

Microsoft

Exam Questions AB-731

AI Transformation Leader (beta)

NEW QUESTION 1

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft 365 Copilot enables users to search across emails, files, chats, meetings, and connected apps, by using natural language queries.	☐	☐
Microsoft 365 Copilot provides data protection, and helps ensure that user prompts and chat data are secure.	☐	☐
Microsoft 365 Copilot is included in all Microsoft 365 subscriptions.	☐	☐

- A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft 365 Copilot enables users to search across emails, files, chats, meetings, and connected apps, by using natural language queries.	☒	☐
Microsoft 365 Copilot provides data protection, and helps ensure that user prompts and chat data are secure.	☒	☐
Microsoft 365 Copilot is included in all Microsoft 365 subscriptions.	☐	☒

NEW QUESTION 2

You have a historical dataset that contains 1,000 records. You need an AI solution that can analyze the data to identify patterns and predict future outcomes. What should you include in the solution?

- A. Microsoft Foundry
B. Azure Document Intelligence in Foundry Tools
C. Azure Machine Learning
D. Azure Content Understanding in Foundry Tools

Answer: C

NEW QUESTION 3

You plan to meet with stakeholders to discuss how generative AI can benefit your company. You need to provide a relevant description of generative AI. Which description should you use?

- A. Generative AI is designed to generate responses based on a user's natural language prompts.
B. Generative AI is designed to translate documents into other languages.
C. Generative AI is designed to predict future trends based on historical data.
D. Generative AI is designed to recommend products based on user behavior.

Answer: A

NEW QUESTION 4

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Prompt engineering changes how a generative AI model was trained.	☐	☐
Prompt engineering focuses on designing clear, concise, and context-rich instructions.	☐	☐
Effective prompt engineering involves maximizing the number of tokens used in each request.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area	
Statements	
Prompt engineering changes how a generative AI model was trained.	Yes No
Prompt engineering focuses on designing clear, concise, and context-rich instructions.	
Effective prompt engineering involves maximizing the number of tokens used in each request.	

NEW QUESTION 5

You plan to meet with a group of stakeholders to discuss how generative AI can benefit your company. You need to provide the stakeholders with a relevant description of generative AI during the meeting. Which description should you use?

- A. Generative AI is designed to translate documents into other languages.
- B. Generative AI is designed to predict future trends based on historical data.
- C. Generative AI is designed to generate responses based on a user's natural language prompts.
- D. Generative AI is designed to recommend products based on user behavior.

Answer: C

Explanation:

Generative AI's defining characteristic is that it creates new content (text, images, code, summaries, drafts) in response to instructions—most commonly natural language prompts. Option C captures that general-purpose description in a stakeholder-friendly way: users provide prompts and the system generates responses or content. This framing is broad enough to cover common business value scenarios such as summarizing documents, drafting communications, creating marketing copy, generating reports, building assistants, and producing structured outputs from unstructured requests. Option A is a single use case (translation), not the defining description. Option B describes predictive analytics/forecasting, which is a different AI category focused on outcomes and probabilities rather than content creation. Option D describes recommendation systems, typically driven by ranking/behavioral signals; while AI can enhance recommendations, that is not the core definition of generative AI. Therefore, the most accurate and relevant description for stakeholders is C.

NEW QUESTION 6

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area	
Statements	
A manufacturer can use Azure Vision in Foundry Tools to identify product defects on an assembly line.	Yes No
A logistics company can use Azure Vision in Foundry Tools to recognize package shipping labels.	
The HR department at your company can only use Azure Vision in Foundry Tools to extract written content from Microsoft Word files.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area	
Statements	
A manufacturer can use Azure Vision in Foundry Tools to identify product defects on an assembly line.	Yes No
A logistics company can use Azure Vision in Foundry Tools to recognize package shipping labels.	
The HR department at your company can only use Azure Vision in Foundry Tools to extract written content from Microsoft Word files.	

NEW QUESTION 7

Your company creates a custom Azure Machine Learning model that uses a generative AI assistant. The model initially delivers strong results. However, six months later, the model predictions become noticeably less accurate. What is a possible cause of the issue?

- A. The input data changed over time.
- B. The model requires additional compute resources.
- C. The model was trained incorrectly.

Answer: A

NEW QUESTION 8

Your company uses a generative AI solution. You need to improve the quality of responses by using grounding. Which statement accurately describes how grounding improves accuracy and relevancy?

- A. references a diverse set of people, disciplines, and perspectives
- B. explains how and why AI models generate content
- C. anchors the responses in specific data sources
- D. specifies the strengths and weaknesses of the AI model

Answer: C

NEW QUESTION 9

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statements	Yes	No
Azure Vision in Foundry Tools can extract and analyze key phrases from PDF files.	☐	☐
Azure Vision in Foundry Tools can generate images based on natural language descriptions.	☐	☐
Azure Document Intelligence in Foundry Tools can be used to automate the processing of invoices and credit notes.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Azure Vision in Foundry Tools can extract and analyze key phrases from PDF files. Answer: No

Azure Vision in Foundry Tools can generate images based on natural language descriptions. Answer: No

Azure Document Intelligence in Foundry Tools can be used to automate the processing of invoices and credit notes. Answer: Yes

No— Azure Vision in Foundry Tools focuses oncomputer visiontasks such as image analysis and OCR (reading text from images and documents). While it can extract text from scanned PDFs via OCR,key phrase extractionis a natural language processing capability provided byAzure Language in Foundry Tools, not Azure Vision. Key phrase extraction analyzestextto identify main concepts, which is a different service family than vision.

No— Azure Vision cananalyzeexisting images (for example, generate captions/descriptions of an image), butgenerating new images from a text promptis a generative model capability (for example, DALL·E through Azure OpenAI/Azure AI Foundry model endpoints), not an Azure Vision feature. Vision describes what it ??sees??. it doesn??t synthesizenew images from natural language.

Yes— Azure Document Intelligence in Foundry Tools is designed forintelligent document processing, including automating extraction of structured fields from financial documents. Microsoft provides prebuilt models for invoices and supports custom extraction for similar document types, which makes it suitable for automating workflows involving invoices and credit-note style documents (field extraction, validation, routing).

NEW QUESTION 10

You are exploring how Microsoft 365 Copilot uses Microsoft Graph to deliver AI-powered experiences. Which information in Microsoft Graph can Copilot use by default?

- A. emails, files, meetings, and chats in Microsoft 365
- B. data stored in a file share
- C. social media activity
- D. content from public websites

Answer: A

NEW QUESTION 10

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
To use Microsoft 365 Copilot Chat, you must have a Microsoft 365 Copilot license.	☐	☐
Microsoft 365 Copilot Chat provides context-aware assistance in Microsoft 365 apps.	☐	☐
Microsoft 365 Copilot Chat can only access information in open files and read emails.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
To use Microsoft 365 Copilot Chat, you must have a Microsoft 365 Copilot license.	☐	☒
Microsoft 365 Copilot Chat provides context-aware assistance in Microsoft 365 apps.	☒	☐
Microsoft 365 Copilot Chat can only access information in open files and read emails.	☐	☒

NEW QUESTION 12

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Using incomplete or poor-quality data during generative AI model training can increase costs.	☐	☐
AI models rely on training data to learn patterns and identify relationships to produce outputs.	☐	☐
Generative AI models trained on non-representative datasets can produce inaccurate or unbalanced results.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Using incomplete or poor-quality data during generative AI model training can increase costs.	☒	☐
AI models rely on training data to learn patterns and identify relationships to produce outputs.	☒	☐
Generative AI models trained on non-representative datasets can produce inaccurate or unbalanced results.	☒	☐

NEW QUESTION 14

In which scenario is Azure Machine Learning most likely to deliver strategic value for an organization?

- A. Using historical sales data to forecast demand across product categories.
- B. Digitizing a paper-based process to reduce errors.
- C. Entering customer feedback into a spreadsheet to understand sentiment.
- D. Sending personalized emails to customers based on the customer location.

Answer: A

NEW QUESTION 19

Your company plans to use an AI-powered solution to analyze customer feedback for insights related to future product designs. You need to mitigate the privacy risks associated with the solution. What is the best approach to achieve the goal? Select the BEST answer.

- A. Anonymize the source data to remove customer Personally Identifiable Information (PII) from the feedback.
- B. Delete all the feedback data immediately after analysis.
- C. Ensure that feedback is attributable to the customer so that it can be deleted upon request.
- D. Limit privacy reviews to the final stage of the AI project lifecycle.

Answer: A

NEW QUESTION 20

HOTSPOT

- Select the answer that correctly completes the sentence.
Using high-quality grounding data in a generative AI solution .

Answer Area

Using high-quality grounding data in a generative AI solution

- ensures that all responses are factually accurate.
- increases performance of an AI model.
- improves the accuracy and reliability of the predictions and outputs of AI.
- increases the amount of storage required to host an AI model.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Using high-quality grounding data in a generative AI solution

- ensures that all responses are factually accurate.
- increases performance of an AI model.
- improves the accuracy and reliability of the predictions and outputs of AI.
- increases the amount of storage required to host an AI model.

NEW QUESTION 25

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft 365 Copilot can amplify existing data governance challenges.	☐	☐
Implementing Microsoft 365 Copilot reduces data management costs.	☐	☐
Microsoft 365 Copilot can help IT teams manage data risks.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
Microsoft 365 Copilot can amplify existing data governance challenges.	☒	☐
Implementing Microsoft 365 Copilot reduces data management costs.	☐	☒
Microsoft 365 Copilot can help IT teams manage data risks.	☒	☐

NEW QUESTION 30

Your company purchases Microsoft 365 Copilot for its sales department. The sales department needs to find and summarize information across internal documents quickly. From which two data sources can the sales department obtain results by default? (Select TWO.)

- A. an on-premises file share
- B. a custom customer relationship management (CRM) system
- C. Microsoft SharePoint
- D. Microsoft OneDrive
- E. Microsoft Sway

Answer: CD

Explanation:

By default, Microsoft 365 Copilot is grounded in your organization's Microsoft 365 data through Microsoft Graph, and it respects the user's existing permissions. For "find and summarize information across internal documents," the most direct default document repositories in Microsoft 365 are SharePoint (team sites and shared libraries) and OneDrive (a user's work files). That is why C (Microsoft SharePoint) and D (Microsoft OneDrive) are the correct selections. Microsoft explicitly describes Copilot as accessing organizational content via Microsoft Graph, including user documents and related work content. The other options are not "by default" sources. A (on-premises file share) is not automatically part of Microsoft Graph unless you integrate/migrate content or use connectors to make it discoverable in Microsoft 365 experiences. B (custom CRM) similarly requires an integration approach (for example, Microsoft 365 Copilot connectors / Graph connectors) to index and expose that data for Copilot to use. E (Microsoft Sway) is not a primary default content source for Copilot's document grounding and is not typically referenced as a core internal document repository compared to SharePoint/OneDrive. So, for immediate, out-of-the-box internal document discovery and summarization within Microsoft 365, SharePoint + OneDrive are the default answer.

NEW QUESTION 35

Your company is deploying Microsoft 365 Copilot. The deployment must provide users with access to the Researcher agent to search across data in Microsoft SharePoint. You need to recommend a licensing plan for the solution. What should you recommend?

- A. pay-as-you-go
- B. a Microsoft 365 subscription entitlement
- C. a Microsoft 365 Copilot per-user add-on license
- D. a usage-based consumption license in Azure

Answer: C

NEW QUESTION 39

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
A generative AI model guarantees factually accurate responses if the model is trained on a large dataset.	☐	☐
Content filtering and responsible AI safeguards help a generative AI model generate safe and inoffensive content.	☐	☐
A generative AI model always produces fair and unbiased results when the training data has been properly prepared and reviewed for fairness.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
A generative AI model guarantees factually accurate responses if the model is trained on a large dataset.	☐	☒
Content filtering and responsible AI safeguards help a generative AI model generate safe and inoffensive content.	☒	☐
A generative AI model always produces fair and unbiased results when the training data has been properly prepared and reviewed for fairness.	☐	☒

NEW QUESTION 42

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Retrieval Augmented Generation (RAG) requires model fine-tuning.	☐	☐
Retrieval Augmented Generation (RAG) is helpful when you need a generative AI solution that can access current, verifiable information.	☐	☐
Retrieval Augmented Generation (RAG) enables you to get more relevant responses based on your organization's documents without retraining the base model.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Retrieval Augmented Generation (RAG) requires model fine-tuning.	☐	☒
Retrieval Augmented Generation (RAG) is helpful when you need a generative AI solution that can access current, verifiable information.	☒	☐
Retrieval Augmented Generation (RAG) enables you to get more relevant responses based on your organization's documents without retraining the base model.	☒	☐

NEW QUESTION 43

HOTSPOT

HOTSPOT - For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Larger datasets can increase the cost of a generative AI solution that uses an Azure Machine Learning workspace.	☐	☐
The cost of consuming Azure OpenAI models is primarily identified by the number of input and output tokens processed.	☐	☐
The cost of custom generative AI solutions always remains the same regardless of the model version or capability used.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Larger datasets can increase the cost of a generative AI solution that uses an Azure Machine Learning workspace.	☒	☐
The cost of consuming Azure OpenAI models is primarily identified by the number of input and output tokens processed.	☒	☐
The cost of custom generative AI solutions always remains the same regardless of the model version or capability used.	☐	☒

NEW QUESTION 48

.....

Thank You for Trying Our Product

We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions

2nd - Questions and Answers in PDF Format

AB-731 Practice Exam Features:

- * AB-731 Questions and Answers Updated Frequently
- * AB-731 Practice Questions Verified by Expert Senior Certified Staff
- * AB-731 Most Realistic Questions that Guarantee you a Pass on Your FirstTry
- * AB-731 Practice Test Questions in Multiple Choice Formats and Updatesfor 1 Year

100% Actual & Verified — Instant Download, Please Click
