

Exam Questions AB-731

AI Transformation Leader (beta)

<https://www.2passeasy.com/dumps/AB-731/>

NEW QUESTION 1

Your company plans to adopt AI across multiple business units. You need to ensure that all AI projects align with the company's business strategy and are implemented responsibly. What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Allow each department to deploy its own AI tools and workflows.
- B. Delegate AI decision-making to the company's IT department.
- C. Outsource AI development to an external vendor.
- D. Establish an AI council to provide guidance, oversight, and coordination.

Answer: D

NEW QUESTION 2

You plan to meet with stakeholders to discuss how generative AI can benefit your company. You need to provide a relevant description of generative AI. Which description should you use?

- A. Generative AI is designed to generate responses based on a user's natural language prompts.
- B. Generative AI is designed to translate documents into other languages.
- C. Generative AI is designed to predict future trends based on historical data.
- D. Generative AI is designed to recommend products based on user behavior.

Answer: A

NEW QUESTION 3

Your company sells hiking and camping gear online. You need a generative AI solution that can interact with customers and ask questions about their needs. What should you include in the solution?

- A. a chatbot
- B. predictive AI
- C. computer vision
- D. a recommendation engine

Answer: A

NEW QUESTION 4

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
A manufacturer can use Azure Vision in Foundry Tools to identify product defects on an assembly line.	☐	☐
A logistics company can use Azure Vision in Foundry Tools to recognize package shipping labels.	☐	☐
The HR department at your company can only use Azure Vision in Foundry Tools to extract written content from Microsoft Word files.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
A manufacturer can use Azure Vision in Foundry Tools to identify product defects on an assembly line.	☒	☐
A logistics company can use Azure Vision in Foundry Tools to recognize package shipping labels.	☒	☐
The HR department at your company can only use Azure Vision in Foundry Tools to extract written content from Microsoft Word files.	☐	☒

NEW QUESTION 5

HOTSPOT

- Select the answer that correctly completes the sentence.

The cost of using generative AI language models is based typically on the number of _____ processed.

The cost of using generative AI language models is based typically on the number of

▼

documents

requests

tokens

words

processed.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

The cost of using generative AI language models is based typically on the number of

▼

documents

requests

tokens

words

processed.

NEW QUESTION 6

Your company uses a fine-tuned generative AI solution trained on data that is representative of the general population. You discover that some of the generated responses include inappropriate or exclusionary language based on ableist assumptions. You need to prevent the inappropriate responses. Your solution must minimize costs. What should you do?

- A. Apply a newer version of the generative AI model.
- B. Apply a content-moderation filter.
- C. Create a new version of the solution that is trained on only inclusive and representative content.
- D. Create a new version of the solution that is trained on only exclusionary content.

Answer: B

NEW QUESTION 7

Your company creates a custom Azure Machine Learning model that uses a generative AI assistant. The model initially delivers strong results. However, six months later, the model predictions become noticeably less accurate. What is a possible cause of the issue?

- A. The input data changed over time.
- B. The model requires additional compute resources.
- C. The model was trained incorrectly.

Answer: A

NEW QUESTION 8

Your company is preparing to adopt Microsoft 365 Copilot and wants to follow Microsoft responsible AI principles. As a business leader, you propose establishing an AI governance council to ensure alignment with the responsible AI principles. What is the primary purpose of the council? More than one answer choice may achieve the goal. Select the BEST answer.

- A. to monitor user behavior and enforce compliance with internal IT policies
- B. to train employees on how to use Copilot features effectively
- C. to oversee implementation, manage technical performance, and ensure successful AI deployment
- D. to guide strategy, provide oversight, and ensure cross-functional alignment for responsible AI adoption

Answer: D

Explanation:

An AI governance council (often called an "AI Council") exists primarily to set direction and provide cross-functional oversight so AI adoption stays aligned to the organization's values, risk posture, and Responsible AI commitments. That maps most directly to D. Microsoft's guidance on creating an AI Council describes leadership responsibilities such as defining and communicating the organization's AI vision, values, and policies, reviewing and approving AI use cases/projects, and coordinating with enablement and technical readiness teams to understand risks, issues, and opportunities. It also emphasizes representation across distinct functions (for example: senior leadership, legal, compliance, risk, ethics, data, technology, business, HR) to ensure governance decisions reflect a broad, accountable perspective.

The other options describe activities that may be supporting outcomes of governance, but they are not the council's primary purpose. A is narrow (IT policy enforcement/user monitoring) and is typically handled by security/compliance operations rather than the top-level governance body. B is user enablement/training (commonly owned by adoption/change management teams). C focuses on technical delivery and performance management (often owned by engineering/MLOps/service owners). The governance council's central value is strategic guidance + oversight + cross-functional alignment to ensure Responsible AI adoption is consistent, accountable, and sustainable across the business.

NEW QUESTION 9

DRAG DROP

DRAG DROP - Match the Microsoft responsible AI principles to the appropriate descriptions. NOTE: Each correct match is worth one point.

AI principles

Fairness

Reliability and safety

Privacy and security

Inclusiveness

Transparency

Accountability

Answer Area

AI Principle

Protect personal information and apply strong safeguards to keep data secure.

AI Principle

Make AI solutions understandable by explaining how and why decisions are made.

AI Principle

Design AI solutions that are accessible to people of all abilities and experiences.

AI Principle

Involve human oversight in the control of AI solutions.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

AI principles

Fairness

Reliability and safety

Privacy and security

Inclusiveness

Transparency

Accountability

Answer Area

Privacy and security

Protect personal information and apply strong safeguards to keep data secure.

Transparency

Make AI solutions understandable by explaining how and why decisions are made.

Inclusiveness

Design AI solutions that are accessible to people of all abilities and experiences.

Accountability

Involve human oversight in the control of AI solutions.

NEW QUESTION 10

Your company plans to build a generative AI solution based on internal data. You recommend using Microsoft Foundry as a starting point to develop and manage the solution. What is a key benefit of using Microsoft Foundry for this project?

- A. Provides a scalable platform for developing and deploying generative AI solutions.
- B. Removes the need to select or configure the underlying AI model.
- C. Enables business users to build generative AI solutions.
- D. Offers a low-code platform for developing generative AI solutions.

Answer: A

NEW QUESTION 10

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Azure Vision in Foundry Tools can extract and analyze key phrases from PDF files.	☐	☐
Azure Vision in Foundry Tools can generate images based on natural language descriptions.	☐	☐
Azure Document Intelligence in Foundry Tools can be used to automate the processing of invoices and credit notes.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Azure Vision in Foundry Tools can extract and analyze key phrases from PDF files. Answer: No

Azure Vision in Foundry Tools can generate images based on natural language descriptions. Answer: No

Azure Document Intelligence in Foundry Tools can be used to automate the processing of invoices and credit notes. Answer: Yes

No— Azure Vision in Foundry Tools focuses on computer vision tasks such as image analysis and OCR (reading text from images and documents). While it can extract text from scanned PDFs via OCR, key phrase extraction is a natural language processing capability provided by Azure Language in Foundry Tools, not Azure Vision. Key phrase extraction analyzes text to identify main concepts, which is a different service family than vision.

No— Azure Vision can analyze existing images (for example, generate captions/descriptions of an image), but generating new images from a text prompt is a generative model capability (for example, DALL·E through Azure OpenAI/Azure AI Foundry model endpoints), not an Azure Vision feature. Vision describes what it sees; it doesn't synthesize new images from natural language.

Yes— Azure Document Intelligence in Foundry Tools is designed for intelligent document processing, including automating extraction of structured fields from financial documents. Microsoft provides prebuilt models for invoices and supports custom extraction for similar document types, which makes it suitable for automating workflows involving invoices and credit-note style documents (field extraction, validation, routing).

NEW QUESTION 11

You are exploring how Microsoft 365 Copilot uses Microsoft Graph to deliver AI-powered experiences. Which information in Microsoft Graph can Copilot use by default?

- A. emails, files, meetings, and chats in Microsoft 365
- B. data stored in a file share
- C. social media activity
- D. content from public websites

Answer: A

NEW QUESTION 12

HOTSPOT

Select the answer that correctly completes the sentence. The Researcher agent in Microsoft 365 Copilot .

Answer Area

The Researcher agent in Microsoft 365 Copilot

creates visual dashboards from structured data in Microsoft Excel and Power BI.
generates a pivot table and performs time series forecasting.
performs complex, multi-step, data analysis and code execution tasks over arbitrary datasets.
uses reasoning capabilities to generate deep insights based on organizational data and the web.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

The Researcher agent in Microsoft 365 Copilot

creates visual dashboards from structured data in Microsoft Excel and Power BI.
generates a pivot table and performs time series forecasting.
performs complex, multi-step, data analysis and code execution tasks over arbitrary datasets.
uses reasoning capabilities to generate deep insights based on organizational data and the web.

NEW QUESTION 16

Your company manages an online catalog of office supplies. You plan to use a generative AI solution to create product descriptions for your company's website. The solution must ensure descriptions can be posted immediately after creation, enable selection/inclusion of product details, and be fast and simple for non-technical staff. What is the best type of solution to use? Select the BEST answer.

- A. custom Azure Machine Learning model
- B. the Researcher agent in Microsoft 365 Copilot
- C. an interactive AI agent
- D. a fine-tuned large language model LLM

Answer: D

NEW QUESTION 19

HOTSPOT

- Select the answer that correctly completes the sentence.

Adopting Microsoft responsible AI principles is important for your organization because the principles .

Adopting Microsoft responsible AI principles is important for your organization

because the principles

- ensure that AI models deliver consistent and equitable results.
- help organizations increase trust in fully autonomous AI systems.
- promote the ethical and accountable use of AI.
- standardize model development practices across AI teams.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Adopting Microsoft responsible AI principles is important for your organization

because the principles

- ensure that AI models deliver consistent and equitable results.
- help organizations increase trust in fully autonomous AI systems.
- promote the ethical and accountable use of AI.
- standardize model development practices across AI teams.

NEW QUESTION 22

HOTSPOT

- What should you use for each task? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Extracting structured data from forms and invoices:

- Azure Language in Foundry Tools
- Azure Document Intelligence in Foundry Tools
- Azure Vision in Foundry Tools

Summarizing written content from business reports:

- Azure Language in Foundry Tools
- Azure Document Intelligence in Foundry Tools
- Azure Vision in Foundry Tools

Generating descriptive text for uploaded images:

- Azure Language in Foundry Tools
- Azure Document Intelligence in Foundry Tools
- Azure Vision in Foundry Tools

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Extracting structured data from forms and invoices: Answer:Azure Document Intelligence in Foundry Tools
Summarizing written content from business reports: Answer:Azure Language in Foundry Tools
Generating descriptive text for uploaded images: Answer:Azure Vision in Foundry Tools
These three tasks align to three different Azure AI capability families: document processing, language understanding/generation, and computer vision. Forms and invoicesare semi-structured documents where the business need is to extract specific fields (IDs, names, totals, dates) reliably into structured output.Azure Document Intelligenceis designed for intelligent document processing and includes prebuilt models (such as invoices) as well as custom extraction options, making it the correct choice for structured data extraction from documents.
Summarizing written business reportsis an NLP task focused on compressing long text into key points, themes, and action items.Azure Languageprovides language processing capabilities (including summarization features within language service capabilities), so it is the best fit for summarization scenarios.
Generating descriptive text for images(image captioning/description) is a computer vision task.Azure Visioncan analyze uploaded images and return descriptions/captions and other visual insights, which directly matches the requirement to produce descriptive text from images.

NEW QUESTION 24

Your company plans to use generative AI to help build a website that will showcase various existing products. Which capability best describes a benefit of using generative AI for this project? Select the BEST answer.

- A. translating product descriptions into a different language
- B. analyzing product sales to identify patterns and trends
- C. designing a new product based on customer requirements
- D. creating product descriptions based on product specifications

Answer: D

NEW QUESTION 28

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Using incomplete or poor-quality data during generative AI model training can increase costs.	☐	☐
AI models rely on training data to learn patterns and identify relationships to produce outputs.	☐	☐
Generative AI models trained on non-representative datasets can produce inaccurate or unbalanced results.	☐	☐

A. Mastered

B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Using incomplete or poor-quality data during generative AI model training can increase costs.	☒	☐
AI models rely on training data to learn patterns and identify relationships to produce outputs.	☒	☐
Generative AI models trained on non-representative datasets can produce inaccurate or unbalanced results.	☒	☐

NEW QUESTION 30

HOTSPOT

- Select the answer that correctly completes the sentence.
When you use Microsoft 365 Copilot connectors to connect external content to _____, your users can find, summarize, and learn from line-of-business (LOB) data by using natural language prompts.

Answer Area

When you use Microsoft 365 Copilot connectors to connect external content to , your users can find, summarize, and learn from line-of-business (LOB) data by using natural language prompts.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

When you use Microsoft 365 Copilot connectors to connect external content to , your users can find, summarize, and learn from line-of-business (LOB) data by using natural language prompts.

NEW QUESTION 32

HOTSPOT

You need to recommend an AI solution for each task. The solutions must use prebuilt AI capabilities to reduce development time. What should you recommend for each task?

Extract information from invoices and credit notes:

Identify discussion topics in customer service call recordings:

Detect customer sentiment and opinions:

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Extract information from invoices and credit notes:

Identify discussion topics in customer service call recordings:

Detect customer sentiment and opinions:

NEW QUESTION 34

Your company discovers that several employees use personal ChatGPT accounts to assist with work tasks. You are concerned about proprietary data being shared externally. You need to evaluate the business value of rolling out Microsoft 365 Copilot. Which capability is a key benefit of using Copilot instead of a personal ChatGPT account?

- A. analyzing and producing reports based on complex data
- B. generating ideas and solving issues
- C. drafting documents, emails, presentations, and marketing materials
- D. accessing internal data in accordance with existing Microsoft 365 policies

Answer: D

NEW QUESTION 37

Your company receives thousands of scanned invoices each month. You need to recommend an AI solution that can automatically extract key details, such as invoice numbers, vendor names, and total amounts. What is the best solution to recommend? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Azure Document Intelligence in Foundry Tools
- B. Azure Vision in Foundry Tools
- C. Azure AI Search
- D. Azure Machine Learning

Answer: A

NEW QUESTION 39

Your company is evaluating the use of Microsoft Copilot Studio to support business process automation and employee self-service. Which two capabilities are directly supported in Copilot Studio? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Using agents to identify and respond to security incidents
- B. configuring document security
- C. drafting and summarizing files in Microsoft Word and PowerPoint
- D. building agents that connect to business data and automate user interactions

E. customizing agent behavior and responses

Answer: DE

NEW QUESTION 40

You need to create a custom Azure Machine Learning model. The data used to train the model is consistent and uniform. What should you do first?

- A. Prepare the training data.
- B. Evaluate the model.
- C. Train the model.
- D. Tune hyperparameters.
- E. Deploy the model.

Answer: A

Explanation:

Even when training data is already consistent and uniform, the first step in building a custom Azure Machine Learning model is still to prepare the training data. ??Consistent?? data reduces the amount of cleaning you may need, but preparation is broader than cleaning: you still must confirm the schema, validate data types, handle missing values (if any), ensure label quality (for supervised learning), select/engineer features, and split data into training/validation/test sets. Those actions determine whether training will be stable and whether evaluation metrics will be meaningful. If you skip preparation and go directly to training (C), the model might learn from the wrong columns, inconsistent labels, or poorly partitioned data, producing misleading results. Evaluation (B) comes after training because you need a trained model to score and measure. Hyperparameter tuning (D) is an optimization activity that presupposes you already have a working training pipeline and a baseline model to improve. Deployment (E) is last, after you have validated performance and selected the model candidate. Azure Machine Learning commonly operationalizes these steps through pipelines, where data preparation is a foundational stage that precedes training and evaluation (and can also be iterated as you refine features and quality).

NEW QUESTION 45

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft 365 Copilot can amplify existing data governance challenges.	☐	☐
Implementing Microsoft 365 Copilot reduces data management costs.	☐	☐
Microsoft 365 Copilot can help IT teams manage data risks.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft 365 Copilot can amplify existing data governance challenges.	☒	☐
Implementing Microsoft 365 Copilot reduces data management costs.	☐	☒
Microsoft 365 Copilot can help IT teams manage data risks.	☒	☐

NEW QUESTION 47

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Microsoft Copilot in Outlook can automatically send follow-up replies to emails.	☐	☐
Microsoft Copilot in Outlook can identify and surface tasks mentioned in your emails.	☐	☐
Microsoft Copilot in Outlook can summarize long email threads and highlight action items and deadlines.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Microsoft Copilot in Outlook can automatically send follow-up replies to emails.	☐	☒
Microsoft Copilot in Outlook can identify and surface tasks mentioned in your emails.	☒	☐
Microsoft Copilot in Outlook can summarize long email threads and highlight action items and deadlines.	☒	☐

NEW QUESTION 49

HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
A text-to-image generator can be used to translate content into other languages.	☐	☐
A predictive analytics model can generate new marketing content for a company’s online ads.	☐	☐
A generative AI chatbot can engage customers in personalized conversations and recommend products.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
A text-to-image generator can be used to translate content into other languages.	☐	☒
A predictive analytics model can generate new marketing content for a company’s online ads.	☐	☒
A generative AI chatbot can engage customers in personalized conversations and recommend products.	☒	☐

NEW QUESTION 52

HOTSPOT

- For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Answer Area

Statements	Yes	No
A generative AI model guarantees factually accurate responses if the model is trained on a large dataset.	☐	☐
Content filtering and responsible AI safeguards help a generative AI model generate safe and inoffensive content.	☐	☐
A generative AI model always produces fair and unbiased results when the training data has been properly prepared and reviewed for fairness.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
A generative AI model guarantees factually accurate responses if the model is trained on a large dataset.	☐	☒
Content filtering and responsible AI safeguards help a generative AI model generate safe and inoffensive content.	☒	☐
A generative AI model always produces fair and unbiased results when the training data has been properly prepared and reviewed for fairness.	☐	☒

NEW QUESTION 54
HOTSPOT

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Retrieval Augmented Generation (RAG) requires model fine-tuning.	☐	☐
Retrieval Augmented Generation (RAG) is helpful when you need a generative AI solution that can access current, verifiable information.	☐	☐
Retrieval Augmented Generation (RAG) enables you to get more relevant responses based on your organization’s documents without retraining the base model.	☐	☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements	Yes	No
Retrieval Augmented Generation (RAG) requires model fine-tuning.	☐	☒
Retrieval Augmented Generation (RAG) is helpful when you need a generative AI solution that can access current, verifiable information.	☒	☐
Retrieval Augmented Generation (RAG) enables you to get more relevant responses based on your organization’s documents without retraining the base model.	☒	☐

NEW QUESTION 57
Your company manages a website that publishes daily news articles. You need to recommend an AI solution that can analyze text and identify the main people, locations, and companies mentioned in the articles. What should you include in the recommendation?

- A. Azure Language in Foundry Tools
- B. Content Safety in Foundry Control Plane
- C. Azure Vision in Foundry Tools
- D. Azure Speech in Foundry Tools

Answer: A

Explanation:

The requirement is to analyzetextand identify ??people, locations, and companies?? mentioned in news articles. This is a classicNamed Entity Recognition (NER)/ entity extraction scenario, which falls under natural language processing.Azure Language in Foundry Toolsis the correct choice because it provides text analytics capabilities that detect and categorize entities in unstructured text—commonly includingPerson,Location, andOrganization. This enables downstream experiences such as topic tagging, search filters (e.g., ??all articles mentioning Company X??), trend dashboards (top people/places mentioned this week), and improved content discovery.

The other options do not match the requirement.Content Safetyfocuses on moderating harmful or policy-violating content (for example, hate, violence, self-harm, sexual content) and is not the primary tool for extracting named entities.Azure Visionis for analyzing images and performing OCR; it would only be relevant if the articles were images or scans, but the task here is entity extraction from text articles.Azure Speechis for speech-to-text, text-to-speech, and audio analysis; it would be used if your input were audio recordings rather than written articles.

Therefore, to identify key entities (people, locations, companies) from daily news article text, the best recommendation isAzure Language in Foundry Tools.

NEW QUESTION 58

HOTSPOT

Select the answer that correctly completes the sentence.

When a generative AI model produces output that seems realistic but contains incorrect information, the behavior is known as .

Answer Area

When a generative AI model produces output that seems realistic but contains incorrect information, the behavior is known as

data leakage.
model inaccuracy.
overreliance.
prompt injection.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

When a generative AI model produces output that seems realistic but contains incorrect information, the behavior is known as

data leakage.
model inaccuracy.
overreliance.
prompt injection.

NEW QUESTION 59

HOTSPOT

HOTSPOT - For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements

You can use Azure Language in Foundry Tools to analyze the sentiment of customer reviews.

Yes

☐

No

☐

You can use Azure Language in Foundry Tools to translate internal reports into multiple languages.

☐☐

You can use Azure Language in Foundry Tools to extract text from scanned documents.

☐☐

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Statements

You can use Azure Language in Foundry Tools to analyze the sentiment of customer reviews.

Yes

☒

No

☐

You can use Azure Language in Foundry Tools to translate internal reports into multiple languages.

☐☒

You can use Azure Language in Foundry Tools to extract text from scanned documents.

☐☒
