

Exam Questions 1Z0-435

Oracle Business Process Management Suite 12c Essentials

<https://www.2passeasy.com/dumps/1Z0-435/>

NEW QUESTION 1

You are analyzing the different methods available to manage the life cycle of the OWSM policies in your SOA/BPM environment. Identify two statements that correctly describe OWSM policy attachments. (Choose two.)

- A. Although you can boss attach and detach security policies in JDeveloper, you can detach them only in Enterprise Manager.
- B. An application developer typically uses JDeveloper to create new security policies rather than select them from a prebuilt list.
- C. When you use JDeveloper to associate a security policy with a web service, the policy is not really attached until application development.
- D. OWSM policies can be attached and detached with WLST.

Answer: CD

NEW QUESTION 2

Which two statements are accurate about how ADF Business Components can be used in a task flow for a human task? (Choose two.)

- A. They can create and insert a new row in a database table.
- B. They can invoke wildcard control flow rules in the task flow.
- C. They can initialize the information displayed on a form when given an ID from the process payload.
- D. They can declaratively map database information back into the process payload.
- E. They can invoke task flow call activities.

Answer: BE

NEW QUESTION 3

You have a requirement to dynamically assign tasks at run time based on the employee's title. Which three could be used to accomplish this assignment? (Choose three.)

- A. Use parametric roles to map the individual parametric role assignments and then map individual users to specific titles in the workspace using extended user properties.
- B. Use parametric roles to map the individual parametric role assignments and then map LDAP groups to specific titles in the workspace using extended user properties.
- C. In LDAP, ensure that individual users have been given titles and, in the workspace, associate the LDAP title attribute to a parametric role.
- D. Use a business rule in the human task to dynamically assign work items to specific users or an LDAP group based on employee title.
- E. In the process, edit the properties of the swimlane and assign a "title" string data object in the process payload to define a parametric role.

Answer: ABD

NEW QUESTION 4

Which two statements are true about BPM Suite product architecture? (Choose two.)

- A. The Process Asset Manager is a container of reusable, shared, implementation assets available to all processes within a BPM project.
- B. Business architecture modeling is supported by a third-party product that Oracle resells as part of the BPM Suite 12c product family.
- C. BPM Suite leverages SOA Suite infrastructure and tooling to support key design-time and run-time features.
- D. Case Management is an Oracle add-on product to add adaptive case management support to BPM Suite.
- E. BPM Suite supports BPMN process modeling notation in both BPM Process Composer and BPM Studio.

Answer: AD

NEW QUESTION 5

Which three attributes are unique to adaptive case management-based processes as compared to traditional BPMN-based processes? (Choose three.)

- A. The sequence of execution of activities is determined by process participants at run time.
- B. They are routine, well-defined, structured processes.
- C. New stakeholders, not just task participants, may be added at run time.
- D. They are exclusively event-driven.
- E. They involve human-centric processing.

Answer: ACD

NEW QUESTION 6

Which two case elements can have due dates configured? (Choose two.)

- A. Case
- B. Case data
- C. Events
- D. Milestones
- E. Activities

Answer: AB

NEW QUESTION 7

Which two can be added as members of a static approval group? (Choose two.)

- A. Users
- B. Groups
- C. Application roles

- D. other approval groups
- E. WebLogic administrators

Answer: AD

Explanation: Members of a static approval group can be either users or other approval groups.
Reference: http://docs.tpu.ru/docs/oracle/en/fmw/11.1.1.6.0/user.1111/e15175/bpmug_ws_admin.htm

NEW QUESTION 8

Which statement describes how web forms are built?

- A. Technical developers create web forms by using BPM Studio and then business analysts edit them by using BPM Process Composer.
- B. Business analysts create web forms by using BPM Process Composer and then technical developers sometimes edit them by using BPM Composer.
- C. End users create web forms by using BPM Process Workspace and then technical developers sometimes edit them by using BPM Process Composer.
- D. Technical developers create web forms by using BPM Process Composer and then business analysts sometimes edit them by using BPM Studio.

Answer: D

NEW QUESTION 9

Which statement is accurate about providing process analytics in BPM Suite?

- A. BPM Suite supports KPI reporting for high-level business architecture models as well as for detailed BPMN process models.
- B. The primary focus of measurement and reporting of KPIs is to help operational personnel tune the BMP Suite runtime environment.
- C. End users use BPM Composer to review reports showing the results of KPI measurement.
- D. To see any populated business process performance dashboard charts, the project team needs to define KPIs in their models.

Answer: A

NEW QUESTION 10

Identify the gateway type that disallows an outgoing conditional path.

- A. Exclusive
- B. Inclusive
- C. Parallel
- D. Complex

Answer: C

Explanation: A Parallel Gateway creates parallel paths without checking any conditions; each outgoing Sequence Flow receives a token upon execution of this Gateway Reference: http://training-course-material.com/training/BPMN_2.0_Gateways#Parallel_Gateway (See Parallel Gateway, 2nd line).

NEW QUESTION 10

The process payload, including customer name and order ID, is stored based on a single XSD- based data object and the human tasks in the process use this XSD definition. End users need to see the customer name and the order ID as columns in their default inbox task list. Which three approaches best accomplish this requirement? (Choose three.)

- A. Either public or protected flex fields can be used to displays the customer name and order ID without having to add additional process payload data objects.
- B. Public flex fields can be used if two new simple data elements, representing the customer name and order ID, are added to the human task's list of data objects.
- C. Public flex fields can be used if two new simple process payload data objects, representing the customer name and order ID, are first added.
- D. Public flex fields can be used only if they have first been created in the workspace and the two have been added as mapped attributes in the human tasks.
- E. No changes to the human task's incoming data or data associations are necessary if protected flex fields are used.

Answer: ABE

NEW QUESTION 12

During a simu-lation run, a simu-lation definition may be associated with .

- A. one what-if scenario for a single process
- B. multiple what-if scenarios for a single process
- C. multiple processes and one what-if scenario for each process
- D. multiple processes and multiple what-if scenarios for each process

Answer: C

NEW QUESTION 14

What feature would you use if you want to step through a business process just to validate the flow, rules, and forms?

- A. Process Player
- B. Process Simulation
- C. Process Workspace
- D. BPMN Debugger

Answer: A

NEW QUESTION 19

Which statement is accurate about verbal rules and business phrases?

- A. Verbal ruled can be created in Business Process Composer, but not in BPM Studio.
- B. For a particular verbal rule, conditions and actions can include derived business phrases or user- defined business phrases, but not both.
- C. Derived business phrases are automatically created by using facts and globals in the rules dictionary.
- D. Verbal rules must be created in a separate ruleset from general rules and decision tables.

Answer: BC

NEW QUESTION 22

Which statement is true about the architecture of the business rules component?

- A. Facts are vocabulary elements that are used to construct tests and actions for verbal rules.
- B. You can use globals to help users modify rules without having to rework the rule logic.
- C. Unlike decision tables, if-then rules provide conflict resolution and gap analysis.
- D. In the action of a rule, you typically use the Fire RL (Rule Language) verb to invoke inferencing.

Answer: A

NEW QUESTION 24

Which two statements accurately explain how the Call activity behaves in a BPMN model? (Choose two.)

- A. When using a Call activity to invoke a reusable process, the data object values of the calling process are automatically made available to the called process.
- B. The Call activity can invoke a reusable process from within the current process
- C. If the process is to be invoked by a Call activity, the called process must start with one None Start Event.
- D. At a Call activity, the calling process does not wait until the called process or subprocess returns.

Answer: BC

Explanation: The call activity allows you to call a reusable process from within the current process.

Reference: https://docs.oracle.com/middleware/1213/bpm/bp-composer-user/app_bpmn_ref_bpmcu.htm#BPMCU87375

NEW QUESTION 27

Which statement is an unsupported scenario for virtualization through libOVD?

- A. Dynamic groups used to determine group membership.
- B. Users and groups used for task assignment are stored in a relational database.
- C. Users and groups used for task assignment are stored in an external LDAP server or the embedded LDAP server.
- D. Users and groups used for task assignment are stored in multiple external LDAP servers.

Answer: C

NEW QUESTION 28

Which is a capability of Web Form rules?

- A. altering execution of an unbounded ADF task flow
- B. inserting validation rules into an ADF page that a BPM Studio wizard has generated
- C. encoding-business policies that can be easily modified by end users at run time
- D. populating a dynamic drop-down list by accessing a RESTful service

Answer: D

NEW QUESTION 29

At design time, web forms created by using the Web Form Designer are associated only with human tasks inside the same .

- A. process
- B. space
- C. project
- D. application

Answer: A

NEW QUESTION 34

Which two statements describe how parallel and inclusive gateways work? (Choose two.)

- A. You specify conditions on outgoing sequence flows on a parallel gateway, but not on an inclusive gateway.
- B. More than one outgoing path can be followed out of an inclusive gateway, but not from a parallel gateway.
- C. For both types of gateways, a merge is used to wait for all tokens before proceeding.
- D. You can override standard merge behavior for both types of gateways so execution can proceed when a certain percentage of tokens have arrived at the merge.
- E. All conditions are evaluated in an inclusive gateway.

Answer: AC

NEW QUESTION 35

Which two statements are true about verbal rules and business phrases? (Choose two.)

- A. You can create a verbal rule with business phrases as a column in a decision table rule.
- B. Derived business phrases are automatically created by using facts, globals, and other information in the rules dictionary.
- C. User-defined business phrases can be explicitly authored to augment derived phrases.
- D. You can mark a verbal rule as draft in the Rules Editor.

Answer: BC

Explanation: Derived business phrases are automatically created using facts, globals and other information in the dictionary while user-defined phrases can be explicitly authored to augment derived phrases.

Reference: https://docs.oracle.com/middleware/1213/bpm/bp-composer-user/business_rules_bpmcu.htm#BPMCU506

NEW QUESTION 40

Which two statements are true about using Process Player to test a process? (Choose two.)

- A. All activities must be implemented for a process before you can run it with Process Player.
- B. When you are running a process by using Process Player and it reaches a user task that has an associated form, you must display the form to select the task outcome.
- C. As a process runs in Process Player, the BPMN diagram is animated to show the flow through the model.
- D. Before running Process Player, you must map all roles in your process to at least one user or group in your organization.

Answer: BD

NEW QUESTION 42

Which statement is true for a BPMN subprocesses?

- A. It has access to the data variables of the main process.
- B. Data have to be explicitly passed back and forth between the main process and the subprocess.
- C. The subprocess can be reused and called from other processes.
- D. The sequence flow inside a subprocess can be diverted and joined to the main flow without going through an end event.

Answer: C

NEW QUESTION 46

Which two components in a BPM project can be promoted to become a case activity? (Choose two.)

- A. Mediator
- B. BPEL
- C. Human task
- D. Business rule
- E. BPMN
- F. Spring

Answer: CE

Explanation: A case definition contains various case activities that represent the different work that the user can perform in the context of a case. Oracle BPM allows you to define case activities based on:

- a Human Task
- a BPMN process

Reference: http://docs.oracle.com/cd/E28280_01/doc.1111/e15176/case_mgmt_bpmpd.htm#BPMPD87410

NEW QUESTION 48

You have a situation where a collection of rules might provide a flexible way of externalizing logic in an application.

Which two are accurate considerations to access as you decide to use a decision table or if-then rules? (Choose two.)

- A. The decision table's spreadsheet metaphor is compact and familiar to end users.
- B. Decision tables can use globals while if-then rules cannot.
- C. The logic likely requires more rules if expressed as a decision table.
- D. Unlike with a decision table, an Expression Builder is provided for if-then rules to help you craft condition expressions.
- E. Built-in error prevention features for decision tables can help you build more complete and accurate rules.

Answer: BE

NEW QUESTION 53

In which two tools can you explore the path taken by a running process instance? (Choose two.)

- A. Enterprise Manager
- B. Process Composer
- C. Weblogic Console
- D. Business Process Workspace

Answer: AD

NEW QUESTION 55

Which two statements are true about the role of Oracle Business Rules in Adaptive Case Management (ACM)?

- A. Defining business rules is mandatory to be able to build, deploy, and run an ACM project.
- B. Business rules are used to handle case events and take specific actions on the case.
- C. Business rules are used to activate conditional case activities.
- D. Oracle Business Rules is an optional component of ACM.

Answer: CD

NEW QUESTION 60

Which two statements are correct on the use of business objects in a BPM project? (Choose two.)

- A. A business object is defined by a complex data type.
- B. Business objects are often defined in WSDL documents.
- C. A business object can inherit data and behavior from a parent business object.
- D. You can create a business object at either the project level or the process level.

Answer: BC

NEW QUESTION 62

Which two product features might a process analyst use the most in contrast to a process developer? (Choose two.)

- A. Process simulation.
- B. Business rules.
- C. Mediator services.
- D. Web Forms.
- E. BPM Studio.
- F. ADF forms.

Answer: AD

NEW QUESTION 64

Which two statements are accurate in describing features of Business Process Workspace? (Choose two.)

- A. To see tasks containing a particular word in the task title, you need to create a custom view.
- B. The definition and data for a new view can be shared with a colleague.
- C. A custom view needs to be created to enable the delegation of a task to another user.
- D. In a task view, the task list can be sorted based upon any visible column heading.

Answer: BC

NEW QUESTION 68

Which three options are human task patterns that cause the token to wait in the calling process until the human task is completed? (Choose three.)

- A. FYI
- B. Initiator
- C. Management
- D. Manual
- E. Group

Answer: BCE

Explanation: Pattern Description

Pattern	Description
Complex	Uses a complex routing flow that is defined within the human task.
Management	Uses the management chain pattern where the assignee is set to the management chain participant for the process participant belonging to the group or role assigned to the swimlane.
FYI	Bases assignment on the participant, role, or group defined in the swimlane. Similar to the interactive activity, but the FYI activity does not wait until completion before continuing.
Group	Uses the group vote pattern. The assignee for the task is automatically set to the role or group associated with the lane. This interactive activity can only be added to swimlanes that are assigned to roles or groups.
Initiator	The initiator pattern is used to create a process instance.

Reference: https://docs.oracle.com/middleware/1213/bpm/bp-composer-user/app_bpmn_ref_bpmcu.htm#BPMCU87357

NEW QUESTION 73

Which two statements are true about business architecture modeling in BPM Suite? (Choose two.)

- A. It fosters a top-down approach that allows for discovery of an organization's processes.
- B. It is required before BPMN modeling can begin for a specific process.
- C. It is supported by enterprise maps, value chain models, and strategy models created in BPM Studio.
- D. It allows you to define high-level processes that span an entire organization.
- E. It uses familiar BPMN notation to graphically describe high-level process areas.

Answer: AD

Explanation: Business Architecture is a methodology for performing high-level analysis of the business processes within your organization. These processes can be high-level processes that span an entire organization or specific, low-level processes performed within a specific group.

Business Architecture uses a top-down approach that allows for discovery of your organization's processes. You can define and evaluate high-level goals and map them to specific strategies for achieving them. You can also run reports on Business Architecture components to evaluate performance.
