**NEW QUESTION 1**

What is the primary purpose of Umbrella??s Secure Web Gateway?

- A. exposes shadow IT by providing the ability to detect and report on cloud applications across organizations
- B. analyzes sensitive data in-line to provide visibility and control over sensitive data
- C. isolates web traffic from the user device to prevent the possibility of malware infections
- D. logs and inspects web traffic for full visibility, URL and application controls, and protection against malware

**Answer:** D

**Explanation:**

The primary purpose of Umbrella??s Secure Web Gateway (SWG) is to provide a comprehensive security solution that logs and inspects web traffic. This allows for full visibility into the web activities within an organization, enabling URL and application controls, and offering advanced threat protection against malware. SWG acts as a checkpoint between users and the internet, filtering and monitoring web traffic to ensure safe internet access while blocking potentially harmful content. It is designed to enforce security policies, prevent data leakage, and protect against web-based threats by inspecting URLs, detecting threats, and decrypting select encrypted traffic for inspection.

**NEW QUESTION 2**

Which Cisco solution enables a hybrid experience and offers a VPN solution?

- A. on-premises solution
- B. edge computing
- C. remote solution
- D. cloud solution

**Answer:** A

**Explanation:**

Cisco's on-premises solutions, including their integrated services routers and security appliances, support the implementation of Virtual Private Networks (VPNs), which are crucial for creating a secure and encrypted connection over a less secure network, such as the internet. This becomes especially important for businesses adopting hybrid work models, where employees split their time between working on-site and remotely. The VPN solution allows remote workers to safely access the company's internal network, ensuring that sensitive data remains protected, even when accessed from outside the office. This hybrid experience is enabled by

on-premises VPN solutions, as they provide the necessary infrastructure to support secure remote access.

**NEW QUESTION 3**

What is a crucial concern for Hybrid SMBs?

- A. complexity of applications
- B. process automation
- C. more data with too little contextualization
- D. protect employees, devices, and company data

**Answer:** D

**Explanation:**

For Hybrid SMBs, a crucial concern is the protection of employees, devices, and company data. As businesses adopt hybrid work models, they face unique security challenges. These include securing data across different networks and devices, protecting against cyber threats in a more complex IT environment, and ensuring that employees can work safely from any location. Effective integration of technologies to ensure robust security is essential, requiring expertise and a strategic approach1.

**NEW QUESTION 4**

How does Cisco help SMBs with security?

- A. only check internal emails for phishing
- B. only priority applications should have zero trust-based access with multifactor authentication
- C. endpoint security with threat hunting and vulnerability management
- D. decentralized security policy

**Answer:** C

**Explanation:**

Cisco assists SMBs in enhancing their security posture through endpoint security that includes threat hunting and vulnerability management. This approach provides a robust defense against a wide range of cyber threats by actively seeking out potential security issues and managing vulnerabilities before they can be exploited. Cisco??s endpoint security solutions are designed to protect against advanced threats at every endpoint, regardless of where users connect to the network1. This proactive stance on security helps SMBs safeguard their assets and maintain business continuity in the face of evolving cyber threats. References

**NEW QUESTION 5**

What must a hybrid SMB technology solution have?

- A. zero trust identity-based access
- B. specific desk for each employee when they visit the office
- C. single vendor collaboration infrastructure
- D. separate security policy for wired and wireless users

**Answer:** A

**Explanation:**

A hybrid SMB technology solution must prioritize security, especially in a landscape where remote work is prevalent. Zero trust identity-based access is a security model that requires all users, whether inside or outside the organization's network, to be authenticated, authorized, and continuously validated for security configuration and posture before being granted or keeping access to applications and data. This approach aligns with the modern needs of SMBs to provide secure access to their resources in a hybrid environment, where users are accessing systems both on-premises and remotely. It ensures that only authenticated and authorized users and devices can access applications and data, thereby reducing the attack surface and providing a more secure IT environment.

**NEW QUESTION 6**

Which Cisco product ensures that the right devices are connecting to the right application by the right person?

- A. Duo
- B. Webex
- C. Meraki
- D. Umbrella

**Answer:** A

**Explanation:**

The Cisco product that ensures the right devices are connecting to the right application by the right person is Duo. Duo is a multi-factor authentication (MFA) solution that verifies the identity of users and the health of their devices before they connect to the apps they use. This security measure helps prevent unauthorized access and potential breaches. Duo's MFA requires two or more verification factors, which significantly increases security because even if one factor (like a password) is compromised, unauthorized users would still need the second factor to gain access<sup>1</sup>.

**NEW QUESTION 7**

Which Cisco product is part of the smart experience for empowering IT?

- A. Meraki Sensors
- B. Meraki Cameras
- C. Meraki Insight
- D. Umbrella

**Answer:** C

**Explanation:**

Explanation

Meraki Insight is part of Cisco's smart experience aimed at empowering IT. It provides end-to-end visibility on the network, which is crucial for IT teams to ensure a high-quality user experience. By leveraging Meraki Insight, IT can proactively monitor and troubleshoot network issues, thus empowering them to manage the network more efficiently and effectively. References := 1, 2

**NEW QUESTION 8**

What is the number one threat vector?

- A. Web Page Spoofing
- B. Email
- C. DOS Attacks
- D. IoT Devices

**Answer:** B

**Explanation:**

Explanation

Email is considered the top threat vector for small and medium businesses. This is because it is the most common method attackers use to deliver malware, phishing attempts, and other malicious activities. Research from HP Wolf Security indicates that email accounts for 79% of threats, making it a significant concern for cybersecurity efforts<sup>1</sup>.

**NEW QUESTION 9**

How does Cisco help SMBs to be truly smart?

- A. employee automation
- B. utilities cost control
- C. operational inefficiencies
- D. secure connectivity

**Answer:**

D

**Explanation:**

Explanation

Cisco aids SMBs in becoming truly smart by providing secure connectivity solutions. These solutions are designed to enable employees to work safely and reliably from anywhere, at any time. Cisco's offerings, such as Meraki Wi-Fi for public or private connectivity, ensure speed, scale, and security. Additionally, Cisco's smart office technology solutions leverage intelligent workplace technologies like Meraki cameras for security and smart building automation, and environmental sensors for a smarter, safer, and more sustainable future. This secure connectivity is fundamental to enabling smart operations and empowering SMBs to take advantage of digital opportunities.

**NEW QUESTION 10**

Which resource is used to learn about Cisco APIs and connect with other developers in Cisco communities?

- A. DevNet
- B. DevCad
- C. WebCad
- D. Black Belt

**Answer:** A

**NEW QUESTION 10**
