

Microsoft

Exam Questions AB-900

Microsoft 365 Copilot and Agent Administration Fundamentals (beta)

NEW QUESTION 1

HOTSPOT

Select the answer that correctly completes the sentence.

Conditional Access policies

- are configured by using the Microsoft Defender portal.
- are applied only to on-premises resources.
- provide control over how users can access cloud apps.
- require a Microsoft Exchange mailbox.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Conditional Access policies

- are configured by using the Microsoft Defender portal.
- are applied only to on-premises resources.
- provide control over how users can access cloud apps.
- require a Microsoft Exchange mailbox.

NEW QUESTION 2

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

In the Microsoft 365 admin center, the Credits used metric in the Copilot credits report shows the total credits used by users in your organization that _____ and are interacting with work grounded agents in Microsoft 365 Copilot Chat.

- use Microsoft Teams
- are external to your organization
- are assigned a Microsoft 365 Copilot license
- are NOT assigned a Microsoft 365 Copilot license

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

In the Microsoft 365 admin center, the Credits used metric in the Copilot credits report shows the total credits used by users in your organization that _____ and are interacting with work grounded agents in Microsoft 365 Copilot Chat.

- use Microsoft Teams
- are external to your organization
- are assigned a Microsoft 365 Copilot license
- are NOT assigned a Microsoft 365 Copilot license

NEW QUESTION 3
HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.	☐	☐
Content retrieved by using Microsoft Graph is used by Microsoft to train models.	☐	☐
Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Prompts and responses issued by users in Microsoft 365 Copilot are used by Microsoft to train models.	☒	☐
Content retrieved by using Microsoft Graph is used by Microsoft to train models.	☒	☐
Microsoft 365 Copilot honors the security permissions in your Microsoft 365 subscription.	☐	☒

NEW QUESTION 4

You need to create a Microsoft 365 Copilot agent that can create charts and visualizations based on a Microsoft Excel workbook. What should you configure for the agent?

- A. the Scrum Assistant template
- B. the Customer Insights Assistant template
- C. the code interpreter capability
- D. the image generator capability

Answer: C

Explanation:

The correct answer isC. the code interpreter capability. Microsoft Learn states that thecode interpretercapability for Microsoft 365 Copilot declarative agents allows the agent togenerate and execute Python codetoanalyze dataandgenerate visualizations. Microsoft??s agent schema documentation explicitly describes Code Interpreter as a capability used to solve complex math problems, analyze data, and generate visualizations. That directly matches the requirement to createcharts and visualizationsfrom aMicrosoft Excel workbook. Microsoft documentation also explains that code interpreter supports working withExcel filesand is used for scenarios such asdata analysis,statistical computations, andgenerating charts. This makes it the correct configuration for an agent that must reason over workbook data and produce chart-based outputs. By contrast, theimage generator capabilityis for creating images, not for analyzing workbook data. TheScrum AssistantandCustomer Insights Assistantoptions are templates, not the specific technical capability required to read data and build charts from an Excel workbook.

NEW QUESTION 5

HOTSPOT

Your organization has a Microsoft 365 subscription.
You need to use Microsoft Purview to meet the following requirements:

- Discover and classify sensitive data across multiple platforms.
- Block users from sharing intellectual property with external users.

Which Microsoft Purview solution should you use for each requirement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer Area

Discover and classify sensitive data across multiple platforms:

Communication Compliance

Data Loss Prevention

Information Protection

Insider Risk Management

Block users from sharing intellectual property with external users:

Communication Compliance

Data Loss Prevention

Information Protection

insider Risk Management

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Discover and classify sensitive data across multiple platforms:

Communication Compliance

Data Loss Prevention

Information Protection

Insider Risk Management

Block users from sharing intellectual property with external users:

Communication Compliance

Data Loss Prevention

Information Protection

insider Risk Management

NEW QUESTION 6

Your organization has a Microsoft 365 subscription.
You need to investigate security incidents and alerts raised from the Windows 11 devices in your organization. What should you use?

- A. Microsoft Entra ID Protection
- B. Microsoft Purview Insider Risk Management
- C. Microsoft Defender for Endpoint
- D. Microsoft Defender for Identity

Answer: C

NEW QUESTION 7

HOTSPOT
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
For administrators to use SharePoint Advanced Management, all the users in your organization need a Microsoft 365 Copilot license.	☐	☐
SharePoint Advanced Management can help restrict Microsoft 365 Copilot from accessing Microsoft SharePoint content.	☐	☐
SharePoint Advanced Management is available as a standalone license for organizations without Microsoft 365 Copilot.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
For administrators to use SharePoint Advanced Management, all the users in your organization need a Microsoft 365 Copilot license.	☐	☒
SharePoint Advanced Management can help restrict Microsoft 365 Copilot from accessing Microsoft SharePoint content.	☒	☐
SharePoint Advanced Management is available as a standalone license for organizations without Microsoft 365 Copilot.	☒	☐

NEW QUESTION 8

FILL IN THE BLANK

Select the answer that correctly completes the sentence.

Answer Area

You can use the Microsoft Purview solution to find all the content that relates to the term "Project Falcon" in the emails exchanged by two users.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

eDiscovery

NEW QUESTION 9

HOTSPOT

Your organization has a Microsoft 365 subscription.

You need to use Microsoft Purview to meet the following requirements:

Prevent users from sharing files that contain Personally Identifiable Information (PII). Use machine learning to train a model that detects sensitive content.

Which Microsoft Purview solution should you use for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Prevent users from sharing PII:

Communication Compliance

Data Loss Prevention

DSPM for AI

Information Protection

Insider Risk Management

Use machine learning to train a model:

Communication Compliance

Data Loss Prevention

DSPM for AI

Information Protection

Insider Risk Management

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Prevent users from sharing PII:

Communication Compliance
Data Loss Prevention
DSPM for AI
Information Protection
Insider Risk Management

Use machine learning to train a model:

Communication Compliance
Data Loss Prevention
DSPM for AI
Information Protection
Insider Risk Management

NEW QUESTION 10

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

In Microsoft Entra Privileged Identity Management (PIM), an administrator has made you eligible for the User Administrator role. Before you can create a user account, you must

Activate the role
install the Microsoft Authenticator app.
request a license.
update your location information.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

In Microsoft Entra Privileged Identity Management (PIM), an administrator has made you eligible for the User Administrator role. Before you can create a user account, you must

Activate the role

install the Microsoft Authenticator app.
request a license.
update your location information.

NEW QUESTION 10

Your organization has a Microsoft 365 subscription. All users are assigned a Microsoft 365 Copilot license. You need to prevent the users from generating images by using Copilot. What should you use?

- A. the Microsoft Defender portal
- B. the Microsoft Purview portal
- C. the Microsoft 365 admin center
- D. the Microsoft Entra admin center

Answer: C

Explanation:

The correct answer isC. the Microsoft 365 admin center. Microsoft Learn documents a specificCopilot image generationsetting in theMicrosoft 365 admin centerunderCopilot>Settings>Copilot actions>Copilot image generation. Microsoft states that when this scenario is allowed, users can ask Copilot to create, design, and edit images. When it is not allowed, Copilot doesnotgenerate images and instead responds with stock or brand images. This directly matches the requirement to prevent users from generating images by using Copilot.

The other options are incorrect because Microsoft does not document this control as being managed from Defender, Purview, or Entra for this scenario. Microsoft also separately notes that organizations can control access to Designer image generation through policy, but the admin experience for managing the Microsoft 365 Copilot scenario itself is explicitly surfaced in the Microsoft 365 admin center. Therefore, for an exam question focused on where an admin should go to disable image generation in Copilot, the best and documented answer is the Microsoft 365 admin center.

NEW QUESTION 14

What can you use to block a user account automatically when a risky sign-in is detected?

- A. Microsoft Entra ID Protection
- B. Microsoft Defender for Office 365
- C. Microsoft Entra Privileged Identity Management (PIM)
- D. Microsoft Defender for Identity

Answer: A

NEW QUESTION 17

Your organization has a Microsoft 365 subscription.
You need to evaluate your organization's Identity Secure Score.
Which two factors affect the score? Each correct answer presents a complete the solution. NOTE: Each correct selection is worth one point.

- A. the SharePoint site permissions
- B. the number of global administrators
- C. passwords that are never expired
- D. the location of the users

Answer: BC

NEW QUESTION 22

HOTSPOT
You are evaluating Microsoft Purview solutions.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
A Communication Compliance policy can detect inappropriate text in Microsoft Teams messages.	☐	☐
A Communication Compliance policy can detect offensive language in Microsoft 365 Copilot prompts.	☐	☐
A Communication Compliance policy can be used to retain email messages for 10 years.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
A Communication Compliance policy can detect inappropriate text in Microsoft Teams messages.	☒	☐
A Communication Compliance policy can detect offensive language in Microsoft 365 Copilot prompts.	☒	☐
A Communication Compliance policy can be used to retain email messages for 10 years.	☐	☒

NEW QUESTION 27

Your organization has a Microsoft 365 subscription. All users have Microsoft 365 Copilot licenses.
You need to identify where sensitive content is being used during Copilot interactions, analyze the content usage patterns, and provide recommendations on

applying the appropriate protections.
What should you use?

- A. Microsoft Viva Insights
- B. the Microsoft Purview DSPM for AI solution
- C. Microsoft Security Copilot
- D. the Microsoft Purview Insider Risk Management solution

Answer: B

NEW QUESTION 32

Your organization has a Microsoft 365 subscription.
Which two tasks can you perform by using the Exchange admin center? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. Create a mail flow rule.
- B. Add a custom domain.
- C. Assign a Microsoft Exchange license.
- D. Create a shared mailbox.

Answer: AD

NEW QUESTION 36

HOTSPOT
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Administrators can block specific websites from being used by Microsoft 365 Copilot.	☐	☐
Administrators can block Microsoft 365 Copilot from using web search when responding to user prompts.	☐	☐
Administrators can block access to the Researcher agent in Microsoft 365 Copilot, while allowing access to the Analyst agent.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Administrators can block specific websites from being used by Microsoft 365 Copilot.	☐	☒
Administrators can block Microsoft 365 Copilot from using web search when responding to user prompts.	☒	☐
Administrators can block access to the Researcher agent in Microsoft 365 Copilot, while allowing access to the Analyst agent.	☒	☐

NEW QUESTION 40

HOTSPOT
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Zero Trust requires an Azure subscription.	☐	☐
Zero Trust is a security strategy, NOT a specific product.	☐	☐
From the Microsoft 365 admin center, you can enable Zero Trust for your organization.	☐	☐

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Zero Trust requires an Azure subscription.	☐	☒
Zero Trust is a security strategy, NOT a specific product.	☒	☐
From the Microsoft 365 admin center, you can enable Zero Trust for your organization.	☐	☒

NEW QUESTION 42

Which statement accurately describes authorization in Microsoft 365?

- A. a process to validate an identity from an external system
- B. a process to verify whether an identity is who or what they claim to be
- C. a process to verify whether an identity is allowed to access a resource
- D. a process to require additional authentication methods before an identity can access resources

Answer: C

NEW QUESTION 47

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
To use Microsoft 365 Copilot Chat to reason over web data, you need a Microsoft 365 Copilot license.	☐	☐
To use the Researcher agent in Microsoft 365 Copilot, you need a Microsoft 365 Copilot license.	☐	☐
To add an agent in the Microsoft 365 Copilot app, you need a Microsoft 365 Copilot license.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

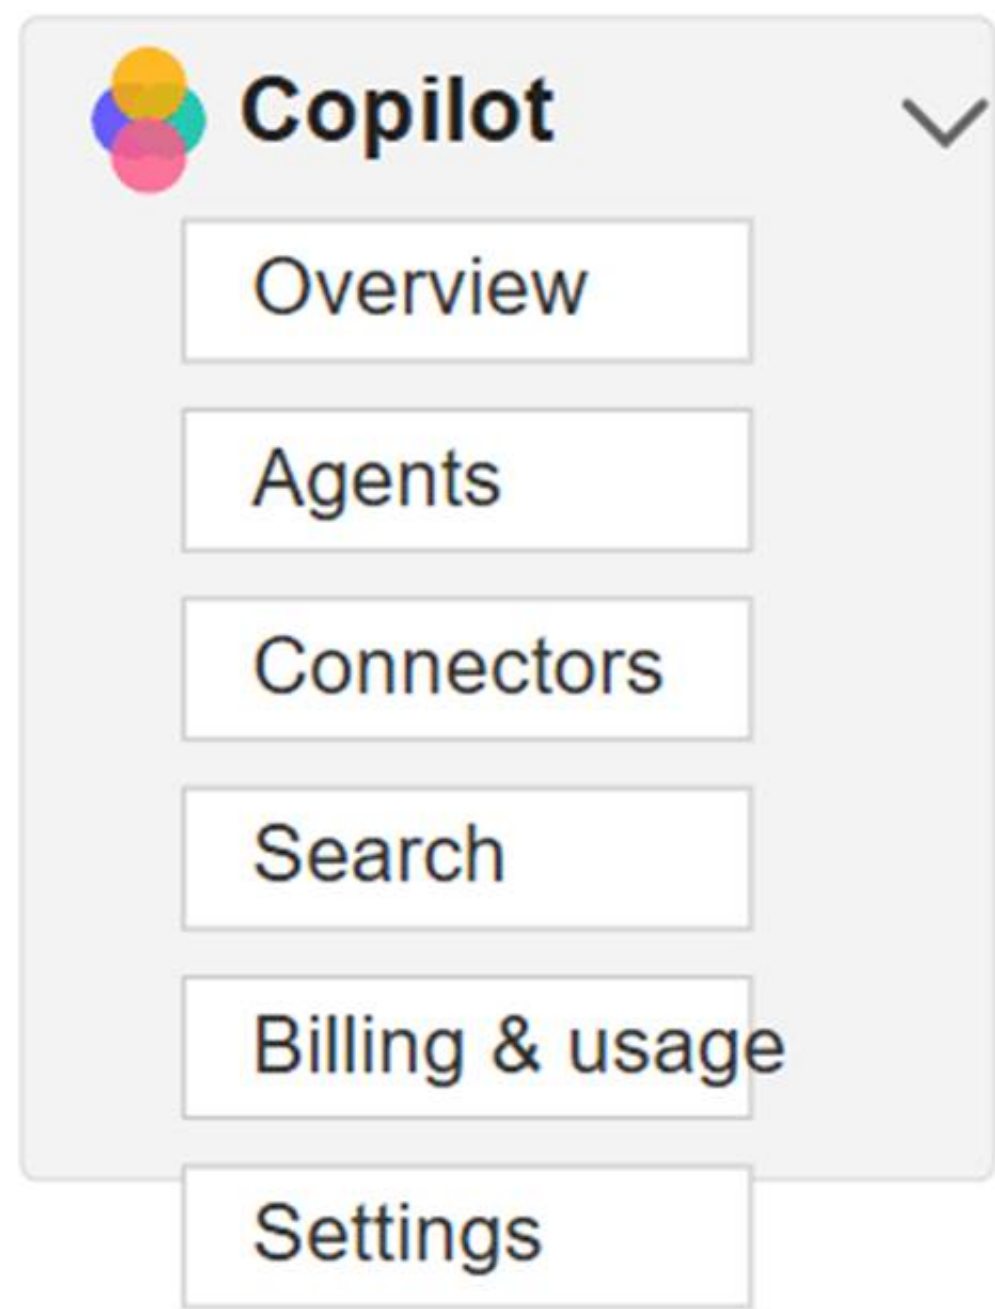

Explanation:

Statements	Yes	No
To use Microsoft 365 Copilot Chat to reason over web data, you need a Microsoft 365 Copilot license.	☐	☒
To use the Researcher agent in Microsoft 365 Copilot, you need a Microsoft 365 Copilot license.	☒	☐
To add an agent in the Microsoft 365 Copilot app, you need a Microsoft 365 Copilot license.	☐	☒

NEW QUESTION 52

HOTSPOT

You need to ensure that users can use an external system as a knowledge source for custom Microsoft 365 Copilot agents. What should you configure in the Microsoft 365 admin center? To answer, select the appropriate settings in the answer area.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

The correct answer is Connectors. Microsoft documents that Microsoft 365 Copilot connectors are used to bring external, line-of-business data into Microsoft 365 Copilot so users can search, reason over, and act on content from non-Microsoft systems. Microsoft also states that admins must enable and configure Copilot connectors in the Microsoft 365 admin center, and once configured, those connectors can be selected as knowledge sources for custom agents. This directly matches the requirement to let users use an external system as a knowledge source for custom Microsoft 365 Copilot agents. This is why the hotspot in the Copilot area should be set to Connectors, not Overview, Agents, Search, Billing & usage, or Settings. Overview provides status information, Agents is for agent management, Search is for Microsoft Search experiences, and Billing & usage is for metering and consumption tracking. The specific admin feature that enables external enterprise data sources for agent grounding is Connectors. Microsoft further explains that configured connectors can expose external knowledge securely and respect source-level permissions when used in agent scenarios.

NEW QUESTION 54

HOTSPOT

Select the answer that correctly completes the sentence.

Answer Area

From the SharePoint admin center, you can create a

server.
user.
site.
role.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

From the SharePoint admin center, you can create a

server.

user.

site.

role.

NEW QUESTION 56

Your organization has a Microsoft 365 subscription that contains Microsoft SharePoint sites and Microsoft Teams teams. You discover that the sites and the teams are shared to users outside your organization. You need to identify which sites and teams were shared to the external users. What should you use?

- A. the SharePoint admin center
- B. the Microsoft Teams admin center
- C. the Microsoft 365 admin center
- D. the Microsoft Defender portal

Answer: A

NEW QUESTION 60

HOTSPOT
Your organization has a Microsoft 365 subscription. A user named John is assigned an admin role as shown in the following exhibit.

Manage admin roles

John selected

Admin roles give users permission to view data and complete tasks in admin centers. Give users only the access they need by assigning the least-permissive role.

[Learn more about admin roles](#)

☐

User (no admin center access)

☒

Admin center access

Global readers have read-only access to admin centers, while Global admins have unlimited access to edit all settings. Users assigned other roles are more limited in what they can see and do.

☒

Global Reader ⓘ

☐

AI Administrator ⓘ

☐

Exchange Administrator ⓘ

☐

Global Administrator ⓘ

☐

Helpdesk Administrator ⓘ

☐

Service Support Administrator ⓘ

☐

SharePoint Administrator ⓘ

☐

User Administrator ⓘ

☐

User Experience Success Manager ⓘ

Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer Area

John can [answer choice].

View all the users in the Microsoft Entra tenant

view all the content in Microsoft SharePoint sites

read all the content in Microsoft Exchange mailboxes

perform eDiscovery of Microsoft 365 Copilot prompts

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

The correct answer isView all the users in the Microsoft Entra tenant. In the exhibit, John is assigned theGlobal Readerrole. Microsoft documents that theGlobal Readerrole is intended for users who need toview administrator features and settings in admin centersthat a Global Administrator can view, but without edit permissions. That makes it appropriate for read-only visibility into tenant-wide directory and admin information, including users in Microsoft Entra. The other answer choices are not supported by the Global Reader role. Microsoft distinguishes admin-center visibility from access tocontentin workloads such asSharePoint sitesandExchange mailboxes. Global Reader is a read-only administrative role, not a content access role for reading all documents or mailbox items. Likewise,performing eDiscovery of Microsoft 365 Copilot promptsrequires Purview eDiscovery permissions or role group membership, not merely the Global Reader role. Microsoft documents eDiscovery permissions separately in Purview role groups. Therefore, based on the assigned role shown, the valid completion is that John canview all the users in the Microsoft Entra tenant.

NEW QUESTION 61

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Users that are assigned a Microsoft 365 E5 license can create Microsoft 365 Copilot agents grounded in the web.	☐	☐
Users must be assigned a Microsoft 365 Copilot license to use the Analyst agent.	☐	☐
Users can use a natural language prompt to create a Microsoft 365 Copilot agent.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Users that are assigned a Microsoft 365 E5 license can create Microsoft 365 Copilot agents grounded in the web.	☐	☒
Users must be assigned a Microsoft 365 Copilot license to use the Analyst agent.	☒	☐
Users can use a natural language prompt to create a Microsoft 365 Copilot agent.	☒	☐

NEW QUESTION 64

Your company has a Microsoft SharePoint site named Site1. Site1 contains all the policies of the company s HR department. The policies are saved as Microsoft Word documents. All users have read access to Site1. The HR department manager reports that user requests about the policies are NOT being addressed in a timely manner, especially around major holidays. You need to recommend a solution to enable the users to find the HR department policies. The solution must provide the users with a list of common queries and ensure that responses are grounded only in Site1. What should you include in the recommendation?

- A. the personal assistant in Copilot in Word
- B. a Microsoft 365 Copilot notebook
- C. a custom Microsoft 365 Copilot agent
- D. the Researcher agent in Microsoft 365 Copilot

Answer: C

NEW QUESTION 69

Your organization has a Microsoft 365 subscription.
You need to evaluate your organization s Identity Secure Score.
Which two factors affect the score? Each correct answer presents a complete the solution. NOTE: Each correct selection is worth one point.

- A. the number of global administrators
- B. the SharePoint site permissions
- C. the location of the users
- D. passwords that are never expired

Answer: AD

NEW QUESTION 72

HOTSPOT
Your organization has a Microsoft 365 subscription that contains a Microsoft SharePoint site named Site1. The permissions for Site1 are configured as shown in the exhibit.
You create a new user named User1 in the subscription.
