Exam Questions PL-600

Microsoft Power Platform Solution Architect

About ExamBible

Your Partner of IT Exam

Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

Our Advances

* 99.9% Uptime

All examinations will be up to date.

* 24/7 Quality Support

We will provide service round the clock.

* 100% Pass Rate

Our guarantee that you will pass the exam.

* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

NEW QUESTION 1

HOTSPOT - (Topic 1)

You need to recommend solutions for the organization's technical challenges.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Provide workers a self-service option for viewing personal and skills information.	<div style="border: 1px solid gray; padding: 2px;"> <div style="border-bottom: 1px solid gray; padding: 2px;">▼</div> <div style="padding: 2px;">Power Automate</div> <div style="padding: 2px;">QnA Maker</div> <div style="padding: 2px;">Azure Cognitive Services</div> </div>
Authenticate workers who use the self-service option for updating skills information.	<div style="border: 1px solid gray; padding: 2px;"> <div style="border-bottom: 1px solid gray; padding: 2px;">▼</div> <div style="padding: 2px;">Azure Active Directory B2B</div> <div style="padding: 2px;">Azure Active Directory B2C</div> <div style="padding: 2px;">Dynamics 365 owner team</div> </div>
Plan routes for audit teams.	<div style="border: 1px solid gray; padding: 2px;"> <div style="border-bottom: 1px solid gray; padding: 2px;">▼</div> <div style="padding: 2px;">Azure traffic routing</div> <div style="padding: 2px;">Address input component</div> <div style="padding: 2px;">Dynamics 365 Field Service</div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Power Automate

Self-service purchase is available for Power Platform (Power BI, Power Apps, and Power Automate), Project, and Visio.

Box 2: Azure Active Directory B2B

Scenario: First Up Consulting recruits information technology (IT) workers for temporary or permanent positions at client companies.

Azure Active Directory (Azure AD) business-to-business (B2B) collaboration is a feature within External Identities that lets you invite guest users to collaborate with your organization. With B2B collaboration, you can securely share your company's applications and services with guest users from any other organization, while maintaining control over your own corporate data. Work safely and securely with external partners, large or small, even if they don't have Azure AD or an IT department. A simple invitation and redemption process lets partners use their own credentials to access your company's resources.

Note, Scenario:

? Workers must be able to sign into a portal by using their own email address.

Workers must be required to use a secure method of authentication to be able to view their data.

? User security roles must be customized to ensure that users are able to interact

only with the specific data in which they need access. Box 3: Dynamics 365 Field Service

Dynamics 365 Field Service functionality include:

An interactive schedule board helps dispatchers assign work orders to the best resources based on location, availability, skill set, priority, and more. This is done via a manual drag- and-drop method, a semi-automated scheduling assistant, or fully automated with Resource Scheduling Optimization.

The schedule board displays each resource--whether an employee, contractor, or equipment--and their scheduled work orders. Resources and their assigned jobs are also displayed on a map along with routes and traffic patterns in real time.

NEW QUESTION 2

- (Topic 1)

You need to recommend technology for accessing historical job placement data. What should you recommend?

- A. Power Virtual Agents chatbots
- B. Virtual tables
- C. Power BI
- D. Power Automate flows

Answer: B

Explanation:

A virtual table is a custom table in Microsoft Dataverse that has columns containing data from an external

rows, but contain data that is sourced from an external database, such as an Azure SQL Database. Rows based on virtual tables are available in all clients including custom clients developed using the Dataverse web services.

Scenario:

? First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.

? The company plans to reference historical data in the existing system. The records held in these systems will not be migrated to the new solution except for medication information.

? The solution must provide a worker appointment booking system that can access worker historical job placement data.

? First Up staff members must be able to view and update worker records. They must be able to see current and historical job placement data on the same form in the new solution.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-virtual-entities>

NEW QUESTION 3

DRAG DROP - (Topic 1)

You need to recommend the appropriate messaging channel solutions for the organization.

What should you recommend? To answer, drag the appropriate messaging options to the correct user types. Each messaging option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Messaging options	User type	Messaging option
Power Apps portals	Worker support agents	
Dynamics 365 Customer Service	Patients	
Omnichannel for Customer Service dashboard		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Omnichannel for Customer Service dashboard

Scenario: Workers must be able to communicate in near real-time with worker support agents.

The company has a team of worker support agents that respond to inquiries from current and prospective workers. Some of the worker support agents are multilingual.

If you choose to expand your customer service offering to provide chat and channels, the Customer Service workspace seamlessly adjusts to support managing conversations as well.

Note: As an agent with the Customer Service Representative security role, when you open Customer Service workspace, you start on the Customer Service Agent Dashboard unless your administrator has changed the default view. This dashboard shows you your active cases, cases you can work in queues you are assigned to, and your open activities. You can open existing cases and activities or begin working new cases from the queues you are assigned to and create activities.

Box 2: Dynamics 365 Customer Service

Scenario: First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.

NEW QUESTION 4

- (Topic 1)

You need to recommend a solution for handling data entry requirements for the mobile audit teams.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Scenario:

Audit teams must have the ability to view worker information on their mobile devices. Audit teams must be able to record data during visits to locations where workers are placed.

When you create an app, or someone shares an app with you, you can run that app on the Power Apps mobile app or in a web browser.

Reference:

<https://docs.microsoft.com/en-us/powerapps/user/run-app-browser>

NEW QUESTION 5

- (Topic 1)

You need to recommend a reporting solution for the organization.

Which two options should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. AI Builder
- B. SQL Server Reporting Services (SSRS)
- C. Dynamics 365
- D. Power BI

Answer: BC

Explanation:

Scenario:

? The reporting and analytics team must be able to create reports that include data from all facilities and all workers.

? Management reports must present an overview of the entire organization. Other reports may be limited to specific offices.

B: Power Apps apps can include reports that provide useful business information to the user. These reports are based on SQL Server Reporting Services and provide the same set of features that are available for typical SQL Server Reporting Services reports.

C: Microsoft Dynamics 365 online and Model-Driven PowerApps offers several advanced reporting options. Advanced reports are often necessary when business requirements demand complex calculations, returning multiple data sets, grouping large sets of data based on rules, and retrieving data from different data sources.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/add-reporting-to-app>

<https://powerusers.microsoft.com/t5/Building-Power-Apps/Creating-SSRS-Report-for-Model-Driven-PowerApps/td-p/621866>

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/powerapps-custom-visual>

NEW QUESTION 6

HOTSPOT - (Topic 2)

You need to recommend tools for agents and management.

Which tools should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

User type

Tool

Agent

	▼
Power BI	
Dashboard	
Microsoft Power Automate	
Microsoft Power Apps	

Management

	▼
Power BI	
Microsoft Power Apps	
Microsoft AppSource	
Microsoft Power Automate	

Answer:

User type

Tool

Agent

	▼
Power BI	
Dashboard	
Microsoft Power Automate	
Microsoft Power Apps	

Management

	▼
Power BI	
Microsoft Power Apps	
Microsoft AppSource	
Microsoft Power Automate	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Dashboard

Agents need dashboards to show a current count of all reservations on the entity.

Box 2: Power BI

Management requires paginated reports for stakeholders.

NEW QUESTION 7

- (Topic 2)

You need to select an appropriate app for Relecloud. Which app should you recommend?

- A. Dynamics 365 Field Service
- B. Dynamics 365 Sales
- C. Dynamics 365 Project Operations
- D. Dynamics 365 Customer Service

Answer: D

Explanation:

Microsoft Dynamics 365 Customer Service is a module for customer service automation that streamlines case and knowledge management, enables personalized customer service with a 360-degree customer view, and provides visibility into customer service department performance with dashboards and reports.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customer-service/overview>

NEW QUESTION 8

- (Topic 3)

You need to recommend a method for transferring machine information to Dynamics 365 Field Service.

What should you recommend?

- A. Microsoft Dataverse connector
- B. Dual-write
- C. Lifecycle Services

Answer: A

Explanation:

Scenario: Information about each machine produced must be transferred to Dynamics 365 Field Service.

Use the Microsoft Dataverse connector when connecting to the Microsoft Dataverse used for Microsoft Dynamics 365 Sales, Microsoft Dynamics 365 Customer Service, Microsoft Dynamics 365 Field Service, Microsoft Dynamics 365 Marketing, and Microsoft Dynamics 365 Project Service Automation.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/connections/connection-dynamics-crmonline>

NEW QUESTION 9

- (Topic 3)

You need to resolve the issue reported during testing. What should you do?

- A. Create an image data type within the Inspection Order table.
- B. Create a relationship within the Inspection Order table to the originating inspection order.
- C. Create a Quick View form for the inspection order.

Answer: B

Explanation:

Need to store the image in the table.

Scenario: The company uses photos of employees to generate employee badges. Photos are uploaded into Microsoft 365 user profiles.

NEW QUESTION 10

HOTSPOT - (Topic 3)

You need to recommend components to meet the re-inspection requirements.

Which components should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Component

Initiate the creation of re-inspection orders.

▼
Dataflow
Business rule
Power Automate flow

Automatically set overall inspection ratings based on the checklist ratings.

▼
From event
Business rule
Custom action
Rollup data type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Power Automate flow

Scenario: Inspection orders must be automatically marked for re-inspection should a machine fail inspection. The new inspection order must be created by using the originating inspection order as a template.

Box 2: Business rule

? By combining conditions and actions, you can do any of the following with business rules:

- ? Set column values
- ? Clear column values
- ? Set column requirement levels
- ? Show or hide columns
- ? Enable or disable columns
- ? Validate data and show error messages
- ? Create business recommendations based on business intelligence.

NEW QUESTION 10

HOTSPOT - (Topic 3)

You need to recommend solutions to meet the integration requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Solution

View, assign, and resolve inspection bottlenecks.

▼
Booking rules
Schedule board
Proficiency models

Automatically input measurement readings from inspection gauges

▼
Custom connector
Azure IoT Hub connector
Azure IoT Central connector
Microsoft Dataverse connector

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Schedule board

Note: The Dynamics 365 Field Service schedule board provides an overview of resource availability and bookings you can make. When you're looking at the schedule board for the current day, you'll see a blue line that indicates the current time of day. You can also see a picture of all the resources listed on the schedule board. To quickly view contact information for a resource, hover over their name to view the contact card.

Box 2: Azure IoT Central connector

Azure IoT Central makes it easy to connect, monitor, and manage your IoT devices at scale. With the IoT Central V3 connector, you can trigger workflows when a rule has fired, and take actions by executing commands, updating properties, getting telemetry from devices, and more. Use this connector with your Azure IoT Central V3 application. This connector is available in the following products and regions:

Service	Class	Regions
Logic Apps	Standard	All Logic Apps regions ↗ except the following: <ul style="list-style-type: none"> - Azure Government regions - Azure China regions
Power Automate	Premium	All Power Automate regions except the following: <ul style="list-style-type: none"> - US Government (GCC) - US Government (GCC High) - China Cloud operated by 21Vianet
Power Apps	Premium	All Power Apps regions except the following: <ul style="list-style-type: none"> - US Government (GCC) - US Government (GCC High) - China Cloud operated by 21Vianet

NEW QUESTION 15

- (Topic 4)

A large company experiences high staff turnover rates. As a result, the company must add or remove multiple system user accounts daily.

You need to recommend a security concept which will facilitate complex security profiles to entities for large groups of users across the Power Apps and Dynamics 365 applications. What should you recommend?

- A. Hierarchy security
- B. Field-level security
- C. User access management
- D. Team privileges

Answer: D

Explanation:

User and team management is the area of Microsoft Dataverse where you can create and maintain user accounts and profiles.

A user is any person who works for a business unit who uses Dataverse. Each user has a user account.

A team is a group of users. Teams let users across an organization collaborate and share information.

Note: Why use Dataverse?

Easy to secure – Data is securely stored so that users can see it only if you grant them access. Role-based security allows you to control access to tables for different users within your organization.

Data from your Dynamics 365 applications is also stored within Dataverse, allowing you to quickly build apps

that use your Dynamics 365 data and extend your apps with Power Apps. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/user-team-entities> <https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-intro>

NEW QUESTION 18

DRAG DROP - (Topic 4)

You are designing a solution to automate the following processes:

- Import data into Microsoft Dataverse from systems that have an API available.
- Import data into Microsoft Dataverse from systems that do not have an API available.
- Validate that contacts in a Microsoft Excel file Dataverse forms in a specified order. You need to implement automation methods.

Which components should you use? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point

Components	Requirement	Component
Cloud flow	Interact with applications that do not have an API.	
Business process flow	Guide users through business steps in a specific order.	
Robotic process automation	Interact with applications that have an API.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Components	Requirement	Component
Cloud flow	Interact with applications that do not have an API.	Robotic process automation
Business process flow	Guide users through business steps in a specific order.	Business process flow
Robotic process automation	Interact with applications that have an API.	Cloud flow

NEW QUESTION 22

HOTSPOT - (Topic 4)

A company uses Dynamics 365 Sales and Power BI.

Sales managers must be able to keep track of changes to their pipeline in the following ways:

- ? Notify the sales managers when an Opportunity changes sales stage.
- ? Notify the sales managers when the pipeline drops below 2.5M USD.
- ? When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.

You need to recommend a solution that meets the company requirements.

Which combination of solutions should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Notify the sales manager when an Opportunity changes sales stage.	<input type="checkbox"/> Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector <input type="checkbox"/> Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 users <input type="checkbox"/> Microsoft Power Automate, data alerts, and Microsoft Office 365 connector
Notify the sales managers when the pipeline drops below 2.5 USD.	<input type="checkbox"/> Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector <input type="checkbox"/> Microsoft Power Automate, Power BI data alerts, and Microsoft Office 365 connector <input type="checkbox"/> Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector
When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.	<input type="checkbox"/> Power BI, Power Apps, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector <input type="checkbox"/> Microsoft Power Automate, Data alerts, Microsoft Dataverse connector, and Microsoft Office 365 users <input type="checkbox"/> Microsoft Power Automate, Data alerts, and Microsoft Office 365 connector <input type="checkbox"/> Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft 365 Outlook connector

Use Microsoft Dataverse as the data source.

While Power Automate is a robust tool with ever-expanding capabilities, it also handles simple tasks with grace. A universal business need for many organizations is the ability to automate email notifications based on certain criteria: an opportunity is won, send an email to the sales manager; a case is closed, send an email to the customer; a work order is completed, send an email to the customer.

Power Automate can easily accommodate this using the Microsoft 365 Outlook connector.

Box 2: Microsoft Power Automate, Power Bi data alerts, and Microsoft 365 connector Data alerts in the Power BI service: Set alerts to notify you when data in your dashboards changes beyond limits you set.

Box 3: Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

NEW QUESTION 27

- (Topic 4)

You are a Power Apps architect for a company. The IT administrator designs a Power Apps app that is ready to be tested. The company uses application lifecycle management (ALM).

Each version and solution component must be tracked as it is tested.

You need to recommend a strategy to deploy solutions for the user acceptance testing environment.

What should you recommend?

- A. Use Package Deployer and deploy a managed solution.

- B. Use Package Deployer and deploy an unmanaged solution.
- C. Use Solution Packager and deploy a managed solution.
- D. Use Solution Packager and deploy an unmanaged solution.

Answer: D

Explanation:

Solution Packager is a tool that can unpack a compressed solution file into multiple XML files and other files, so they can be easily managed by a source control system.

Unmanaged solution: An open solution with no restrictions on what can be added, removed, or modified. This is recommended during development of a solution.

C: Managed solution

A completed solution ready to be imported into an organization. Once imported, components can't be added or removed, although they can optionally allow further customization. This is recommended when development of the solution is complete.

Reference:

<https://docs.microsoft.com/en-us/power-platform/alm/solution-packager-tool>

NEW QUESTION 28

- (Topic 4)

A company wants to create a Power Automate flow that posts marketing events to social media.

The company must ensure that the postings adhere to regulatory requirements for handling of personally identifiable information (PII) data. The company will not post events to unauthorized social media platforms.

You need to ensure that the requirement is met.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Configure the relevant connector so that is part of the Non-Business data group category.
- B. Create a security role to prevent data export.
- C. Configure an Azure Active Directory (AAD) security role for the maker to the environment.
- D. Create a Data Loss Protection (DLP) policy.
- E. Configure the relevant connector so that it is part of the Blocked data group category.

Answer: DE

Explanation:

DLP policies enforce rules for which connectors can be used together by classifying connectors as either Business or Non-Business. If you put a connector in the Business group, it can only be used with other connectors from that group in any given app or flow. Sometimes you might want to block the usage of certain connectors altogether by classifying them as Blocked.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention>

NEW QUESTION 30

- (Topic 4)

A car dealership has a custom financing table.

You are working with a developer to add a button to a ribbon that displays a hidden section of a form when specific criteria are met.

You need to recommend tools and technologies for the developer

Which two tools or technologies should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point

- A. Write a business rule.
Write JavaScript code.
- B. Use the Ribbon Workbench.
- D. Use the form editor.

Answer: BC

Explanation:

Client-side scripting using JavaScript is one of the ways to apply custom business process logic for displaying data on a form in a model-driven app.

You can use a community tool, Ribbon Workbench, to visually edit ribbons using the UI. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/model-driven-apps/client-scripting>

<https://docs.microsoft.com/en-us/powerapps/developer/model-driven-apps/customize-commands-ribbon>

NEW QUESTION 32

- (Topic 4)

You are designing a Power Platform solution for a company. The company issues each employee a tablet device.

The company wants to simplify the opportunity management processes and automate when possible. The company identifies the following requirements:

- ? Users must have a visual guide to know which data to enter in each step of the opportunity management process.
- ? The system must automatically assign the opportunity to a manager for approval once all data is entered.
- ? The system must notify an assignee each time an opportunity is assigned to them by using push notifications.
- ? When a user selects a push notification, the associated opportunity must display.

You need to recommend the Power Platform components that will meet their requirements.

Which three Power Platform components should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Business process flows
- B. Power Apps mobile apps
- C. Power Virtual Agents chatbots
- D. Power Automate desktop flows
- E. Power Automate cloud flows

Answer: ABE

Explanation:

- A: Use business process flows to define a set of steps for people to follow to take them to a desired outcome. These steps provide a visual indicator that tells people where they are in the business process.
- B: Push notifications are used in Power Apps mobile to engage app users and help them prioritize key tasks. In Power Apps, you can create notifications for Power Apps mobile by using the Power Apps Notification connector. You can send notifications to any app that you create in Power Apps.
- E: Create a cloud flow when you want your automation to be triggered either automatically, instantly, or via a schedule.
 - _ Automated flows: Create an automation that is triggered by an event such as arrival of an email from a specific person, or a mention of your company in social media.

Reference:

<https://docs.microsoft.com/en-us/power-automate/business-process-flows-overview> <https://docs.microsoft.com/en-us/powerapps/mobile/power-apps-mobile-notification>

NEW QUESTION 35

- (Topic 4)

You are designing a Microsoft Power Platform solution for an automobile parts manufacturer. You create the following tables:

Table	Comments
Assemblies	For each assembly record, there will be one or more rows in the Parts table. When the ownership for an assembly record changes, the related parts records must be updated.
Parts	Rows in the Parts table must not be deleted when an assembly is deleted.

You need to recommend a relationship behavior. Which relationship behavior should you recommend?

- A. Referential, Restrict Delete
- B. Custom
- C. Parental
- D. Referential, Remove Link

Answer: A

Explanation:

Restrict Delete: Prevent the Referenced table record from being deleted when referencing tables exist.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/configure-entity-relationship-cascading-behavior>

NEW QUESTION 40

- (Topic 4)

You are designing a new Microsoft Power Platform solution for a wedding organizer company.

The company uses a third-party application and plans to migrate the data into Microsoft Dataverse for the new solution. The third-party application has an API that can be connected to programmatically for data migration purposes.

You need to migrate the unique IDs belonging to the records from the third-party application.

Which two Microsoft Dataverse column types should you use to store this information? Each correct answer presents a complete solution.

- A. Text Area
- B. Unique Identifier
- C. Plain Text
- D. Rich Text
- E. Float

Answer: B

NEW QUESTION 42

- (Topic 4)

A company provides mobile diagnostic imaging services. You are designing a Power Apps solution to manage patient appointments and procedures.

Patient records are stored within the company's cloud patient billing system. The patient ID must be the only information stored within the app. The patient name and date of birth must be visible to the technician to verify the patient's identity.

You need to recommend a solution to display the patient information. What should you recommend?

- A. Virtual table
- B. Business rule
- C. Privacy preference
- D. Data gateway
- E. Custom dataflow

Answer: A

Explanation:

A virtual table is a custom table in Microsoft Dataverse that has columns containing data from an external data source. Virtual tables appear in your app to users as regular table rows, but contain data that is sourced from an external database, such as an Azure SQL Database. Rows based on virtual tables are available in all clients including custom clients developed using the Dataverse web services.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-virtual-entities>

NEW QUESTION 47

HOTSPOT - (Topic 4)

A food distribution terminal uses Microsoft Dynamics 365 Field Service and Microsoft Dynamics 365 Supply Chain Management to manage inventory and fulfill customer orders. Customers place custom orders through a Power Pages customer portal. Customers can enter different receiving times and dates on fresh

produce order lines.

The terminal needs to expose fresh produce order details from Dynamics 365 to its customers in the portal. Customers can control how much detail they see in the portal.

You need to design a solution that meets the requirements. Which mechanism should you use for each requirement?

To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Mechanism
Retrieve data representing fresh produce details.	<ul style="list-style-type: none"> Custom connector Basic form Data gateway Advanced form Custom connector
Expose the fresh produce details.	<ul style="list-style-type: none"> Portal Management app Portal Management app Customer Service Insights Microsoft Power Platform admin center Microsoft 365 Apps admin center

Answer:

Answer Area

Requirement	Mechanism
Retrieve data representing fresh produce details.	<ul style="list-style-type: none"> Custom connector Basic form Data gateway Advanced form Custom connector
Expose the fresh produce details.	<ul style="list-style-type: none"> Portal Management app Portal Management app Customer Service Insights Microsoft Power Platform admin center Microsoft 365 Apps admin center

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 48

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company plans to automate the expense approval process.

Users currently enter data into an on-premises SQL Server database. You need to allow users to submit expenses from mobile devices.

Solution: Create a canvas app for expense data entry. Create a custom connector. Create a cloud flow for approval and use the custom connector to add data to the SQL Server database.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

NEW QUESTION 50

- (Topic 4)

A company has a website that contains a form named Contact Us. Data from completed forms is saved to a shared document. An office administrator periodically reviews the document. The office administrator sends new submissions to another employee who creates contacts or updates existing contacts.

You need to recommend a solution to automate the process.

What should you recommend?

- A. Excel Online Connector
- B. Dynamics 365 Customer Insights
- C. Dynamics 365 Customer Service
- D. Dynamics 365 Marketing

Answer: D

Explanation:

Microsoft designed Customer Insights to allow organizations to map, match, merge, and enrich customerbased data from different sources. A classic scenario would be to merge data from customer service software, like Freshdesk, and online sales, such as Shopware, into one source for reporting and further data analysis.

Reference:

<https://msdynamicsworld.com/story/microsoft-dynamics-365-customer-insights-overview>

NEW QUESTION 51

- (Topic 4)

You are a Microsoft Power Platform solution architect working on a project. API calls are being sent between external applications and a Microsoft Power Platform solution.

The number of requests per user within a given time frame varies. Some users may be exceeding the service protection API limits.

You need to ensure that the API conforms to service protection limits.

Which three metrics should you review? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. The number of requests that a user can make each day.
- B. The total number of requests that can be processed each day.
- C. The number of concurrent requests that a user can make.
- D. The total execution time for requests by all users.
- E. The combined execution time required to process requests from a user.

Answer: ACE

Explanation:

Three types of service protection API limit errors that can be returned:

? Number of requests This limit counts the total number of requests during the preceding 300 second period.

? Execution time This limit tracks the combined execution time of incoming requests during the preceding 300 second period.

? Concurrent requests This limit tracks the number of concurrent requests. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/api-limits>

NEW QUESTION 52

HOTSPOT - (Topic 4)

You are a Microsoft Power Platform architect designing integrations for a project. You have the following integration requirements:

- Post requests to a system that is not always available and limited in its ability to process high volumes of messages.
- Allow peer-to-peer communication between on-premises services and cloud-based model-driven Microsoft Power Platform apps.
- Stream large volumes of data from the company's website to a live Power BI dashboard.
- Support enterprise-level integrations with Dynamics 365 that can be billed on a consumption basis.

You need to use an Azure service for the integration requirements.

Which Azure services should you use? To answer, select the appropriate options in the answer area?

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Service
Post requests to a system that is not always available and limited in its ability to process high volumes of messages.	<ul style="list-style-type: none"> Azure Service Bus Azure Service Bus Azure Notification Hub Azure Active Directory Azure ExpressRoute
Allow peer-to-peer communication between on-premises services and cloud-based model-driven Microsoft Power Platform apps.	<ul style="list-style-type: none"> Azure Relay Azure Relay Azure SQL Azure Cognitive Services Azure API Management
Stream large volumes of data from the company's website to a live Power BI dashboard.	<ul style="list-style-type: none"> Azure Event Hubs Azure Event Hubs Azure Service Bus Azure SQL
Support enterprise-level integrations with Dynamics 365 that can be billed on a consumption basis.	<ul style="list-style-type: none"> Azure Functions Azure Logic Apps Azure Functions Azure Service Bus

Answer:

Answer Area

Requirement	Service
Post requests to a system that is not always available and limited in its ability to process high volumes of messages.	<ul style="list-style-type: none"> Azure Service Bus Azure Service Bus Azure Notification Hub Azure Active Directory Azure ExpressRoute
Allow peer-to-peer communication between on-premises services and cloud-based model-driven Microsoft Power Platform apps.	<ul style="list-style-type: none"> Azure Relay Azure Relay Azure SQL Azure Cognitive Services Azure API Management
Stream large volumes of data from the company's website to a live Power BI dashboard.	<ul style="list-style-type: none"> Azure Event Hubs Azure Event Hubs Azure Service Bus Azure SQL
Support enterprise-level integrations with Dynamics 365 that can be billed on a consumption basis.	<ul style="list-style-type: none"> Azure Functions Azure Logic Apps Azure Functions Azure Service Bus

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 57

- (Topic 4)

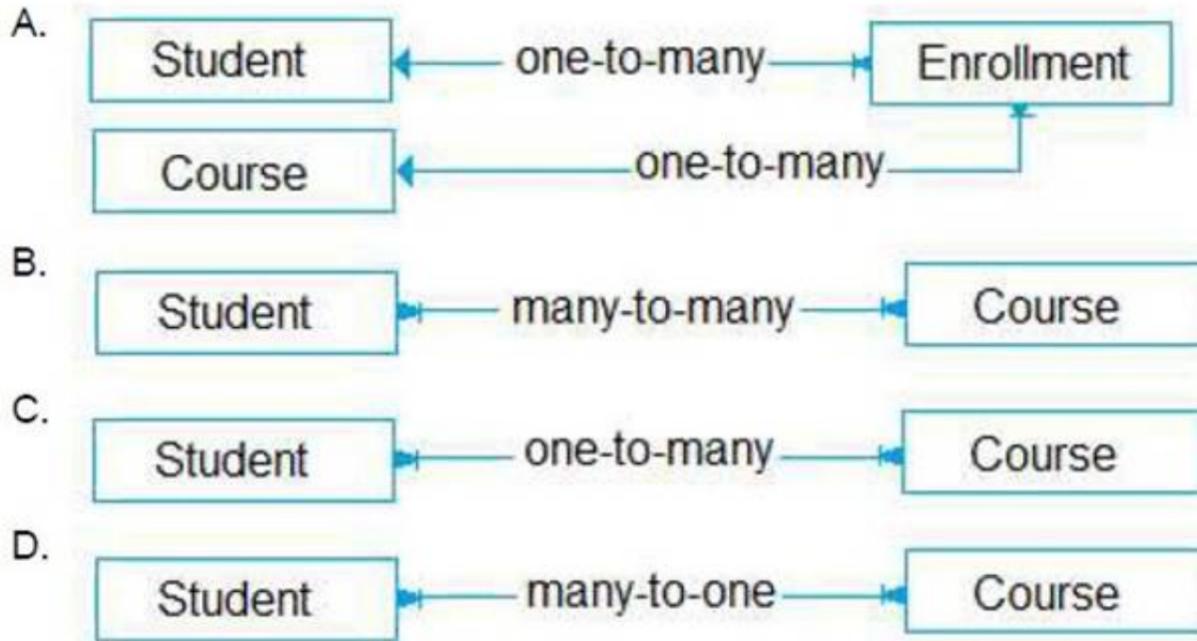

You are designing the data model for a school. The school wants to track students' enrollments in courses.

The system must meet the following requirements: Track the courses in which each student is enrolled. Track the students that are enrolled in each course.

Track dates when each student enrolled in each course and the person who approved the enrollment.

Allow users to create a report that details which students are enrolled in which courses. You need to recommend a data model that will fit the school's requirements.

Which logical model should you recommend?

A. Option A

B. Option B

Option C

C. Option D

Answer: A

Explanation:

Need a relationship table.

N:N (Many-to-Many): A table relationship that depends on a special Relationship table, sometimes called an Intersect table, so that many rows of one table can be related to many rows of another table.

When viewing rows of either table in a N:N relationship you can see a list of any rows of the other table that are related to it. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-entity-relationships>

NEW QUESTION 58

- (Topic 4)

A company is implementing Dynamics 365 Sales.

The company has turned off out-of-the-box quote calculations in order to implement its own custom calculations.

When users update a line item on a quote, they expect to see an updated total for the quote in real time. Users are reporting inconsistent behavior, with some aggregations taking up to two hours.

You review the system design and notice many asynchronous workflows. You need to recommend a solution to enable the calculation in real time.

Which two options should you recommend? Each answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. Consolidate asynchronous workflow into a single real-time workflow.

B. Consolidate multiple asynchronous workflows into a single asynchronous workflow.

C. Implement a business process flow to replace the existing workflows.

D. Convert the asynchronous workflows to a synchronous plug-in.

Answer: AB

Explanation:

NEW QUESTION 59

- (Topic 4)

You are designing a Microsoft Power Platform solution for a company that has multiple Microsoft Dataverse environments.

You need to prevent specific users from accessing specific environments. What should you do?

A. Remove all security roles from the users of the specific environments.

B. Remove the user from the business unit.

C. Remove the user from all security groups.

D. Remove the user from all teams.

Answer: A

Explanation:

Microsoft Dataverse uses a role-based security model to help secure access to the database. Security roles can be used to configure environment-wide access to all resources in the environment.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/database-security>

NEW QUESTION 61

- (Topic 4)

A company has a Power Platform solution that integrates with a third-party system. The client reports that unexpected updates are being made to the Accounts table. You need to determine the root cause of the issue.

In which three locations should you investigate? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Audit summary view
- B. Solution history
- C. SDK Message Processing Steps
- D. Plug-in trace log
- E. System job run history

Answer: ABD

Explanation:

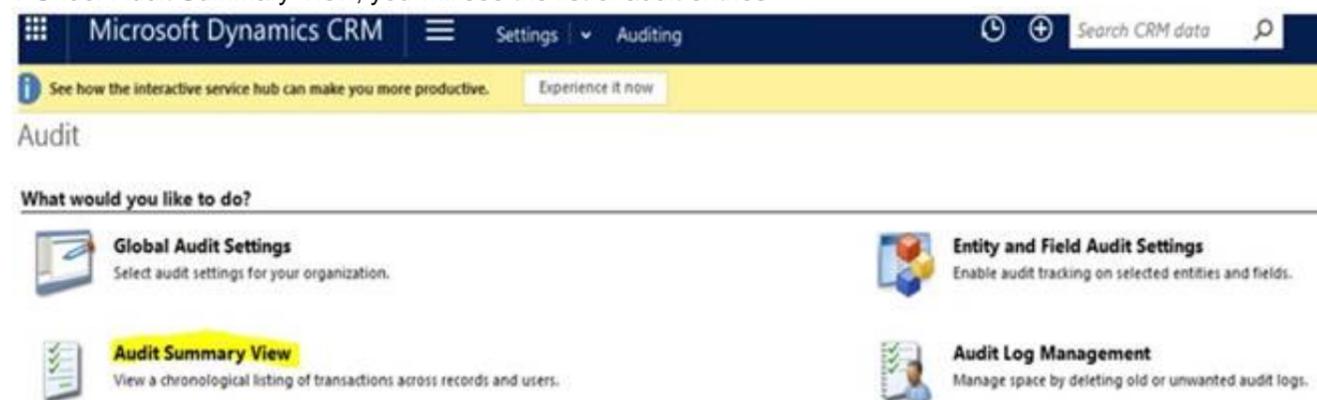

A: How to View Auditing Log Details?

System administrators can see activities for the entities that are enabled for audit logging. To view the audit logs:

? Go to Settings > System > Auditing.

? Choose Audit Summary View.

? Under Audit Summary View, you will see the list of audit entries

B: You can view details about solution operations from the Solutions area of Power Apps. An operation can be a solution import, export, or uninstall. The solution history displays information such as solution version, solution publisher, type of operation, operation start and end time, and operation status.

D: Trace log records are written to the PluginTraceLog Table. Writing of these records is controlled by the trace settings mentioned in

Enable trace logging.

This data can be found in model-driven applications by navigating to Settings and choosing the Plug-in Trace Log tile.

Reference:

<https://www.sherweb.com/blog/dynamics-365/audits-dynamics-365/> <https://docs.microsoft.com/en-us/powerapps/developer/data-platform/logging-tracing>

NEW QUESTION 64

- (Topic 4)

A pharma company uses a proprietary system to manage its chemical experiments. The company uses Microsoft Dynamics 365 Project Operations to manage lab staff and resources.

Employees manually update Project Operations data with data from their proprietary system as needed. Employees are not able to provide a definite schema for their data.

You need to provide a solution that will allow employees to configure their own automatic updates.

Which component should you use?

- A. Dataflows
- B. Custom connectors
- C. Data gateways
- D. Microsoft Power Automate flows

Answer: D

NEW QUESTION 68

- (Topic 4)

A client uses Dynamics 365 Sales, Power BI datasets, and Power BI dataflows.

The Dynamics 365 Sales implementation has security roles that restrict data export. You need to ensure that data has the same restrictions in Power BI as it does in Dynamics 365 Sales.

You need to design the security to avoid sensitive data from being seen.

Which two actions should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Use Microsoft Dataverse restrictions before setting up the Power BI reports.
- B. Limit the role in Dynamics 365 Sales to only data allowed so it cannot be exported to Microsoft Excel.
- C. Limit the role and ensure that exporting to Microsoft Excel is not allowed in both Dynamics 365 Sales and Power BI.
- D. Share Power BI dashboards only with users who are supported to see this data.

Answer: AB

Explanation:

A: When you share a dashboard or report, the people you share it with can view it and interact with it, but can't edit it. They see the same data that you see in the dashboard and reports and get access to the entire underlying dataset unless row-level security (RLS) is applied to the underlying dataset.

B: Depending on the sensitivity of an organization's data, it is often necessary to disable the ability to export or print reports.

Reference:

<https://docs.microsoft.com/en-us/power-bi/collaborate-share/service-share-dashboards>

NEW QUESTION 71

DRAG DROP - (Topic 4)

You are designing a business strategy for a client who has a Power Platform solution. The client works with critical data where any data loss creates a high risk.

You need to document the failover process for the stakeholders.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
If the second call is successful, the application continues normally.	
The application makes a service call to the datacenter.	
The application receives an exception after attempting the service call.	⬅️
The application automatically tries the call again.	➡️
The application redirects calls to an on-premises server.	⬆️
	⬆️

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions	Answer Area
If the second call is successful, the application continues normally.	
The application makes a service call to the datacenter.	The application makes a service call to the datacenter.
The application receives an exception after attempting the service call.	The application receives an exception after attempting the service call.
The application automatically tries the call again.	The application redirects calls to an on-premises server.
The application redirects calls to an on-premises server.	If the second call is successful, the application continues normally.

NEW QUESTION 75

- (Topic 4)

A company is struggling to gather insights from won and lost opportunities.

Users must be able to access the company's solution from mobile and desktop devices. The solution must meet the following requirements:

- Track opportunities and reasons for the win or loss of opportunities in the context of other related data.
- Display data to users as charts and tables and provide drill-through capabilities.

You need to recommend a Microsoft Power Platform tool to help the client visualize the data. Which two technologies should you recommend? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Power BI
- B. Power Virtual Agents
- C. Power Apps
- D. Power Automate

Answer: AC

NEW QUESTION 77

- (Topic 4)

A company plans to automate business processes by using Power Automate. You identify a subprocess that must be implemented across multiple flows. You need to implement the subprocess so that it is maintainable and easy to navigate. What should you do?

- A. Save a copy of the subprocess and then add any additional actions into the flow.
- B. Initiate the subprocess with an automated trigger.
- C. Copy the actions of the subprocess into the flow by using the clipboard.
- D. Initiate the subprocess with an instant trigger.

Answer: B

NEW QUESTION 80

- (Topic 4)

A company is creating a Microsoft Power Platform app to enable employees to log daily time entries. Employee user accounts are in multiple Azure AD tenants and are not located in the tenant that is running the app. Employees must be added as Azure AD guest accounts within the tenant that will be running the app. Employees must access the model-driven app by being a member of a security team. The security team has been assigned the Employee Security role. Employees must create personal views of records to view within the system.

You need to implement a security solution. Which privilege should you use?

- A. Direct basic level
- B. Azure AD security group
- C. Team
- D. Shared app access

Answer: C

NEW QUESTION 85

HOTSPOT - (Topic 4)

An automobile parts manufacturer wants to replace an existing system with a Microsoft Power Platform solution. The company has been experiencing undesired data changes in their current system. The cause of the changes is due to the relationships that are set up between tables in the database that the system uses. The new solution must meet the following requirements:

- Track vehicle manufacturers and models.
- Display a list of all models that a manufacturer produces.
- Ensure that each vehicle model can be associated to only one manufacturer.
- Delete all associated models when a user deletes a manufacturer.
- Automatically populate information from the manufacturer when creating a new model from the model list on the manufacturer page.

You need to recommend table relationships to meet the business requirements. Which relationship settings should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Business requirement	Relationship
The system must delete all associated models when a user deletes a manufacturer.	<ul style="list-style-type: none"> Use a parental 1:N relationship between manufacturer and model. Use a parental 1:N relationship between manufacturer and model. Use a referential 1:N relationship between manufacturer and model. Use field mappings in 1:N relationship between manufacturer and model. Use an N:N relationship between manufacturer and model.
The system must auto-populate information from the manufacturer when creating a new model from the model list on the manufacturer page.	<ul style="list-style-type: none"> Use field mappings in 1:N relationship between manufacturer and model. Use a parental 1:N relationship between manufacturer and model. Use a referential 1:N relationship between manufacturer and model. Use field mappings in 1:N relationship between manufacturer and model. Use an N:N relationship between manufacturer and model.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Business requirement	Relationship
The system must delete all associated models when a user deletes a manufacturer.	<ul style="list-style-type: none"> Use a parental 1:N relationship between manufacturer and model. Use a parental 1:N relationship between manufacturer and model. Use a referential 1:N relationship between manufacturer and model. Use field mappings in 1:N relationship between manufacturer and model. Use an N:N relationship between manufacturer and model.
The system must auto-populate information from the manufacturer when creating a new model from the model list on the manufacturer page.	<ul style="list-style-type: none"> Use field mappings in 1:N relationship between manufacturer and model. Use a parental 1:N relationship between manufacturer and model. Use a referential 1:N relationship between manufacturer and model. Use field mappings in 1:N relationship between manufacturer and model. Use an N:N relationship between manufacturer and model.

NEW QUESTION 87

- (Topic 4)

You are designing a Microsoft Power Platform solution that uses Microsoft Dataverse.

You need to recommend a way to update currency exchange rates within Microsoft Dataverse.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Review AppSource for prebuilt solutions.
- B. Create a Power Automate flow that uses a custom connection or HTTP request to an outside source for exchange rates.
- C. Embed an iframe that points to a currency exchange service into a model-driven app.
- D. Use the Power BI connector to establish a link that updates Microsoft Dataverse with the current exchange rate.

Answer: AB

Explanation:

B: We need is a source for exchange rates. There are some published connectors, but you also use a free service called Exchange Rates API, which are based on the European Central Bank, and create a custom connection.

Now that we have our custom connector defined and have a way to request the latest exchange rates, the next step is to create a Power Automate flow that will update all of currencies setup in our Dataverse environment.

Dataverse is a multicurrency system, in which each record can be associated with its own currency. This currency is called the transaction currency. The multicurrency features enable users to perform financial transactions like opportunities, quotes, orders, and invoices in multiple currencies. This feature also provides a currency choice to the end user when a financial transaction occurs.

Reference:

<https://readyxrm.blog/2021/03/10/updating-currency-exchange-rates-in-dataverse/>

NEW QUESTION 91

HOTSPOT - (Topic 4)

You are designing a model-driven app for a hospital. The app will be used to track teams at the hospital including:

Team	Comments
Cleaning	There are three predetermined cleaning teams. Tasks are assigned to a team. Anyone on the team can complete an assigned task.
Emergency room	These teams are formed as needed based on patient needs and staff availability.
Billing	These teams are assigned to specific hospital departments. Team members must only see data for the hospital department to which they are assigned.

You need to recommend the team types to use.

Which team types should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Team type
Cleaning teams	<div style="border: 1px solid gray; padding: 2px; width: fit-content;"> <div style="background-color: #f0f0f0; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> ▼ </div> <div style="padding: 2px;"> <p>Access</p> <p>Owner</p> </div> </div>
Emergency room teams	<div style="border: 1px solid gray; padding: 2px; width: fit-content;"> <div style="background-color: #f0f0f0; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> ▼ </div> <div style="padding: 2px;"> <p>Access</p> <p>Owner</p> </div> </div>
Billing teams	<div style="border: 1px solid gray; padding: 2px; width: fit-content;"> <div style="background-color: #f0f0f0; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> ▼ </div> <div style="padding: 2px;"> <p>Access</p> <p>Owner</p> </div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Owner team

Owner team: An owner team owns records and has security roles assigned to the team. A user's privileges can come from their individual security roles, those of the teams that they're part of or the ones they inherit. A team has full access rights on the records that the team owns. Team members are added manually to the owner team.

Box 2: Access team

Access team: An access team doesn't own records and doesn't have security roles assigned to the team. The team members have privileges defined by their individual security roles and by roles from the teams they're members of. These members share records with an access team, and the team is granted access rights to the records. Access rights include Read, Write, and Append.

Box 3: Owner team

NEW QUESTION 96

DRAG DROP - (Topic 4)

You are a Microsoft Power Platform architect.

You need to design a process to transport configuration and test data from one environment to a separate environment. Which four actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions		Answer area
Import the ZIP file data.		1
Import the CSV file data.		2
Define the schema of the source data to be exported.	➤	3
Use the schema to export data.	➤	4
Download the Configuration Migration tool from NuGet.		
Create personal views to define the source data to be exported.		
Download the schema of the source data to be exported.		
Download the Configuration Migration tool from AppSource.		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

<https://learn.microsoft.com/en-us/power-platform/admin/manage-configuration-data>

NEW QUESTION 97

HOTSPOT - (Topic 4)

You are designing a model-driven app that provides marketing, sales, and service operations to a company.

The app must integrate with the following systems and data sources:

- A third-party marketing system for lead generation and website submissions.
- A Microsoft Excel Online file that contains manufacturing data on relevant products.
- A separate Microsoft Dataverse environment.

You need to recommend Power Automate connectors for the app.

Which connections should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Data source	Connector type
Third-party marketing system	<ul style="list-style-type: none"> Power BI connector SharePoint connector Custom connector Microsoft Forms connector
Microsoft Dataverse environment	<ul style="list-style-type: none"> SharePoint Azure Data Factory Microsoft Dataverse

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Custom connector

While Azure Logic Apps, Microsoft Power Automate, and Microsoft Power Apps offer over 325+ connectors to connect to Microsoft and non-Microsoft services, you may want to communicate with services that aren't available as prebuilt connectors.

Box 2: Microsoft Dataverse

The Microsoft Dataverse connector provides several triggers to start your flows and many actions that you can use to create or update data in Dataverse while your flows run. You can use Dataverse actions even if your flows don't use a trigger from the Dataverse connector.

Use the Microsoft Dataverse connector to create cloud flows that start when data changes in Dataverse tables and custom messages.

NEW QUESTION 102

- (Topic 4)

You are a Power Platform consultant for an internet support company. The company lacks a budget to buy third-party ISVs or add-ons.

The company requires a new system that achieves the following:

- ? All support issues must come in by email, need to be logged, and assigned to the support group.
- ? Accounts must synchronize with the parent company Oracle database.
- ? Reports must be sent to the executives on a weekly basis.
- ? No custom code will be used in the system.

You need to recommend the components that should be configured.

Which two components should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Power Virtual Agents
- B. Microsoft Dataverse
- C. server-side synchronization
- D. Microsoft Customer Voice

Answer: BD

Explanation:

The Dynamics 365 Customer Voice data is stored in Microsoft Dataverse.

Dynamics 365 Customer Voice is an enterprise feedback management application you can use to easily keep track of the customer metrics that matter the most to your business. ... It provides a personalized experience, enabling you to collect customer feedback and get relevant insights quickly and easily, all in a few clicks.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customer-voice/about> <https://docs.microsoft.com/en-us/dynamics365/customer-voice/data-flow>

NEW QUESTION 103

DRAG DROP - (Topic 4)

A company uses Microsoft Power Platform solutions.

The company plans to set up application lifecycle management (ALM) capabilities to store the solutions in source control, which will be used to automate the release process.

You need to set up the initial ALM infrastructure to store the solutions in source control. Which four actions should you perform in sequence?

To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 108

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses a Microsoft Excel sheet to manage its loan application process. The company wants to optimize the process.

You need to discover inefficiencies in the process.

Solution: Upload the activity data stored in the Excel sheet to the process advisor feature. Use process mining to discover inefficiencies in the process.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 110

HOTSPOT - (Topic 4)

A company plans to use a combination of model-driven and canvas apps for data interaction and Power BI for data reporting. The company has the following requirements:

- Share a canvas app with the auditor team.
- Ensure account balance values in Power BI are only viewable by the investment team.
- Streamline user administration and role assignment.

You need to recommend a security component to use for each requirement.

Which security components should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Security component
Share a canvas app.	<ul style="list-style-type: none"> Microsoft Entra ID security group Security roles Column-level security Manager hierarchy model Microsoft Entra ID security group
Control account balance visibility.	<ul style="list-style-type: none"> Report access Report access Column-level security Microsoft Entra ID security group
Streamline user administration and role assignment.	<ul style="list-style-type: none"> Manager hierarchy model Security roles Column-level security Manager hierarchy model Microsoft Entra ID security group

Answer:

Answer Area

Requirement	Security component
Share a canvas app.	<ul style="list-style-type: none"> Microsoft Entra ID security group Security roles Column-level security Manager hierarchy model Microsoft Entra ID security group
Control account balance visibility.	<ul style="list-style-type: none"> Report access Report access Column-level security Microsoft Entra ID security group
Streamline user administration and role assignment.	<ul style="list-style-type: none"> Manager hierarchy model Security roles Column-level security Manager hierarchy model Microsoft Entra ID security group

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 113

- (Topic 4)

You are designing a Power Platform solution for a company. Users must be granted access only to data that is relevant to them.

You need to recommend actions to meet the requirements.

Which two recommendations should you make? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add column security profiles to applicable teams.
- B. Define and configure security roles.
- C. Create teams and assign security roles and users to the teams.
- D. Create business units and assign security roles to the business units.

Answer: BD

Explanation:

To control data access, you must set up an organizational structure that both protects sensitive data and enables collaboration. You do this by setting up business units, security roles, and field security profiles.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/security-roles-privileges>

NEW QUESTION 118

DRAG DROP - (Topic 4)

You are performing a requirements analysis for a customer. The customer provides the following requirements:

- ? Power Platform storage capacity must remain under 100 percent.
- ? Customer service representatives must be sent an email when they are assigned a case.
- ? Help desk technicians must be shown an error message when they try to delete a task row.
- ? The plug-in pass rate must remain over 99 percent for the production environment.

You need determine if the requirements are functional or non-functional.

Which requirement type should you use? To answer, drag the appropriate requirement types to the correct requirements. Each requirement type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Requirement types	Requirement	Requirement type
	Power Platform storage capacity must remain under 100 percent.	<input type="text"/>
<input type="text" value="Functional"/>	Customer Service representatives must be sent an email when they are assigned a case.	<input type="text"/>
<input type="text" value="Non-functional"/>	Help desk technicians must be shown an error message when they try to delete a task row.	<input type="text"/>
	The plug-in pass rate must remain over 99 percent for the production environment.	<input type="text"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Non-functional

Non-functional requirements commonly describe non-behavior aspects of the solution such as performance requirements.

Box 2: Functional

Functional requirements describe what the solution needs to do or its behaviors. Box 3: Functional

Box 4: Non-functional

Examples of common non-functional requirement types include:

- ? Availability
- ? Compliance/regulatory
- ? Data retention/residency
- ? Performance (response time, and so on)
- ? Privacy
- ? Recovery time
- ? Security
- ? Scalability

NEW QUESTION 120

- (Topic 4)

A company uses two separate unlinked apps to manage sales leads: a Power Apps app and a third-party application.

The client has the following requirements:

- ? Manage all leads by using the Power Apps app.
- ? Create a lead in the Power Apps app when a user creates a lead in the third-party application.
- ? Update leads in the Power Apps app when a user updates a lead in the third-party application.
- ? Connect to the third-party application by using an API.

You need to recommend strategies to integrate the Power Apps app and the third-party application.

Which three options can you use to achieve the goal? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Dual-write
- B. Custom connector
- C. Dataflow
- D. Power Automate cloud flow
- E. DataService connector

Answer: ADE

Explanation:

A: Customers should be able to adopt business applications from Microsoft and expect they speak the same language and seamlessly work together. Dual Write allows our customers to not think about these apps as different systems to write to independently; rather, the underlying infrastructure makes it seamless for these apps to write simultaneously.

D: Use Custom APIs to create your own APIs in Dataverse. With a Custom API you can consolidate a group of operations into an API that you and other developers can call in their code. The Common Data Service (current environment) connector enables calling Custom APIs actions in Power Automate.

E: Common Data Service provides access to the environment database on the Microsoft Common Data Service. It is available for Logic Apps, Power Automate, and Power Apps. Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/cdm-data-integration/dual-writelink-common-data-service-apps>

<https://docs.microsoft.com/en-us/connectors/commondataservice/> <https://docs.microsoft.com/en-us/powerapps/developer/data-platform/custom-api>

NEW QUESTION 122

HOTSPOT - (Topic 4)

A company offers continuing education courses for medical professionals. Each time a course is offered, the company tracks that the session has taken place in an Excel workbook.

The company maintains a list of required qualifications for an educator to teach a course. Educator qualifications range from languages spoken to advanced degrees.

The company needs the following custom table relationships defined:

- ? Associate educators with a list of their professional qualifications.

? Assign a primary educator to each course that is held.

? Collect information about every course that is held.

You need to determine the type of relationship that best fits the requirement.

Which type of table relationship should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Relationship
Educators must be associated with their qualifications.	<div style="border: 1px solid gray; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; text-align: right;">▼</div> <div style="padding: 2px;"> <p>Many-to-many relationship that uses a system generated table</p> <p>Many-to-many relationship that uses a custom table</p> <p>One-to-many relationship</p> </div> </div>
When a course is held there must be a primary educator assigned.	<div style="border: 1px solid gray; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; text-align: right;">▼</div> <div style="padding: 2px;"> <p>Many-to-many relationship that uses a system generated table</p> <p>Many-to-many relationship that uses a custom table</p> <p>One-to-many relationship</p> </div> </div>
When a course is held, the company needs to collect information on that session.	<div style="border: 1px solid gray; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; text-align: right;">▼</div> <div style="padding: 2px;"> <p>Many-to-many relationship that uses a system generated table</p> <p>Many-to-many relationship that uses a custom table</p> <p>One-to-many relationship</p> </div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Requirement	Relationship
Educators must be associated with their qualifications.	<div style="border: 1px solid gray; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; text-align: right;">▼</div> <div style="padding: 2px;"> <p>Many-to-many relationship that uses a system generated table</p> <p>Many-to-many relationship that uses a custom table</p> <p>One-to-many relationship</p> </div> </div>

NEW QUESTION 127

HOTSPOT - (Topic 4)

You are supporting the go-live process for a company. The company is responsible for migrating data to the Microsoft Power Platform by using a custom solution.

The company reports the following issues:

- Migration processes fail due to operation timeouts.
- Records that include lookup columns often fail to load. You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Issue	Solution
Migration processes fail due to operation timeouts.	<div style="border: 1px solid gray; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; text-align: right;">▼</div> <div style="padding: 2px;"> <p>Increase multithreading and/or batch size settings.</p> <p>Increase multithreading and/or batch size settings.</p> <p>Decrease multithreading and/or batch size settings.</p> <p>Ensure you are loading data into all tables at the same time.</p> <p>Ensure you are loading data into tables in a particular order.</p> </div> </div>
Records that include lookup columns often fail to load.	<div style="border: 1px solid gray; padding: 2px;"> <div style="background-color: #f0f0f0; padding: 2px; text-align: right;">▼</div> <div style="padding: 2px;"> <p>Ensure you are loading data into tables in a specific order.</p> <p>Increase multithreading and/or batch size settings.</p> <p>Decrease multithreading and/or batch size settings.</p> <p>Ensure you are loading data into all tables at the same time.</p> <p>Ensure you are loading data into tables in a specific order.</p> </div> </div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Issue	Solution
Migration processes fail due to operation timeouts.	<ul style="list-style-type: none"> Increase multithreading and/or batch size settings. Increase multithreading and/or batch size settings. Decrease multithreading and/or batch size settings. Ensure you are loading data into all tables at the same time. Ensure you are loading data into tables in a particular order.
Records that include lookup columns often fail to load.	<ul style="list-style-type: none"> Ensure you are loading data into tables in a specific order. Increase multithreading and/or batch size settings. Decrease multithreading and/or batch size settings. Ensure you are loading data into all tables at the same time. Ensure you are loading data into tables in a specific order.

NEW QUESTION 128

HOTSPOT - (Topic 4)

You are designing a Microsoft Power Platform solution for a company.

Which components should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Component

Allow users to change the status of a record only if a custom column named Reason is populated.

▼

- Business rule
- Power Automate flow
- Asynchronous plug-in
- Background workflow

Prompt users to update each opportunity product record when an opportunity is won or lost.

▼

- JavaScript code
- Real-time workflow
- Power Automate flow
- Asynchronous plug-in

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Business rule

You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.

Box 2: Power Automate flow

Trigger the Power Automate flow with "When a record is updated", then add a Condition in the flow and configure it with Status Label equals to Won.

NEW QUESTION 129

- (Topic 4)

A company has a model-driven app. The app has forms with both Business Rules and JavaScript added to handle the business logic on the form. The form contains logic that is enforced by using business rules. The company wants to apply the business rules to all forms in the app. You need to recommend a simplified form setup so the form can be maintained moving forward. What should you recommend?

- A. Manage the business logic with a Power Apps Component Framework (PCF) control.
- B. Evaluate whether complex parts of the logic can be solved by using Power Apps Component Framework (PCF) control.
- C. Use Business Rules for the remaining functionality.
- D. Remove the Business Rules and use only JavaScript.
- E. Update logic to ensure Business Rules are optimized.
- F. Use JavaScript for the remaining functionality.

Answer: B

Explanation:

PCF controls are reusable. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/component-framework/overview>

NEW QUESTION 133

- (Topic 4)

You are evaluating a solution design for a model-driven app that will have a large number of complex forms. Many of the forms take up to 10 seconds to load. You need to recommend solution to speed up loading times for the forms. Which two solutions should you recommend? Each correct answer presents a complete solution.
 NOTE: Each correct selection is worth one point.

- A. Consolidate and reduce scripts.
- B. Use synchronous JavaScript requests.
- C. Move scripts into the OnLoad event.
- D. Remove unnecessary fields.

Answer: AD

Explanation:

Controls that require extra data beyond the primary record produce the most strain on form responsiveness and loading speed. These controls fetch data over the network and often involve a waiting period (seen as progress indicators) because it can take time to transmit the data. Keep only the most frequently used of these controls on the default tab.

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/design-performant-forms>

NEW QUESTION 136

DRAG DROP - (Topic 4)

You are a Microsoft Power Platform solution architect capturing requirements for a national retail chain protect. The project has the following requirements

- Retail employees must use the application on a company- provided tablet device.
- The app must store data offline
- Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity
- Apps are shared with security group teams for users to access.

You need to identify the project s functional and non-functional requirements.

How should you categorize the requirements? To answer, drag the appropriate categories to the correct requirements. Each category may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content.

Categories

Functional
Non-functional

Requirement

Retail employees must use the application on a company-provided tablet device.
 The app must store data offline.
 Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity.
 Apps are shared with security group teams for users to access.

Category

Functional
Non-functional

Answer:

Categories

Functional
Non-functional

Requirement

Retail employees must use the application on a company-provided tablet device.
 The app must store data offline.
 Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity.
 Apps are shared with security group teams for users to access.

Non-functional

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 138

HOTSPOT - (Topic 4)

You are designing a Power Platform solution for a company that provides in-home appliance maintenance. When a customer schedules a service appointment, a dispatcher assigns one technician for a specific time and location.

The solution must capture information about the technician assigned to each appointment and the list of tools that the technician must bring to the appointment.

You need to recommend the data type for the captured information.

Which data type should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Data type

Capture information about the technician assigned to each service appointment.

	▼
Choice	
Choices	
Customer	
Lookup	

Select the tools that the technician must bring to an appointment.

	▼
Choices	
Customer	
Lookup	
Text	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Choice

Like Choices below, but can only select one of the option.

Box 2: Choices

You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form they can select one, multiple, or all the values displayed in a drop-down list.

NEW QUESTION 141

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company plans to automate the expense approval process.

Users currently enter data into an on-premises SQL Server database. You need to allow users to submit expenses from mobile devices.

Solution: Create a canvas app for expense data entry. Create a desktop flow. Create a cloud flow for approval and trigger the desktop flow to add data to the SQL Server database.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION 145

- (Topic 4)

A company has a custom web-based solution that is hosted on Azure. You design a Power Platform solution to provide the company additional capabilities.

You need to integrate the Power Platform solution with the web-based solution.

What should you recommend?

- A. Connection reference
- B. Custom connector
- C. Desktop flow
- D. Data gateway

Answer: B

Explanation:

A custom connector in Power Platform is a wrapper around a REST API that allows Power Automate or Power Apps to communicate with that REST API. Connectors created in Power Automate are available in Power Apps. Likewise, connectors created in Power Apps are available in Power Automate.

Reference:

<https://docs.microsoft.com/en-us/learn/modules/create-custom-connector-power-platform/1-introduction>

NEW QUESTION 150

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses a Microsoft Excel sheet to manage its loan application process. The company wants to optimize the process.

You need to discover inefficiencies in the process.

Solution: Upload the activity data stored in the Excel sheet to the process advisor feature. Use task mining to discover inefficiencies in the process.

Does the solution meet the goal?

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 155

- (Topic 4)

You are a Microsoft Power Platform architect supporting the go-live phase of a canvas app. The canvas app accesses data on-premises and in the cloud.

Users are reporting the app is very slow to respond, especially upon initial launch. You need to optimize the performance of the app.

Which three actions should you complete? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Move data calls from the OnStart event to the Onload event.
- B. Reduce data row limits.
- C. Increase data row limits.
- D. Move data calls from the Onload event to the OnStart event.
- E. Review the settings of the data gateway for on-premises data sources.

Answer: ABE

NEW QUESTION 160

- (Topic 4)

A company uses a third-party cloud-based app to make real-time business decisions. The app has a RESTful API.

You must design a Microsoft Power Platform solution that interacts with the third-party app. Changes made in the Microsoft Power Platform solution must be reflected in the cloud app.

You need to recommend technologies to integrate the Microsoft Power Platform solution with the cloud app.

Which two technologies should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Scheduled Power Automate cloud flow with a custom connector to the cloud app
- B. Power Virtual Agents
- C. Custom plug-on registered with Microsoft Dataverse
- D. Model-driven app

Answer: AC

Explanation:

A: To enable Logic Apps, Power Automate, or Power Apps to communicate with the REST or SOAP API, use a custom connector, which is a wrapper around a REST API (Logic Apps also supports SOAP APIs).

C: Custom APIs are a powerful way to connect to any existing API, hosted anywhere, from PowerApps. You do not need a PowerApps Enterprise subscription to register or use a Custom API.

Custom APIs are RESTful endpoints that you can connect to and use from PowerApps. All you'll need is a Swagger definition file for your endpoint.
