NEW QUESTION 1
You have recently purchased a new wireless router. You would like to configure a name for your wireless network so that you can easily identify it when scanning available wireless networks.
Which term describes this wireless network device name?

A. Default gateway
B. Wireless access point (AP)
C. Access Point Identifier (API)
D. Service Set Identifier (SSID)

Answer: D

NEW QUESTION 2
Which term describes the practice of actively collecting wireless networking data from companies and individuals?

A. War driving
B. Spear phishing
C. Dictionary attack
D. Social engineering

Answer: A

NEW QUESTION 3
Virtualization software transforms the hardware resources of a physical computer to create a fully functional virtual computer that can run its own operating systems and applications. In addition to the CPU and RAM, which hardware resources are used by virtualization software?

A. Hard disk and USB devices
B. Hard disk and network devices
C. Virtual hard disk and network devices
D. Network devices and secondary storage devices

Answer: B

NEW QUESTION 4
Disaster recovery planning is considered a best practice for all organizations. It is even more important when cloud-computing services are used. Which of the following should be included as part of a disaster recovery plan for companies that use cloud-based services?

A. Company organizational chart
B. Malware and anti-virus software updates
C. Service-level agreement with a cloud-provider
D. Inventory of services not dependent on the cloud provider

Answer: C

NEW QUESTION 5
Henry is the network manager at XYY Corporation, a large manufacturing company that competes in the global market. The company's computing environment is extremely complex and includes several proprietary software systems, all of which require custom configuration of network devices to operate correctly. The company's executive management team believes that they can benefit by switching the company over to any cloud-based service. Henry disagrees.
What is a disadvantage of cloud-based services that Henry can cite to support his position?

A. Cloud-based services provide no maintenance or support.
B. Cloud-based services are typically more costly than in-house solutions.
C. The company must typically purchase additional servers to support connections to these types of cloud-based service providers.
D. Cloud-based services are typically more limited in offerings and configurations than the company currently supports in-house.

Answer: D

NEW QUESTION 6
What is the distinguishing difference between a LAN and WAN?

A. A LAN is a group of networked computers within a confined geographic area.
B. A WAN is a group of networked computers within a confined geographic area.
C. A LAN typically provides slower network connection speeds than a WAN.
D. A WAN is commonly used for intra-office communication.

Answer: A

NEW QUESTION 7
