Oracle

Exam Questions 1Z0-435

Oracle Business Process Management Suite 12c Essentials

NEW QUESTION 1
Which statement accurately describes event-driven architecture?

A. It is a design approach that fosters creation of distinct pieces of software where each piece is a self-contained unit of functionality.
B. It is a programing paradigm that views processing as evaluation of functions without regard for application state.
C. it is a style of building software that specifies logic without describing its control flow.
D. It is an approach focusing on the production, detection, and consumption of potentially significant state changes.

Answer: C

NEW QUESTION 2
You pass some data from a process variable as a parameter into a human task. At a later time, the variable is then updated in a parallel stream of execution in the BPEL process while the human task is still executing before it is actioned by the assignee.
What does the assignee see after opening the task in the workspace and looking at the parameter?

A. The parameter contains the values of the process variable as it was when the task was created.
B. The parameter contains the values of the process variable as it is at the current time (that is, when the user opened the human task in the workspace).
C. The parameter is empty and the task must be restarted to pick up the new values of the process variable.
D. It is not possible to determine what the assignee sees from the information provided.

Answer: C

NEW QUESTION 3
Which two modeling approaches could be used to handle exceptions thrown by a service? (Choose two.)

A. subprocess
B. event subprocess
C. error and event
D. error catch event as a boundary event on the service task

Answer: BD

Explanation: You can handle the exceptions that occur in an activity using the following: *A boundary error catch event *An event subprocessBoundary error catch events enable you to resume the main process flow after handling theexception.If you want to reuse the exception handling flow for multiple tasks in your process, then eventsubprocesses are more efficient than boundary catch events. Event subprocesses enable you todefine a cleaner process with less effort because the catch error event is located within the eventsubprocess. To reuse an exception handling flow using boundary catch events, you must define aboundary catch event for each of the tasks, and then connect those boundary events to theexception handling flow.

NEW QUESTION 4
You are analyzing the different methods available to manage the life cycle of the OWSM policies
in your SOA/BPM environment. Identify two statements that correctly describe OWSM policy attachments. (Choose two.)

A. Although you can boss attach and detachsecurity policies in JDeveloper, you can detach themonly in Enterprise Manager.
B. An application developer typically uses JDeveloper to create new security policies rather thanselect them from a prebuilt list.
C. When you use JDeveloper to associate a security policy with a web service, the policy is notreally attached until application development.
D. OWSM policies can be attached and detached with WLST.

Answer: CD

NEW QUESTION 5
Which statement is true about a case activity that is defined as "Automatic" and "Conditional"?

A. The activity is run automatically as soon as the case starts.
B. The activity is run by the system only after it is initiated by the user.
C. The activity is automatically run by the system as soon asit is activated by a case rule.
D. Only a BPMN case activity can be defined as "Automatic" and "Conditional".

Answer: B

NEW QUESTION 6
Which two statements are accurate about how ADF Business Components can be used in a task flow for a human task? (Choose two.)

A. They can create and insert a new row in a database table.
B. They can invoke wildcard control flow rules in the task flow.
C. They can initialize the information displayed on a form when given an ID from the process payload.
D. They can declaratively map database information back into the process payload.
E. They can invoke task flow call activities.

Answer: BE

NEW QUESTION 7
Which statement is true about BPM Suite's round trip simu-lation feature?

A. Round trip simulation is a feature of a Process Player.
B. Basing a simulation on actual process runtime data can help you find bottlenecks in a process model.
C. Unit test suites can be automatically generated based upon round trip simulation data.
D. During round trip simulation generation, process bottlenecks are identified and highlighted on the model.

Answer: B

NEW QUESTION 8
You have a requirement to dynamically assign tasks at run time based on the employee's title. Which three could be used to accomplish this assignment? (Choose three.)

A. Use parametric roles to map the individual parametric role assignments and then map individual users to specific titles in the workspace using extended user propertie
B. Use parametric roles to map the individual parametric role assignments and then map LDAP groups to specific titles in the workspace using extended user propertie
C. In LDAP, ensure that individual users have been given titles and, in the workspace, associate the LDAP title attribute to a parametric rol
D. Use a business rule in the human task to dynamically assign work items to specific users or an LDAP group based on employee titl
E. In the process, edit the properties of the swimlane and assign a "title" string data object in the process payload to define a parametric role.

Answer: ABD

NEW QUESTION 9
The initial performer of a task is determined by the role associated with the swim lane in which the task is modeled except when you use a(n) _____.

A. complex task
B. user task
C. FYI task
D. group task

Answer: A

Explanation: A complex user task uses a complex routing flow that is defined within the humantask.BPM Studio offers a number of human task patterns out of the box, to make it easy to implementthe most common types of human tasks. For example, the Simple pattern just assigns individualusers or groups. The Management pattern is used for a sequential list of approvers up themanagement chain. Initiator is for the person who kicks off the process.For most of these,swimlane roles are used to determine assignments. For the Complex task, however, the swimlaneis irrelevant, and routing and assignments are typically more complicated.Note: Swimlanes are the horizontal lines that run across the process editor. All flow objects mustbe placed within a swimlane.Swimlanes can also be used to group flow objects based on the roles defined within your process.Swimlanes that contain user tasks must have roles assigned to them. Swimlanes visually displaythe role responsible for performing each flow object within your process. Additionally, you canhave multiple swimlanes that are assigned to the same role.Swimlanes can make your process more readable when you must use the same role in differentparts of the same process.

NEW QUESTION 10
Which statement is true about how if-then rules are processed during an inferencing session?

A. Rules are evaluated in the order in which they were added to the ruleset.
B. A particular rule can be fired only once in an inferencing session.
C. The effective date set for a rule can take it out of consideration for evaluation.
D. A priority setting of 1 causes the rule to fire during each inferencing session.
E. Rules with multiple IF conditions receive higher priority during evaluation.

Answer: AB

NEW QUESTION 10
Which two statements accurately identify capabilities available for rules testing? (Choose two.)

A. You can create a test suite or a test template without first creating a design function.
B. You can test rulesets by creating a business rules function that calls the decision function.
C. You can use Enterprise Manager to test rules via a decision function.
D. You can mark individual test suites as "draft" to turn them off for test validation.

Answer: BD

Explanation: You can test rulesets by creating a decision function and calling the decision function from Rules Designer with an Oracle Business Rules function. Draft Test check box to turn off the test validation.
Reference: http://docs.oracle.com/middleware/1213/bpm/rules-user/testing.htm#ASRUG982

NEW QUESTION 13
Which three attributes are unique to adaptive case management-based processes as compared to traditional BPMN-based processes? (Choose three.)

A. The sequence of execution of activities is determined by process participants at run time.
B. They are routine, well-defined, structured processes.
C. New stakeholders, not just task participants, may be added at run time.
D. They are exclusively event-driven.
E. They involve human-centric processing.

Answer: ACD

NEW QUESTION 17
Which action enables support for virtualization through libOVD?

A. Update the order of the WebLogic authentication providers to put the LDAP providers first.
B. Use Enterprise Manager or WLST to add the virtualize=true property to the SOA Common Properties MBean.
C. Use Enterprise Manager or WLST to add the virtualize=true property to the domain level Identity Store Configuration.
D. Update the domain directory to include a valid libOVD adapter configuration file under the config/ fmwconfig folder.

Answer: C

NEW QUESTION 21
Which two case elements can have due dates configured? (Choose two.)

A. Case
B. Case data
C. Events
D. Milestones
E. Activities

Answer: AB

NEW QUESTION 22
Which two can be added as members of a static approval group? (Choose two.)

A. Users
B. Groups
C. Application roles
D. other approval groups
E. WebLogic administrators

Answer: AD

Explanation: Members of a static approval group can be either users or other approval groups.
Reference: http://docs.tpu.ru/docs/oracle/en/fmw/11.1.1.6.0/user.1111/e15175/bpmug_ws_admin.htm

NEW QUESTION 25
To assign a global unique identifier (GUID) to a variable, you use a(n) .

A. simple expression
B. XPath expression
C. XSLT transformation
D. call to a JavaScriot function

Answer: B

NEW QUESTION 30
Which objective can be accomplished by using business rules in workflow routing?

A. Create a new routing rule and invoke it immediately.
B. Create new participants and make them available as targets for routing.
C. Send a routing sleep back to the previous participant for a workflow stage that is associated with a group vote (parallel) scenario.
D. Make a routing decision before the task is assigned to the next routing slip participant.

Answer: D

NEW QUESTION 35
Which statement describes how web forms are built?

A. Technical developers create web forms by using BPM Studio and then business analysts edit them by using BPM Process Composer.
B. Business analysts create web forms by using BPM Process Composer and then technical developers sometimes edit them by using BPM Composer.
C. End users create web forms by using BPM Process Workspace and then technical developers sometimes edit them by using BPM Process Composer.
D. Technical developers create web forms by using BPM Process Composer and then business analysts sometimes edit them by using BPM Studio.

Answer: D

NEW QUESTION 36
Which statement is accurate about providing process analytics in BPM Suite?

A. BPM Suite supports KPI reporting for high-level business architecture models as well as for detailed BPMN process models.
B. The primary focus of measurement and reporting of KPIs is to help operational personnel tune the BMP Suite runtime environment.
C. End users use BPM Composer to review reports showing the results of KPI measurement.
D. To see any populated business process performance dashboard charts, the project team needs to define KPIs in their models.

Answer: A

NEW QUESTION 41
Identify the gateway type that disallows an outgoing conditional path.

A. Exclusive
B. Inclusive
C. Parallel
D. Complex

Answer: C

Explanation: A Parallel Gateway creates parallel paths without checking any conditions; each outgoing Sequence Flow receives a token upon execution of this Gateway Reference: http://training-course- material.com/training/BPMN_2.0_Gateways#Parallel_Gateway (See Parallel Gateway, 2nd line).

NEW QUESTION 42
Which two statements are true for decision table rules? (Choose two.)

A. They can have multiple conditions, but share only one action.
B. They typically contain a set of rules that covers all combinations or where no two combinations conflict.
C. Both gap detection and conflict resolution cannot be turned off at the same time.
D. A priority can be set for an entire decision table.

Answer: BD

Explanation: A Decision Table is an alternative business rule format that is more compact and intuitive when many rules are required to analyze many combinations of property values. You can use a Decision Table to create a set of rules that covers all combinations or where no two combinations conflict.
Reference: http://docs.oracle.com/middleware/1213/bpm/bp-composer-user/business_rules_bpmcu.htm#BPMCU495

NEW QUESTION 43
What feature would you use if you want to step through a business process just to validate the flow, rules, and forms?

A. Process Player
B. Process Simulation
C. Process Workspace
D. BPMN Debugger

Answer: A

NEW QUESTION 45
Value chain models allow you to specify more details about a process area that may have been identified in an enterprise map. Which two statements are true about how the details are specified in a value chain model? (Choose two.)

A. A value chain model is the starting point for process decomposition in business architecture modeling.
B. A step can be broken down into a separate value chain model to create a hierarchical group of value chain models.
C. It documents goals, objectives, and strategies for a business area.
D. A step can be linked to a BPMN process model.
E. There is typically just one value chain model for an entire organization.

Answer: B

Explanation: Reference: http://docs.oracle.com/middleware/1213/bpm/bp-composer-user/ba_project_bpmcu.htm#BPMCU99994 (4.1.2)

NEW QUESTION 49
Which statement is accurate about verbal rules and business phrases?

A. Verbal ruled can be created in Business Process Composer, but not in BPM Studio.
B. For a particular verbal rule, conditions and actions can include derived business phrases or user- defined business phrases, but not both.
C. Derived business phrases are automatically created by using facts and globals in the rules dictionary.
D. Verbal rules must be created in a separate ruleset from general rules and decision tables.

Answer: BC

NEW QUESTION 52
Which two statements accurately explain how the Call activity behaves in a BPMN model? (Choose two.)

A. When using a Call activity to invoke a reusable process, the data object values of the calling process are automatically made available to the called process.
B. The Call activity can invoke a reusable process from within the current process
C. If the process is to be invoked by a Call activity, the called process must start with one None Start Event.
D. At a Call activity, the calling process does not wait until the called process or subprocess returns.

Answer: BC

Explanation: The call activity allows you to call a reusable process from within the current process.
Reference: https://docs.oracle.com/middleware/1213/bpm/bp-composer-user/app_bpmn_ref_bpmcu.htm#BPMCU87375

NEW QUESTION 56
Which two statements are accurate descriptions of how process data objects or project data objects are used? (Choose two.)

A. A process data object can be based on either a basic data type or a complex data type.
B. A process data object is associated with a module where it resides.
C. One of the main benefits of defining process data objects is that you can configure Business Process WorkSpace views to display their values.
D. Project data objects are not used to share data values between processes.

Answer: AD

Explanation: Basic and complex data types can both be defined as either process or project data objects.
Although project data objects allow you to define data objects that are used by all processes in a project, they are not global data objects. Each process within your project uses its own version of the data object. Project data objects are not used to share data between processes. To share data between processes, you must create data associations.

NEW QUESTION 60
Which two statements accurately describe how Oracle Web Services Manager works? (Choose two.)

A. On the client side, the agent coordinates a pipeline of policy interceptors that apply policy assertions to the request in a standardized, predetermined order.
B. On the service side, policy assertions are processed in reverse order of the client side before the request is delivered to the service.
C. On the client side, the policy manager coordinates a pipeline of agents that apply policy assertions to the request in the order specified by the developer.
D. On the service side, policy assertions are processed in the same order as on the client side before the request is delivered to the service.

Answer: AB

NEW QUESTION 65
At design time, web forms created by using the Web Form Designer are associated only with human tasks inside the same .

A. process
B. space
C. project
D. application

Answer: A

NEW QUESTION 66
Which two statements are true about running and analyzing simu-lation results? (Choose two.)

A. You must wait until a simulation run finishes in order to see up-to-date results in charts.
B. During a simulation run, in-flight instances are always allowed to finish before a simulation completes.
C. During a simulation run, cost and time data are automatically collected for all activities, events, and gateways.
D. You can use only Business Process Composer to create and run simulations.
E. The number appearing above the left-most bar atop an activity represents the high water mark for the queue.

Answer: BD

Explanation:

Let in-flight instances finish before simulation ends	If selected, simulation ends only when t specified number of instances complete unselected, simulation stops after the si duration is completed. At that point, all incomplete instances are shown in eithe process" or "queue" status.

In Business Process Composer you can only run simulations based on test data you define using Business Process Composer.

NEW QUESTION 70
Which two statements describe how parallel and inclusive gateways work? (Choose two.)

A. You specify conditions on outgoing sequence flows on a parallel gateway, but not on an inclusive gateway.
B. More than one outgoing path can be followed out of an inclusive gateway, but not from a parallel gateway.
C. For both types of gateways, a merge is used to wait for all tokens before proceeding.
D. You can override standard merge behavior for both types of gateways so execution can proceed when a certain percentage of tokens have arrived at the merge.
E. All conditions are evaluated in an inclusive gateway.

Answer: AC

NEW QUESTION 71
By default, which two tasks participant roles can change the outcome of a task? (Choose two.)

A. Admin
B. Approvers

C. Assignees
D. Creator
E. Owner
F. Reviewer

Answer: CE

Explanation: The task owner can change both the outcome of the task and the assignments.
The assignee can raise questions about the work, by adding comments into the task to communicate to the owner or followers about their progress. For example, if an assignee cannot complete the task, they can either change the assignee back to the owner, or add a comment into the task while changing the task status to "need assistance".

NEW QUESTION 73
Which two statements are true about verbal rules and business phrases? (Choose two.)

A. You can create a verbal rule with business phrases as a column in a decision table rule.
B. Derived business phrases are automatically created by using facts, globals, and other information in the rules dictionary.
C. User-defined business phrases can be explicitly authored to augment derived phrases.
D. You can mark a verbal rule as draft in the Rules Editor.

Answer: BC

Explanation: Derived business phrases are automatically created using facts, globals and other information in the dictionary while user-defined phrases can be explicitly authored to augment derived phrases.
Reference: https://docs.oracle.com/middleware/1213/bpm/bp-composer-user/business_rules_bpmcu.htm#BPMCU506

NEW QUESTION 78
Which event will be raised when a case is suspended?

A. Lifecycle
B. Activity
C. Milestone
D. User-defined

Answer: D

NEW QUESTION 81
To establish the integration between BPM Suite and BAM 12c, you need to .

A. do nothing as they are integrated out-of-the-box
B. set the DisableProcessMetricsMBean setting to false on the SOA server
C. set the DisableProcessMetricsMBean setting to false on the BAM server
D. set the DisableMonitorExpressMBean setting to false on the SOA server

Answer: B

NEW QUESTION 86
Which two components in a BPM project can be promoted to become a case activity? (Choose two.)

A. Mediator
B. BPEL
C. Human task
D. Business rule
E. BPMN
F. Spring

Answer: CE

Explanation: A case definition contains various case activities that represent the different work that the user can perform in the context of a case. Oracle BPM allows you to define case activities based on:
▪ a Human Task
▪ a BPMN process
Reference: http://docs.oracle.com/cd/E28280_01/doc.1111/e15176/case_mgmt_bpmpd.htm#BPMPD87410

NEW QUESTION 90
Which component enables a shared work environment for a BPM Suite 12c project where process analysts use Process Composer and process developers use BPM Studio?

A. Oracle Enterprise Repository
B. Meta Data Services
C. Process Asset Manager
D. Apache Derby DB

Answer: C

Explanation: You can use the Process Asset Manager to share BPM projects between the different persons working on the project
Reference: https://docs.oracle.com/middleware/1213/bpm/bpm-develop/bac_bpmpd.htm#BPMPD87526

NEW QUESTION 91
You have a situation where a collection of rules might provide a flexible way of externalizing logic in an application.
Which two are accurate considerations to access as you decide to use a decision table or if-then rules? (Choose two.)

A. The decision table's spreadsheet metaphor is compact and familiar to end users.
B. Decision tables can use globals while if-then rules cannot.
C. The logic likely requires more rules if expressed as a decision table.
D. Unlike with a decision table, an Expression Builder is provided for if-then rules to help you craft condition expressions.
E. Built-in error prevention features for decision tables can help you build more complete and accurate rules.

Answer: BE

NEW QUESTION 93
In which two tools can you explore the path taken by a running process instance? (Choose two.)

A. Enterprise Manager
B. Process Composer
C. Weblogic Console
D. Business Process Workspace

Answer: AD

NEW QUESTION 98
What determines the life span of the value in a subprocess data object?

A. process
B. task
C. subprocess
D. project

Answer: D

NEW QUESTION 100
Which two statements are true about the role of Oracle Business Rules in Adaptive Case Management (ACM)?

A. Defining business rules is mandatory to be able to build, deploy, and run an ACM project.
B. Business rules are used to handle case events and take specific actions on the case.
C. Business rules are used to activate conditional case activities.
D. Oracle Business Rules is an optional component of ACM.

Answer: CD

NEW QUESTION 101
When automatically generating an ADF form from a human task, the difference between using the "Auto- Generate Task Form" and the "Launch Task Form Wizard" is that the .

A. "Launch Task Form Wizard" option launches a six-step "BPM Custom Form Wizard" and the "Auto- Generate" option creates the ADF project, task flow, and ADF form with one key click
B. "Launch Task Form Wizard" option does not create a new ADF project every time it is run
C. "Auto-Generate" option gives you the choice to use an existing ADF page template as the form is being created.
D. "Launch Task Form Wizard" option automatically creates an ADF page template and task flow template

Answer: D

NEW QUESTION 105
Which two product features might a process analyst use the most in contrast to a process developer? (Choose two.)

A. Process simulation.
B. Business rules.
C. Mediator services.
D. Web Forms.
E. BPM Studio.
F. ADF forms.

Answer: AD

NEW QUESTION 107
Human workflow is implemented as a .

A. component within the BPEL service engine
B. separate Java server running on WebLogic Server

C. service engine within the SOA infrastructure
D. component within the BPMN service engine

Answer: C

NEW QUESTION 108
Which two statements are accurate in describing features of Business Process Workspace? (Choose two.)

A. To see tasks containing a particular word in the task title, you need to create a custom view.
B. The definition and data for a new view can be shared with a colleague.
C. A custom view needs to be created to enable the delegation of a task to another user.
D. In a task view, the task list can be sorted based upon any visible column heading.

Answer: BC

NEW QUESTION 112
A task is considered overdue when .

A. there are no more renewals
B. the current date is beyond the due date
C. the current date is beyond the expiration date
D. the current date is beyond both the expiration date and the due date

Answer: B

Explanation: A task is considered overdue after it is past the specified due date. This date is in addition to the expiration policy. A due date can be specified irrespective of whether an expiration policy has been specified. The due date enables Oracle BPM Worklist to display a due date, list overdue tasks, highlight overdue tasks in the inbox, and so on.
Reference: https://lomonzhang.wordpress.com/2010/07/28/the-difference-of-%E2%80%98due-date%E2% 80%99-and-%E2%80%98expiration-date%E2%80%99in-oracle-human-tasks/

NEW QUESTION 117
Which three options are human task patterns that cause the token to wait in the calling process until the human task is completed? (Choose three.)

A. FYI
B. Initiator
C. Management
D. Manual
E. Group

Answer: BCE

Explanation: Pattern Description

Pattern	Description
Complex	Uses a complex routing flow that is defined within the human task.
Management	Uses the management chain pattern where the assignee is set to the management chain pa[...] for the process participant belonging to the group or role assigned to the swimlane.
FYI	Bases assignment on the participant, role, or group defined in the swimlane. Similar to the interactive activity, but the FYI activity does not wait until completion before continuing.
Group	Uses the group vote pattern. The assignee for the task is automatically set to the role or gr[...] associated with the lane. This interactive activity can only be added to swimlanes that are assigned to roles or groups.
Initiator	The initiator pattern is used to create a process instance.

Reference: https://docs.oracle.com/middleware/1213/bpm/bp-composer-user/app_bpmn_ref_bpmcu.htm#BPMCU87357

NEW QUESTION 118
Which two statements are true about business architecture modeling in BPM Suite? (Choose two.)

A. It fosters a top-down approach that allows for discovery of an organization's processes.
B. It is required before BPMN modeling can begin for a specific process.
C. It is supported by enterprise maps, value chain models, and strategy models created in BPM Studio.
D. It allows you to define high-level processes that span an entire organization.
E. It uses familiar BPMN notation to graphically describe high-level process areas.

Answer: AD

Explanation: Business Architecture is a methodology for performing high-level analysis of the business processes within your organization. These processes can be high-level processes that span an entire organization or specific, low-level processes performed within a specific group.
Business Architecture uses a top-down approach that allows for discovery of your organization's processes. You can define and evaluate high-level goals and map them to specific strategies for achieving them. You can also run reports on Business Architecture components to evaluate performance.
Reference: http://docs.oracle.com/middleware/1213/bpm/bp-composer-user/ba_project_bpmcu.htm#BPMCU880

NEW QUESTION 123
......

Thank You for Trying Our Product

We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions

2nd - Questons and Answers in PDF Format

1Z0-435 Practice Exam Features:

* 1Z0-435 Questions and Answers Updated Frequently

* 1Z0-435 Practice Questions Verified by Expert Senior Certified Staff

* 1Z0-435 Most Realistic Questions that Guarantee you a Pass on Your FirstTry

* 1Z0-435 Practice Test Questions in Multiple Choice Formats and Updatesfor 1 Year

100% Actual & Verified — Instant Download, Please Click
Order The 1Z0-435 Practice Test Here
