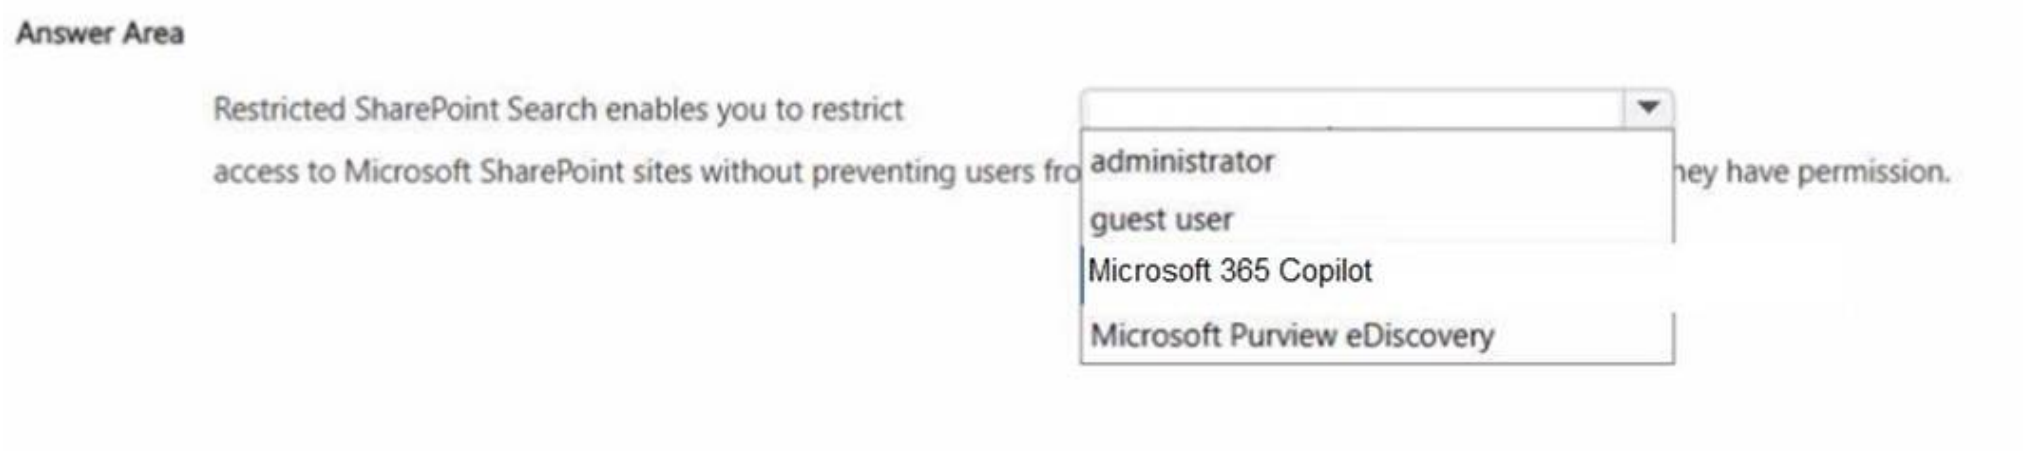
Exam Questions AB-900

Microsoft 365 Copilot and Agent Administration Fundamentals (beta)

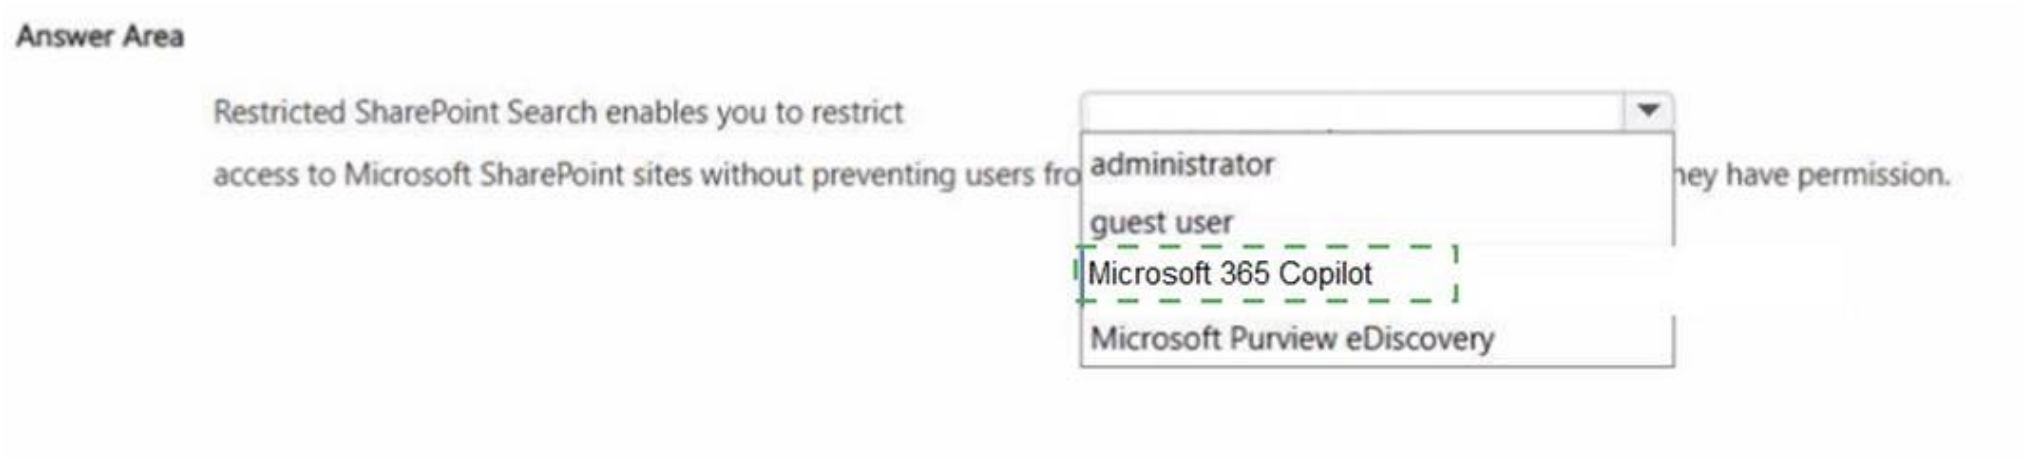
NEW QUESTION 1
HOTSPOT
Select the answer that correctly completes the sentence.



A. Mastered
B. Not Mastered

Answer: A

Explanation:



NEW QUESTION 2
You need to identify files and emails that contain social security numbers (SSNs) and credit card numbers. What should you use in the Microsoft Purview portal?

A. Information Protection reports
B. Data explorer
C. Information Protection policies
D. Activity explorer

Answer: B

Explanation:
The correct answer is B. Data explorer. Microsoft Learn states that Data explorer in Microsoft Purview shows a current snapshot of items that have been classified as a sensitive information type in your organization. Microsoft??s sensitive information type documentation specifically lists examples such as social security numbers and credit card numbers, which means Data explorer is the appropriate portal feature for identifying files and emails that contain those data types. Data explorer is designed to help administrators see where sensitive data exists across supported Microsoft 365 locations.
The other options are less appropriate for this task. Information Protection reports focus more broadly on label and protection reporting. Information Protection policies are for configuring classification and protection behavior, not for finding existing files and emails containing SSNs or credit card numbers. Activity explorer is primarily used to review user and policy-related activities, such as label changes or DLP events, rather than to provide the direct sensitive-data inventory view requested here. Since the question asks to identify the files and emails containing specific sensitive information types, Microsoft??s documented answer is Data explorer.

NEW QUESTION 3
FILL IN THE BLANK
Select the answer that correctly completes the sentence.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
eDiscovery

NEW QUESTION 4
HOTSPOT
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE Each correct selection is worth one point

Answer Area

Statements	Yes	No
A site member of a Microsoft SharePoint site can invite users to access the content in the site.	○	○
A site owner of a Microsoft SharePoint site can add Microsoft 365 groups as site members.	○	○
A site owner of a Microsoft SharePoint site can remove another site owner from the site.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Answer Area

Statements	Yes	No
A site member of a Microsoft SharePoint site can invite users to access the content in the site.	○	○
A site owner of a Microsoft SharePoint site can add Microsoft 365 groups as site members.	○	○
A site owner of a Microsoft SharePoint site can remove another site owner from the site.	○	○

NEW QUESTION 5
Your company has a written compliance policy that requires all emails be retained for seven years, and then permanently deleted. Which Microsoft Purview solution should you use?

A. Information Protection
B. Insider Risk Management
C. Data Loss Prevention
D. Data Lifecycle Management

Answer: D

Explanation:
The correct answer isD. Data Lifecycle Management. Microsoft Learn states that Microsoft Purview retention policies and retention labels, managed underData Lifecycle Management, support three core outcomes:retain-only,delete-only, andretain and then delete. The requirement in this question is exact: keep email forseven yearsand thenpermanently deleteit. That is a textbookretain and then deleteretention configuration, which Microsoft documents as part of Purview??s retention capabilities. Microsoft also recommends using Microsoft 365 retention policies and labels for retaining and deleting emails rather than relying on older Exchange-only approaches in most modern compliance scenarios.
The other options do not meet the requirement.Information Protectionfocuses on labeling and protecting sensitive information.Insider Risk Managementis used to detect and investigate risky user behavior.Data Loss Preventionhelps prevent inappropriate sharing or exfiltration of sensitive data. None of those are designed to enforce a timed seven-year retention period followed by automatic permanent deletion. The Microsoft Purview solution explicitly built for that lifecycle requirement isData Lifecycle Management.

NEW QUESTION 6
Your organization has a Microsoft 365 E5 subscription.
You need to ensure that a third-party cloud service can authenticate to Microsoft Entra. What should you configure?

A. a Microsoft 365 Copilot connector
B. multifactor authentication (MFA)

C. a Conditional Access policy
D. an app registration

Answer: D

NEW QUESTION 7
Your organization has a Microsoft 365 E5 subscription. You create a Microsoft Purview sensitivity label named Label1. You need to ensure that users can apply Label1 to files in Microsoft 365. What should you use?

A. an auto-labeling policy
B. a trainable classifier
C. a retention label policy
D. a sensitivity label policy

Answer: D

Explanation:
The correct answer isD. a sensitivity label policy. In Microsoft Purview, creating a sensitivity label by itself doesnotmake it available to users. Microsoft Learn states that after you create sensitivity labels, you mustpublishthem by creating alabel policyso that users and groups can see and apply those labels in Microsoft 365 apps and services. Publishing controls which labels are available and to whom they are shown. This is why asensitivity label policyis required to ensure that users can applyLabel1to files.
The other options do not meet the requirement.Auto-labeling policiesapply labels automatically when content matches conditions, but they are not the primary mechanism for simply making a label available for user selection. Atrainable classifieris used to identify content categories, not to publish a label. Aretention label policypublishes retention labels for records and lifecycle purposes, which is different from sensitivity labeling for classification and protection. Therefore, the correct Microsoft-documented method to let users apply Label1 to files is to publish it using asensitivity label policy.

NEW QUESTION 8
HOTSPOT
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Zero Trust requires an Azure subscription.	○	○
Zero Trust is a security strategy, NOT a specific product.	○	○
From the Microsoft 365 admin center, you can enable Zero Trust for your organization.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Zero Trust requires an Azure subscription.	○	○
Zero Trust is a security strategy, NOT a specific product.	○	○
From the Microsoft 365 admin center, you can enable Zero Trust for your organization.	○	○

NEW QUESTION 9
Your organization has a Microsoft 365 subscription.
You create a security group named Group1 and assign a Microsoft 365 E3 license to the group.
You discover that a user named User1 does NOT have access to the Microsoft 365 E3 features.
You need to ensure that User1 can access all the Microsoft 365 E3 features.
Which two actions can you perform? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

A. Add User1 to Group1.
B. Assign a Conditional Access policy to Group1.
C. Assign a Conditional Access policy to User1.
D. Assign a license to User1.

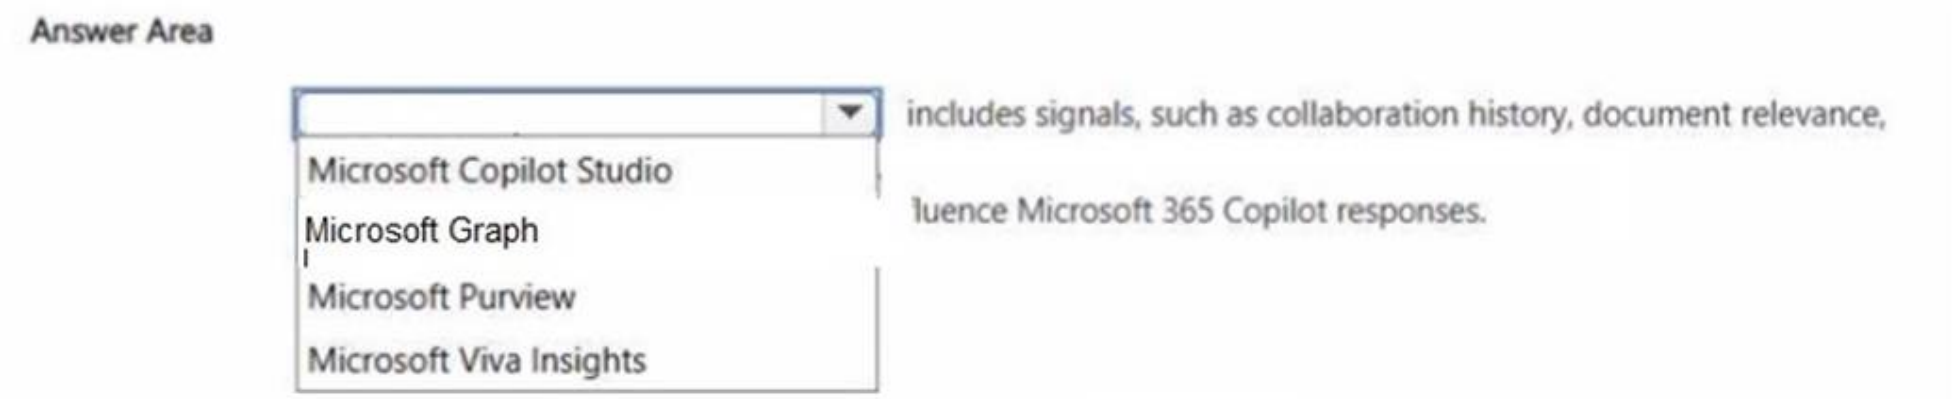
Answer: AD

NEW QUESTION 10
A user named User1 is responsible for quarterly sales reporting.
User1 needs to identify performance trends, generate visual insights, and create a summary of anomalies across multiple files that contain various datasets.
What should you use

A. the Researcher agent in Microsoft 365 Copilot
B. Microsoft 365 Copilot Search
C. Copilot in Excel
D. the Analyst agent in Microsoft 365 Copilot

Answer: D

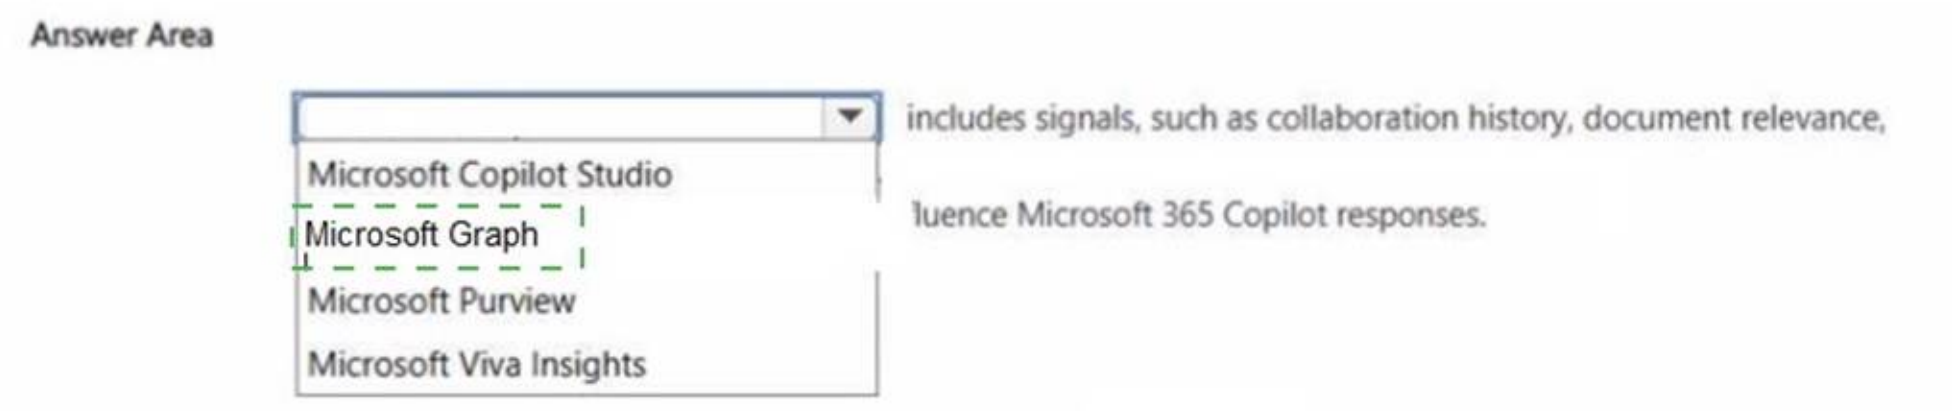
NEW QUESTION 10
HOTSPOT
Select the answer that correctly completes the sentence.



A. Mastered
B. Not Mastered

Answer: A

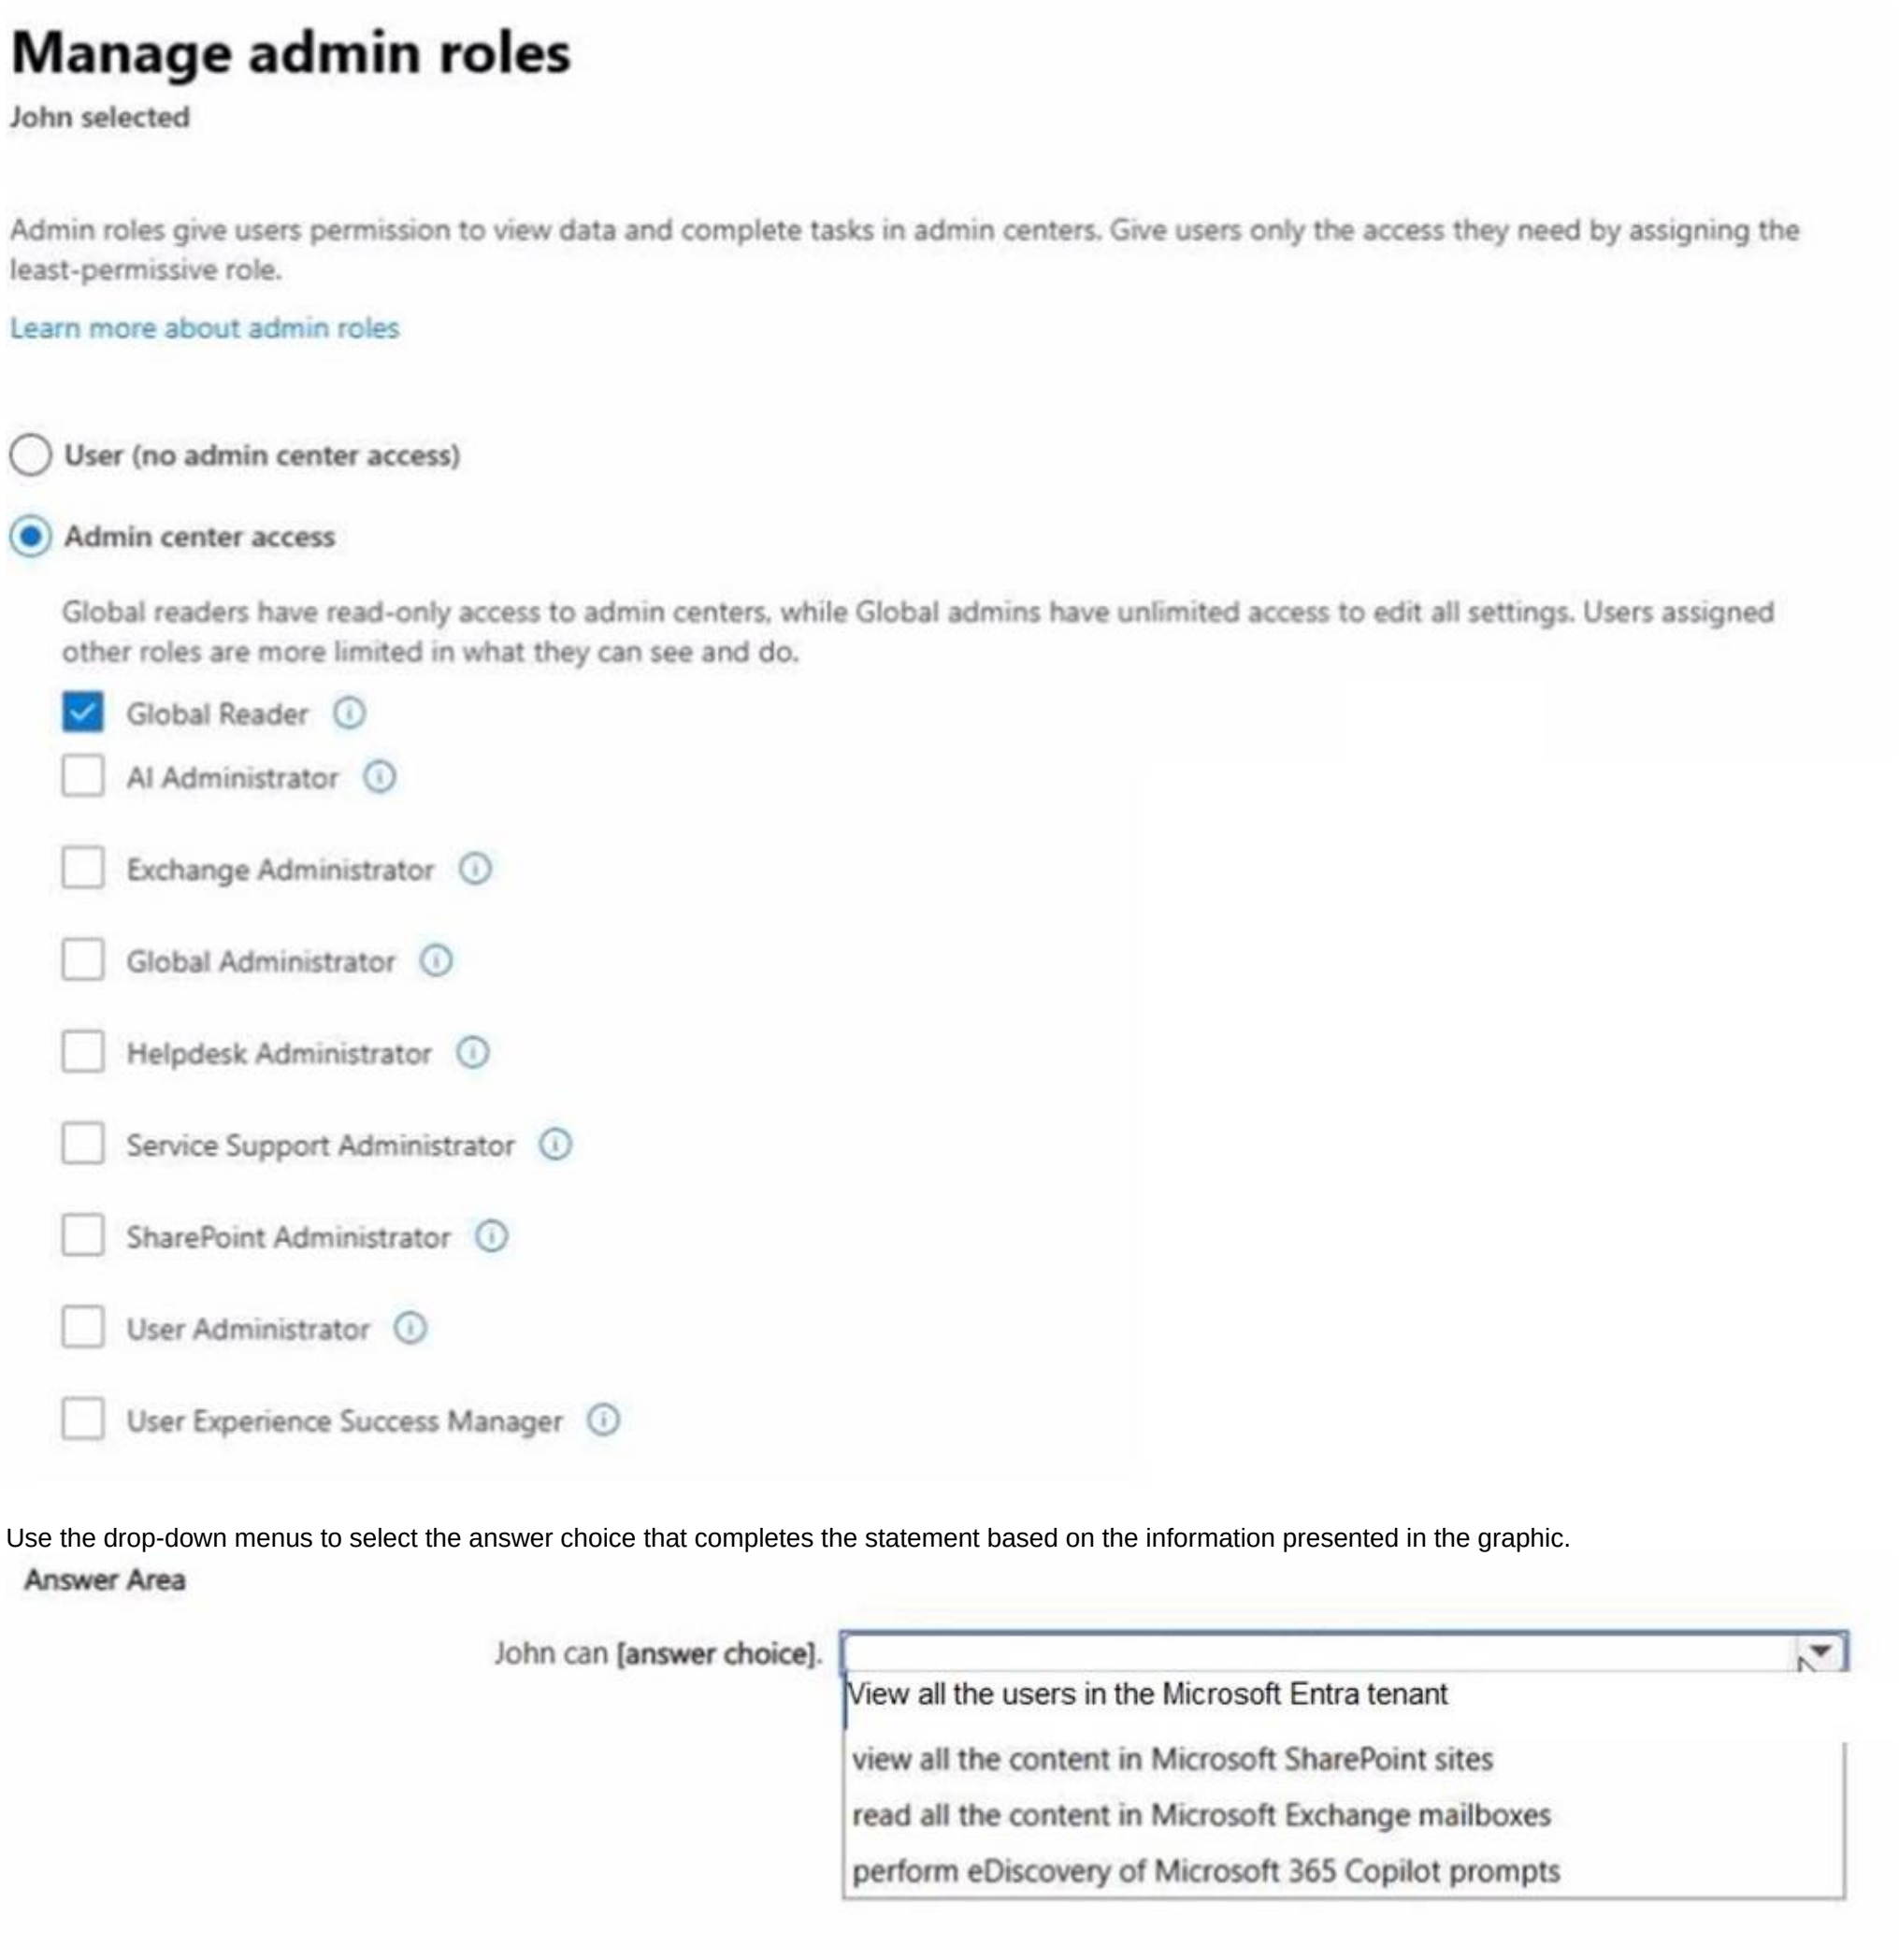
Explanation:



NEW QUESTION 15
Your organization has a Microsoft 365 subscription.
You need to review the impact of a recent phishing incident that targeted email users. What should you use?
A. the Microsoft Defender portal
B. the Microsoft 365 admin center
C. the Microsoft Entra admin center
D. the Microsoft Exchange admin center

Answer: A

NEW QUESTION 16
HOTSPOT
Your organization has a Microsoft 365 subscription.
A user named John is assigned an admin role as shown in the following exhibit.



Use the drop-down menus to select the answer choice that completes the statement based on the information presented in the graphic.

Answer Area

John can **[answer choice]**.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
The correct answer isView all the users in the Microsoft Entra tenant. In the exhibit, John is assigned theGlobal Readerrole. Microsoft documents that theGlobal Readerrole is intended for users who need toview administrator features and settings in admin centersthat a Global Administrator can view, but without edit permissions. That makes it appropriate for read-only visibility into tenant-wide directory and admin information, including users in Microsoft Entra.
The other answer choices are not supported by the Global Reader role. Microsoft distinguishes admin-center visibility from access tocontentin workloads such asSharePoint sitesandExchange mailboxes. Global Reader is a read-only administrative role, not a content access role for reading all documents or mailbox items. Likewise,performing eDiscovery of Microsoft 365 Copilot promptsrequires Purview eDiscovery permissions or role group membership, not merely the Global Reader role. Microsoft documents eDiscovery permissions separately in Purview role groups.
Therefore, based on the assigned role shown, the valid completion is that John canview all the users in the Microsoft Entra tenant.

NEW QUESTION 19
HOTSPOT
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

Answer Area

Statements	Yes	No
Microsoft Purview Communications Compliance can detect offensive text in images stored in Microsoft SharePoint sites.	○	○
Microsoft Purview Communications Compliance anonymizes user identities by default during investigations.	○	○
Microsoft Purview Communications Compliance adds a disclaimer to all monitored communications.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft Purview Communications Compliance can detect offensive text in images stored in Microsoft SharePoint sites.	○	○
Microsoft Purview Communications Compliance anonymizes user identities by default during investigations.	○	○
Microsoft Purview Communications Compliance adds a disclaimer to all monitored communications.	○	○

NEW QUESTION 22
Your organization has a Microsoft 365 subscription. You need to assign a license to a user.
What should you use?

A. the Microsoft Purview portal
B. the Microsoft 365 admin center
C. the Microsoft Teams admin center

Answer: B

NEW QUESTION 27
You use Microsoft 365 Copilot.
What does Copilot use to generate responses based on corporate data stored in Microsoft SharePoint?

A. Microsoft Intune
B. Microsoft Defender
C. Microsoft Graph
D. Microsoft Purview

Answer: C

NEW QUESTION 28
HOTSPOT
Select the answer that correctly completes the sentence.

The Microsoft responsible AI principle of [▼]
- accountability
- inclusiveness
- privacy and security
- reliability and safety
- transparency

requires the oversight of AI systems to ensure that humans remain in control.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

The Microsoft responsible AI principle of [accountability ▾] requires the oversight of AI systems to ensure that humans remain in control.

- accountability
- inclusiveness
- privacy and security
- reliability and safety
- transparency
