same file format.  
 You create a file named File1 in App1.  
 You need to identify which apps can open File1.  
 What apps should you identify? To answer, select the appropriate options in the answer area, NOTE: Each correct selection is worth one point.

You can open File1 from:

<input type="checkbox"/>	App1 only
<input type="checkbox"/>	App1, and App2 only
<input type="checkbox"/>	App1 and App3 only
<input type="checkbox"/>	App1, App2, and App3

An action will be logged when you attempt to open File1 from:

<input type="checkbox"/>	App1 only
<input type="checkbox"/>	App3 only
<input type="checkbox"/>	App1, and App2 only
<input type="checkbox"/>	App2 and App3 only
<input type="checkbox"/>	App1, App2, and App3

**Answer:**

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/creating-a-windows-information-protection-policy>

#### NEW QUESTION 55

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company uses Windows AutoPilot to configure the computer settings of computers issued to users. A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company. You plan to transfer the computer to a user named User2.

You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.

Solution: You create a new Windows AutoPilot self-deploying deployment profile. Does this meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/self-deploying>

#### NEW QUESTION 60

You have a Microsoft Azure Log Analytics workplace that collects all the event logs from the computers at your company.

You have a computer named Computer1 that runs Windows 10. You need to view the events collected from Computer1.

Which query should you run in Log Analytics?

- A. Event| where Computer == "Computer1"
- B. ETWEvent| where SourceSystem == "Computer1"
- C. ETWEvent| where Computer == "Computer1"
- D. Event| where SourceSystem == "Computer1"

**Answer:** A

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/azure/azure-monitor/platform/data-sources-windows-events>

#### NEW QUESTION 61

You have computers that run Windows 10 as shown in the following table.

Name	Configuration
Computer1	Active Directory domain-joined
Computer2	Microsoft Azure Active Directory (Azure AD) –joined
Computer3	Hybrid Microsoft Azure Active Directory (Azure AD)-joined

Computer2 and Computer3 are enrolled in Microsoft Intune.

In a Group Policy object (GPO) linked to the domain, you enable the Computer Configuration/Administrative Templates/Windows Components/Search/Allow Cortana setting.

In an Intune device configuration profile, you configure the following:

- ▶ Device/Vendor/MSFT/Policy/Config/ControlPolicyConflict/MDMWinsOverGP to a value of 1
- ▶ Experience/AllowCortana to a value of 0.

Each of the following statement, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Computer1 can use Cortana for each.	<input type="radio"/>	<input type="radio"/>
Computer2 can use Cortana for search.	<input type="radio"/>	<input type="radio"/>
Computer3 can use Cortana for search.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation: Reference:

https://blogs.technet.microsoft.com/cbernier/2018/04/02/windows-10-group-policy-vs-intune-mdm-policy-who-

#### NEW QUESTION 65

Your company has an infrastructure that has the following:

- ▶ A Microsoft 365 tenant
- ▶ An Active Directory forest
- ▶ Microsoft Store for Business
- ▶ A Key Management Service (KMS) server
- ▶ A Windows Deployment Services (WDS) server
- ▶ A Microsoft Azure Active Directory (Azure AD) Premium tenant

The company purchases 100 new computers that run Windows 10.

You need to ensure that the new computers are joined automatically to Azure AD by using Windows AutoPilot.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Management tool:

<input type="checkbox"/>	Azure Active Directory admin center
<input type="checkbox"/>	Microsoft Store for Business
<input type="checkbox"/>	Volume Activation Management Tool console
<input type="checkbox"/>	Windows Deployment Services console

Required information from each computer:

<input type="checkbox"/>	Device serial number and hardware hash
<input type="checkbox"/>	MAC address and computer name
<input type="checkbox"/>	Volume License Key and computer name

Answer:

#### NEW QUESTION 68

You have computers that run Windows 10 Pro. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.

You need to upgrade the computers to Windows 10 Enterprise. What should you configure in Intune?

- A. A device enrollment policy
- B. A device cleanup rule
- C. A device compliance policy
- D. A device configuration profile

**Answer:** D

**Explanation:** Reference:

<https://blogs.technet.microsoft.com/skypehybridguy/2018/09/21/intune-upgrade-windows-from-pro-toenterprise>

#### NEW QUESTION 70

You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune. You need to ensure that only applications that you explicitly allow can run on the computers. What should you use?

- A. Windows Defender Credential Guard
- B. Windows Defender Exploit Guard
- C. Windows Defender Application Guard
- D. Windows Defender Antivirus.

**Answer:** C

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/windows/security/threat-protection/device-guard/introduction-to-device-guardv-based-security-and-windows-defender-application-control>

#### NEW QUESTION 75

Your company plans to deploy tablets to 50 meeting rooms.

The tablets run Windows 10 and are managed by using Microsoft Intune. The tablets have an application named App1.

You need to configure the tablets so that any user can use App1 without having to sign in. Users must be prevented from using other applications on the tablets. Which device configuration profile type should you use?

- A. Kiosk
- B. Endpoint protection
- C. Identity protection
- D. Device restrictions

**Answer:** A

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/windows/configuration/kiosk-single-app>

#### NEW QUESTION 79

You have 10 computers that run Windows 7 and have the following configurations:

- ☒ A single MBR disk
- ☒ A disabled TPM chip
- ☒ Disabled hardware virtualization
- ☒ UEFI firmware running in BIOS mode
- ☒ Enabled Data Execution Prevention (DEP)

You plan to upgrade the computers to Windows 10.

You need to ensure that the computers can use Secure Boot.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Convert the MBR disk to a GPT disk
- B. Enable the TPM chip.
- C. Disable DEP
- D. Enable hardware virtualization
- E. Convert the firmware from BIOS to UEFI.

**Answer:** AE

**Explanation:** Reference:

<https://docs.microsoft.com/en-us/windows-hardware/manufacture/desktop/boot-to-uefi-mode-or-legacy-biosmod>

#### NEW QUESTION 84

You manage 1,000 computers that run Windows 10. All the computers are enrolled in Microsoft Intune. You manage the servicing channel settings of the computers by using Intune.

You need to review the servicing status of a computer. What should you do?

- A. From Device configuration- Profiles, view the device status.
- B. From Device compliance, view the device compliance.
- C. From Software updates, view the audit logs.
- D. From Software updates, view the Per update ring deployment state.

**Answer:** D

**Explanation:** References:

<https://docs.microsoft.com/en-us/intune/windows-update-compliance-reports>

#### NEW QUESTION 88

You have computers that run Windows 10 and are configured by using Windows AutoPilot. A user performs the following tasks on a computer named Computer1:

- ▶ Creates a VPN connection to the corporate network
- ▶ Installs a Microsoft Store app named App1
- ▶ Connects to a Wi-Fi network

You perform a Windows AutoPilot Reset on Computer1.

What will be the state of the computer when the user signs in? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

The Wi-Fi connection will be:

<input type="checkbox"/>	Removed
<input checked="" type="checkbox"/>	Retained and the passphrase will be retained
<input type="checkbox"/>	Retained but the passphrase will be reset

App1 will be:

<input checked="" type="checkbox"/>	Reinstalled at sign-in
<input type="checkbox"/>	Removed
<input type="checkbox"/>	Retained

The VPN connection will be:

<input type="checkbox"/>	Removed
<input checked="" type="checkbox"/>	Retained and the credentials will be cached
<input type="checkbox"/>	Retained but the credentials will be reset

Answer:

Explanation: Reference:

<https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset>
