NEW QUESTION 1

A scrum master has defined an iteration plan and created several tasks for the plan. The assigned team members are updating the tasks' attributes of Status, Estimate Correction and Time Remaining in the work item editors. How do these updates affect the plan's Work Breakdown view?

- A. The progress bars for each team member reflect the changes.
- B. The view shows work items organized into columns based on status.
- C. The tasks' ranks are updated automatically to reflect the updated attributes.
- D. They don't; the tasks must be modified in the plan editor to affect the pla

Answer: A

NEW QUESTION 2

A developer has created a repository workspace on the server and wants to be able to access the files locally via installed tools such as editors and compilers. What action must the developer take to accomplish this?

- A. Take a baseline of the components.
- B. Load the contents of the repository workspace.
- C. Check out the files and save copies to the file system.
- D. Modify the stream's flow target to match the repository workspac

Answer: A

NEW QUESTION 3

A developer working in the RTC Eclipse client has checked in their changes and found that another developer's incoming change set has affected the same file. The developer attempted to Auto Resolve the conflict, but was unsuccessful. Which of the following would cause this to occur?

- A. The incoming change set appended new lines to the file.
- B. The developer's change set included changes to multiple files.
- C. Both change sets contained changes to the same line in the file.
- D. Work items related to the change sets affect the same componen

Answer: A

NEW QUESTION 4

What is the source of the data to create metric based reports?

- A. RTC REST API
- B. CCM Database
- C. Data Warehouse
- D. Data Collection Component Database

Answer: B

NEW QUESTION 5

An administrator has created a new type of work item with its own unique workflow. When the users begin to use this new work item type, the available states and actions are not from the expected workflow. How can the administrator correct this?

- A. Compile the workflow source.
- B. Deploy the new work item type.
- C. Bind the workflow to the work item type.
- D. Publish the workflow for the work item typ

Answer: C

NEW QUESTION 6

A user would like to set up mandatory attributes. How can this be accomplished?

- A. Set a work item precondition.
- B. Update the work item type's workflow.
- C. Update the permissions for a specific role.
- D. Change a setting on the attribute definitio

Answer: A

NEW QUESTION 7

A team is struggling to find the correct build result and wants to automatically reduce the amount of results retained. How can this be accomplished?

- A. Manually delete them.
- B. Set up a pruning policy.
- C. Delete the build engine and create a new one.
- D. Delete the build definition and create a new one

Answer: D

NEW QUESTION 8

Management is asking for report describing all RTC users, team areas, team members and corresponding process roles, as well as team area administrators for an RTC project area.

How should the report be created?

- A. Generate Runtime Report using the RTC Eclipse client.
- B. Use the "repotools-jts" utility with the "exportUsers" option.
- C. Export users from the Team Organization View in the RTC Eclipse client.
- D. Export the users from the "Active Users" menu on the JTS Application Administration Web Page

Answer: D

NEW QUESTION 9

An organization plans to have a large number of project areas. The process engineering team plans to Change roles as well as the associated permissions. The organization does not allow changes to a project area process directly on the production system and needs to minimize the work to deploy a new process to all the project areas.

How can this be accomplished?

- A. Use Process Sharing.
- B. Extract the Process Templates.
- C. Export and import the Process Templates.
- D. Copy process XML to each production project area

Answer: B

NEW QUESTION 10

A user wants to add widgets from external sources to a RTC Dashboard. Which type can be added?

- A. Apache Widget
- B. Open Social Gadget
- C. Google Open Gadget
- D. External Content Widget

Answer: A

NEW QUESTION 10

A scrum master needs to manage work items from multiple project areas and create a cross-project plan with a set of master work items. The scrum master wants to see a roll up of the schedules of work items related to the master work items.

Which work item link type permits this?

- A. Parent
- B. Tracks
- C. Resolves
- D. Depends On

Answer: D

NEW QUESTION 11

When an RTC user logs onto the JTS Application Administration Web Page to create a new RTC user, the 'Users' menu does not appear. What is the reason for this?

- A. The user is not registered as a member of the project area.
- B. The user does not have JazzAdmins Repository Permission.
- C. The user does not have the proper RTC Client Access License.
- D. The user does not have JazzProjectAdmins Repository Permission

Answer: A

NEW QUESTION 12

A report author needs to produce a JRS report that only shows high priority work items. How can this be accomplished?

- A. Set up traceability links.
- B. Link the report to a query.
- C. Limit the project scope of the report
- D. Add an attribute condition to the report.

Answer: B

NEW QUESTION 14

An RTC administrator has installed JTS and CCM using a departmental server topology and completed the Jazz Team Server and Application Setup process. How many Public URIs (context root) exist for this topology?

- A. Zero

- B. 1 for JTS
- C. 1 for CCM
- D. 1 for JTS and 1 for CCM

Answer: C

NEW QUESTION 15

A user needs to import work items into a project area using the RTC Eclipse client. Which file content type can be used?

- A. XML document
- B. Rich Text document
- C. File Interchange format
- D. Comma Separated Value

Answer: C

NEW QUESTION 18

An organization is considering utilizing preconditions to enforce process behavior of work items. Which elements define the configuration? (Choose three.)

- A. Role
- B. Release
- C. Timeline
- D. Work Item
- E. Editor Presentation
- F. Operation Behavior

Answer: ABC

NEW QUESTION 20

The scrum master moves a story in the Quick Planner from the backlog to a sprint plan. Which attribute on the story was automatically updated by this action?

- A. Release
- B. Owned by
- C. Planned for
- D. Filed Against

Answer: D

NEW QUESTION 25

A user checks in changes and creates a baseline. The user later has doubts and wants to remove the baseline. How can this be achieved?

- A. Baselines created are permanent and cannot be deleted.
- B. A configuration manager can delete baselines in the component history.
- C. The user reverts the baseline which deletes it from the outgoing changes.
- D. The user can get rid of the baselines by replacing the components with an earlier baselin

Answer: B

NEW QUESTION 26

A user wants to create an enumeration. There is a requirement to allow users with the appropriate permissions to add new literals from the Work Item editor. Where does the enumeration need to be stored?

- A. Database
- B. Process Template
- C. Repository Workspace
- D. Process Specification

Answer: A

NEW QUESTION 29

An administrator is evaluating different templates and needs to select one for use on a new project area. Which of the following is the first consideration?

- A. The team area to release relationship.
- B. The number of teams in the project area.
- C. The development process of the software team.
- D. The geographical distribution of team member

Answer: D

NEW QUESTION 33

A development team would like to apply tighter governance of code towards the end of its release How is this implemented? (Choose two.)

- A. Restrict deliveries based on role.
- B. Restrict deliveries based on access group.
- C. Require read only attributes on work items.

- D. Require change sets to be approved before delivery.
- E. Restrict check-in to the developer repository workspac

Answer: DE

NEW QUESTION 38

A development team is using the RTC web interface to update plans and work items. One user notices that recent work item changes are not rendered in the web browser.

What is the reason for this?

- A. The web browser is caching the work items.
- B. The data warehouse has not yet been updated.
- C. The web browser version is no longer supported.
- D. User does not have permission to view the work ite

Answer: A

NEW QUESTION 42

A user would like to set up a variable with a value that can be referenced in other fields of the Build Definition editor. What must be added to the build definition?

- A. Labels
- B. Variables
- C. Attributes
- D. Properties

Answer: A

NEW QUESTION 45

Where would one determine how often the data warehouse is updated?

- A. The CCM advanced properties pages.
- B. On the Data Warehouse properties page.
- C. On the Report Builder administration page.
- D. On the Data Collection Component configuration and administration pag

Answer: C

NEW QUESTION 49

A project manager wants to create an effective project dashboard and is planning the content. Which points should be considered? (Choose three.)

- A. Determine the goals for the dashboard.
- B. Consider creating a project plan dashboard.
- C. Determine how the dashboard addresses the goals.
- D. Consider the layout and number of columns for the dashboard.
- E. Determine whether to use a personal, project or team dashboard.
- F. Choose reports to add to the dashboard that will display the appropriate metric

Answer: BEF

NEW QUESTION 50

Which build artifact allows developers to associate the outcome with a release?

- A. Build Result
- B. Build Script
- C. Build Engine
- D. Build Definition

Answer: B

NEW QUESTION 52

A scrum master wants to determine if the team has enough time to complete the work planned for an iteration. What is used to assess this?

- A. Plan's Task Board View
- B. Ranked List of work items
- C. Load Bar in the Plan Details
- D. Traceability View sorted by Estimate

Answer: B

NEW QUESTION 54

An administrator is designing the representation of the following:

- 1) which team is responsible for work items
- 2) in which build the defects were discovered
- 3) the timeframe for the work item to be completed Which of the following shows the correct relationships?

- A. Categories: Found In Releases: Planned For Iterations: Filed Against
- B. Team Areas: Planned For Releases: Filed Against Iterations: Found In
- C. Categories: Filed Against Releases: Found In Iterations: Planned For
- D. Team Areas: Filed Against Releases: Planned For Iterations: Found In

Answer: D

NEW QUESTION 56

A project has both new development and maintenance work, each with their own schedule. The scrum master has organized the project area into development and maintenance team areas. The scrum master wants to keep the work effort and planning for both teams separate. Which of the below can be defined to facilitate this?

- A. Cross-project plans for both teams.
- B. A timeline and iteration for each team.
- C. Sprint plans that match the team areas and categories.
- D. Divide the release backlog into corresponding team ownershi

Answer: D

NEW QUESTION 60

A project manager asks the administrator to restrict user access to the project area to only people on the project. Where would the administrator go in order to modify this?

- A. Access Groups
- B. Operational Behaviors
- C. Team Area Permissions
- D. Project Area Access Control

Answer: B

NEW QUESTION 63

A development has organized the source code into components and found that there is a strong dependency or containment relationship between two of the components.

What action could the development team take to establish this relationship?

- A. Take a baseline of both components.
- B. Update both component's Properties view.
- C. Utilize a work item to link both components.
- D. Create the Child component as a subcomponent of the paren

Answer: B

NEW QUESTION 68

A developer is working on a task with outgoing change sets in a loaded repository workspace when a manager identifies a new, critical task that must be performed immediately. There are currently no unresolved changes.

Without creating another repository workspace, how can the developer safely work on the critical task without losing the pending changes of the initial task?

- A. The user suspends the current change sets and starts working in a new change set.
- B. The user reloads the repository workspace and starts working in a new change set
- C. The user creates a new change set, selects it as the current change set and checks in all changes.
- D. The user loads the repository workspace in a different client and starts working in a new change se

Answer: B
