

Appian

Exam Questions ACD101

Appian Associate Developer

NEW QUESTION 1

You have two record types: ACME_Student and ACME_Class.

You need to add a many-to-many relationship between these two record types. What should you do?

- A. Create a new record type with data sync enabled, then add a one-to-many relationship from each record type (ACME_Student and ACME_Class) to the new mapping record type.
- B. This relationship cannot be modeled using record type relationships.
- C. Add the relationship from either ACME_Student or ACME_Class, then select Many-to- Many under Relationship Type, and add the corresponding keys.

Answer: A

NEW QUESTION 2

You need to pass data into a process from other parts of your Appian application. Which configuration is required in your process model?

- A. Toggle the Parameter field to "True" on the configuration of a process variable.
- B. Create process variables on the Data Management tab of Process Model Properties.
- C. Add an interface as a Process Start Form.

Answer: B

NEW QUESTION 3

A user needs to navigate from a record summary to an external URL. Which interface component can be used to support this goal?

- A. Button
- B. Record Link
- C. Card Layout with a link

Answer: A

NEW QUESTION 4

How do you refer to metadata of a process model object within process model expressions? For example: the creator, name, or description.

- A. Process Properties, referred to in process model expressions using the pp! domain.
- B. Process Variables, referred to in process model expressions using the pv! domain.
- C. Process Model Properties, referred to in process model expressions using the pm! domain.

Answer: C

NEW QUESTION 5

A customer wants to display a small toolbar with three icons - a "sad face," a "face with neutral expression," and a "happy face" - on the bottom of every page in their application.

Users will be instructed to use the icon that best expresses their current experience using the application. This will allow the customer to collect valuable data about users.

Which object type should be called from each page to implement this feature?

- A. An interface, because the component must render user interface elements.
- B. An expression rule, because the component captures expressions of user sentiment for analysis.
- C. A decision, because the component captures a choice that users select from an array of custom selection components, rather than a standard dropdown or radio button.

Answer: A

NEW QUESTION 6

After selecting a record, a user wants to initiate an activity in the context of that selected record.

You start by creating the process model that implements this activity. What should you do next?

- A. Add the process model as a record list action to that record.
- B. Configure a site page as an action to kick off the process model.
- C. Add the process model as a record related action to that record.

Answer: C

NEW QUESTION 7

You need to remove an unused field from an existing record type Product, which has data sync enabled and is backed by a database table.

What should you do?

- A. Delete the field from the record type and optionally delete the column from the database table.
- B. Delete the field from the product Custom Data Type (CDT) and perform a full resync of the record type.
- C. Delete the column from the database table and perform a full resync of the record type.

Answer: B

NEW QUESTION 8

You select the "Generate groups and folders to secure and organize objects" option while creating a new application, Acme, with the prefix ACM. By default, which two groups are generated by Appian? (Choose two.)

- A. ACM Administrators
- B. ACM Designers
- C. ACM Viewers
- D. ACM Users

Answer: AB

NEW QUESTION 9

Which Appian feature is used to automate repetitive manual tasks such as extracting data from a system for which there is no API?

- A. RPA
- B. Process Mining
- C. Connected Systems

Answer: A

NEW QUESTION 10

You are creating a form used to order a pizza. You use a radio button component for the selection. The pizza selection labels include a list of toppings. You do not want the selection labels to be truncated. Which layout should you choose?

- A. Compact
- B. Grid
- C. Stacked

Answer: C

NEW QUESTION 10

You created and published a new process model. The process model has a start form with two synchronous subprocesses with 40 and 66 nodes each. All nodes are chained from the start node through the subprocesses to the end node. After the tasks and subprocesses, there is a second User Input Task in which the user can confirm the entries and add a comment. When testing as a normal Acme business user, you see that the confirmation screen is not shown to you. What might be the reason for this behavior?

- A. The maximum number of activity chained nodes is exceeded and breaks.
- B. The second User Input Task is assigned to the process initiator.
- C. The second User Input Task is assigned to the Acme business user group.

Answer: A

NEW QUESTION 14

Your customer wants to change the name of a field of an existing Custom Data Type (CDT) to match a renamed database field. The CDT is backed by a database entity, whose data store has the Automatically Update Database Schema option disabled. The old column name was BIRTHDATE and the new column name is DATE_OF_BIRTH. How should you proceed?

- A. Download the CDT asXSD, make the appropriate changes, and re-upload the XS
- B. Verify and publish the data store.
- C. Rename the field in the record type in Appian to automatically update the CDT field.
- D. Rename the field in the CDT in Appia
- E. Verify and publish the data store.

Answer: C

NEW QUESTION 17

What is the Production environment used for?

- A. Allowing business users to test the application.
- B. Allowing developers to make updates to the application.
- C. Allowing business users to use the final version of the application.

Answer: C

NEW QUESTION 19

You need to be able to define record type relationships. What is a required prerequisite in Appian?

- A. The record types must have data sync enabled.
- B. The record types must be on a virtualized data source.
- C. The record types must be stored in the local Appian business database.

Answer: A
