

C1000-010 Dumps

IBM Operational Decision Manager Standard V8.9.1 Application Development

<https://www.certleader.com/C1000-010-dumps.html>

NEW QUESTION 1

What properly needs to be set in a BOM Configuration file to ignore elements present in the BOM class but missing from the XOM?

- A. ignore.MissingXomElement
- B. update.ignoreDifferences
- C. update.ignoreMissingXomElement
- D. update.ignoreMissingBomElement

Answer: A

NEW QUESTION 2

In the process of Decision Center configuration, several different security roles are defined for the Decision Center. Which group contains the correct security roles?

- A. user, adminUser, configUser
- B. dcinstalled dcUser, dcAdministrator
- C. rtsUser, rtsAdministrator, rtsConfigManager
- D. resAdministrator, resConfigManager, resInstaller

Answer: A

NEW QUESTION 3

Why are synchronization connection entries useful?

- A. To keep the connection open to the Decision Center database.
- B. To track the state of the synchronization with Decision Center.
- C. To resolve the conflicts between Rule Designer and Decision Center.
- D. To enable Rule Designer to connect to Decision Center without user sec

Answer: B

NEW QUESTION 4

Which statement is true of a rule project that has multiple BOM entries referenced and some of them have the same element name?

- A. There cannot be multiple BOM entries referenced to rule projects.
- B. Rule Designer will show the error of having same element name already exists.
- C. If there are several BOM entries, an element in the first BOM entry in the path overrides any other element with the same name in the other BOM entries
- D. If there are several BOM entries with same element name, then the order of runtime appearance has to be set or else it will not allow the project to be saved.

Answer: B

NEW QUESTION 5

Which two elements are both mandatory in the ruleset path?

- A. Version
- B. Ruleset name
- C. Branch level
- D. RuleApp name
- E. Rule Project Name

Answer: BD

NEW QUESTION 6

Which rule engine execution mode is designed to optimize a large numbers of objects?

- A. Faslpalh
- B. RetePlus
- C. Sequential
- D. Ciassic Engine

Answer: D

NEW QUESTION 7

An application developer has changed the Java XOM. The developer then tries to update the BOM but no differences appear. What are two reasons this could happen? (Select two.)

- A. A member in the Java XOM was deleted.
- B. A member in the Java XOM was annotated as ©Deprecated.
- C. Only the content of a method(s) in the Java XOM were changed.
- D. A @NotBusiness annotation was added to a member of the Java XOM.
- E. An additional optional parameter was added to a method(s) in the Java XO

Answer: BE

NEW QUESTION 8

Categories named Vehicle and Customer have been added to a rule project. In the BOM of this rule project, a business element Car has been assigned categories Vehicle and Automobile and a business element Client has been assigned the category Customer. Which category filters need to be assigned to an action rule so that both the Car and Client business element are visible in the rule? Select two.

- A. Any
- B. All
- C. Client
- D. Vehicle and Client
- E. Vehicle and Automobile

Answer: AB

NEW QUESTION 9

When configuring Decision Server Rules on WebSphere Liberty Profile, which archive needs to be deployed on the application server in order to enable hosted transparent decision services?

- A. DSService war
- B. HdtsService.war
- C. DecisionRunner.war
- D. DecisionService.war

Answer: A

NEW QUESTION 10

What is the resulting BOM class when the following Java XOM class is imported in the rule project?

```
public interface VehicleTypeClass {  
    public String getMake ();  
    @BusinessType (value="String")  
    public int getModel ();  
    public int getYear();  
    public void setYear(int year);  
    public void upgrade(VehicleTypeClass vehicle);  
}
```

A.

```
public interface VehicleTypeClass  
{  
    public readonly abstract string make;  
    public readonly abstract string model;  
    public abstract int year;  
    public void upgrade(VehicleTypeClass arg);  
}
```

```
B. public interface VehicleTypeClass
{
    public abstract string make;
    public abstract string model;
    public abstract int year;
    public void upgrade(VehicleTypeClass arg);
}

C. public interface VehicleTypeClass
{
    public readonly abstract string make;
    public readonly abstract string model;
    public abstract int year;
    public readonly void upgrade(VehicleTypeClass arg);
}

D. public interface VehicleTypeClass
{
    public readonly abstract string make;
    public readonly abstract int model;
    public abstract int year;
    public readonly void upgrade(VehicleTypeClass arg);
}
```

- A. Exhibit
- B. Exhibit
- C. Exhibit
- D. Exhibit

Answer: D

NEW QUESTION 10

A customer needs to calculate sales taxes based on the state of origin for an online pricing solution. The customer identified 15 states in the US that have a different sales tax and also include 2-3 additional types of taxes. Also, these 15 states have different regulations and need to update taxes on a monthly basis. How can a developer design the rule application to simplify the number of rules and the impact of multiple deployments so that unchanged rules are not duplicated?

- A. - Organize tax rules in a common rule project to address taxes for the states sharing the same logic - Create a separate rule project for every state where taxes calculations are unique- Override common rules with unique rules from this separate rule project
- B. - Create a rule project for every state to include its own tax rules- Package all rule projects into a single RuleApp with multiple rulesets
- C. - Create a rule project with only the rules of one state and use these rules as the only ruleset of a RuleApp
- D. - Create a rule project with a single decision table with all states listed and the tax logic for every state in separate virtual methods from the BOM that can be used in the table.- Use this rule project as the only ruleset in the RuleAp

Answer: C

NEW QUESTION 11

Which of the following makes a conflict when merging two branches in Decision Center?

- A. When a snapshot is created in one of the branches
- B. When a new ruleflow is created in one of the branches
- C. When the same decision table is modified in both branches
- D. When an action rule is modified from Rule Designer in one of the branches

Answer: A

NEW QUESTION 13

Which statement is true when deploying a RuleApp archive?

- A. A managed Java XOM in the RuleApp archive must follow a XOM versioning policy.
- B. Java XOM's must always be included in RuleApp archives to guarantee version compatibility.
- C. Resource and library versioning polices only apply when managed XOM's are present in the RuleApp archive.
- D. RuleApp archives must be configured from the ruleset view first to define the rulesets to be included in the RuleApp archive.

Answer: A

NEW QUESTION 15

What are the possible results of running a test suite?

- A. Passed, Failed
- B. Running, Done, Retrying
- C. Active, Complete, Paused
- D. Successful, Failure, Error

Answer: A

NEW QUESTION 18

Which correctly represents the deployed RuleApp ruleset path template?

- A. RuleApp/RuleApp_majo
- B. RuleApp_minor/Ruleset/Ruleset_majo
- C. Ruleset_minor
- D. RuleApp/RuleApp_minor.RuleApp_major/Ruleset/Ruleset_minor.Ruleset_major
- E. Ruleset/Ruleset_majo
- F. Ruleset_minor/RuleApp/RuleApp_majo
- G. RuleApp_minor
- H. Ruleset/Ruleset_mino
- I. Ruleset_major/RuleApp/RuleApp_mino
- J. RuleApp_major

Answer: D

NEW QUESTION 23

A developer is working with a mainframe legacy application. How can they build the execution object model (XOM) with the information from this application?

- A. Import the Cobol copybook.
- B. Extract objects through SQL queries.
- C. Use the Decision Engine API to map Cobol structures.
- D. Use the Rule Designer migration tool to convert the source Cobol copyboo

Answer: B

NEW QUESTION 26

A rule developer is creating a virtual method that will calculate the percentage of a provided value. The method receives 2 parameters: The first parameter is the percentage and second parameter is the value to calculate the percentage from. What is a correct verbalization to accomplish this?

- A. The {1}% of {2}
- B. The {0}%of{1}
- C. The {1}% of {this}
- D. The {0}% of {this}

Answer: A

NEW QUESTION 28

ODM V8.9.1 is being installed on several nodes in silent mode by using a response file. What needs to be included in the response file during installation?

- A. Sample server port number
- B. IBM Installation Manager home location
- C. Repository path for the sample server installation
- D. Installed WebSphere Application Server home location

Answer: C

NEW QUESTION 31

What is one migration task a developer needs to perform when migrating a legacy business rules application to the latest version of the product?

- A. Migrate existing TestSuite files.
- B. Migrate the XOM to include business annotations.
- C. Migrate existing B2X code from IRL to supported ARL.
- D. Update existing web service clients from JSON to XM

Answer: B

NEW QUESTION 32

How can a developer help the business users to author rules in a way that improves performance?

- A. Rewrite complex BAL rules as technical rules.
- B. The way in which rules are written have no impact on performance.
- C. Modify the BOM to remove the {this} placeholder to make the rules less verbose.
- D. Make sure that conditions that test a collection of objects come before simpler conditions, to reduce the number of objects that later conditions in the rule must test.

Answer: D

NEW QUESTION 35

What is the purpose of the Decision Warehouse?

- A. To store all deployed rulesets
- B. To store all meta data about deployed rulesets
- C. To store execution traces to monitor ruleset execution
- D. To store historical changes made to rule projects so previous versions can be restored

Answer: D

NEW QUESTION 40

When working on rules in both Rule Designer and Decision Center, what is good practice to ensure BOM consistency?

- A. Deprecate obsolete classes and members.
- B. Use the merge feature to align discrepancies.
- C. Delete BOM classes and members in Rule Designer.
- D. Only change arguments in the BOM in Rule Designer

Answer: C

NEW QUESTION 42

Which statement is true regarding the decision service rule project hierarchy?

- A. A standard rule project can be changed to a main rule project when it is referenced by other rule projects.
- B. Changing a rule project to a main rule project can affect the deployment and synchronization of the project.
- C. Changing a main rule project to a standard rule project removes the main rule project references to other rule projects.
- D. Changing a rule project from a standard rule project to a main rule project always requires changes to the way rule projects are referenced.

Answer: A

NEW QUESTION 44

What has to be selected or defined when running a simulation in Decision Center?

- A. JDBC Connection
- B. The Cluster JVM
- C. Output Folder for Result
- D. The Decision Runner server
- E. B

Answer: E

NEW QUESTION 47

Which statement is true about the Business Console Administration tab?

- A. Administration tasks can be done only in Enterprise Console.
- B. Only users with "rtsAdministrator" role have access to this tab.
- C. Only users with "rtsAdministrator" or "rtsInstaller" roles have access to this tab.
- D. Only users with "rtsAdministrator" or "rtsConfigManager" roles have access to this tab.

Answer: A

NEW QUESTION 50

Which statement applies when enforcing security on a project using Decision Center Business console?

- A. Decision Center Enterprise console must be used to grant access permissions to custom groups.
- B. Members of custom groups are restricted by the permissions assigned to that group, regardless of membership in other groups.
- C. When a user belongs to multiple groups and members of custom groups have varying permission levels, the most restrictive permissions apply.
- D. When a user belongs to multiple groups and members of custom groups have varying permission levels, the least restrictive permissions apply.

Answer: A

NEW QUESTION 54

What is the purpose of a RuleApp?

- A. A RuleApp is a deployable management unit.
- B. A RuleApp is the entry point for clients to access the business logic.
- C. A RuleApp contains a single executable ruleset.
- D. A RuleApp includes all that is needed by a single decision operation

Answer: C

NEW QUESTION 59

A company wants to use ODM rules for a graphical user interface (GUI) validation. They want to use rules to validate forms filled out by customers. The rules would validate user input and answers to the questions. The users must have the ability to navigate the website while waiting for the ODM response. What implementation should they use?

- A. Implement a REST rule service in the XML format.
- B. Implement a HTDS rule session to handle the request and response web service call.
- C. Use an EJB rule session to handle changing the state of objects in working memory.
- D. Use an asynchronous ruleset execution and an observer to end the execution or catch an exception on failur

Answer: A

NEW QUESTION 62

The project owner, Paul, asks a rule author, Bea, to update rules for the Spring release, and asks Adam to review and validate Bea's changes. After Bea finishes her updates, she notifies Adam. Adam is unable to access the project to test the changes. What is the problem?

- A. Paul forgot to assign Adam as a Tester.
- B. Adam has rtsUser permissions, therefore, he cannot test rules.
- C. After Bea finished her updates, she marked the status as Finished, which prevented Adam from testing.
- D. Paul needed to mark Bea's updates to the Spring release as Reviewed so that Adam could see the update

Answer: B

NEW QUESTION 67

Which statement regarding decision services is true?

- A. The main rule project can be referenced by a XOM for purposes of exposing methods in rules.
- B. Decision services can be configured through parameters in the properties when rule extractors are used.
- C. The source rule project for the decision operation determines the rules, variables, and dependent projects that are eligible to be included in the rule set.
- D. When a decision service with multiple rule projects is published to Decision Center, standard rule projects are published as source decision service artifacts.

Answer: C

NEW QUESTION 69

A large enterprise has multiple decision services from different business units using Decision Center as the source of truth to maintain their rules. Some of these projects have customized Decision Center behaviors in order to meet business user authoring experience requirements.

What are two reasons to use Decision Center in non-production environments in order to minimize interruption to access to Decision Center for this customer?

- A. To test customizations
- B. To test product updates and ifixes
- C. To test the behavior of large decision tables
- D. To develop and encourage POCs away from production
- E. To simulate new complex rule ideas away from production

Answer: AB

NEW QUESTION 70

Which of the following activities can be performed through the RES REST APIs?

- A. Executing a ruleset only
- B. Starting and stopping the RES server
- C. Deploying new artifacts and executing rulesets
- D. Managing deployed artifacts such as ruleapp
- E. XOM
- F. libraries, and execute rulesets

Answer: A

NEW QUESTION 71

For a request, which object is used for a Java execution of a Rule session?

- A. IlrRequest
- B. rule Request
- C. restAPIRequest
- D. IlrSessionRequest

Answer: A

NEW QUESTION 73

How are objects removed from working memory?

- A. clearObject ()
- B. removeobject()
- C. delete statement
- D. retract statement

Answer: C

NEW QUESTION 74

A customer has an online and batch processing application. The batch process can be executed multiple times during the day on demand and can overlap the

online application. RuleApps and rulesets are the same across online and batch. The batch application also manages big batches with high throughput. How can this application be architected to address these requirements?

- A. - Use an embedded approach for the online application and batch application to address the high throughput and change the execution units to file persistence to simplify the deployment.
- B. - Separate infrastructure from online to batch, each one configured in a separate cluster.- Configure a ruleset interceptor to route the workload between online application execution units and batch execution units.
- C. - Configure 2 clusters in the same cell where the online application is running: one cluster for the online application and a second cluster for the batch process.- Configure the Rule Execution Server console outside of the 2 clusters to share the RuleApps across the online and batch application.
- D. - Use separate infrastructure for online and batch processing.- Use managed approach with a centralized Rule Execution Server for online.- Configure a set of J2SE RuleApp clients to run in parallel and distribute the batch workload.- Change the Rule Execution Server and XU notification mechanism to TCP/IP to use the same deployed RuleApps for both the batch and online application.

Answer: D

NEW QUESTION 78

The screenshot below describes permissions granted to the group "Eligibility"

The screenshot shows a web interface for managing permissions. At the top, there are buttons: 'Save Permissions', 'Cancel', 'View Effective Permissions', and 'Help'. Below this, a message states: 'You are currently editing the permissions for the group: Eligibility'. The main part of the interface is a table with the following columns: 'Actions', 'PERMISSION', 'TYPE', 'PROPERTY', and 'VALUE'. The table contains five rows of data:

| Actions | PERMISSION | TYPE | PROPERTY | VALUE |
|---------|------------|----------------|----------|-------|
| ▲ ▼ | Create | Action Rule | - | Yes |
| ▲ ▼ | Create | * | - | No |
| ▲ ▼ | View | * | - | Yes |
| ▲ ▼ | Update | Decision Table | - | Yes |
| ▲ ▼ | View | Smart Folder | - | Group |

At the bottom right of the table, it says '5 Results'. At the bottom left, there are three buttons: 'New', 'Edit', and 'Delete'.

Which two statements are true about a user in the group "Eligibility"?

- A. The user can view Queries.
- B. The user can view Ruleflows.
- C. The user can create Action Rules.
- D. The user can update Action Rules.
- E. The user can create Decision Table

Answer: BD

NEW QUESTION 79

What is needed when executing a decision service by posting a REST request?

- A. ruleset library
- B. ruleset name
- C. XOM JAR file
- D. RuleApp JAR file

Answer: A

NEW QUESTION 81
