

Exam Questions AB-900

Microsoft 365 Copilot and Agent Administration Fundamentals (beta)

<https://www.2passeasy.com/dumps/AB-900/>

NEW QUESTION 1

HOTSPOT

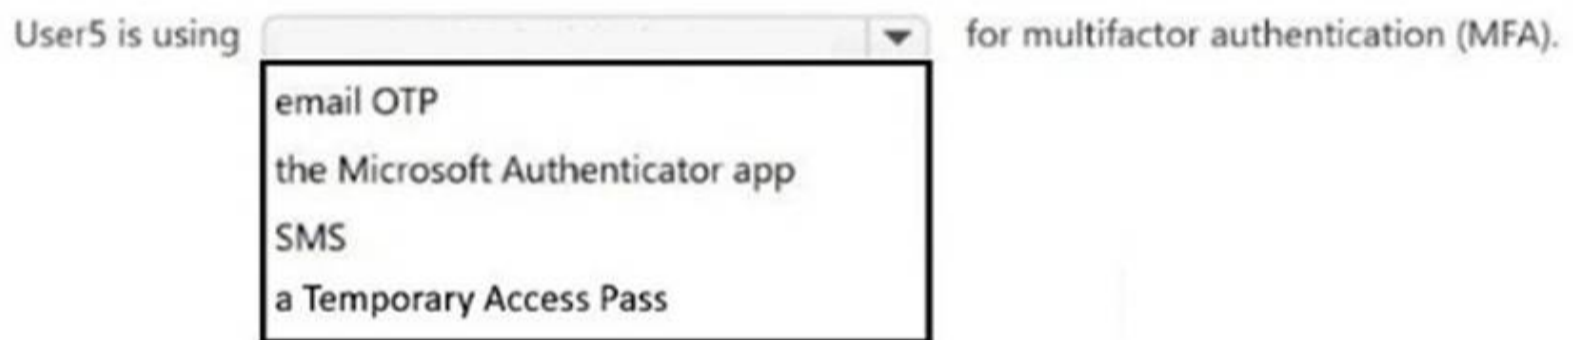

A user named User5 navigates to <https://myapps.microsoft.com>. After entering their username and password, User5 receives the displayed message on their mobile device.

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Are you trying to sign in?

Contoso Ltd.
 User5@sk2508.onmicrosoft.com

Enter the number shown to sign in.

Enter number here

YES

NO, IT'S NOT ME

I CAN'T SEE THE NUMBER

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer Area

User5 is using  for multifactor authentication (MFA).

NEW QUESTION 2

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.	<input type="radio"/>	<input type="radio"/>
Content retrieved by using Microsoft Graph is used by Microsoft to train models.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.	<input checked="" type="radio"/>	<input type="radio"/>
Content retrieved by using Microsoft Graph is used by Microsoft to train models.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 3

You need to create a Microsoft 365 Copilot agent that can create charts and visualizations based on a Microsoft Excel workbook. What should you configure for the agent?

- A. the Scrum Assistant template
- B. the Customer Insights Assistant template
- C. the code interpreter capability
- D. the image generator capability

Answer: C

Explanation:

The correct answer is C. the code interpreter capability. Microsoft Learn states that the code interpreter capability for Microsoft 365 Copilot declarative agents allows the agent to generate and execute Python code to analyze data and generate visualizations. Microsoft's agent schema documentation explicitly describes Code Interpreter as a capability used to solve complex math problems, analyze data, and generate visualizations. That directly matches the requirement to create charts and visualizations from a Microsoft Excel workbook.

Microsoft documentation also explains that code interpreter supports working with Excel files and is used for scenarios such as data analysis, statistical computations, and generating charts. This makes it the correct configuration for an agent that must reason over workbook data and produce chart-based outputs. By contrast, the image generator capability is for creating images, not for analyzing workbook data. The Scrum Assistant and Customer Insights Assistant options are templates, not the specific technical capability required to read data and build charts from an Excel workbook.

NEW QUESTION 4

HOTSPOT

Your organization has a Microsoft 365 subscription.

You need to use Microsoft Purview to meet the following requirements:

- Discover and classify sensitive data across multiple platforms.
- Block users from sharing intellectual property with external users.

Which Microsoft Purview solution should you use for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Discover and classify sensitive data across multiple platforms:

▼

- Communication Compliance
- Data Loss Prevention
- Information Protection
- Insider Risk Management

Block users from sharing intellectual property with external users:

▼

- Communication Compliance
- Data Loss Prevention
- Information Protection
- insider Risk Management

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Discover and classify sensitive data across multiple platforms:

▼

- Communication Compliance
- Data Loss Prevention
- Information Protection
- Insider Risk Management

Block users from sharing intellectual property with external users:

▼

- Communication Compliance
- Data Loss Prevention
- Information Protection
- insider Risk Management

NEW QUESTION 5

You need to identify files and emails that contain social security numbers (SSNs) and credit card numbers. What should you use in the Microsoft Purview portal?

- A. Information Protection reports
- B. Data explorer
- C. Information Protection policies
- D. Activity explorer

Answer: B

Explanation:

The correct answer is B. Data explorer. Microsoft Learn states that Data explorer in Microsoft Purview shows a current snapshot of items that have been classified as a sensitive information type in your organization. Microsoft's sensitive information type documentation specifically lists examples such as social security numbers and credit card numbers, which means Data explorer is the appropriate portal feature for identifying files and emails that contain those data types. Data explorer is designed to help administrators see where sensitive data exists across supported Microsoft 365 locations.

The other options are less appropriate for this task. Information Protection reports focus more broadly on label and protection reporting. Information Protection policies are for configuring classification and protection behavior, not for finding existing files and emails containing SSNs or credit card numbers. Activity explorer is primarily used to review user and policy-related activities, such as label changes or DLP events, rather than to provide the direct sensitive-data inventory view requested here. Since the question asks to identify the files and emails containing specific sensitive information types, Microsoft's documented answer is Data explorer.

NEW QUESTION 6

What can you use to block a user account automatically when a risky sign-in is detected?

- A. Microsoft Entra ID Protection
- B. Microsoft Defender for Office 365
- C. Microsoft Entra Privileged Identity Management (PIM)
- D. Microsoft Defender for Identity

Answer: A

NEW QUESTION 7

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Answer Area

Statements	Yes	No
Users can use Microsoft 365 Copilot anonymously.	<input type="radio"/>	<input type="radio"/>
Administrators can allow the self-service purchase of Microsoft 365 Copilot licenses.	<input type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot licenses can be assigned to Microsoft Entra ID guest users from other organizations.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Users can use Microsoft 365 Copilot anonymously.	<input type="radio"/>	<input checked="" type="radio"/>
Administrators can allow the self-service purchase of Microsoft 365 Copilot licenses.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft 365 Copilot licenses can be assigned to Microsoft Entra ID guest users from other organizations.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 8

Your organization has a Microsoft 365 E5 subscription.

You need to ensure that a third-party cloud service can authenticate to Microsoft Entra. What should you configure?

- A. a Microsoft 365 Copilot connector
- B. multifactor authentication (MFA)
- C. a Conditional Access policy
- D. an app registration

Answer: D

NEW QUESTION 9

Your organization has a Microsoft 365 E5 subscription. You create a Microsoft Purview sensitivity label named Label1. You need to ensure that users can apply Label1 to files in Microsoft 365. What should you use?

- A. an auto-labeling policy
- B. a trainable classifier
- C. a retention label policy
- D. a sensitivity label policy

Answer: D

Explanation:

The correct answer is D. a sensitivity label policy. In Microsoft Purview, creating a sensitivity label by itself does not make it available to users. Microsoft Learn states that after you create sensitivity labels, you must publish them by creating a label policy so that users and groups can see and apply those labels in Microsoft 365 apps and services. Publishing controls which labels are available and to whom they are shown. This is why a sensitivity label policy is required to ensure that users can apply Label1 to files.

The other options do not meet the requirement. Auto-labeling policies apply labels automatically when content matches conditions, but they are not the primary mechanism for simply making a label available for user selection. A trainable classifier is used to identify content categories, not to publish a label. A retention label policy publishes retention labels for records and lifecycle purposes, which is different from sensitivity labeling for classification and protection. Therefore, the correct Microsoft-documented method to let users apply Label1 to files is to publish it using a sensitivity label policy.

NEW QUESTION 10

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

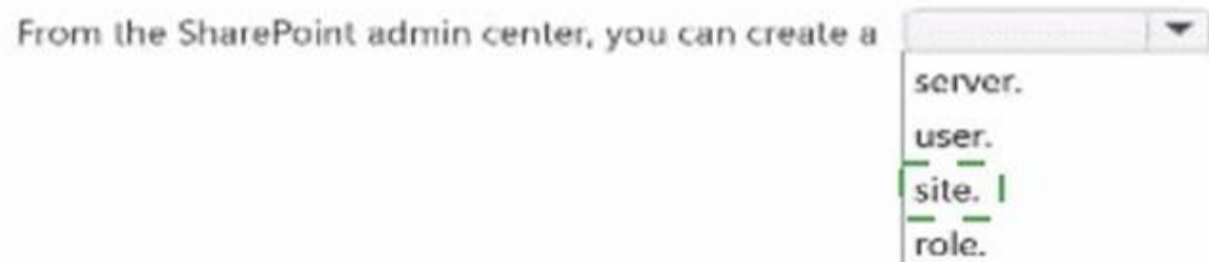

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

NEW QUESTION 10

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Users that are assigned a Microsoft 365 E5 license can create Microsoft 365 Copilot agents grounded in the web.	<input type="radio"/>	<input type="radio"/>
Users must be assigned a Microsoft 365 Copilot license to use the Analyst agent.	<input type="radio"/>	<input type="radio"/>
Users can use a natural language prompt to create a Microsoft 365 Copilot agent.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Users that are assigned a Microsoft 365 E5 license can create Microsoft 365 Copilot agents grounded in the web.	<input type="radio"/>	<input checked="" type="radio"/>
Users must be assigned a Microsoft 365 Copilot license to use the Analyst agent.	<input checked="" type="radio"/>	<input type="radio"/>
Users can use a natural language prompt to create a Microsoft 365 Copilot agent.	<input checked="" type="radio"/>	<input type="radio"/>

NEW QUESTION 13

HOTSPOT

You open the Microsoft Entra admin center as shown in the following exhibit.

The screenshot shows the Microsoft Entra admin center interface. At the top, there is a 'Identity Secure Score' card showing a score of 17.77% with a note that the score refreshes every 24 hours. To the right is a 'Score History' chart showing a score of 0. Below these are filter tabs for 'All 12', 'Security 12', 'Best practice 0', and 'Microsoft Defender for Identity 0'. A search bar contains 'Search by recommendation' and an 'Add filter' button. Below the search bar, it says '12 recommendations found'. A table lists the following recommendations:

Priority	Recommendation	Required licenses	Release type	Secure Score points
Low	Use least privileged administrative roles	Microsoft Entra ID Free	Generally available	1/1
Low	Designate more than one global admin	Microsoft Entra ID Free	Generally available	1/1
Medium	Enable password hash sync if hybrid	Microsoft Entra ID Free	Generally available	0/5
High	Do not expire passwords	Microsoft Entra ID Free	Generally available	8/8
High	Ensure all users can complete multifactor authentication	Microsoft Entra ID Free	Generally available	0.82/9
Medium	Do not allow users to grant consent to unreliable applications	Microsoft Entra ID Free	Generally available	0/4
High	Enable policy to block legacy authentication	Microsoft Entra ID Free	Generally available	0.73/8
High	Require multifactor authentication for administrative roles	Microsoft Entra ID Free	Generally available	0/10

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer Area

Resolving the [answer choice] recommendation will improve the Identity Secure Score the most.

- Do not expire passwords
- Use least privileged administrative roles
- Enable policy to block legacy authentication
- Required multifactor authentication for administrative roles

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Resolving the [answer choice] recommendation will improve the Identity Secure Score the most.

- Do not expire passwords
- Use least privileged administrative roles
- Enable policy to block legacy authentication
- Required multifactor authentication for administrative roles

NEW QUESTION 18

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Answer Area

Statements	Yes	No
Microsoft Purview Communications Compliance can detect offensive text in images stored in Microsoft SharePoint sites.	<input type="radio"/>	<input type="radio"/>
Microsoft Purview Communications Compliance anonymizes user identities by default during investigations.	<input type="radio"/>	<input type="radio"/>
Microsoft Purview Communications Compliance adds a disclaimer to all monitored communications.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft Purview Communications Compliance can detect offensive text in images stored in Microsoft SharePoint sites.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft Purview Communications Compliance anonymizes user identities by default during investigations.	<input checked="" type="radio"/>	<input type="radio"/>
Microsoft Purview Communications Compliance adds a disclaimer to all monitored communications.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION 20

HOTSPOT

Your company uses Microsoft 365 Copilot pay-as-you-go billing.

The company wants greater visibility into Copilot usage costs and the ability to forecast departmental spending.

You need to ensure that you can see Copilot costs by department.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Portal:
The Microsoft 365 admin center
The Microsoft Entra admin center
The Microsoft Purview portal

Feature:
An auto-claim policy
A billing policy
A Copilot connector

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Portal:
The Microsoft 365 admin center
The Microsoft Entra admin center
The Microsoft Purview portal

Feature:
An auto-claim policy
A billing policy
A Copilot connector

NEW QUESTION 23

You use Microsoft 365 Copilot.

What does Copilot use to generate responses based on corporate data stored in Microsoft SharePoint?

- A. Microsoft Intune
- B. Microsoft Defender
- C. Microsoft Graph
- D. Microsoft Purview

Answer: C
