

## 1Z0-435 Dumps

# Oracle Business Process Management Suite 12c Essentials

<https://www.certleader.com/1Z0-435-dumps.html>

#### NEW QUESTION 1

Which statement accurately describes event-driven architecture?

- A. It is a design approach that fosters creation of distinct pieces of software where each piece is a self-contained unit of functionality.
- B. It is a programming paradigm that views processing as evaluation of functions without regard for application state.
- C. It is a style of building software that specifies logic without describing its control flow.
- D. It is an approach focusing on the production, detection, and consumption of potentially significant state changes.

**Answer: C**

#### NEW QUESTION 2

You pass some data from a process variable as a parameter into a human task. At a later time, the variable is then updated in a parallel stream of execution in the BPEL process while the human task is still executing before it is actioned by the assignee.

What does the assignee see after opening the task in the workspace and looking at the parameter?

- A. The parameter contains the values of the process variable as it was when the task was created.
- B. The parameter contains the values of the process variable as it is at the current time (that is, when the user opened the human task in the workspace).
- C. The parameter is empty and the task must be restarted to pick up the new values of the process variable.
- D. It is not possible to determine what the assignee sees from the information provided.

**Answer: C**

#### NEW QUESTION 3

Which two modeling approaches could be used to handle exceptions thrown by a service? (Choose two.)

- A. subprocess
- B. event subprocess
- C. error and event
- D. error catch event as a boundary event on the service task

**Answer: BD**

**Explanation:** You can handle the exceptions that occur in an activity using the following: \*A boundary error catch event \*An event subprocessBoundary error catch events enable you to resume the main process flow after handling the exception.If you want to reuse the exception handling flow for multiple tasks in your process, then event subprocesses are more efficient than boundary catch events. Event subprocesses enable you to define a cleaner process with less effort because the catch error event is located within the event subprocess. To reuse an exception handling flow using boundary catch events, you must define a boundary catch event for each of the tasks, and then connect those boundary events to the exception handling flow.

#### NEW QUESTION 4

You are analyzing the different methods available to manage the life cycle of the OWSM policies in your SOA/BPM environment. Identify two statements that correctly describe OWSM policy attachments. (Choose two.)

- A. Although you can attach and detach security policies in JDeveloper, you can detach them only in Enterprise Manager.
- B. An application developer typically uses JDeveloper to create new security policies rather than select them from a prebuilt list.
- C. When you use JDeveloper to associate a security policy with a web service, the policy is not really attached until application development.
- D. OWSM policies can be attached and detached with WLST.

**Answer: CD**

#### NEW QUESTION 5

Which two statements are true about the defined Oracle JMS Adapter outbound connection?

- A. It supports connections to JMS distributed queues.
- B. It uses default credentials when connecting to the remote JMS provider.
- C. It supports zero message loss via distributed transactions.
- D. It requires the JMS consumer to explicitly commit transactions.

**Answer: AB**

**Explanation:** Reference: [http://docs.oracle.com/cd/E23943\\_01/web.1111/e15493/prog\\_details.htm](http://docs.oracle.com/cd/E23943_01/web.1111/e15493/prog_details.htm)

#### NEW QUESTION 6

Which two statements are true about business indicators used for process analytics?(Choose two.)

- A. A counter must be associated with a counter mark in order for the counter to be incremented.
- B. Measures specify how process analytics data can be filtered or grouped.
- C. If you do not define any business indicators, no data is captured at a sampling point.
- D. Measurement marks are defined on sequence flows and are visible on the model.
- E. The dimensions you have defined are visible on the process model.

**Answer: AD**

**NEW QUESTION 7**

Which statement is true about BPM Suite's round trip simulation feature?

- A. Round trip simulation is a feature of a Process Player.
- B. Basing a simulation on actual process runtime data can help you find bottlenecks in a process model.
- C. Unit test suites can be automatically generated based upon round trip simulation data.
- D. During round trip simulation generation, process bottlenecks are identified and highlighted on the model.

**Answer: B**

**NEW QUESTION 8**

Which statement is true about a case activity that is defined as "Automatic" and "Conditional"?

- A. The activity is run automatically as soon as the case starts.
- B. The activity is run by the system only after it is initiated by the user.
- C. The activity is automatically run by the system as soon as it is activated by a case rule.
- D. Only a BPMN case activity can be defined as "Automatic" and "Conditional".

**Answer: B**

**NEW QUESTION 9**

Which two statements are accurate about how ADF Business Components can be used in a task flow for a human task? (Choose two.)

- A. They can create and insert a new row in a database table.
- B. They can invoke wildcard control flow rules in the task flow.
- C. They can initialize the information displayed on a form when given an ID from the process payload.
- D. They can declaratively map database information back into the process payload.
- E. They can invoke task flow call activities.

**Answer: BE**

**NEW QUESTION 10**

Which statement is true about BPM Suite's round trip simulation feature?

- A. Round trip simulation is a feature of a Process Player.
- B. Basing a simulation on actual process runtime data can help you find bottlenecks in a process model.
- C. Unit test suites can be automatically generated based upon round trip simulation data.
- D. During round trip simulation generation, process bottlenecks are identified and highlighted on the model.

**Answer: B**

**NEW QUESTION 10**

Which human workflow service is used to get the list of outcomes defined for a task?

- A. IRuntimeConfigService
- B. ITaskQueryService
- C. ITaskService
- D. ITaskMetadataService

**Answer: B**

**Explanation:** Query the list of tasks using ITaskQueryService.

Reference: [http://docs.oracle.com/cd/E15586\\_01/integration.1111/e10224/bp\\_worklistcust.htm](http://docs.oracle.com/cd/E15586_01/integration.1111/e10224/bp_worklistcust.htm)

**NEW QUESTION 15**

Which two statements are true about configuring service tasks? (Choose two.)

- A. A service task can be configured to invoke a process or service asynchronously.
- B. Although you call a file adapter as a service from your BPMN diagram, no linkage between your BPMN process and the external reference appears in the SOA Composite Editor.
- C. You can invoke a BPEL process by using a service task.
- D. The implementation of a service task can be either a process call or a service call.

**Answer: BC**

**NEW QUESTION 17**

Which two statements are true about BPM Suite product architecture? (Choose two.)

- A. The Process Asset Manager is a container of reusable, shared, implementation assets available to all processes within a BPM project.
- B. Business architecture modeling is supported by a third-party product that Oracle resells as part of the BPM Suite 12c product family.
- C. BPM Suite leverages SOA Suite infrastructure and tooling to support key design-time and run-time features.
- D. Case Management is an Oracle add-on product to add adaptive case management support to BPM Suite.
- E. BPM Suite supports BPMN process modeling notation in both BPM Process Composer and BPM Studio.

**Answer: AD**

**NEW QUESTION 18**

Which three attributes are unique to adaptive case management-based processes as compared to traditional BPMN-based processes? (Choose three.)

- A. The sequence of execution of activities is determined by process participants at run time.
- B. They are routine, well-defined, structured processes.
- C. New stakeholders, not just task participants, may be added at run time.
- D. They are exclusively event-driven.
- E. They involve human-centric processing.

**Answer:** ACD

**NEW QUESTION 21**

Which option is constraint on promoting a BPMN process to be a case activity?

- A. The BPMN process has to be modeled as an asynchronous process.
- B. The BPMN process cannot contain human tasks.
- C. The BPMN process must be in the same project as the case.
- D. The BPMN process requires that the reply from the process contains at least one parameter.

**Answer:** A

**Explanation:** The BPMN process must already exist. You can use synchronous and asynchronous BPMN processes. The case activity only supports message start and end points

Reference: [http://docs.oracle.com/cd/E28280\\_01/doc.1111/e15176/case\\_mgmt\\_bpmpd.htm#BPMPD87432](http://docs.oracle.com/cd/E28280_01/doc.1111/e15176/case_mgmt_bpmpd.htm#BPMPD87432)

**NEW QUESTION 22**

Which two can be added as members of a static approval group? (Choose two.)

- A. Users
- B. Groups
- C. Application roles
- D. other approval groups
- E. WebLogic administrators

**Answer:** AD

**Explanation:** Members of a static approval group can be either users or other approval groups.

Reference: [http://docs.tpu.ru/docs/oracle/en/fmw/11.1.1.6.0/user.1111/e15175/bpmug\\_ws\\_admin.htm](http://docs.tpu.ru/docs/oracle/en/fmw/11.1.1.6.0/user.1111/e15175/bpmug_ws_admin.htm)

**NEW QUESTION 27**

Which two statements are correct about business indicators? (Choose two.)

- A. They can be captured at measurement marks.
- B. Dimensions allow the user to capture numerical values.
- C. All business indicators are captured at sampling points and a subset is captured at measurement marks.
- D. Counters are used for interval start and interval stop measurements.

**Answer:** AC

**Explanation:** A Measure Business Indicator is used to capture something that can be measured.

The BPMN Service Engine automatically stores the data in the dimension business indicators in the pre-defined and custom sampling points defined for your process.

**NEW QUESTION 28**

Identify the gateway type that disallows an outgoing conditional path.

- A. Exclusive
- B. Inclusive
- C. Parallel
- D. Complex

**Answer:** C

**Explanation:** A Parallel Gateway creates parallel paths without checking any conditions; each outgoing Sequence Flow receives a token upon execution of this Gateway Reference: [http://training-course-material.com/training/BPMN\\_2.0\\_Gateways#Parallel\\_Gateway](http://training-course-material.com/training/BPMN_2.0_Gateways#Parallel_Gateway) (See Parallel Gateway, 2nd line).

**NEW QUESTION 31**

Which two statements are true for decision table rules? (Choose two.)

- A. They can have multiple conditions, but share only one action.
- B. They typically contain a set of rules that covers all combinations or where no two combinations conflict.
- C. Both gap detection and conflict resolution cannot be turned off at the same time.

D. A priority can be set for an entire decision table.

**Answer:** BD

**Explanation:** A Decision Table is an alternative business rule format that is more compact and intuitive when many rules are required to analyze many combinations of property values. You can use a Decision Table to create a set of rules that covers all combinations or where no two combinations conflict. Reference: [http://docs.oracle.com/middleware/1213/bpm/bp-composer-user/business\\_rules\\_bpmcu.htm#BPMCU495](http://docs.oracle.com/middleware/1213/bpm/bp-composer-user/business_rules_bpmcu.htm#BPMCU495)

### NEW QUESTION 33

Which two tools can you use to create charts for a dashboard that displays metrics for your BPM project? (Choose two.)

- A. BPM Studio
- B. BAM Composer
- C. BPM Process Composer
- D. BPM Process Workspace
- E. WebCenter Process Spaces

**Answer:** BD

### NEW QUESTION 36

Which two statements are true about out-of-the-box metrics support in BPM Suite? (Choose two.)

- A. If you want to know average time spent in each activity in your process, you can look at the workload per process dashboard in Business Process Workspace.
- B. By default, in standard dashboards that display data about in-flight instances, there is a 30- minute delay before up-to-date data appear in the charts.
- C. You can only view out-of-the-box metrics in charts created in Business Process Workspace.
- D. During process execution, when a sampling point is reached, the BPMN Service Engine collects all standard process metrics that are prespecified out-of-the-box.

**Answer:** CD

### NEW QUESTION 41

During a simulation run, a simulation definition may be associated with .

- A. one what-if scenario for a single process
- B. multiple what-if scenarios for a single process
- C. multiple processes and one what-if scenario for each process
- D. multiple processes and multiple what-if scenarios for each process

**Answer:** C

### NEW QUESTION 44

What feature would you use if you want to step through a business process just to validate the flow, rules, and forms?

- A. Process Player
- B. Process Simulation
- C. Process Workspace
- D. BPMN Debugger

**Answer:** A

### NEW QUESTION 46

What does the case engine use as the content store if a content management system is not specifically configured for case management?

- A. Oracle WebCenter Content
- B. a CMIS content store
- C. a file system
- D. a database

**Answer:** D

**Explanation:** Case Data: the data for the case stored in the BPM database.

Reference: [https://docs.oracle.com/middleware/1213/bpm/bpm-develop/case\\_mgmt\\_bpmpd.htm#BPMPD87410](https://docs.oracle.com/middleware/1213/bpm/bpm-develop/case_mgmt_bpmpd.htm#BPMPD87410)

### NEW QUESTION 47

Value chain models allow you to specify more details about a process area that may have been identified in an enterprise map. Which two statements are true about how the details are specified in a value chain model? (Choose two.)

- A. A value chain model is the starting point for process decomposition in business architecture modeling.
- B. A step can be broken down into a separate value chain model to create a hierarchical group of value chain models.
- C. It documents goals, objectives, and strategies for a business area.
- D. A step can be linked to a BPMN process model.
- E. There is typically just one value chain model for an entire organization.

**Answer:** B

**Explanation:** Reference: [http://docs.oracle.com/middleware/1213/bpm/bp-composer-user/ba\\_project\\_bpmcu.htm#BPMCU99994](http://docs.oracle.com/middleware/1213/bpm/bp-composer-user/ba_project_bpmcu.htm#BPMCU99994) (4.1.2)

**NEW QUESTION 50**

Which statement is accurate about verbal rules and business phrases?

- A. Verbal ruled can be created in Business Process Composer, but not in BPM Studio.
- B. For a particular verbal rule, conditions and actions can include derived business phrases or user- defined business phrases, but not both.
- C. Derived business phrases are automatically created by using facts and globals in the rules dictionary.
- D. Verbal rules must be created in a separate ruleset from general rules and decision tables.

**Answer:** BC

**NEW QUESTION 51**

Which statement is true about the architecture of the business rules component?

- A. Facts are vocabulary elements that are used to construct tests and actions for verbal rules.
- B. You can use globals to help users modify rules without having to rework the rule logic.
- C. Unlike decision tables, if-then rules provide conflict resolution and gap analysis.
- D. In the action of a rule, you typically use the Fire RL (Rule Language) verb to invoke inferencing.

**Answer:** A

**NEW QUESTION 55**

Which two statements are accurate descriptions of how process data objects or project data objects are used? (Choose two.)

- A. A process data object can be based on either a basic data type or a complex data type.
- B. A process data object is associated with a module where it resides.
- C. One of the main benefits of defining process data objects is that you can configure Business Process Workspace views to display their values.
- D. Project data objects are not used to share data values between processes.

**Answer:** AD

**Explanation:** Basic and complex data types can both be defined as either process or project data objects.

Although project data objects allow you to define data objects that are used by all processes in a project, they are not global data objects. Each process within your project uses its own version of the data object. Project data objects are not used to share data between processes. To share data between processes, you must create data associations.

**NEW QUESTION 59**

Which human task pattern is best suited for a single approver scenario where the role is resolved through group membership? (Choose two.)

- A. User
- B. Group
- C. Initiator
- D. FYI
- E. Management

**Answer:** A

**Explanation:** Single Approver: Use this option for a single user to act on a task. If the task is assigned to a role or group with multiple users, then one member must claim the task and act on it.

Reference: [http://docs.oracle.com/cd/E28280\\_01/user.11111/e15175/bpmug\\_ws\\_perform\\_tasks.htm](http://docs.oracle.com/cd/E28280_01/user.11111/e15175/bpmug_ws_perform_tasks.htm)

**NEW QUESTION 62**

Which is a capability of Web Form rules?

- A. altering execution of an unbounded ADF task flow
- B. inserting validation rules into an ADF page that a BPM Studio wizard has generated
- C. encoding-business policies that can be easily modified by end users at run time
- D. populating a dynamic drop-down list by accessing a RESTful service

**Answer:** D

**NEW QUESTION 63**

Which two statements accurately describe how Oracle Web Services Manager works? (Choose two.)

- A. On the client side, the agent coordinates a pipeline of policy interceptors that apply policy assertions to the request in a standardized, predetermined order.
- B. On the service side, policy assertions are processed in reverse order of the client side before the request is delivered to the service.
- C. On the client side, the policy manager coordinates a pipeline of agents that apply policy assertions to the request in the order specified by the developer.
- D. On the service side, policy assertions are processed in the same order as on the client side before the request is delivered to the service.

**Answer:** AB

**NEW QUESTION 64**

Which two statements are true about running and analyzing simulation results? (Choose two.)

- A. You must wait until a simulation run finishes in order to see up-to-date results in charts.
- B. During a simulation run, in-flight instances are always allowed to finish before a simulation completes.
- C. During a simulation run, cost and time data are automatically collected for all activities, events, and gateways.
- D. You can use only Business Process Composer to create and run simulations.
- E. The number appearing above the left-most bar atop an activity represents the high water mark for the queue.

**Answer:** BD

**Explanation:**

<p>Let in-flight instances finish before simulation ends</p>	<p>If selected, simulation ends only when the specified number of instances complete. If unselected, simulation stops after the simulation duration is completed. At that point, all incomplete instances are shown in either "process" or "queue" status.</p>
--------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

In Business Process Composer you can only run simulations based on test data you define using Business Process Composer.

**NEW QUESTION 67**

By default, which two tasks participant roles can change the outcome of a task? (Choose two.)

- A. Admin
- B. Approvers
- C. Assignees
- D. Creator
- E. Owner
- F. Reviewer

**Answer:** CE

**Explanation:** The task owner can change both the outcome of the task and the assignments.

The assignee can raise questions about the work, by adding comments into the task to communicate to the owner or followers about their progress. For example, if an assignee cannot complete the task, they can either change the assignee back to the owner, or add a comment into the task while changing the task status to "need assistance".

**NEW QUESTION 72**

Which two statements are true about using Process Player to test a process? (Choose two.)

- A. All activities must be implemented for a process before you can run it with Process Player.
- B. When you are running a process by using Process Player and it reaches a user task that has an associated form, you must display the form to select the task outcome.
- C. As a process runs in Process Player, the BPMN diagram is animated to show the flow through the model.
- D. Before running Process Player, you must map all roles in your process to at least one user or group in your organization.

**Answer:** BD

**NEW QUESTION 77**

Which statement is true for a BPMN subprocesses?

- A. It has access to the data variables of the main process.
- B. Data have to be explicitly passed back and forth between the main process and the subprocess.
- C. The subprocess can be reused and called from other processes.
- D. The sequence flow inside a subprocess can be diverted and joined to the main flow without going through an end event.

**Answer:** C

**NEW QUESTION 80**

To establish the integration between BPM Suite and BAM 12c, you need to .

- A. do nothing as they are integrated out-of-the-box
- B. set the DisableProcessMetricsMBean setting to false on the SOA server
- C. set the DisableProcessMetricsMBean setting to false on the BAM server
- D. set the DisableMonitorExpressMBean setting to false on the SOA server

**Answer:** B

**NEW QUESTION 85**

Which two components in a BPM project can be promoted to become a case activity? (Choose two.)

- A. Mediator
- B. BPEL

- C. Human task
- D. Business rule
- E. BPMN
- F. Spring

**Answer:** CE

**Explanation:** A case definition contains various case activities that represent the different work that the user can perform in the context of a case. Oracle BPM allows you to define case activities based on:

- a Human Task
- a BPMN process

Reference: [http://docs.oracle.com/cd/E28280\\_01/doc.1111/e15176/case\\_mgmt\\_bpmpd.htm#BPMPD87410](http://docs.oracle.com/cd/E28280_01/doc.1111/e15176/case_mgmt_bpmpd.htm#BPMPD87410)

#### NEW QUESTION 90

Which component enables a shared work environment for a BPM Suite 12c project where process analysts use Process Composer and process developers use BPM Studio?

- A. Oracle Enterprise Repository
- B. Meta Data Services
- C. Process Asset Manager
- D. Apache Derby DB

**Answer:** C

**Explanation:** You can use the Process Asset Manager to share BPM projects between the different persons working on the project

Reference: [https://docs.oracle.com/middleware/1213/bpm/bpm-develop/bac\\_bpmpd.htm#BPMPD87526](https://docs.oracle.com/middleware/1213/bpm/bpm-develop/bac_bpmpd.htm#BPMPD87526)

#### NEW QUESTION 92

You have a situation where a collection of rules might provide a flexible way of externalizing logic in an application. Which two are accurate considerations to access as you decide to use a decision table or if-then rules? (Choose two.)

- A. The decision table's spreadsheet metaphor is compact and familiar to end users.
- B. Decision tables can use globals while if-then rules cannot.
- C. The logic likely requires more rules if expressed as a decision table.
- D. Unlike with a decision table, an Expression Builder is provided for if-then rules to help you craft condition expressions.
- E. Built-in error prevention features for decision tables can help you build more complete and accurate rules.

**Answer:** BE

#### NEW QUESTION 93

In which two tools can you explore the path taken by a running process instance? (Choose two.)

- A. Enterprise Manager
- B. Process Composer
- C. Weblogic Console
- D. Business Process Workspace

**Answer:** AD

#### NEW QUESTION 96

Which two statements are true about the role of Oracle Business Rules in Adaptive Case Management (ACM)?

- A. Defining business rules is mandatory to be able to build, deploy, and run an ACM project.
- B. Business rules are used to handle case events and take specific actions on the case.
- C. Business rules are used to activate conditional case activities.
- D. Oracle Business Rules is an optional component of ACM.

**Answer:** CD

#### NEW QUESTION 99

Which two features are provided on the Tasks page of Business Process Workspace?

- A. Display Status for Adaptive Case Management (ACM) cases.
- B. View human tasks based on the user's permissions and assigned groups and roles.
- C. Create personal to-do tasks that are unassociated with a process instance.
- D. View who is currently assigned to a task that the current user has completed.

**Answer:** BC

**Explanation:** The Tasks page displays tasks for the user based on the user's permissions and assigned groups and roles. Perform authorized actions on tasks in the worklist, acquire and check out shared tasks, define personal to-do tasks, and define subtasks.

Reference: [http://docs.oracle.com/middleware/1213/bpm/bpm-user/bpmug\\_ws\\_gt\\_strt.htm#BPMUG121](http://docs.oracle.com/middleware/1213/bpm/bpm-user/bpmug_ws_gt_strt.htm#BPMUG121)

**NEW QUESTION 104**

When automatically generating an ADF form from a human task, the difference between using the "Auto- Generate Task Form" and the "Launch Task Form Wizard" is that the .

- A. "Launch Task Form Wizard" option launches a six-step "BPM Custom Form Wizard" and the "Auto- Generate" option creates the ADF project, task flow, and ADF form with one key click
- B. "Launch Task Form Wizard" option does not create a new ADF project every time it is run
- C. "Auto-Generate" option gives you the choice to use an existing ADF page template as the form is being created.
- D. "Launch Task Form Wizard" option automatically creates an ADF page template and task flow template

**Answer: D**

**NEW QUESTION 105**

Which pattern is best handled by using Adaptive Case Management?

- A. straight-through processing requiring no manual intervention
- B. deterministic, human-centric processes
- C. knowledge-based work requiring collaboration
- D. application integration processes

**Answer: C**

**NEW QUESTION 106**

Which two statements are correct on the use of business objects in a BPM project? (Choose two.)

- A. A business object is defined by a complex data type.
- B. Business objects are often defined in WSDL documents.
- C. A business object can inherit data and behavior from a parent business object.
- D. You can create a business object at either the project level or the process level.

**Answer: BC**

**NEW QUESTION 111**

Which statement is true about using a data-first approach in the Web Form Designer?

- A. The process must already have an object-based process variable created.
- B. The human task must already have an object-based data element defined.
- C. A corresponding process data object is automatically created and mapped into and out of the human task.
- D. As widgets are dragged onto the form from the palette, the form's underlying XSD is automatically updated.

**Answer: C**

**NEW QUESTION 116**

Which three actions are available when using business rules for a case? (Choose three.)

- A. Activate activities.
- B. Set an activity's relevance.
- C. Change a milestone deadline.
- D. Change a required activity to an optional activity.
- E. Modify case data.

**Answer: CDE**

**NEW QUESTION 120**

Which two product features might a process analyst use the most in contrast to a process developer? (Choose two.)

- A. Process simulation.
- B. Business rules.
- C. Mediator services.
- D. Web Forms.
- E. BPM Studio.
- F. ADF forms.

**Answer: AD**

**NEW QUESTION 123**

Human workflow is implemented as a .

- A. component within the BPEL service engine
- B. separate Java server running on WebLogic Server
- C. service engine within the SOA infrastructure
- D. component within the BPMN service engine

**Answer: C**

**NEW QUESTION 124**

Which three options are human task patterns that cause the token to wait in the calling process until the human task is completed? (Choose three.)

- A. FYI
- B. Initiator
- C. Management
- D. Manual
- E. Group

**Answer:** BCE

**Explanation:** Pattern Description

Pattern	Description
Complex	Uses a complex routing flow that is defined within the human task.
Management	Uses the management chain pattern where the assignee is set to the management chain participant for the process participant belonging to the group or role assigned to the swimlane.
FYI	Bases assignment on the participant, role, or group defined in the swimlane. Similar to the interactive activity, but the FYI activity does not wait until completion before continuing.
Group	Uses the group vote pattern. The assignee for the task is automatically set to the role or group associated with the lane. This interactive activity can only be added to swimlanes that are assigned to roles or groups.
Initiator	The initiator pattern is used to create a process instance.

Reference: [https://docs.oracle.com/middleware/1213/bpm/bp-composer-user/app\\_bpmn\\_ref\\_bpmcu.htm#BPMCU87357](https://docs.oracle.com/middleware/1213/bpm/bp-composer-user/app_bpmn_ref_bpmcu.htm#BPMCU87357)

**NEW QUESTION 128**

Which two statements are true about business architecture modeling in BPM Suite? (Choose two.)

- A. It fosters a top-down approach that allows for discovery of an organization's processes.
- B. It is required before BPMN modeling can begin for a specific process.
- C. It is supported by enterprise maps, value chain models, and strategy models created in BPM Studio.
- D. It allows you to define high-level processes that span an entire organization.
- E. It uses familiar BPMN notation to graphically describe high-level process areas.

**Answer:** AD

**Explanation:** Business Architecture is a methodology for performing high-level analysis of the business processes within your organization. These processes can be high-level processes that span an entire organization or specific, low-level processes performed within a specific group. Business Architecture uses a top-down approach that allows for discovery of your organization's processes. You can define and evaluate high-level goals and map them to specific strategies for achieving them. You can also run reports on Business Architecture components to evaluate performance.

Reference: [http://docs.oracle.com/middleware/1213/bpm/bp-composer-user/ba\\_project\\_bpmcu.htm#BPMCU880](http://docs.oracle.com/middleware/1213/bpm/bp-composer-user/ba_project_bpmcu.htm#BPMCU880)

**NEW QUESTION 129**

Which two statements are true about using project data objects? (Choose two.)

- A. Any process in the project can access a project data object.
- B. The value of a project data object does not vary between processes.
- C. Project data objects can be used only as input arguments to a process.
- D. Project data objects can be used in data associations and expressions.

**Answer:** AD
