

PMI

Exam Questions PMI-RMP

PMI Risk Management Professional

NEW QUESTION 1

You and your project team are identifying the risks that may exist within your project. Some of the risks are small risks that won't affect your project much if they happen. What should you do with these identified risk events?

- A. All risks must have a valid, documented risk response.
- B. These risks can be accepted.
- C. These risks can be added to a low priority risk watch list.
- D. These risks can be dismissed.

Answer: C

NEW QUESTION 2

Nancy is the project manager of a project with 78 stakeholders. This is a high-profile project and she needs to express to her project team and to the management the importance of communication in this project. She would like to show the number of stakeholder communication channels in the project. Based on this information how many communication channels exist within this project?

- A. 156
- B. 3,003
- C. 78
- D. 6,084

Answer: B

NEW QUESTION 3

You are the project manager of the GHY Project for your company. You need to complete a project management process that will be on the lookout for new risks, changing risks, and risks that are now outdated. Which project management process is responsible for these actions?

- A. Risk planning
- B. Risk identification
- C. Risk monitoring and controlling
- D. Risk analysis

Answer: C

NEW QUESTION 4

Lisa is the project manager of the FKN project for her organization. She is working with Sam, the CIO, to discuss a discount the vendor has offered the project based on the amount of materials that is ordered. Lisa and Sam review the offer and agree that while their project may qualify for the discounted materials the savings is nominal and they would not necessarily pursue the savings. Lisa documents this positive risk response in the risk register. What risk response is this?

- A. Enhance
- B. Transference
- C. Share
- D. Acceptance

Answer: D

NEW QUESTION 5

Tracy is the project manager of the NLT Project for her company. The NLT Project is scheduled to last 14 months and has a budget at completion of \$4,555,000. Tracy's organization will receive a bonus of \$80,000 per day that the project is completed early up to \$800,000. Tracy realizes that there are several opportunities within the project to save on time by crashing the project work. Crashing the project is what type of risk response?

- A. Transference
- B. Mitigation
- C. Exploit
- D. Enhance

Answer: D

NEW QUESTION 6

Frank is the project manager of the NHQ project for his company. Frank is working with the project team, key stakeholders, and several subject matter experts on risks dealing with the new materials in the project. Frank wants to utilize a risk analysis method that will help the team to make decisions in the presence of the current uncertainty surrounding the new materials. Which risk analysis approach can Frank use to create an approach to make decisions in the presence of uncertainty?

- A. Monte Carlo Technique
- B. Qualitative risk analysis process
- C. Quantitative risk analysis process
- D. Delphi Technique

Answer: C

NEW QUESTION 7

You are the project manager of a large project that will last four years. In this project, you would like to model the risk based on its distribution, impact, and other factors. There are three modeling techniques that a project manager can use to include both event-oriented and project-oriented analysis. Which modeling technique does NOT provide event-oriented and project-oriented analysis for identified risks?

- A. Sensitivity analysis
- B. Jo-Hari Window
- C. Expected monetary value
- D. Modeling and simulation

Answer: B

NEW QUESTION 8

Which positive risk response best describes a teaming agreement?

- A. Share
- B. Exploit
- C. Enhance
- D. Venture

Answer: A

NEW QUESTION 9

Virginia is the project manager for her organization. She has hired a subject matter expert to interview the project stakeholders on certain identified risks within the project. The subject matter expert will assess the risk event with what specific goal in mind?

- A. To determine the level of probability and impact for each risk event
- B. To determine the bias of the risk event based on each person interviewed
- C. To determine the probability and cost of the risk event
- D. To determine the validity of each risk event

Answer: A

NEW QUESTION 10

You are the project manager of the GHG project for your company. You have identified the project risks, completed qualitative and quantitative analysis, and created risk responses. You also need to document how and when risk audits will be performed in the project. Where will you define the frequency of risk audits?

- A. Risk response plan
- B. Quality management plan
- C. Risk management plan
- D. Schedule management plan

Answer: C

NEW QUESTION 10

You work as a project manager for BlueWell Inc. You are working with Nancy, the COO of your company, on several risks within the project. Nancy understands that through qualitative analysis you have identified 80 risks that have a low probability and low impact as the project is currently planned. Nancy's concern, however, is that the impact and probability of these risk events may change as conditions within the project may change. She would like to know where will you document and record these 80 risks that have low probability and low impact for future reference. What should you tell Nancy?

- A. Risks with low probability and low impact are recorded in a watchlist for future monitoring.
- B. All risks, regardless of their assessed impact and probability, are recorded in the risk log.
- C. Risk identification is an iterative process so any changes to the low probability and low impact risks will be reassessed throughout the project life cycle.
- D. All risks are recorded in the risk management plan.

Answer: A

NEW QUESTION 14

Harry works as a project manager for the NHQ Project. He is performing quantitative risk analysis for his project. One of the project risks has a 40 percent probability of happening, and it will cost the project \$65,000 if the risk happens. What is the expected monetary value of this risk event?

- A. Negative \$26,000
- B. Negative \$67,000
- C. Zero - the risk event has not yet occurred
- D. \$27,000

Answer: A

NEW QUESTION 17

David is the project manager of the NKL Project for his organization. He has been asked to create a proposal for a construction project for a client. David realizes that there are several requirements within the SOW and RFP provided by the client that would eliminate his company from bidding on the construction project. David proposed to management that his organization create a partnership with a competitor so that together they could bid on the construction project and qualify for the customer's requirements. What risk response is David proposing to management?

- A. Exploiting
- B. Teaming agreement
- C. Transference
- D. Sharing

Answer: D

NEW QUESTION 22

Holly is the project manager of the NHQ project for her company. Her project sponsor, Tracy, has requested that Thomas, the department manager, from the Risk Management Department, will work with Holly to determine the effectiveness of the risk responses. Tracy and Thomas are concerned that some of the risks within Holly's project may not be addressed to depth they would like. In this scenario, who is responsible for ensuring that risk audits are performed at an appropriate frequency throughout the project?

- A. Thomas
- B. Tracy
- C. The project team
- D. Holly

Answer: D

NEW QUESTION 26

You are the project manager for your organization. You are working with your project team to complete the qualitative risk analysis process. The first tool and technique you are using requires that you assess the probability and what other characteristic of each identified risk in the project?

- A. Impact
- B. Risk owner
- C. Cost
- D. Risk category

Answer: A

NEW QUESTION 31

Melody is the project manager for her organization. She has created a risk response to conduct more tests on the software her project is creating. The identified risk that prompted this response was that the software is mission-critical and must be flawless before it can be put into product. What type of a risk response has Melody used in this scenario?

- A. Mitigation
- B. Enhance
- C. Transference
- D. Avoidance

Answer: A

NEW QUESTION 36

Rex is the project manager of the BDF Project. This project will last for two years and has a budget of \$2,345,000. Management has instructed Rex that the project must not go over budget as funds are very tight in the organization. During the project planning Rex and the project team discover a positive risk event to save \$75,000. Rex wants to make certain that this risk event happens so which risk response method is most appropriate?

- A. Share
- B. Mitigation
- C. Exploit
- D. Enhance

Answer: C

NEW QUESTION 41

You and your project team have identified the project risks and now are analyzing the probability and impact of the risks. What type of analysis of the risks provides a quick and high-level review of each identified risk event?

- A. A risk probability-impact matrix
- B. Quantitative risk analysis
- C. Seven risk responses
- D. Qualitative risk analysis

Answer: D

NEW QUESTION 45

You are the project manager of the HJK Project for your organization. You and the project team have created risk responses for many of the risk events in the project. Where should you document the proposed responses and the current status of all identified risks?

- A. Stakeholder management strategy
- B. Risk management plan
- C. Risk register
- D. Lessons learned documentation

Answer: C

NEW QUESTION 46

Tom is the project manager of the GGG project for his company. He is working with the project team on the Perform Qualitative Risk Analysis process. Tom is having the project team to review the project scope statement as an input to the qualitative risk analysis process. Why?

- A. The project scope statement must be understood to see the project requirements and the inherent risks of the project.
- B. The project scope statement will reveal the type of project as either a recurrent or first- of-its-kind project.
- C. The project scope identifies the risks associated with project constraints.

D. The project scope statement must be reviewed to understand the quality requirements and the risks associated with the demand for quality.

Answer: B

NEW QUESTION 47

Rachel is the project manager of the KJH Project for her company. She needs a method to create a quick and simple approach to risk identification to communicate the project risk with the stakeholders. Which one of the following approaches to risk identification should Rachel choose to provide a quick and simple listing of the project risks?

- A. Delphi Technique
- B. Checklist analysis
- C. Assumptions analysis
- D. Brainstorming

Answer: B

NEW QUESTION 52

Lisa is the project manager of the SQL project for her company. She has completed the risk response planning with her project team and is now ready to update the risk register to reflect the risk response. Which of the following statements best describes the level of detail Lisa should include with the risk responses she has created?

- A. The level of detail is set by historical information.
- B. The level of detail should correspond with the priority ranking.
- C. The level of detail must define exactly the risk response for each identified risk.
- D. The level of detail is set of project risk governance.

Answer: B

NEW QUESTION 54

You work as a project manager for SoftTech Inc. You are working with the project stakeholders to begin the qualitative risk analysis process. You will need all of the following as inputs to the qualitative risk analysis process except for which one?

- A. Stakeholder register
- B. Project scope statement
- C. Risk management plan
- D. Risk register

Answer: A

NEW QUESTION 58

Which of the following are parts of SWOT Analysis? Each correct answer represents a complete solution. Choose all that apply.

- A. Opportunities
- B. Tools
- C. Weaknesses
- D. Threats
- E. Strengths
- F. Optimism

Answer: ACDE

NEW QUESTION 62

What risk identification technique allows participants to identify the project risks and to remain anonymous?

- A. Influence diagrams
- B. Assumptions analysis
- C. Surveys
- D. Delphi technique

Answer: D

NEW QUESTION 63

Which of the following documents is described in the statement below? "It is developed along with all processes of the risk management. It contains the results of the qualitative risk analysis, quantitative risk analysis, and risk response planning."

- A. Risk management plan
- B. Project charter
- C. Risk register
- D. Quality management plan

Answer: C

NEW QUESTION 67

When does the Identify Risks process take place in a project?

- A. At the Planning stage.
- B. Throughout the project life-cycle.
- C. At the Initiating stage.
- D. At the Executing stage.

Answer: B

NEW QUESTION 71

Sammy is the project manager for her organization. She would like to rate each risk based on its probability and affect on time, cost, and scope. Harry, a project team member, has never done this before and thinks Sammy is wrong to attempt this approach. Harry says that an accumulative risk score should be created, not three separate risk scores. Who is correct in this scenario?

- A. Harry is correct, because the risk probability and impact considers all objectives of the project.
- B. Harry is correct, the risk probability and impact matrix is the only approach to risk assessment.
- C. Sammy is correct, because organizations can create risk scores for each objective of the project.
- D. Sammy is correct, because she is the project manager.

Answer: C

NEW QUESTION 72

You are working with the project stakeholders to analyze and prioritize their requirements for the project. One of the project requirements is to achieve a high-level of customer satisfaction for the project deliverable. What is the danger in this project requirement?

- A. Achieving customer satisfaction is an assumption and should be documented in the project scope.
- B. Achieving customer satisfaction is a subjective requirement and entails a high level of risk of being successfully accomplished.
- C. Achieving customer satisfaction is a risk as the project manager cannot control how satisfied the customer will be with the project deliverables.
- D. Achieving customer satisfaction should always map to the quality requirements for the project.

Answer: B

NEW QUESTION 77

You work as a project manager for BlueWell Inc. You have to communicate the causes of risk events to the stakeholders. Which risk diagramming technique you will use to communicate the causes of risk events to project stakeholders?

- A. Project network diagrams
- B. Process flow charts
- C. Ishikawa diagrams
- D. Influence diagrams

Answer: C

NEW QUESTION 82

Gary has identified a project risk that could injure project team members. He does not want to accept any risk where someone could become injured on this project so he hires a professional vendor to complete this portion of the project work. This workaround to the risk event is known as what type of risk response?

- A. Acceptance
- B. Transference
- C. Mitigation
- D. Avoidance

Answer: B

NEW QUESTION 86

Shelly is the project manager of the BUF project for her company. In this project Shelly needs to establish some rules to reduce the influence of risk bias during the qualitative risk analysis process. What method can Shelly take to best reduce the influence of risk bias?

- A. Group stakeholders according to positive and negative stakeholders and then complete the risk analysis
- B. Determine the risk root cause rather than the person identifying the risk events
- C. Establish risk boundaries
- D. Establish definitions of the level of probability and impact of risk event

Answer: D

NEW QUESTION 87

Jenny is the project manager of the NHJ Project for her company. She has identified several positive risk events within the project and she thinks these events can save the project time and money. You, a new team member wants to know that how many risk responses are available for a positive risk event. What will Jenny reply to you?

- A. Four
- B. Three
- C. Seven
- D. Acceptance is the only risk response for positive risk events.

Answer: A

NEW QUESTION 88

Harry works as a project manager for BlueWell Inc. He is determining how to conduct the risk management activities for a project. According to the PMBOK, there are six inputs to the plan risk management process. Which one of the following is NOT an input to this process?

- A. Project scope statement
- B. Risk management plan
- C. Schedule management plan
- D. Cost management plan

Answer: B

NEW QUESTION 90

You are the program manager for your organization. Management is considering a new program but they are worried about the program risks that may affect the program success. You know that there are three positive risks responses and three negative risk responses that each risk can have. Management asks you which risk response would be most appropriate for a large risk event if they wanted to hire a third-party to own the risk event for the program. What risk event is most appropriate?

- A. Avoidance
- B. Sharing
- C. Transference
- D. Mitigation

Answer: C

NEW QUESTION 93

Which one of the following is the only output for the qualitative risk analysis process?

- A. Enterprise environmental factors
- B. Project management plan
- C. Risk register updates
- D. Organizational process assets

Answer: C

NEW QUESTION 96

You are the project manager for TTP project. You are in the Identify Risks process. You have to create the risk register. Which of the following are included in the risk register? Each correct answer represents a complete solution. Choose two.

- A. List of mitigation techniques
- B. List of key stakeholders
- C. List of identified risks
- D. List of potential responses

Answer: CD

NEW QUESTION 100

Which of the following diagrams displays sensitivity analysis data?

- A. Fishbone
- B. Influence
- C. Tornado
- D. Cause and effect

Answer: C

NEW QUESTION 105

You work as a project manager for TechSoft Inc. You, the project team, and the key project stakeholders have completed a round of quantitative risk analysis. You now need to update the risk register with your findings so that you can communicate the risk results to the project stakeholders - including management. You will need to update all of the following information except for which one?

- A. Probabilistic analysis of the project
- B. Probability of achieving cost and time objectives
- C. Risk distributions within the project schedule
- D. Trends in quantitative risk analysis

Answer: C

NEW QUESTION 109

You work as a project manager for BlueWell Inc. You with your team are using a method or a (technical) process that conceives the risks even if all theoretically possible safety measures would be applied. One of your team member wants to know that what is a residual risk. What will you reply to your team member?

- A. It is a risk that can not be addressed by a risk response.
- B. It is a risk that will remain no matter what type of risk response is offered.
- C. It is a risk that remains because no risk response is taken.
- D. It is a risk that remains after planned risk responses are taken.

Answer: D

NEW QUESTION 111

You work as a project manager for BlueWell Inc. There has been a delay in your project work that is adversely affecting the project schedule. You decided, with your stakeholders' approval, to fast track the project work to get the project done faster. When you fast track the project which of the following are likely to increase?

- A. Costs
- B. Quality control concerns
- C. Human resource needs
- D. Risks

Answer: D

NEW QUESTION 114

You work as a project manager for BlueWell Inc. Your project is using a new material to construct a large warehouse in your city. This new material is cheaper than traditional building materials, but it takes some time to learn how to use the material properly. You have communicated to the project stakeholders that you will be able to save costs by using the new material, but you will need a few extra weeks to complete training to use the materials. This risk response of learning how to use the new materials can also be known as what term?

- A. Team development
- B. Benchmarking
- C. Cost of conformance to quality
- D. Cost-benefits analysis

Answer: C

NEW QUESTION 116

You are the project manager of the YHG project for your company. Within the project, you and the project team have identified a risk event that could have a financial impact on the project of \$450,000. This risk event has a 70 percent chance of occurring in the project. The project identifies a solution that will reduce the probability of the risk event to ten percent, but it will cost \$260,000 to implement. Management agrees with the solution and asks that you include the risk response in the project plan. What risk response is this?

- A. This is mitigation because the response reduces the probability.
- B. This is not a risk response, but a change request.
- C. This is transference because of the \$260,000 cost of the solution.
- D. This is avoidance because the risk response caused the project plan to be changed.

Answer: A

NEW QUESTION 117

Frances is the project manager of a project in her organization. This project has a budget of \$567,000 and is scheduled to last for three years. Frances wants to examine the risk events to determine which risk events have the most potential impact on the project. Which modeling technique can help Frances to accomplish this goal?

- A. Expected monetary value
- B. Sensitivity analysis
- C. Quantitative risk analysis
- D. Modeling and simulation

Answer: B

NEW QUESTION 120

You are the project manager for your organization. You have determined that an activity is too dangerous to complete internally so you hire licensed contractor to complete the work.

The contractor, however, may not complete the assigned work on time which could cause delays in subsequent work beginning. This is an example of what type of risk event?

- A. Internal
- B. Secondary risk
- C. Pure risk
- D. Transference

Answer: B

NEW QUESTION 121

You are the project manager of the NHK Project. Management wants to know how often your risk identification process will occur during the project. Considering that your project is scheduled to last one year and involves five distinct phases, how often should risk identification take place?

- A. Monthly
- B. Once per project life cycle phase
- C. Quarterly
- D. Vary depending on the situations within the project

Answer: D

NEW QUESTION 125

You are the project manager of the NGQQ Project for your company. To help you communicate project status to your stakeholders, you are going to create a stakeholder register. All of the following information should be included in the stakeholder register except for which one?

- A. Assessment information of the stakeholders' major requirements, expectations, and potential influence
- B. Stakeholder classification of their role in the project
- C. Identification information for each stakeholder
- D. Stakeholder management strategy

Answer: D

NEW QUESTION 126

You are the project manager for the ABC organization. Your current project has 75 internal stakeholders and 245 external stakeholders. Many of the risks within your project will only affect the internal stakeholders, but several of the identified risk events will affect the external stakeholders. Management would like to know the total number of communication channels in the project. How many communication channels exist in this project?

- A. 245
- B. 51,040
- C. 102,080
- D. 320

Answer: B

NEW QUESTION 129

You work as the project manager for Bluewell Inc. Your project has several risks that will affect several stakeholder requirements. Which project management plan will define who will be available to share information on the project risks?

- A. Risk Management Plan
- B. Stakeholder management strategy
- C. Resource Management Plan
- D. Communications Management Plan

Answer: D

NEW QUESTION 134

You are the project manager of the AMD project for your organization. In this project, you are currently performing quantitative risk analysis. The tool and technique you are using is simulation where the project model is computed many times with the input values chosen at random for each iteration. The goal is to create a probability distribution from the iterations for the project schedule. What technique will you use with this simulation?

- A. Pareto modeling
- B. Expected Monetary Value
- C. Analogous modeling
- D. Monte Carlo Technique

Answer: D

NEW QUESTION 139

Nancy is the project manager of the NHH project. She and the project team have identified a significant risk in the project during the qualitative risk analysis process. Bob is familiar with the technology that the risk is affecting and proposes to Nancy a solution to the risk event. Nancy tells Bob that she has noted his response, but the risk really needs to pass through the quantitative risk analysis process before creating responses. Bob disagrees and ensures Nancy that his response is most appropriate for the identified risk. Who is correct in this scenario?

- A. Bob is correct
- B. Bob is familiar with the technology and the risk event so his response should be implemented.
- C. Bob is correct
- D. Not all risk events have to pass the quantitative risk analysis process to develop effective risk responses.
- E. Nancy is correct
- F. All risks of significant probability and impact should pass the quantitative risk analysis process before risk responses are created.
- G. Nancy is correct
- H. Because Nancy is the project manager she can determine the correct procedures for risk analysis and risk response
- I. In addition, she has noted the risk response that Bob recommends.

Answer: B

NEW QUESTION 142

You are the project manager of the NHQ Project for your company. You have completed qualitative and quantitative analysis of your identified project risks and you would now like to find an approach to increase project opportunities and to reduce threats within the project. What project management process would best help you?

- A. Monitor and control project risks
- B. Create a risk governance approach
- C. Create the project risk register
- D. Plan risk responses

Answer: D

NEW QUESTION 146

You are the project manager of the GYH project for your organization. Management has asked you to begin identifying risks and to use an information gathering technique. Which one of the following risk identification approaches is an information gathering technique?

- A. Root cause analysis

- B. Assumptions analysis
- C. SWOT analysis
- D. Documentation reviews

Answer: A

NEW QUESTION 151

You are the project manager of a large construction project. Part of the project involves the wiring of the electricity in the building your project is creating. You and the project team determine the electrical work is too dangerous to perform yourself so you hire an electrician to perform the work for the project. This is an example of what type of risk response?

- A. Acceptance
- B. Mitigation
- C. Transference
- D. Avoidance

Answer: C

NEW QUESTION 153

Sensitivity analysis is a technique for systematically changing parameters in a model to determine the effects of such changes and is useful for computer modelers for a range of purposes. Which of the following purposes does the sensitivity analysis include? Each correct answer represents a complete solution. Choose all that apply.

- A. Estimating the average outcome
- B. Model development
- C. Decision making or the development of recommendations for decision makers
- D. Increased understanding or quantification of the system

Answer: BCD

NEW QUESTION 157

Frank is a project team member in your project. Frank has been adding changes to the software interface for the software that your project is creating. Because Frank has been adding these features new risks have entered into the project. You elect that these additions should be removed from the project even if it takes extra time and money to remove the features. What are these riskladen features called?

- A. Gold plating
- B. Scope creep
- C. Negative risks
- D. Corrective actions

Answer: B

NEW QUESTION 160

Rob is the project manager of the IDLK Project for his company. This project has a budget of \$5,600,000 and is expected to last 18 months. Rob has learned that a new law may affect how the project is allowed to proceed - even though the organization has already invested over \$750,000 in the project. What risk response is the most appropriate for this instance?

- A. Acceptance
- B. Transference
- C. Mitigation
- D. Enhance

Answer: A

NEW QUESTION 161

You are the project manager of the NHJ project for your company. This project has a budget at completion of \$1,650,000 and you are 60 percent complete. According to the project plan, however, the project should be 65 percent complete. In this project you have spent \$995,000 to reach this point of completion. There is a risk that this project may be late so you have taken some measures to recover the project schedule. Management would like to know, based on current performance, what the estimate at completion for this project will be. What is the estimate at completion?

- A. \$1,650,000
- B. \$1,666,667
- C. \$663,333
- D. -\$8,333

Answer: B

NEW QUESTION 162

Tom works as a project manager for BlueWell Inc. He is determining which risks can affect the project. Which of the following inputs of the identify risks process is useful in identifying risks, and provides a quantitative assessment of the likely cost to complete the scheduled activities?

- A. Activity cost estimates
- B. Cost management plan
- C. Activity duration estimates
- D. Risk management plan

Answer: A

NEW QUESTION 163

Mary is the project manager of PKT project. In Mary's project there are certain enterprise environmental factors that require Mary to use modeling and simulation techniques to predict the likelihood of achieving cost and schedule objectives in the project. Mary is using a technique for which the cost estimates are chosen at random for each iteration of the analysis, such as pessimistic, most likely, and worst-case scenarios. What type of analysis is Mary using in this project?

- A. Quantitative analysis
- B. Qualitative analysis
- C. Risk distribution
- D. Monte Carlo Analysis

Answer: D

NEW QUESTION 164

Kelly is the project manager of the NNQ Project for her company. This project will last for one year and has a budget of \$350,000. Kelly is working with her project team and subject matter experts to begin the risk response planning process. When the project manager begins the plan risk response process, what two inputs will she need?

- A. Risk register and the risk response plan
- B. Risk register and power to assign risk responses
- C. Risk register and the risk management plan
- D. Risk register and the results of risk analysis

Answer: C

NEW QUESTION 166

There are seven risk responses for any project. Which one of the following is a valid risk response for a negative risk event?

- A. Enhance
- B. Exploit
- C. Acceptance
- D. Share

Answer: C

NEW QUESTION 167

Joan is the project manager of the KYU project for her company. She is working with management on defining a contingency reserve for her project. Currently the project is scheduled to last 18 months and it has a cost budget of \$2.5 million. What two areas of the project can the contingency reserve address in regard to risk management?

- A. Quality and costs
- B. Cost and resource management
- C. Risk and project planning
- D. Costs and schedule

Answer: D

NEW QUESTION 169

Frank is the project manager of the NHL Project for his company and he is starting the risk identification process for the project. Frank needs to ensure that the correct stakeholders are interviewed as part of risk identification. What document will help Frank to communicate and solicit inputs of the project stakeholders during risk identification?

- A. Project charter
- B. Risk register
- C. Requirements management plan
- D. Stakeholder register

Answer: D

NEW QUESTION 172

You work as a project manager for TechSoft Inc. You are working with the project stakeholders on the qualitative risk analysis process in your project. You have used all the tools to the qualitative risk analysis process in your project. Which of the following techniques is NOT used as a tool in qualitative risk analysis process?

- A. Risk Urgency Assessment
- B. Risk Categorization
- C. Risk Reassessment
- D. Risk Data Quality Assessment

Answer: C

NEW QUESTION 173

Donna is the project manager of the QSD Project and she believes Risk Event D in the following figure is likely to happen. If this event does happen, how much will Donna have left in the risk contingency reserve if none of the other risk events have happened?

- A. \$35,000
- B. \$41,700

- C. \$14,000
- D. \$6,700

Answer: D

NEW QUESTION 178

Todd is the project manager of the EST project for his company. His organization has established certain rules in the enterprise environmental factors which affect the approach that Todd takes in managing his project. One of the rules requires Todd to consider the risk attitude of the stakeholders participating in risk analysis. Why must risk attitude be considered as a part of risk analysis?

- A. Risk attitude can affect the measurement of probability and impact.
- B. Risk attitude can establish a stakeholder's influence over project decisions.
- C. Risk attitude identifies stakeholders that are hygiene seekers or motivation seekers.
- D. Risk attitude establishes stakeholders as positive or negative stakeholders.

Answer: A

NEW QUESTION 179

Jane is the project manager of the GBB project for her company. In the current project a vendor has offered the project a ten percent discount based if they will order 100 units for the project. It is possible that the GBB Project may need the 100 units, but the cost of the units is not a top priority for the project. Jane documents the offer and tells the vendor that they will keep the offer in mind and continue with the project as planned. What risk response has been given in this project?

- A. Acceptance
- B. Enhance
- C. Exploiting
- D. Sharing

Answer: A

NEW QUESTION 182

You are the project manager of the NHH project for your company. You and the project team have completed the quantitative risk analysis for your project. During this process you create a contingency reserve based on the risk probability-impact matrix as seen in the figure below. Based on the information in the figure above, what amount would you need to include in your risk contingency fund?

- A. -\$465,000
- B. \$171,500
- C. -\$258,500
- D. \$258,500

Answer: D

NEW QUESTION 183

You are completing the qualitative risk analysis process with your project team and are relying on the risk management plan to help you determine the budget, schedule for risk management, and risk categories. You discover that the risk categories have not been created. When should the risk categories have been created?

- A. Create work breakdown structure process
- B. Plan risk management process
- C. Risk identification process
- D. Define scope process

Answer: B

NEW QUESTION 186

Which of the following is a risk response planning technique associated with threats that seeks to reduce the probability of occurrence or impact of a risk to below an acceptable threshold?

- A. Avoidance
- B. Exploit
- C. Transference
- D. Mitigation

Answer: D

NEW QUESTION 191

You are the project manager of the BlueStar project in your company. Your company is structured as a functional organization and you report to the functional manager that you are ready to move onto the qualitative risk analysis process. What will you need as inputs for the qualitative risk analysis of the project in this scenario?

- A. Qualitative risk analysis does not happen through the project manager in a functional structure.
- B. You will need the risk register, risk management plan, project scope statement, and any relevant organizational process assets.
- C. You will need the risk register, risk management plan, outputs of qualitative risk analysis, and any relevant organizational process assets.
- D. You will need the risk register, risk management plan, permission from the functional manager, and any relevant organizational process assets.

Answer: B

NEW QUESTION 194

Neil works as a project manager for SoftTech Inc. He is working with Tom, the COO of his company, on several risks within the project. Tom understands that through qualitative analysis Neil has identified many risks in the project. Tom's concern, however, is that the priority list of these risk events are sorted in "high-risk," "moderate-risk," and "low-risk" as conditions apply within the project. Tom wants to know that is there any other objective on which Neil can make the priority list for project risks. What will be Neil's reply to Tom?

- A. Risks may be listed by the additional analysis and response
- B. Risk may be listed by the responses in the near-term
- C. Risks may be listed by priority separately for schedule, cost, and performance
- D. Risks may be listed by categories

Answer: C

NEW QUESTION 197

Kelly is the project manager of the BHH project for her organization. She is completing the risk identification process for this portion of her project. Which one of the following is the only thing that the risk identification process will create for Kelly?

- A. Risk register
- B. Risk register updates
- C. Change requests
- D. Project document updates

Answer: A

NEW QUESTION 198

Wendy is about to perform qualitative risk analysis on the identified risks within her project. Which one of the following will NOT help Wendy to perform this project management activity?

- A. Project scope statement
- B. Risk management plan
- C. Risk register
- D. Stakeholder register

Answer: D

NEW QUESTION 225

You are the project manager of the GGK project for your company. The GGK project has a budget of \$1,265,100 and is currently 40 percent complete. In this project, you elected to add labor to the project to increase the likelihood of completing the project early as the project was only scheduled to be 35 percent complete at this time. This positive risk response, while keeping the project ahead of schedule, has added significant costs to the project. You have already spent \$575,000 to reach this point in the project. Management would like to know what your cost performance index and the schedule performance index is for this project. What are these values?

- A. The CPI is -\$68,960 and the SPI is \$63,255.
- B. The CPI is .88 and the SPI is zero.
- C. The CPI is .88 and the SPI is 1.14.
- D. The CPI is 1.14 and the SPI is .88.

Answer: C
