

PL-100 Dumps

Microsoft Power Platform App Maker

<https://www.certleader.com/PL-100-dumps.html>

NEW QUESTION 1

- (Exam Topic 1)

You need to create a flow for sending required emails to the regional manager.

How should you create the flow? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Option	Type
Flow type to use	<div style="border: 1px solid black; padding: 2px;"> <div style="border-bottom: 1px solid black; padding: 2px;">Instant</div> <div style="border-bottom: 1px solid black; padding: 2px;">Automated</div> <div style="border-bottom: 1px solid black; padding: 2px;">Business Process</div> <div style="padding: 2px;">Scheduled</div> </div>
Trigger to start flow	<div style="border: 1px solid black; padding: 2px;"> <div style="border-bottom: 1px solid black; padding: 2px;">HTTP Webhook</div> <div style="border-bottom: 1px solid black; padding: 2px;">Power Apps</div> <div style="border-bottom: 1px solid black; padding: 2px;">Common Data Service when a record is created</div> <div style="padding: 2px;">Office 365 Outlook Send an email</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: Business Process

Scenario: If a sales representative submits a status report and assigns the At Risk status to a process, the app must prompt the sales representative to enter a detailed description for the risk. This information must be emailed to the regional manager.

Business process flows provide a guide for people to get work done. They provide a streamlined user experience that leads people through the processes their organization has defined for interactions that need to be advanced to a conclusion of some kind. This user experience can be tailored so that people with different security roles can have an experience that best suits the work they do.

Box 2: Common Data Service when a record is created

The Microsoft Dataverse (Common Data Service) connector provides the following triggers to help you define when your flows start:

- > When a row is created, updated, or deleted
- > When an action is performed
- > When a flow step is run from a business process flow Reference:

<https://docs.microsoft.com/en-us/power-automate/flow-types> <https://docs.microsoft.com/en-us/power-automate/dataverse/overview>

NEW QUESTION 2

- (Exam Topic 1)

You need to modify the app design to meet the accessibility needs of the sales associates.

Which properties should you configure? To answer, drag the appropriate properties to the correct restrictions. Each property may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Properties	Restriction	Property
TabIndex		
DisplayMode	Design for User2	<input type="text"/>
AccessibleLabel	Design for User3	<input type="text"/>
Tooltip		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: AccessibleLabel

Scenario: Before deploying the app to production, you must ensure that the app conforms to Microsoft accessibility and performance guidelines. User2 is visually impaired and cannot see images. AccessibleLabel is a label for screen readers. An empty value for Image, Icon, and Shape controls will hide the controls from screen reader users. Box 2: TabIndex User3 is unable to use a mouse. TabIndex determines if the control participates in keyboard navigation. Keyboard navigation is an important aspect of any app. For many, the keyboard is more efficient than using touch or a mouse. The navigation order should: Mirror what is seen visually. Only have a tab stop at controls that are interactive. Follow either an intuitive across and then down "Z" order or a down and then across "reverse-N" order.

NEW QUESTION 3

- (Exam Topic 1)

You need to configure the app to meet the requirements.

Which object properties should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Property
Provide a visual indicator when the app is offline.	<input type="checkbox"/> Visible <input type="checkbox"/> OnSelect <input type="checkbox"/> DisplayMode <input type="checkbox"/> Fill
Store data when the app is offline.	<input type="checkbox"/> OnSelect <input type="checkbox"/> LoadData <input type="checkbox"/> SubmitForm <input type="checkbox"/> Now

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Fill

Scenario: You must display a visual indicator in the app so that sales representatives know whether the app is offline before submitting reports.

Fill – The background color of a control. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-screen> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

NEW QUESTION 4

- (Exam Topic 1)

You need to ensure that the app can support the needs of User2 and User3, and meets the production deployment requirements.

Which tools should you use? To answer, select the appropriate tool in the answer area. NOTE: Each correct selection is worth one point.

Tools	Answer Area	
	Requirement	Tool
<input type="checkbox"/> Solution Checker	Accessibility	<input type="checkbox"/> Tool
<input type="checkbox"/> App Checker	Deployment	<input type="checkbox"/> Tool
<input type="checkbox"/> Object Detector		
<input type="checkbox"/> Preview the app		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: App Checker

Scenario: Several sales representatives have accessibility restrictions. User2 is visually impaired and cannot see images. User3 is unable to use a mouse.

Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the AppChecker Accessibility checker in Power Apps Studio.

Box 2: Solution Checker

Scenario: Before deploying the app to production, you must ensure that the app conforms to Microsoft accessibility and performance guidelines.

Use solution checker to validate your model-driven apps in Power Apps. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker> <https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/use-powerapps-checker>

NEW QUESTION 5

- (Exam Topic 2)

You need to implement the change requested by the operations manager. Which control should you use?

BF70D5D

- A. Camera
- B. Shape
- C. Add picture
- D. Image

Answer: D

Explanation:

Scenario: The operations manager asks that the time tracking app display the employee's photo once they have scanned their badge. Image control in Power Apps is a control that shows an image from, for example, a local file or a data source. Reference: <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-image>

NEW QUESTION 6

- (Exam Topic 3)

A coworker creates a canvas app.

The canvas app contains the following formula. The formula is attached to the OnVisible property of the first screen that users see:

```
Collect(
Toolbox,
{
    Tool: "Hammer",
    Quantity: 1
},
{
    Tool: "Screwdriver",
    Quantity: 2
}
)
```

You are updating the canvas app.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area	Yes	No
The formula will update multiple records in a data source named Toolbox if the records exist.	<input type="radio"/>	<input type="radio"/>
A local collection is created to store data if a data source named Toolbox does not already exist.	<input type="radio"/>	<input type="radio"/>
If a collection named Toolbox exists the formula will clear any existing records before making any changes.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: No

Records are added, not updated. Box 2: Yes

The Collect function adds records to a data source. Syntax: Collect(DataSource, Item, ...)

DataSource – Required. The data source that you want to add data to. If it doesn't already exist, a new collection is created.

Item(s) - Required. One or more records or tables to add to the data source. Box 3: No

No records are cleared. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-clear-collect-clearcollect>

NEW QUESTION 7

- (Exam Topic 3)

HOTSPOT

Inspectors for a city building department use a Microsoft Teams channel, inspectors use SharePoint to view construction bylaws, rules, and regulations.

The city clerk email inspectors links to new bylaw proposal, inspectors vote on the proposals and provide additional feedback.

You need to demonstrate to the city clerk how they can automate the process

Which option should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Flow element

Option

Type of flow.

Cloud flow
Desktop flow
Business process flow

Trigger type.

Manually trigger a flow.
For a selected message in Microsoft Teams.
For a selected file in SharePoint.
When a flow is run from a business process flow.

Flow step to replace emailing the links.

Get changes for an item in SharePoint.
Post an adaptive card to a channel and wait for a response.
Post a choice of options to a user in Teams.
Send an email with options.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Flow element

Option

Type of flow.

Cloud flow
Desktop flow
Business process flow

Trigger type.

Manually trigger a flow.
For a selected message in Microsoft Teams.
For a selected file in SharePoint.
When a flow is run from a business process flow.

Flow step to replace emailing the links.

Get changes for an item in SharePoint.
Post an adaptive card to a channel and wait for a response.
Post a choice of options to a user in Teams.
Send an email with options.

NEW QUESTION 8

- (Exam Topic 3)

You create an automated flow by using Power Automate. The flow appears under My Flows and is connected to the development environment. The development environment has a solution to move components into a production environment.

You need to ensure that you can transfer the flow to another environment. What should you do?

- A. Add the flow to the default solution of the development environment and export as a managed solution.
- B. Change the environment for the flow.
- C. Add the flow to the existing solution.
- D. Add the flow to the default solution of the production environment.

Answer: A

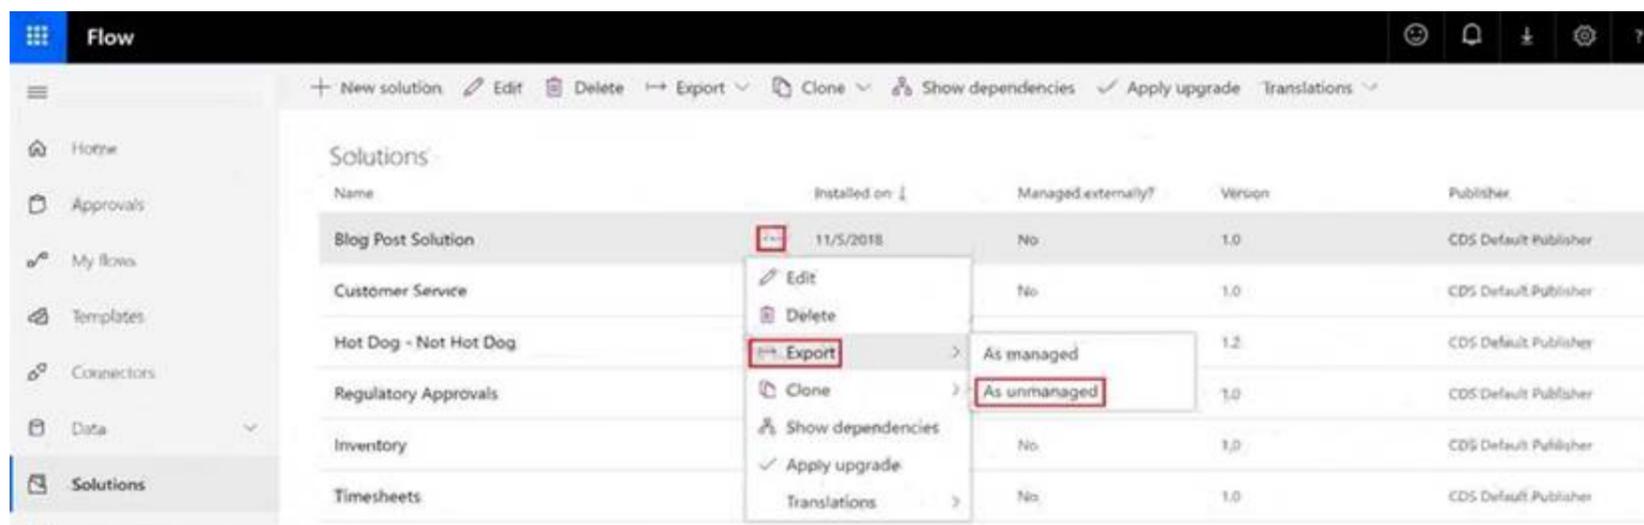

Explanation:

It is very normal for a developer to build the power automate in one environment and then export that automate & import it to another destination environment.

Exporting our Solution

After validating our flows work in our test environment, we now want to promote it to our production environment. We can export our solution by finding it in our Solutions experience, clicking on the ..., selecting Export.

Graphical user interface, application, Teams Description automatically generated

Reference:
<https://flow.microsoft.com/en-us/blog/solutions-in-microsoft-flow/>

NEW QUESTION 9

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.

Development and testing must be performed using production data. Multiple testers must be used at each testing stage.

You need to provision and configure new environments for development and testing. Solution:

- > Provision a developer environment named D1 and a sandbox environment named S1.
- > Copy the production environment to both D1 and S1.
- > Use D1 for development and S1 for testing. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Production: This is intended to be used for permanent work in an organization. Do not use production environment for testing.

Note: Instead use two sandboxed environments: one for development and one for testing. Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

NEW QUESTION 10

- (Exam Topic 3)

A company creates an app that uses Microsoft Dataverse tables.

The app creator wants to verify that the app is operating as expected by using a sample set of real-world data. You need to import the sample data into Dataverse tables.

Which two technologies can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Power BI
- B. SharePoint
- C. Power Query
- D. Dataflows

Answer: CD

Explanation:

C: You can create a table in Dataverse and fill that table with data from an OData feed by using Power Query. You can use the same techniques to integrate data from these online and on-premises sources, among others:

SQL Server Salesforce

IBM DB2

Access Excel Web APIs

OData feeds Text files

D: You can create a new Dataverse table that stores all the metadata from the dataflow run. For every refresh of a dataflow, a record is added to this table. You can also store metadata for multiple dataflow runs in the same table.

Reference:

<https://docs.microsoft.com/en-us/power-query/dataflows/load-dataflow-metadata-into-dataverse-table> <https://docs.microsoft.com/en-us/power-query/dataflows/add-data-power-query>

NEW QUESTION 10

- (Exam Topic 3)

You are an app builder for a medical office. The medical office uses activities to book appointments and business process flows to track patient status. The cleaning staff wants the app to connect directly to a Microsoft Excel workbook to track cleaning tasks. The office does not have access to reporting tools including Power BI.

You need to create apps for the following groups of users. Apps must not require customizations or the use of additional products.

Groups	Comments	Requirements
Reception area staff	Users will access the app only from desktop devices in the office.	Users must be able to access contacts and display activities as a doughnut chart.
Medical staff	Users will access the app from tablet devices.	Users must be able to access activities and business process flows.
Cleaning staff	Users will access the app only from mobile phone devices.	Users must be able to interact with a checklist to mark cleaning tasks as completed.

Which type of app should you build for each group? To answer, drag the appropriate app types to the correct groups. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

App types

- Canvas app
- Model-driven app
- Embedded canvas app

Answer Area

Group	App type
Reception area staff	App type
Medical staff	App type
Cleaning staff	App type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/embedded-canvas-app-guidelines> <https://global.hitachi-solutions.com/blog/canvas-vs-model-driven-apps>

NEW QUESTION 13

- (Exam Topic 3)

You are a technical assistant for a legal services organization. The company uses SharePoint to manage documents and Microsoft Dataverse as the data store. The company has strict rules about access, permissions, and privacy.

Lawyers and paralegals use Microsoft Teams for communications and collaboration. Employees use personal devices to access legal files. You do not have access to the admin area in Microsoft Power Platform.

You need to ensure that these rules are observed consistently and managed in one place.

Which type of app should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	App type
Access client billing details	<ul style="list-style-type: none"> Canvas app in Microsoft Teams Canvas app in SharePoint Model-driven app in SharePoint Model-driven app in Microsoft Teams
Log phone calls and schedule appointments with clients and the team assigned to them	<ul style="list-style-type: none"> Dynamics 365 App for Outlook Microsoft Teams calendar SharePoint calendar

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Model-driven app in Microsoft Teams

A user's ability to see and use apps is controlled by sharing the application with the user. Sharing of canvas apps is done directly with a user or Azure AD group but is still subject to Dataverse security roles. Sharing of model-driven apps is done via Dataverse security roles.

Box 2: Sharepoint Calendar Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/database-security>

NEW QUESTION 18

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR

representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up. Proposed solution: Use a Common Data Service workflow with a PowerQuery on the data entity. Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed.

Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-cl>

NEW QUESTION 20

- (Exam Topic 3)

A call center manager monitors incoming phone calls. The manager analyzes the performance of phone reps by using a custom view. The view contains a custom field named Phone call Duration in Minutes.

The call center manager must present an Excel spreadsheet daily to upper management. The spreadsheet must contain the call center performance for further trending analysis and corrective actions.

You need to create the spreadsheet.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

- Create a pivot table, and then use the Phone call Duration in Minutes field as a category area and the Rep field as a series
- Create a pivot table, and then use the Phone Rep field as a category and the Phone call Duration in Minutes field as a series
- Set the formula for phone call duration in minutes to Average and add a pie chart linked the pivot table
- Export the custom view to an Excel dynamic spreadsheet
- Export the custom view to an Excel dynamic pivot table
- Save the spreadsheet and upload it back to the system
- Export the custom view to an Excel template

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Timeline Description automatically generated with low confidence

Step 1: Export the custom view to an Excel dynamic pivot table

You can export app data to an Office Excel PivotTable to see patterns and trends in data. An Excel PivotTable is a great way to summarize, analyze, explore, and present your app data.

Step 2: Create a pivot table, and then use the Phone Rep field as a category and the Phone call Duration in Minutes as field as series

Step 3: Set the formula for phone call duration in minutes to Average and add a pie chart linked to the pivot table

Step 4: Save the spreadsheet and upload it back to the system. Reference:

<https://docs.microsoft.com/en-us/powerapps/user/export-excel-pivottable>

NEW QUESTION 21

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Key Phrase Extraction model.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

The key phrase extraction prebuilt model identifies the main points in a text document. Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-key-phrase>

NEW QUESTION 24

- (Exam Topic 3)

You create a Power Platform solution. Solution data is stored in a variety of documented cloud services. You must also be able to connect to one or more industry data sources.

You need to configure the data sources. What should you do?

- A. Create a business process flow.
- B. Create a data policy template.
- C. Create a UI flow.
- D. Use an existing data connector.

Answer: D

Explanation:

In Power Apps, add a data connection to an existing canvas app or to an app that you're building from scratch. Your app can connect to SharePoint, Common Data Service, Salesforce, OneDrive, or many other data sources.

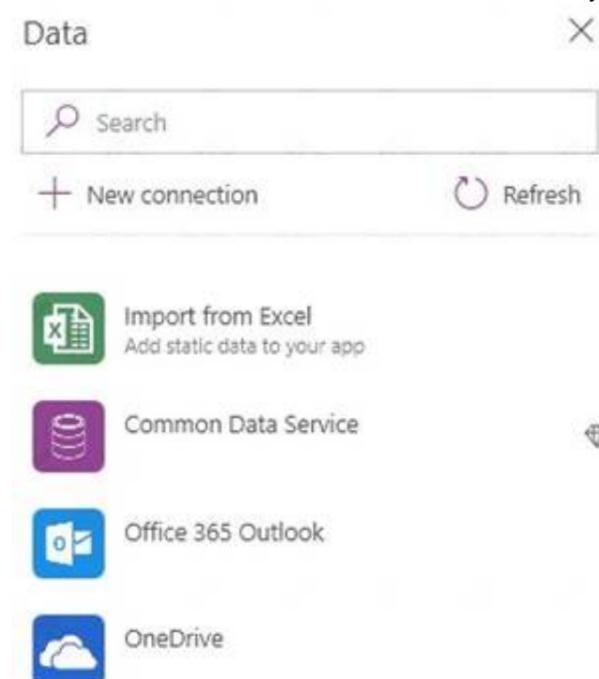

Note:

Add data source

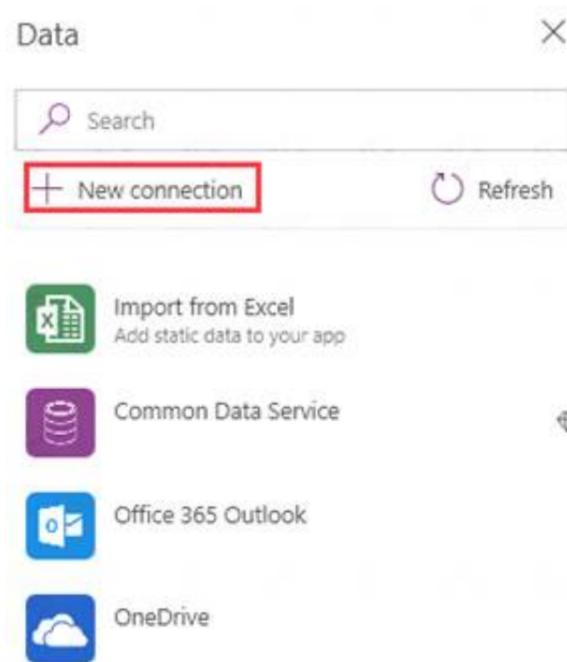

* 1. In the center pane, select connect to data to open the Data pane.

* 2. Select Add data source.

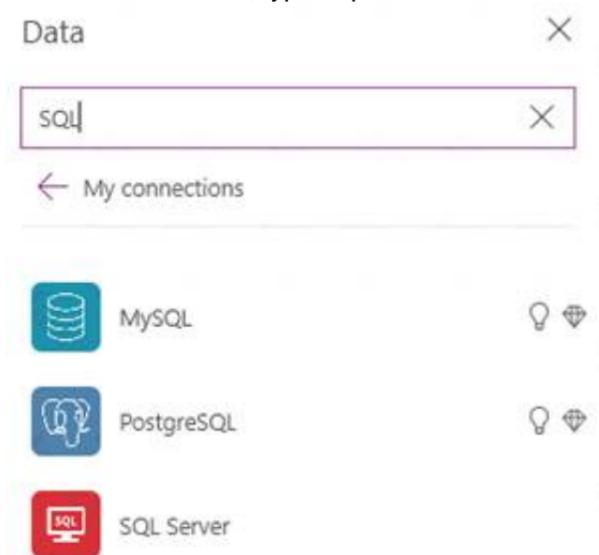

* 3. If the list of connections includes the one that you want, select it to add it to the app. Otherwise, skip to the next step.

* 4. Select New connection to display a list of connections.

* 5. In the search bar, type or paste the first few letters of the connection you want, and then select the connection when it appears.

* 6. Select Create to both create the connection and add it to your app. Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-data-connection>

NEW QUESTION 29

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:

- > Create an Object Detection custom model in AI Builder.
- > Train the model with pictures of bicycles and then publish the trained model.
- > Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

To train an object detection model to recognize your objects, you have to gather images that contain those objects.

The first thing you'll do when you create an AI Builder object detection model is to define its domain. Upload images

Then Train and publish your object detection model

The object detector component takes a photo or loads an image file to do an object detection scan. On a mobile device, the user chooses between taking a photo or selecting one already available in the device user interface. When an image is selected, the component automatically scans it to identify objects.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

NEW QUESTION 34

- (Exam Topic 3)

You are creating an app for an organization's human resources (HR) department. You create an Employee entity in an unmanaged Common Data Service solution.

Another user creates the following Power Automate flows separately from the solution:

Flow	Description
FlowA	Send email to the HR manager when a new document is uploaded to Microsoft SharePoint.
FlowB	Send email to the HR manager after a user selects a document in Microsoft OneDrive for Business and runs the flow.
FlowC	Send email to the HR manager at 8 AM daily if new documents are uploaded in Microsoft OneDrive for Business since the previous day.
FlowD	Send email to the HR manager when a new employee record is added.

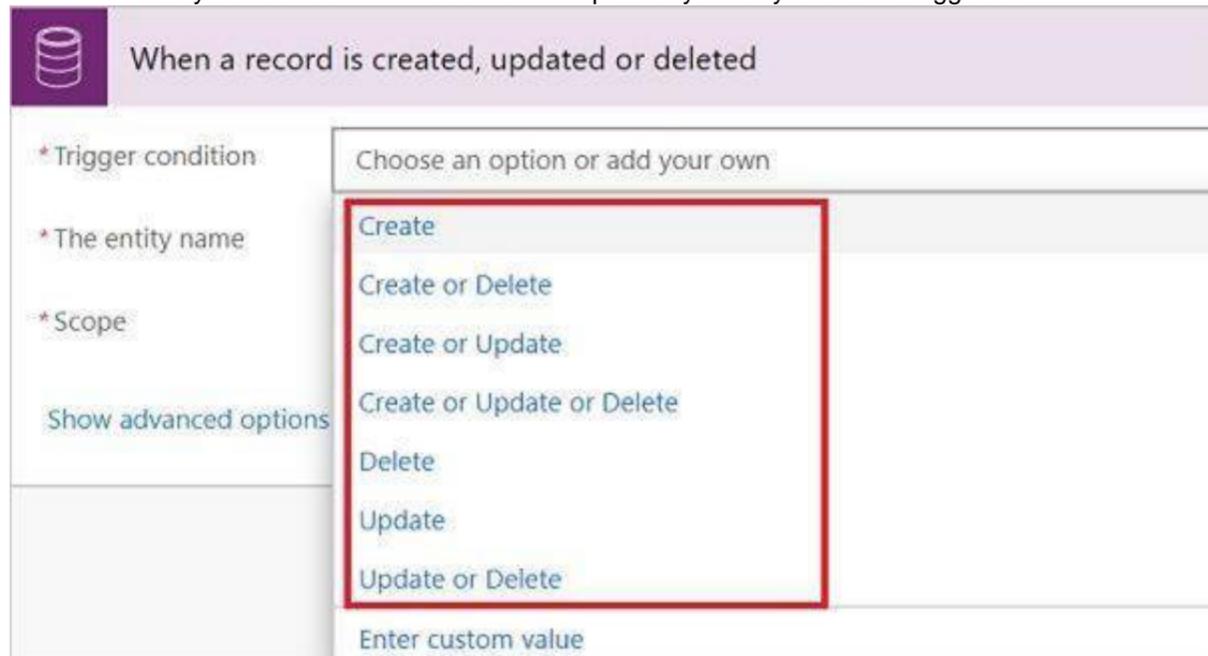

You need to incorporate the flows that can be added to the solution.
Which two flows can you include? Each correct selection presents a complete solution.
NOTE: Each correct selection is worth one point.

- A. FlowA
- B. FlowB
- C. FlowC
- D. FlowD

Answer: AD

Explanation:

You can add any of these conditions to determine precisely when your flow is triggered.

Reference:
<https://docs.microsoft.com/en-us/power-automate/connection-cds-native>

NEW QUESTION 38

- (Exam Topic 3)
DRAG DROP

A company uses Microsoft Power Platform. All users in the company have read/write and create access to SharePoint. You create a canvas app that displays data from a SharePoint list. A group of users must use the app without the ability to change the data source. You need to share the app with the users.

What should you do? To answer, drag the appropriate actions to the correct components. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Actions

- Send all users an email invitation.
- Enable Can use permission.
- Set the users as co-owners.
- Enable Can edit permission.

Answer Area

Component	Action
Canvas app	
SharePoint connection	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 42

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Text Recognition model.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in-powerapps>

NEW QUESTION 44

- (Exam Topic 3)

DRAG DROP

You develop Microsoft Power Platform solutions for Contoso, Ltd You create a Power Virtual Agents chatbot in a Microsoft Teams team.

You need to make the chatbot available to all users in your organization.

Which three actions should you perform in sequence? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 48

- (Exam Topic 3)

DRAG DROP

You are creating a Power Automate cloud flow to update a column on each Item in a list of Microsoft Dataverse records. Records are sorted in order of priority.

You must use a complex expression to determine the column value. The column value must be stored in a variable to make future maintenance easier. Records must be processed based on the sorted order.

You need to add flow steps to process the list of records.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 51

- (Exam Topic 3)

A company has ten sales regions. Each salesperson is assigned to one region. You create a set of five standard views that all salespeople will use. Sales users only want to see information for their own region. Sales users must call sales leads within a week of receiving a lead.

You need to recommend a solution for sales users.

Which two actions will you recommend? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Instruct users to create personal views that filter by region.
- B. Instruct users to filter the view by region.
- C. Configure the definition for each view to sort by region.
- D. Configure the definition for each view to filter by region.

Answer: BD

NEW QUESTION 52

- (Exam Topic 3)

You are using Test Studio to test a Power Apps canvas app. You need to ensure that the app conforms to several use cases. What should you do first?

- A. Save the app to the cloud.
- B. Create test cases for each requirement.
- C. Save the app to your computer.
- D. Create a test suite.
- E. Record test cases for each requirement.

Answer: D

Explanation:

Create a test suite.

By default, a test suite and test case are created for you in Test Studio. Test suites are used to organize your test cases.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-test-studio>

NEW QUESTION 56

- (Exam Topic 3)

You are deploying solutions from development environments into test environments. You need to gather solution information.

What should you do? To answer, drag the appropriate actions to the correct scenarios. Each action may be used once, more than once, or not at all. You may need to drag the split bar

between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Options	Answer Area	
	Scenario	Action
View the history	Find the deployment outcome	Action
Show dependencies	Determine, in which version, a type change occurred	Action
View solution layers	Determine if any components are missing	Action
Run the Solution checker		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: View the history

The solution history displays information such as solution version, solution publisher, type of operation, operation start and end time, and operation status.

Box 2: View solution layers

The see solution layers' feature allows you to view all component changes that occur due to solution changes over time. Within a solution layer, you can drill down to view specific changed and unchanged property details for a component.

The see solution layers' feature:

- > Let's you see the order in which a solution changed a component.
- > Let's you view all properties of a component within a specific solution, including the changes to the component.

Box 3: Show dependencies

As a result of dependency tracking the following behaviors are enforced:

- > Export of a solution warns the user if there are any missing components that could cause failure when importing that solution in another system.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/solution-history> <https://docs.microsoft.com/en-us/powerapps/maker/data-platform/solution-layers>
<https://docs.microsoft.com/en-us/power-platform/alm/dependency-tracking-solution-components>

NEW QUESTION 60

- (Exam Topic 3)

You have a model-driven app that has an entity named Marinas. You have an entity named Boats that list the boats associated with each marina.

You must add a list of boats to the Marinas form. You must also add an option for users to select different views including boat owners and marina members.

You need to embed the list of boats associated with a Marina record in the entity form.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Add a Subgrid component to a form	
Select Show related records and then select the related entity and default view for the subgrid	➤
Save and publish the form	⬅
Select the Allow users to change view option	⬆

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Step 1: Add a Subgrid component to a form

You add a subgrid component the same way as you add any other component.

Step 2: Select Show related records and then select the related entity and default view for the subgrid Configure a subgrid component.

Properties available to configure when using a subgrid component on a form using the form designer include:

> Show related rows

When selected, the subgrid displays only rows related to the current row that is displayed on the form.

Step 3: Select the Allow users to change view option

Configure a subgrid component.

Properties available to configure when using a subgrid component on a form using the form designer include:

> Allow users to change view

When selected, app users can change from the Default view to another view of the table selected in the Table property.

Step 4: Save and publish the form Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/form-designer-add-configure-subgrid>

NEW QUESTION 65

- (Exam Topic 3)

You are creating a canvas app for a company that delivers packages. The app will display one screen for each delivery attempt.

Drivers must make three attempts to deliver a package before returning the package back to a warehouse. Drivers must enter details about delivery on a second screen in the app.

You need to display a list of delivery attempts on the delivery screen.

Which two components can you add to the app to display details about the delivery attempts? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Data table
- B. Vertical gallery
- C. Display form
- D. Drop-down

Answer: AC

Explanation:

The Data table control shows a dataset.

In a canvas app, add and configure a Display form control to show all fields in a record. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-data-table> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-form-layout>

NEW QUESTION 68

- (Exam Topic 3)

HOTSPOT

A company uses Power Apps. The company has a model-driven app that accesses a Microsoft Dataverse table. The app is shared with all users who all have the Basic User security role.

You must prevent the users from running and sharing the app.

What should you do? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Action
Prevent users from running the app.	<input type="checkbox"/> Turn off the app. <input type="checkbox"/> Export the app. <input checked="" type="checkbox"/> Turn off the app. <input type="checkbox"/> Remove access to the table.
Prevent users from sharing the app.	<input checked="" type="checkbox"/> Remove access to the table. <input type="checkbox"/> Export the app. <input type="checkbox"/> Turn off the app. <input checked="" type="checkbox"/> Remove access to the table.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Action
Prevent users from running the app.	<input type="checkbox"/> Turn off the app. <input type="checkbox"/> Export the app. <input checked="" type="checkbox"/> Turn off the app. <input type="checkbox"/> Remove access to the table.
Prevent users from sharing the app.	<input checked="" type="checkbox"/> Remove access to the table. <input type="checkbox"/> Export the app. <input type="checkbox"/> Turn off the app. <input checked="" type="checkbox"/> Remove access to the table.

NEW QUESTION 72

- (Exam Topic 3)

You have a canvas app that uses multiple inputs for calculations.

You must use Test Studio to create automated tests and confirm that the app works as expected. You need to organize your test scenarios into a hierarchy.

In which order should you create the objects? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area
Test assertions		
Test steps	⬅	⬆
Test suites	➡	⬇
Test cases		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated with medium confidence

Step 1: Test suites

By default, a test suite and test case are created for you in Test Studio. Test suites are used to organize your test cases. An app can contain one or more test suites.

Step 2: Test cases

Depending on how you want to organize or group your tests, you can create multiple test cases in a test suite. Each case can test a specific feature or a subset of functionalities in your app.

Step 3: Test steps Step 4: Test assertions

A test case consists of test steps that contain actions. Test actions are written using Power Apps expressions that perform a task. You can use the recorder to automatically generate the test steps as you interact with your app. After you record, you can update the test case, add new steps, delete steps, and write test assertions to validate the result of your test.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-test-studio>

NEW QUESTION 74

- (Exam Topic 3)

A company must use a Power Apps app custom control that is exported from a different canvas Power Apps app.

You need to insert the custom control into the Power Apps app.

Where should you complete the actions? To answer, drag the appropriate locations to the correct actions. Each location may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Objects		Answer Area
Display	Screens	
Components		
		Action
		Location
		Import a custom control from a file.
		Add an alignment to the custom control to display it in the middle of the Power Apps app screen.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Components

* 1. To add code components to a canvas app:

* 2. Navigate to Power Apps Studio.

* 3. Create a new canvas app or edit an existing app to which you want to add the code component.

* 4. Go to Insert > Custom > Import component.

Graphical user interface, text, application, Word Description automatically generated

Box 2: Display Reference:
<https://docs.microsoft.com/en-us/powerapps/developer/component-framework/component-framework-for-canva>

NEW QUESTION 79

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.

Development and testing must be performed using production data. Multiple testers must be used at each testing stage.

You need to provision and configure new environments for development and testing. Solution:

- > Provision a trial environment named T1 and a sandbox environment named S1.
- > Copy the production environment to T1 and S1.
- > Use T1 for development and S1 for testing.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Using trial environments, companies and customers can try out new features and solutions. Do not use a trial environment for development.

A sandbox environment is any non-production environment of Microsoft Dataverse. Isolated from production, a sandbox environment is the place to safely develop and test application changes with low risk.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/trial-environments> <https://docs.microsoft.com/en-us/power-platform/admin/sandbox-environments>

NEW QUESTION 81

- (Exam Topic 3)

You are creating a model-driven app for onboarding new employees. You need to implement business logic for the app.

Which tool should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Requirement	Tools
Business rule	Guide a user through the set of steps needed for onboarding a new employee.	<input type="text"/>
Power Automate	Make date of birth mandatory when creating a new employee record.	<input type="text"/>
Business process flow	Implement an approval flow for expense reports submitted by employees.	<input type="text"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Business process flow

A business process flow is a visual guide meant to help users complete a business process by using a set of predefined stages. Users are not limited on how long they run a business process or how long they have a stage open.

Box 2: Business rule Box 3: Power Automate

A Power Automate flow does not have any visual components like a business process flow. Power Automate flows can be configured to work with many different data sources, and a flow can connect to many different data sources within the same flow. A flow can be configured to time out if it is not completed in a certain time and can be triggered to move between steps based on data or user interaction.

Reference:

<https://docs.microsoft.com/en-us/learn/modules/intro-business-process-flows/2-differences>

NEW QUESTION 83

- (Exam Topic 3)

You create and publish a canvas app component library to perform complex calculations.

You discover an error in one of the calculations. You correct the issue and publish the component library. A co worker uses the original version of the component library in a canvas app.

You need to ensure that the co-worker uses the updated version of the component library. What should you do?

- A. Export the updated component library and instruct the co-worker to import the updated version into the canvas app
- B. Inform the co-worker to edit the canvas app and manually add the updated version of the component library
- C. Instruct the co-worker to edit the canvas app and update the component library

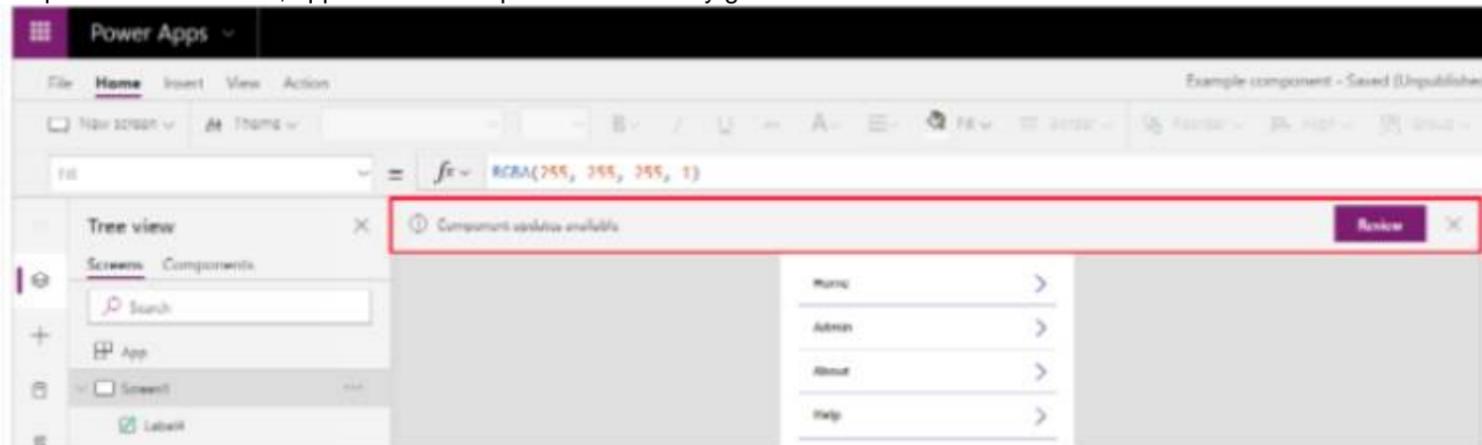

Answer: C

Explanation:

You can modify an existing component library and save any changes with additional version notes. However, the updated component library version must be published for use in existing apps that use the component library.

Makers of other apps are notified of updated components being available. The notification appears when makers edit the apps in canvas app studio. They can choose to update the components:

Graphical user interface, application Description automatically generated

Select Review, and you'll see the option to update the component: Graphical user interface, application Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/component-library>

NEW QUESTION 86

- (Exam Topic 3)

You need to set the value for a global variable named RunningTotal to 5 and navigate to the previous screen named MainScreen.

Which formula should you use?

- A. UpdateContext({ RunningTotal: 5 }); Navigate(MainScreen, ScreenTransition.Cover, RunningTotal);
- B. If(Value(TextBox1.Text) >= 0, (Set(RunningTotal, 5); Back();), Color.Green)
- C. UpdateContext({ RunningTotal:5 }); Back()
- D. Set(RunningTotal, 5); Back();

Answer: D

Explanation:

You set the value of the global variable with the Set function. Set(MyVar, 1) sets the global variable MyVar to a value of 1.

Use the Back and Navigate function to change which screen is displayed. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-variables> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-navigate>

NEW QUESTION 88

- (Exam Topic 3)

A company uses Power Automate and Power Apps to streamline business processes. You need to use AI Builder to analyze customer reviews of the company's products.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Action

- Publish the model.
- Connect data to the model.
- Train the model.
- Use the model in a Power Automate flow.

Answer Area

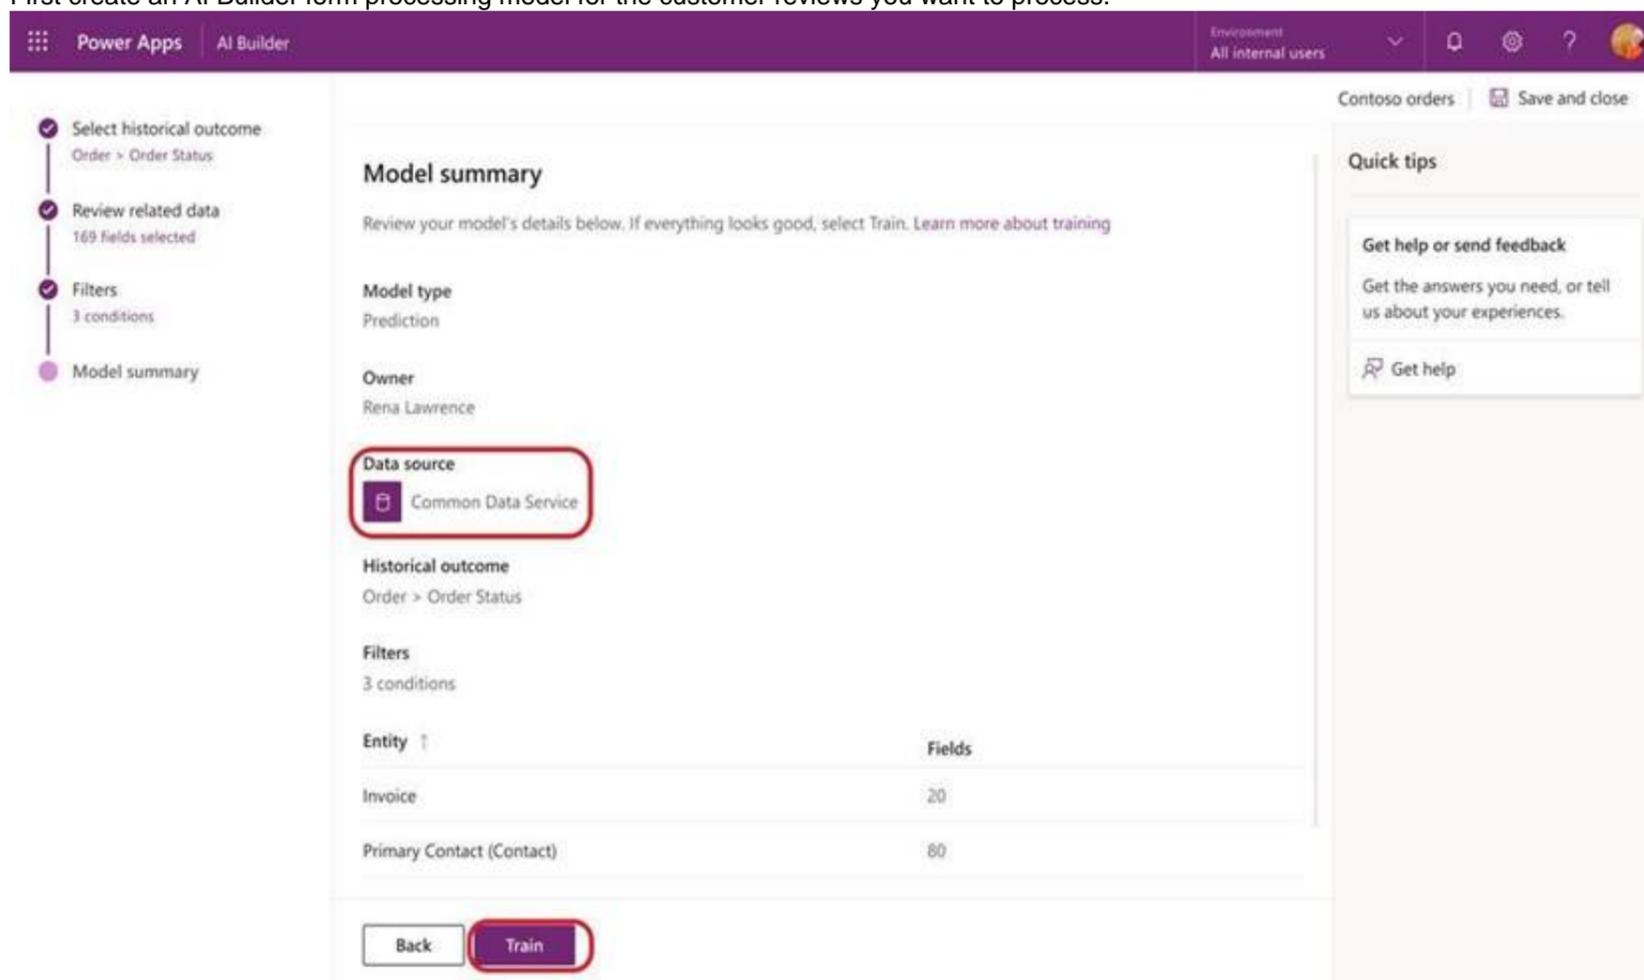

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Connect data to the model.

First create an AI Builder form processing model for the customer reviews you want to process.

Step 2: Train the model. Step 3: Publish the model.

Step 4: Use the model in a Power Automate flow.

Once you train and publish the model, create a solution-aware flow in Power Automate. Reference:

<https://powerapps.microsoft.com/en-us/blog/introducing-simplified-ai-builder-experience-in-power-automate/>

NEW QUESTION 90

- (Exam Topic 3)

You receive ideas from employees in a Microsoft Teams channel. Managers are not members of the Teams channel. Submissions must be reviewed by three managers who are determined by submission type. You need approval from the managers to process submissions. What should you create?

- A. approval request in the Teams channel that requires a response from all approvers
- B. approval request in a chat with the three managers that requires a response from all approvers
- C. approval template that requires responses to be completed in order
- D. approval template that requires a response from all approvers

Answer: B

NEW QUESTION 94

- (Exam Topic 3)

An administrator plans to create and deploy dashboards for use only by sales associates. The dashboards will display the current sales pipeline, open cases, recent major wins, and key opportunities by postal code.

Sales associates must be able to act on the specific data displayed in dashboards. You need to create the dashboards.

Which type of dashboards should you create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Type of dashboard

Ensure that all sales associates can view the dashboard.

	▼
User	
System	

Ensure that sales associates can interact with data from the dashboards.

	▼
Standard	
Multi-stream	
Single-stream	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: User

Type of dashboard: If you want your dashboards to be available across the organization and do not want to manage the access levels at a more detailed level, you might want to create an organization-owned dashboard. However, if you are concerned about the access privileges and security of your dashboard, consider creating a user-owned dashboard where you have more control on who can access it.

Box 2: Single-stream

The single-stream dashboards display real-time data over one stream based on an entity view or queue. The single-stream dashboards are typically helpful to Tier 2 service leads or managers, who monitor fewer, but more complex or escalated cases.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/model-driven-apps/create-dashboard> <https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/configure-interactive-experience-dashbo>

NEW QUESTION 98

- (Exam Topic 3)

DRAG DROP

You are creating a model-driven app.

You must create new components to ensure data from related records can be displayed on a record form. You need to select the component types.

Which component types should you use? To answer, drag the appropriate component types to the correct data. Each component type may be used once, more than once, or not at all. You may need to drag the spirt bar between panes or scroll to view/ content.

NOTE: Each correct selection is worth one point.

<p>Component types</p> <div style="border: 1px solid gray; padding: 2px; margin-bottom: 5px;">Card form</div> <div style="border: 1px solid gray; padding: 2px; margin-bottom: 5px;">System view</div> <div style="border: 1px solid gray; padding: 2px; margin-bottom: 5px;">Public view</div> <div style="border: 1px solid gray; padding: 2px; margin-bottom: 5px;">Quick view form</div>	<p>Answer Area</p>	<p>Data</p> <p>Columns from a single record found in a lookup</p> <p>List of related records</p>	<p>Component type</p> <div style="border: 1px solid gray; padding: 2px; margin-bottom: 5px;"></div> <div style="border: 1px solid gray; padding: 2px; margin-bottom: 5px;"></div>
---	---------------------------	---	--

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

<p>Component types</p> <div style="border: 1px dashed green; padding: 2px; margin-bottom: 5px;">Card form</div> <div style="border: 1px dashed green; padding: 2px; margin-bottom: 5px;">System view</div> <div style="border: 1px dashed green; padding: 2px; margin-bottom: 5px;">Public view</div> <div style="border: 1px dashed green; padding: 2px; margin-bottom: 5px;">Quick view form</div>	<p>Answer Area</p>	<p>Data</p> <p>Columns from a single record found in a lookup</p> <p>List of related records</p>	<p>Component type</p> <div style="border: 1px dashed green; padding: 2px; margin-bottom: 5px;">System view</div> <div style="border: 1px dashed green; padding: 2px; margin-bottom: 5px;">Public view</div>
---	---------------------------	---	--

NEW QUESTION 103

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:

- > Create a Category Classification custom model in AI Builder.
- > Train the model with pictures of bicycles and then publish the trained model.
- > Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead create an Object Detection custom model Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

NEW QUESTION 104

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up. Proposed solution: Create a custom action that has defined dataflows.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed.

Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-cl>

NEW QUESTION 108

- (Exam Topic 3)

A company uses a model-driven app. You create a Power BI sales report.

The executive of the company wants all users to see tiles from the report in the model-driven app. You need to ensure all users can see the tiles.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Step	Setting
Allow addition of Power BI visualization tiles.	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right; margin-bottom: 5px;">▼</div> <div style="border: 1px solid black; padding: 2px;">Power Platform Environment settings</div> <div style="border: 1px solid black; padding: 2px;">Power Apps settings</div> <div style="border: 1px solid black; padding: 2px;">Power BI Service settings</div> <div style="border: 1px solid black; padding: 2px;">Power BI Desktop settings</div> </div>
Add tiles to a dashboard.	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right; margin-bottom: 5px;">▼</div> <div style="border: 1px solid black; padding: 2px;">Create a personal dashboard</div> <div style="border: 1px solid black; padding: 2px;">Create a Power BI dashboard.</div> <div style="border: 1px solid black; padding: 2px;">Create a system dashboard.</div> </div>
Allow users to view tiles.	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right; margin-bottom: 5px;">▼</div> <div style="border: 1px solid black; padding: 2px;">Share tile and share dashboard.</div> <div style="border: 1px solid black; padding: 2px;">Share report and share dashboard.</div> <div style="border: 1px solid black; padding: 2px;">Share tile and publish dashboard.</div> <div style="border: 1px solid black; padding: 2px;">Share report and publish dashboard.</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text Description automatically generated

Box 1: Power Platform Environment settings

Before users can embed Power BI visualizations on personal dashboards, the organization-wide setting must be enabled.

- > In the Power Platform admin center, select an environment.
- > Select Settings > Product > Features.
- > Under Embedded content set Power BI visualization embedding to On to enable or Off to disable.
- > Select Save.

Box 2: Create a personal dashboard

You can embed Power BI tiles on your personal dashboard.

- > Open your app and go to Dashboards.
- > Select an existing personal dashboard or select New to create one.
- > On the dashboard, select an area where you want the tile to appear, and then select Power BI Tile on the toolbar.
- > Add new Power BI tile.
- > In the Power BI Tile dialog, select the workspace and then select the Power BI tile that you want to display on your dashboard. Select Enable for mobile if you want to make the tile available for Dynamics 365 for tablets and Dynamics 365 for phones.
- > Select another area of the dashboard and repeat this step to add another Power BI tile, or other component, such as a chart or list, to your dashboard.
- > Select Save to save your dashboard.

Box 3: Share report and share dashboard.

To share your personal dashboard that contains Power BI visualizations you must configure sharing in both Dataverse and Power BI, and the user or group must have the same credentials and appropriate level of access in both services. To share your personal dashboard in your app, go to Dashboards. In the list of dashboards, select the personal dashboard you want, and then select SHARE DASHBOARD.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/use-power-bi#embed--visualizations-on-personal-dashb>

NEW QUESTION 109

- (Exam Topic 3)

You are creating a capacity planning dashboard with Power BI desktop.

The dashboard must be able to be used within a model-driven manufacturing planning app as well as be embedded within a Microsoft Teams channel.

The data sources are as follows:

Type of data	Data source
Sales log that show pending sales by product	Microsoft Excel workbook
Work estimates, cost estimates, and start and ending dates for each job activity by employee	Common Data Service entity
Actual work values and associated costs of work to date by job activity and employee	On-premises Microsoft SQL Server-based ERP system
Employee information	On-premises Microsoft SQL Server-based ERP system

You need to determine the appropriate method for accomplishing each task.

Which methods should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Task	Method
Connect to the ERP system.	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right; margin-bottom: 5px;">▼</div> <div style="border: 1px solid black; padding: 2px;"> Use a Data Gateway Use a Custom Connector Use a Service Content Pack </div> </div>
Create the relationship between the employee file and the work estimates.	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right; margin-bottom: 5px;">▼</div> <div style="border: 1px solid black; padding: 2px;"> Create a composite model Create an aggregated table Create entity relationships in the CDS Solution Explorer </div> </div>
Create calculations for work remaining, remaining budget.	<div style="border: 1px solid black; padding: 5px;"> <div style="text-align: right; margin-bottom: 5px;">▼</div> <div style="border: 1px solid black; padding: 2px;"> Create a Data Analysis Expressions formula Create an aggregated table Create a modeling view </div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A picture containing graphical user interface Description automatically generated

Box 1: Use a Date Gateway

You can install an on-premises data gateway on the same local computer as SQL Server (in production, it would typically be a different computer).

Box 2: Create an entity relationship in CDS Solution Explorer You can create relationships with CDS Solution Explorer. Box 3: Create an aggregate table

Rollup columns help users obtain insights into data by monitoring key business metrics. A rollup column contains an aggregate value computed over the rows related to a specified row. This includes regular tables and activity tables such as emails and appointments.

Reference:

<https://docs.microsoft.com/en-us/power-bi/connect-data/service-gateway-sql-tutorial> <https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-entity-relationships> <https://docs.microsoft.com/en-us/powerapps/maker/data-platform/define-rollup-fields>

NEW QUESTION 110

- (Exam Topic 3)

A company is building multiple Power Apps apps to support a mobile sales team. The apps must all share a common control that has custom properties.

You need to create a solution for the apps.

Which objects should you use? To answer, drag the appropriate objects to the correct requirements. Each object may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Objects	Requirement	Object
Entity	Reuse the custom control for multiple canvas apps.	
Component		
Component library	Receive input data through a custom property.	
Component framework		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Component library

Components are reusable building blocks for canvas apps so that app makers can create custom controls to use inside an app, or across apps using a component library. Components can use advanced features such as custom properties and enable complex capabilities.

By creating a component library, app makers easily share and update one or more components with other makers.

Component libraries are containers of component definitions that make it easy to: Discover and search components.

Publish updates.

Notify app makers of available component updates. Box 2: Component

A component can receive input values and emit data if you create one or more custom properties. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/component-library> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/create-component>

NEW QUESTION 112

- (Exam Topic 3)

You are designing a canvas app.

You need to select user interface controls to include in the app.

Which control should you use? To answer, drag the appropriate controls to the correct requirements. Each control may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Controls	Requirement	Control
List box	Allow users to select multiple items in a list.	
Radio		
Combo box	Allow users to select multiple items from a list of options by typing in a phrase.	
Drop-down list		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: List box

A List Box control always shows all available choices (unlike a Drop down control) and in which the user can choose more than one item at a time (unlike a Radio control).

Box 2: Combo box

A Combo box control allows you to search for items you will select. The search is performed server-side on the SearchField property so performance is not affected by large data sources.

Single or multi-select mode is configured via the SelectMultiple property.

When searching for items to select, for each item you can choose to show a single data value, two values, or a picture and two values (Person) by modifying the Layout settings in the Data pane.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-list-box> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-combo-box>

NEW QUESTION 113

- (Exam Topic 3)

You are creating a canvas app.

You need to store and retrieve small amounts of data on a local device when the app is offline. Which set of functions should you use?

- A. SaveData, LoadData
- B. Set, Patch
- C. Patch, Collect
- D. Set, Collect

Answer: A

Explanation:

LoadData and SaveData combine to form a simple mechanism to store small amounts of data on a local device. By using these functions, you can add simple offline capabilities to your app.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/offline-apps>

NEW QUESTION 114

- (Exam Topic 3)

A company is building a Power Apps app to track key project tasks.

Users assign tasks a risk status on a scale of 0 to 100 by using a slider input control named RiskStatus on the app. The highest risks use the risk status value of 100.

For each task, the user selects a button named RiskLevel to send the name of the task and RiskStatus number to key project stakeholders. The color of the button must change to the color listed in the following table based on the value of the RiskStatus control. The default color for the button is green.

RiskStatus slider value	Risk description	RiskLevel button color
0–50	No/Low risk	Green
51–100	High risk	Red

You need to configure the solution to change the color of the RiskLevel button.

How should you configure the app? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Question

Response

Where do you enter the formula to change the button color?

▼

On the RiskStatus slider.

On the RiskLevel button.

In the variables of the Power Apps app.

On the OnStart property of the Power Apps app.

Which formula should you use?

▼

If (RiskStatus.Value > 75) (return Red;)

If (RiskStatus.Value > 75, Red, Green)

If (RiskStatus.Value > 75 ? Red : Green)

RiskLevel.Fill = RiskStatus.Value > 75 ? Red : Green;

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated

Box 1: On the RiskLevel button.

On the RiskLevel button fill property.

Box 2: Risklevel.Fill = RiskStatus.Value > 75 ? Red : Green;

Most every type of control in a Power App, has a Fill property, for the fill color. Reference:

<https://wonderlaura.com/2020/07/23/power-apps-gallery-conditional-formatting/>

NEW QUESTION 117

- (Exam Topic 3)

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.

You need to complete the app.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

A. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to View. Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail). Set the data source of the form to Accounts. Set the Item property of the form to Selected. Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).

B. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to View. Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail). Set the data source of the form to Accounts. Set the Item property of the form to First(Accounts). Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).

C. Add an edit form to Screen_AccountDetail and set the Default Mode of the form to New. Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail). Set the data source of the form to Accounts. Set the Item property of the form to Selected. Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).

D. Add a display form to Screen_AccountDetail. Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail). Set the data source of the form to Accounts. Set the Item property of the form to Selected. Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts).

Answer: AD

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

NEW QUESTION 120

- (Exam Topic 3)

You create a canvas app for a store.

The logo must appear as the background image for the app. A loading spinner must display on the screen as the app loads.

You need to add the features to the app.

What should you modify? To answer, drag the appropriate form areas to the correct requests. Each form area may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Screen areas	Feature request	Screen area
<div style="display: flex; gap: 10px;"> <div style="border: 1px solid black; padding: 2px 10px;">Form</div> <div style="border: 1px solid black; padding: 2px 10px;">Gallery</div> </div>	Add logo.	<div style="border: 1px solid black; width: 80px; height: 20px;"></div>
<div style="border: 1px solid black; padding: 2px 10px; margin-top: 5px;">Screen</div>	Add loading spinner.	<div style="border: 1px solid black; width: 80px; height: 20px; margin-top: 5px;"></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Screen

You can add an image to a screen in several different ways. One way is to upload an image to the app, go to the Media tab, and then click on the image to add it to a screen.

Note: Configure graphical elements in your app, including images, photos, and elements of a pen control. BackgroundImage – The name of an image file that appears in the background of a screen.

Applies to the Screen control. Box 2: Screen

Out Of Box Canvas App, provide a property called LoadingSpinner and LoadingSpinnerColor.

LoadingSpinner property is used to displaying a Canvas App OOB Loader Image unless your screen finishes loading.

Click on the Screen in your Canvas App and then You'll be able to see LoadingSpinner and LoadingSpinnerColor Property.

Graphical user interface, application Description automatically generated

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/properties-visual> <https://arpitmscrmhunt.blogspot.com/2020/04/powerapps-display-loading-icon-until.html>

NEW QUESTION 121

- (Exam Topic 3)

You have a Power Platform solution that uses Common Data Service. You need to secure all fields that support field-level security. Which field can you secure?

- A. createdon
- B. accountid
- C. owninguser
- D. cr7b_accountid

Answer: D

Explanation:

Which fields can be secured?

Although most attributes can be secured, there are system attributes, such as IDs, timestamps, and record tracking attributes, that can't. Below are a few examples of attributes that can't be enabled for field security. ownerid, processid, stageid, accountid, contactid createdby, modifiedby, OwningTeam, OwningUser

createdon, EntityImage_ Timestamp, modifiedon, OnHoldTime, overriddencreatedon statecode, statuscode

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/field-level-security>

NEW QUESTION 124

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:

- > Create a Category Classification custom model in AI Builder.
- > Train the model with pictures of bicycles and then publish the trained model.
- > Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead create an Object Detection custom model Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

NEW QUESTION 127

- (Exam Topic 3)

A company is using Power Virtual Agents in Microsoft Teams to expose Microsoft Dataverse data to employees.

You create a chatbot that retrieves a list of customers by postal code from a Dataverse table. The chatbot will accept requests from a user and must connect to Dataverse to retrieve the data.

You need to connect the chatbot to the Dataverse table. What should you use?

- A. Table
- B. Power Apps
- C. Microsoft Teams
- D. Power Virtual Agents
- E. Power Automate

Answer: C

Explanation:

Dataverse for Teams is the “lite” version of Dataverse. It is a low-code platform designed to build relatively simple (but still powerful) apps, using a user-friendly interface and remaining within Microsoft Teams. This new update means that users now have the possibility to create Power Apps apps, Power Automate flows and Power Virtual Agents bots without leaving the Teams platform.

Reference:

<https://docs.microsoft.com/en-us/learn/paths/work-power-platform-teams/>

<https://docs.microsoft.com/en-us/learn/modules/create-chatbot-power-virtual-agents-dataverse-teams/5-call-acti>

NEW QUESTION 128

- (Exam Topic 3)

You create multiple apps as part of an unmanaged solution. You need to move the apps to another environment.

You need to pick the appropriate solution type for each requirement.

Which types of solutions should you create? To answer, drag the appropriate solution types to the correct requirements. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solution types	Requirement	Solution type
Managed	Edit existing components of the solution.	Solution type
Unmanaged	Add new components to the solution.	Solution type
	Export the solution.	Solution type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Unmanaged

Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution.

Box 2: Unmanaged

Box 3: Managed

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

Reference:

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>

NEW QUESTION 133

- (Exam Topic 3)

You create the following apps for a company that provides financial guidance services: a model-driven app for financial advisers that work in the company’s offices and a canvas app for remote financial advisers.

You need to create business rules for a custom counselling entity used by all financial advisers. Who will be affected by the business rules?

To answer, drag the appropriate financial adviser types to the correct business rules. Each financial adviser type may be used once, more than once, or not at all.

You may need to drag the split bat between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Financial adviser types

Answer Area

- Office-based financial advisers only
- Remote financial advisers only
- Office-based and remote financial advisers

- Business rule**
- Set a field value with the scope set to Entity
 - Clear a field value with the scope set to All Forms
 - Set visibility of a field with the scope set to Entity

- Financial adviser type**
- Financial adviser type
 - Financial adviser type
 - Financial adviser type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Office-based and remote financial advisers

Model driven apps can use all actions available on business rules, however not all business rule actions are available for canvas apps at this time.

Box 2: Office-based financial advisers only

If you're building a Canvas app, you must use table as the scope (not All forms, not a specific form) Box 3: Office-based financial advisers only

The following actions are not available on Canvas apps : Show or hide columns

Enable or disable columns

Create business recommendations based on business intelligence. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-create-business-rule>

NEW QUESTION 138

- (Exam Topic 3)

You create a custom field on the Account entity.

Members of TeamA must have full access to the field. Members of TeamB must have no access to the field. You need to configure security.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Add TeamA to the field security profile.
- Create a field security profile and set all the permissions for the custom attribute to **Yes**.
- Add TeamB to the field security profile.
- Create a field security profile and set all the permissions for the custom attribute to **No**.
- Enable field-level security for the field.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Step 1: Enable field security for the field

Step 2: Create a field security profile and set all the permissions for the custom attribute to Yes.

Step 3: Add TeamA to the field security profile.

Note: Field-level security is available for the default fields on most out-of-box entities, custom fields, and custom fields on custom entities. Field-level security is managed by the security profiles. To implement field-level security, a system administrator performs the following tasks.

- Enable field security on one or more fields for a given entity.
- Associate one more existing security profiles, or create one or more new security profiles to grant the appropriate access to specific users or teams.

NEW QUESTION 141

- (Exam Topic 3)

You are creating a Power Automate flow.

You have an array that contains items with different color attributes. You plan to filter the array by using the following filter expression within the flow:

@or(equals(item()['color'], 'red'),contains(item()['color'],'blue')) The filter returns results only when the expression resolves to true.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
The filter expression yields a result if the array contains the color orange	<input type="radio"/>	<input type="radio"/>
The filter expression yields a result if the array contains the color red	<input type="radio"/>	<input type="radio"/>
The filter expression yields a result if the array contains the color sky blue	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated with medium confidence
Box 1: No
Box 2: Yes
The item color must be red, or item color contains blue.
Box 3: Yes

NEW QUESTION 146

- (Exam Topic 3)
DRAG DROP

A company uses Microsoft Power Platform in a production environment. The company is defining new business processes in a prototyping environment. You create components in both environments. You need to package the components you create. Which solution types should you use? To answer, drag the appropriate solution types to the connect components. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 150

- (Exam Topic 3)

You are creating a model-driven app that allows users to create and edit a list of existing accounts. You need to display a list of all active accounts. Which user interface components should you use?

- A. view
- B. gallery
- C. data table
- D. form

Answer: C

Explanation:

Imagine that you have a collection of data (such as a list sales orders, a set of service tickets, or a directory of contacts), and that you want to show this data in your Microsoft PowerApps app in a tabular format, where each column represents a field and each row represents a record. In the past, you might have been able to roughly simulate this visualization, although the process required some effort. However, we've been listening to your requests and are happy to announce that you can now quickly and easily achieve this very typical visualization by using the new Data table control that has been recently added to PowerApps.

Reference:

<https://powerapps.microsoft.com/fr-fr/blog/introducing-the-data-table-control/>

NEW QUESTION 154

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up. Proposed solution: Create a Power Automate flow with conditions that use entered data as default data. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed.

Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-cl>

NEW QUESTION 156

- (Exam Topic 3)

A company has the following divisions: wholesale and retail.

The manufacturer wants to create a single Power BI report to allow users to view data from a Microsoft SQL Server database.

You need to ensure that each user sees data only for the team to which the user is assigned. How should you secure the report?

To answer, drag the appropriate options to the correct action. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Options	Answer Area	
	Action	Option
Power BI Service	Create the team as a role.	Option
Power BI Desktop	Add members to the role.	Option
Common Data Service		
Power Platform Admin center		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

Box 1: Power BI Desktop

You can define roles and rules within Power BI Desktop. When you publish to Power BI, it also publishes the role definitions.

To define security roles, follow these steps.

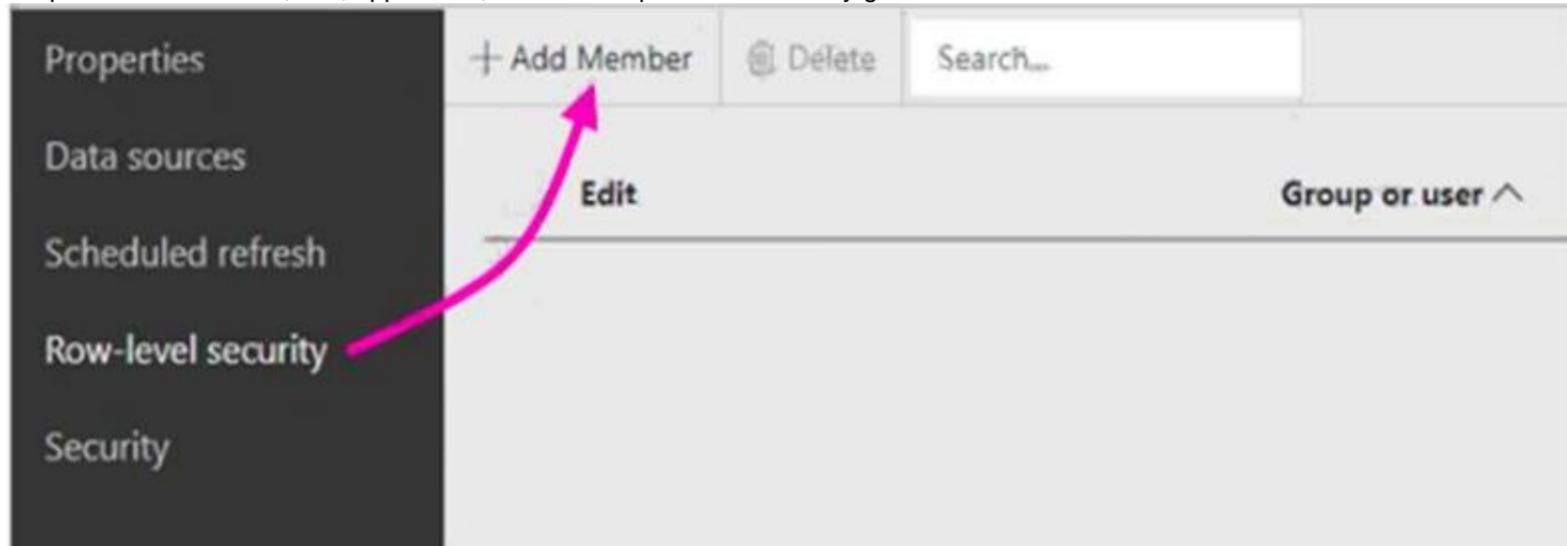

- > Import data into your Power BI Desktop report, or configure a DirectQuery connection.
- > From the Modeling tab, select Manage Roles.
- > From the Manage roles window, select Create.
- > Etc.

Box 2: Power BI Service

After you save your report in Power BI Report Server, you manage security and add or remove members on the server.

- * 1. In Power BI Desktop, save the report to Power BI Report Server. You need to use the version of Power BI Desktop for Power BI Report Server.
- * 2. In Power BI Report Service, select the ellipsis (...) next to the report.
- * 3. Select Manage > Row-level security.

Graphical user interface, text, application, email Description automatically generated

On the Row-level security page, you add members to a role you created in Power BI Desktop. Reference:
<https://docs.microsoft.com/en-us/power-bi/create-reports/desktop-rls>

NEW QUESTION 161

- (Exam Topic 3)

Each maker at a company has a separate Common Data Service environment. You are customizing a canvas app. You create two new entities in your environment.

You are leaving for a vacation. Another maker will continue customizing the app in your absence.

You need to transfer the work to the other maker and ensure that you can work on the updated app when you return from your vacation.

What should you export?

- A. unmanaged solution that includes all customizations
- B. the default solution
- C. a managed solution that includes all customizations
- D. the app

Answer: A

Explanation:

Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution.

Reference:

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>

NEW QUESTION 165

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen_Accounts and add a gallery named Gallery_Accounts to the screen. You set the data source of Gallery_Accounts to Accounts and add another blank screen named Screen_AccountDetail.

You need to complete the app.

Solution:

- > Add an edit form to Screen_AccountDetail and set the Default Mode of the form to View.
- > Set the OnSelect property of Gallery_Accounts to Navigate(Screen_AccountDetail).
- > Set the data source of the form to Accounts.
- > Set the Item property of the form to Selected.
- > Add a back icon on Screen_AccountDetail and set its OnSelect property to Navigate(Screen_Accounts). Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

View, edit, or create an item, save the contents, and reset the controls in an Edit form control. FormMode.View: The form is populated with an existing record but the user cannot modify the values of the

fields.

This function is often invoked from the OnSelect formula of a Button or Image control. Reference:
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

NEW QUESTION 170

- (Exam Topic 3)

DRAG DROP

A company uses Power Apps. The company has a SharePoint list that contains the names of partner organizations and the country/region of the partners. The company requires a canvas app that has a gallery screen to display the information in the SharePoint list. Users must be able to:

- * Return results for the exact word that was searched.
- * View the latest records at the top of the gallery.
- * Use a dropdown control to list the countries/regions of the partners. The list must display each country/region only once.

You need to create the gallery screen in a canvas app.

Which functions should you use? To answer, drag the appropriate functions to the correct activities. Each function may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

The screenshot shows the 'Functions' pane on the left with 'Match', 'Sort', 'Distinct', and 'IsMatch' buttons. The 'Answer Area' is empty. The 'Activity' pane on the right contains three activities: 'Return results for the exact word that was searched.', 'View latest entry at the top', and 'Display duplicate countries/regions only once.' The 'Function' pane on the far right is empty.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

The screenshot shows the 'Functions' pane with 'Match', 'Sort', 'Distinct', and 'IsMatch' buttons. The 'Answer Area' is empty. The 'Activity' pane contains three activities: 'Return results for the exact word that was searched.', 'View latest entry at the top', and 'Display duplicate countries/regions only once.' The 'Function' pane on the right has 'Match', 'Sort', and 'Distinct' assigned to the three activities respectively.

NEW QUESTION 174

- (Exam Topic 3)

HOTSPOT

You are designing edit forms to display individual records selected from a list in a canvas app.

The control layout must respond to a variety of screen sizes and orientations that demonstrate the following behaviors:

- Automatically resize and arrange controls from top to bottom
- Maintain the original position of the controls.
- Require no additional property changes. You need to select the layout type.

Which layouts should you use? To answer, select the appropriate options in the answer area.

The screenshot shows the 'Answer Area' with two behaviors: 'Automatically resize and arrange controls from top to bottom.' and 'Maintain the original position of the controls.' To the right, there are two 'Layout' dropdown menus. The first dropdown has 'Vertical container' selected. The second dropdown has 'Container' selected.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

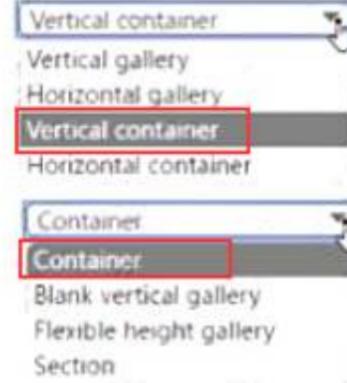

Answer Area

Behavior

Automatically resize and arrange controls from top to bottom.

Maintain the original position of the controls.

Layout

NEW QUESTION 175

- (Exam Topic 3)

You are designing a canvas app that will be used by all users including users who have vision impairments. Which outcome is achieved by each action? To answer, drag the appropriate outcomes to the correct actions.

Each outcome may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Outcomes	Action	Outcome
Not visible to any users	Set the values for the X and Y properties of a control to move the control off-screen.	Outcome
Visible to sighted users only	Set the Color and other related properties of a control to transparent.	Outcome
Visible to screen-reader users only	Set the Height and Width properties of a control to 1.	Outcome
Visible to both sighted and screen-reader users		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/sv-se/powerapps/maker/canvas-apps/accessible-apps>

NEW QUESTION 179

- (Exam Topic 3)

Rangers in national parks report wildlife they encounter during patrols. The rangers record observations in a notebook when they are on patrol. The rangers manually enter observation data when they are in the office. You are designing an app that allows rangers to record their observations while they are on patrol. The wildlife is modeled as a custom table named Wildlife. The model has relationships to the annotation entity and to a custom entity named Wildlife Details. In the Wildlife Details entity, rangers capture more information as they observe an animal's habitat. When observing wildlife, rangers must indicate whether an animal requires medical attention. The app must synchronize and save data to Common Data Service when connectivity is available.

You need to design the app.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Enter notes related to wildlife records.	<ul style="list-style-type: none"> Enable the Wildlife entity and annotation entity for mobile offline. Enable the attachments entity and the annotation entity for mobile offline. Enable the Wildlife entity for mobile offline and enable attachments on the Wildlife entity. Enable the Wildlife entity for mobile offline and use the timeline control for the Wildlife form.
Enter wildlife details as related records.	<ul style="list-style-type: none"> Allow feedback on the Wildlife Details entity. Enable the Wildlife Details entity for mobile offline. Enable change tracking on the Wildlife Details entity. Enable attachments on the Wildlife Details entity and enable the Wildlife Details entity for mobile offline.
Indicate that an animal requires medical attention.	<ul style="list-style-type: none"> Create a business rule. Create a business process. Create a Power Automate flow

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Enable the Wildlife entity and the annotation entity for mobile offline

Note: As part of the 2020 Wave 2 release, we made generally available offline capabilities for model driven apps for users of Power Apps. Makers and administrators can now configure apps to be available offline on a user's device, and users can continue to complete their tasks against the local cache on their phone even with intermittent or no network connectivity. When the network is re-established, the users' changes are seamlessly synchronized back to the cloud.

Box 2: Enable attachments on the Wildlife Details entity and enable Wildlife Details entity for mobile offline. Box 3: Create a business process.

Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.

Note: Power Automate includes several types of processes, each designed for a different purpose:

- Automated flows. Create a flow that performs one or more tasks automatically after it's triggered by an event.
- Button flows.
- Scheduled flows. Create a flow that performs one or more tasks on a schedule such as once a day, on a specific date, or after a certain time.
- Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.
- Workflows and actions. Dynamics 365 customizers may be familiar with the classic Microsoft Dataverse processes, which are workflows and actions. Reference:
<https://powerapps.microsoft.com/en-us/blog/mobile-offline-for-power-apps/>
<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/guide-staff-through-common-tasks-proce>

NEW QUESTION 183

- (Exam Topic 3)

The postal service uses a system based on the Microsoft Database to manage the delivery of packages.

To improve the delivery service, the management requires the delivery staff to use personal cell phones to communicate the location and the exact time of each delivery.

You need to design a solution. What should you do?

- A. Create a button flow with user input for the delivery time and location
- B. Create a button flow with full address and date trigger tokens
- C. Create a UI flow that sends the delivery time and location
- D. Create a button flow with full address and timestamp trigger tokens

Answer: D

Explanation:

Button trigger tokens are data points that are known and available to the device on which a button flow is running. These tokens change based on factors such as the current time or the geographic location of the device at a given moment.

Note: For example, if you are running a button flow on a smart phone, it is likely that the phone knows the time at your current location as well as the date and your current address. In this context, the time, date and address where the phone is located are all determined at the time the button flow runs. They are automatically available for use in any button flows that are executed on the device. You can use these trigger tokens to build useful flows that will minimize repetitive tasks such as providing your location to someone or tracking how much time you spent on a particular job/service call.

<https://docs.microsoft.com/en-us/power-automate/introduction-to-button-trigger-tokens>

NEW QUESTION 186

- (Exam Topic 3)

You plan to create apps for a company.

You need to identify the Power Platform tools required.

What should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Requirement	Tool
Power Virtual Agents bot	Create an app with a customized user interface that allows users to quickly create support tickets.	Tool
Power Automate	Create an app that uses a guided business process to navigate through all records associated with a support ticket.	Tool
Canvas app	Send an email to a customer support manager every time a support ticket is created.	Tool
Model-driven app	Create an automated chat tool that guides a customer through the support ticket creation process.	Tool

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Canvas App

Box 2: Model-driven app

Model-driven app design is a component-focused approach to app development. Model-driven app design doesn't require code and the apps you make can be

simple or very complex. Unlike canvas app development where the designer has complete control over app layout, with model-driven apps much of the layout is determined for you and largely designated by the components you add to the app.

Box 3: Power Automate

Power Automate is a service that helps you create automated workflows between your favorite apps and services to synchronize files, get notifications, collect data, and more.

Box 4: Power Virtual Agents bot

When you create bots with Power Virtual Agents, you author and edit topics.

NEW QUESTION 191

- (Exam Topic 3)

A company uses Power Apps in a single Microsoft Dataverse environment.

Users are divided into two groups about not a canvas app should work. The company decides that each group of users will try a version of the app for one week and switch to the other version of the app the following week.

You need to manage the app creation. What should you do?

- A. Create one app with two different version numbers.
- B. Create one app with two different version notes.
- C. Create two apps with the same name.
- D. Create two apps with different app names.

Answer: D

NEW QUESTION 192

- (Exam Topic 3)

You have an existing Power Apps environment.

You need to create a Common Data Service database for the environment.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer Area
Select Create my database		
Configure currency and language settings		
Configure database collation settings	➤	⬆
Set the environment type to Production	⬅	⬇
Select an existing environment		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Step 1: Select an existing environment Add a database in the admin center:

- * 1. In the admin center, in the left navigation pane, select Environments.
 - * 2. Select the environment to which you want to add the database. Step 2: Select Create my database
 - * 3. Select + Add database
- Step 3: Configure currency and language settings
- * 4. Enter the following, and then select Add.

Setting	Description
Language	The default language for this environment.
Currency	The base currency used for reporting.
Enable Dynamics 365 apps	Select Yes and make a selection to automatically deploy apps such as Dynamics 365 Sales and Dynamics 365 Customer Service.
Deploy sample apps and data	Select Yes to include sample apps and data. Sample data gives you something to experiment with as you learn. You must select No for Enable Dynamics 365 apps for this setting to appear.
Security group	Select a security group to restrict access to this environment.

<https://docs.microsoft.com/en-us/power-platform/admin/create-database>

NEW QUESTION 195

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company has locations in multiple countries and regions across four continents.

The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table.

You need to create a visualization that displays the total amount of orders by country/region in USD. Proposed solution:

Create a custom calculated field of type currency on the order table that converts the order total to USD and displays the total amounts by region in a Power BI chart.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Instead use a calculated field.

Need to calculate the exchange rate in USD.

Calculated columns are calculated in real-time when they are retrieved.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes>

NEW QUESTION 199

- (Exam Topic 3)

You are configuring security to enable users to analyze data by using Microsoft Excel templates.

You create a security role named TemplateAdministrator and configure the role as shown below and assign the role to a user named User1.

Power Apps

File Save and Close Actions Help

Security role: TemplateAdministrator Working on solutions: Default Solution

Entity	Create	Read	Write	Delete	Append	Append To	Assign	Share
Business Unit	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>		
Channel Property Group	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input checked="" type="radio"/>		
Currency	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input checked="" type="radio"/>		
Document Template	<input type="radio"/>							
Mailbox Auto Tracking Folder	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>				
Organization		<input checked="" type="radio"/>	<input type="radio"/>			<input type="radio"/>		
Personal Document Template	<input checked="" type="radio"/>							

Privacy Related Privileges
 Enabling these privileges will allow users to extract customer data from Microsoft Dynamics 365. For more information, review the corresponding user documentation.

Document Generation	<input checked="" type="radio"/>	Dynamics 365 for mobile	<input checked="" type="radio"/>
Export to Excel	<input type="radio"/>	Go Offline in Outlook	<input checked="" type="radio"/>
Mail Merge	<input checked="" type="radio"/>	Print	<input checked="" type="radio"/>
Sync to Outlook	<input checked="" type="radio"/>	Use Dynamics 365 App for Outlook	<input checked="" type="radio"/>

Miscellaneous Privileges

Act on Behalf of Another User	<input type="radio"/>	Approve Email Addresses for Users or Queues	<input type="radio"/>
Assign manager for a user	<input type="radio"/>	Assign position for a user	<input type="radio"/>
Assign Territory to User	<input type="radio"/>	Bulk Edit	<input type="radio"/>

Key

- None Selected
- User
- Business Unit
- Parent: Child Business Unit
- Organization

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.
 NOTE: Each correct selection is worth one point.

You need to ensure that User1 can see the pre-configured example templates.
 Which permission should you change?

▼

- Bulk Edit
- Export to Excel
- Read on Document Template
- Read on Personal Document Template

You need to ensure that User1 can download the file to create an Excel template.
 Which permission should you change?

▼

- Bulk Edit
- Export to Excel
- Read on Document Template
- Read on Personal Document Template

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

You need to ensure that User1 can see the pre-configured example templates.
Which permission should you change?

You need to ensure that User1 can download the file to create an Excel template.
Which permission should you change?

NEW QUESTION 204

- (Exam Topic 3)

Engineers in an organization plan to attend an international product show.

The engineers must be able to capture information about presented products based on personal assessment and interest. The engineers must capture the information by taking pictures of the booth, brochures, and other product-specific materials.

You need to provide a button flow to streamline the process.

Which two AI Builder models should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Language detection
- B. Sentiment analysis
- C. Category classification
- D. Business card reader
- E. Form processing

Answer: DE

Explanation:

International product show: The language detection prebuilt model identifies the predominant language of a text document. The model analyzes the text and returns the detected language and a numeric score from 0 through 1. Scores close to 1 indicate higher confidence in the result. The detected language is returned as the "script" of the language. For instance, for the phrase "I have a dog", it will return "en" instead of "en-US". The response for languages that can't be detected is unknown.

Use the AI Builder business card reader component to detect business cards and extract their information. You can take photos directly in the component or load images that you've taken. Data is extracted and identified by using the properties listed below.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-language-detection> <https://docs.microsoft.com/en-us/ai-builder/business-card-reader-component-in-powerapps>

NEW QUESTION 205

- (Exam Topic 3)

You create a Power Platform solution. Solution data is stored in a variety of documented cloud services.

You need to configure the data sources. What should you do?

- A. Create a data gateway.
- B. Use a content pack.
- C. Create a custom data connector.
- D. Add metadata to standard entities.

Answer: D

Explanation:

Common Data Model is built upon a rich and extensible metadata definition system that enables you to describe and share your own semantically enhanced data types and structured tags, capturing valuable business insight which can be integrated and enriched with heterogeneous data to deliver actionable intelligence. Common Data Model can be used by various applications and services including Microsoft Dataverse, Dynamics 365, Microsoft Power Platform, and Azure ensuring that all of your services can access the same data.

Note: A wide variety of applications and services can easily access data in a data lake, however, each consumer must understand the format and meaning of the data before it can provide value. The Common Data Model simplifies this process by providing a metadata system that describes the data and standard entities to which producers can map.

Reference:

<https://docs.microsoft.com/en-us/common-data-model/use>

NEW QUESTION 209

- (Exam Topic 3)

You use a Microsoft SharePoint list to record information about customers.

You must perform a series of actions only when a new item is added to a SharePoint list. You need to configure a Power Automate flow.

Which trigger should you use?

- A. When an item is created
- B. When an item is created or modified
- C. When a file is created (properties only)
- D. For a selected item

Answer: A

Explanation:

Trigger - When an item is created Triggers when an item is created.

MS Flow will trigger when an item is created in the list. It will return all list item properties which can be used in the Flow.

Reference:

<https://www.c-sharpcorner.com/article/sharepoint-based-triggers-in-ms-flow-part-2/>

NEW QUESTION 212

- (Exam Topic 3)

You have a Power Apps solution that includes three model-driven apps, a business process flow, and a scheduled flow. The solution is deployed to a datacentre in the United States.

You plan to deploy the solution to Canada.

You need to identify applicable government regulations for all components of the solution. Which three actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. View results in the Service Trust portal.
- B. Check the results of the Solution checker.
- C. Identify regulations for the region where the tenant resides.
- D. Identify all regulations for the region where the Common Data Service database resides.
- E. Configure data loss prevention (DLP) policies in the Power Platform Admin center.

Answer: ADE

Explanation:

A: The Microsoft Service Trust Portal provides a variety of content, tools, and other resources about Microsoft security, privacy, and compliance practices.

D: The Service Trust Portal contains details about Microsoft's implementation of controls and processes that protect our cloud services and the customer data therein.

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/get-started-with-service-trust-portal>
