

**Microsoft**

## **Exam Questions AZ-302**

Microsoft Azure Solutions Architect Certification Transition

NEW QUESTION 1

- (Exam Topic 1)

You have an Azure Service Bus.

You need to implement a Service Bus queue that guarantees first-in-first-out (FIFO) delivery of messages. What should you do?

- A. Enable partitioning.
- B. Set the Max Size setting of the queue to 5 GB.
- C. Enable duplicate detection.
- D. Enable sessions.
- E. Set the Lock Duration setting to 10 seconds.

Answer: A

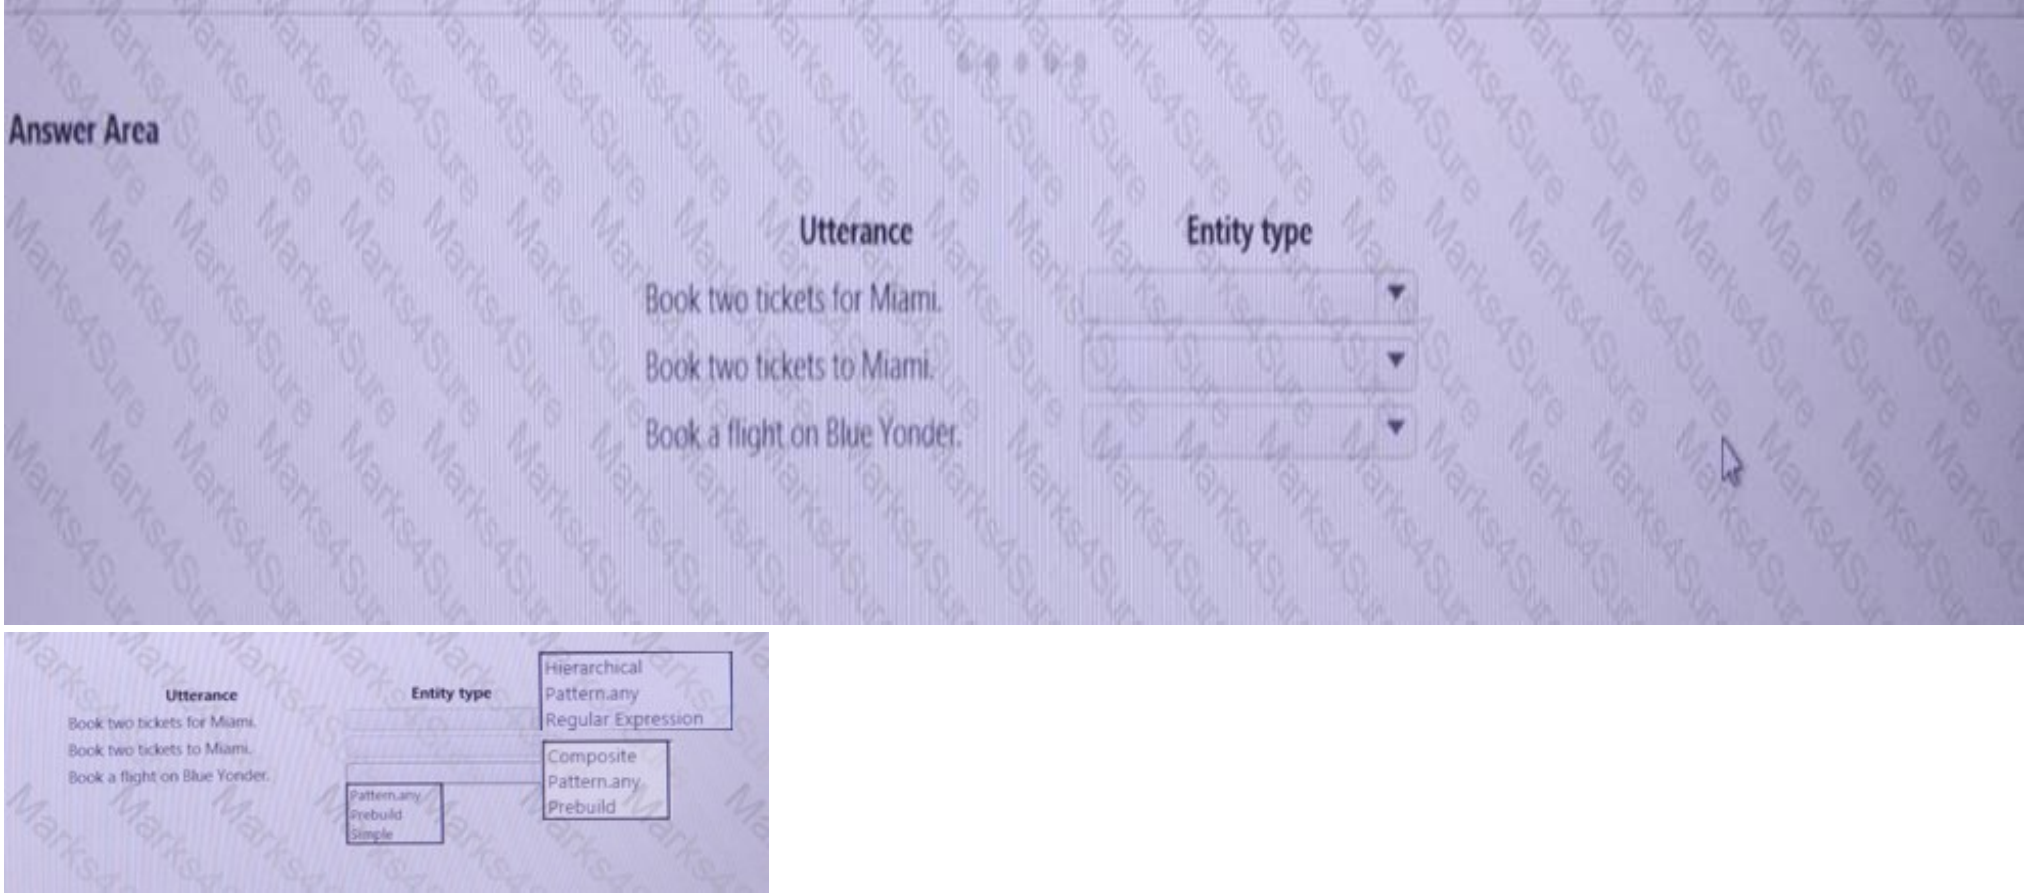

NEW QUESTION 2

- (Exam Topic 1)

You are creating a flight reservations chat bot in a web app. You use Language Understanding Intelligence Services (LUIS) and Microsoft Cognitive Service APIs to create the chat bot.

You add a pre-built domain and provide intents and utterances. You need more than the intent name for your chat bot to act on concepts. You need to choose entities for those concepts that have actions assigned for the app.

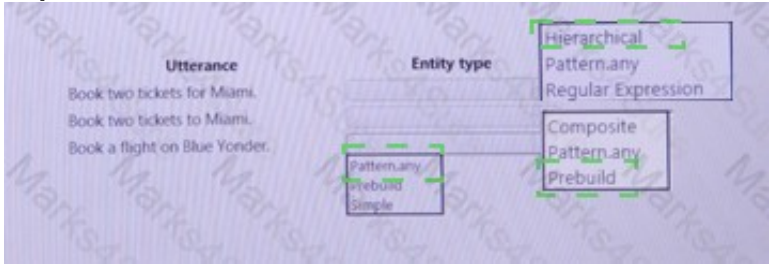

Which entities should you use? To answer, select the appropriate options in the answer area. NOTE: ach connect selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 3

- (Exam Topic 1)

You have standard Load balancer configured to support three virtual machines on the same subnet. You need to recommend a solution to notify administrators when the load balancer fails.

Which metrics should you recommend using to test the load balancer? To answer, drag the appropriate metrics to the correct conditions. Each metric may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

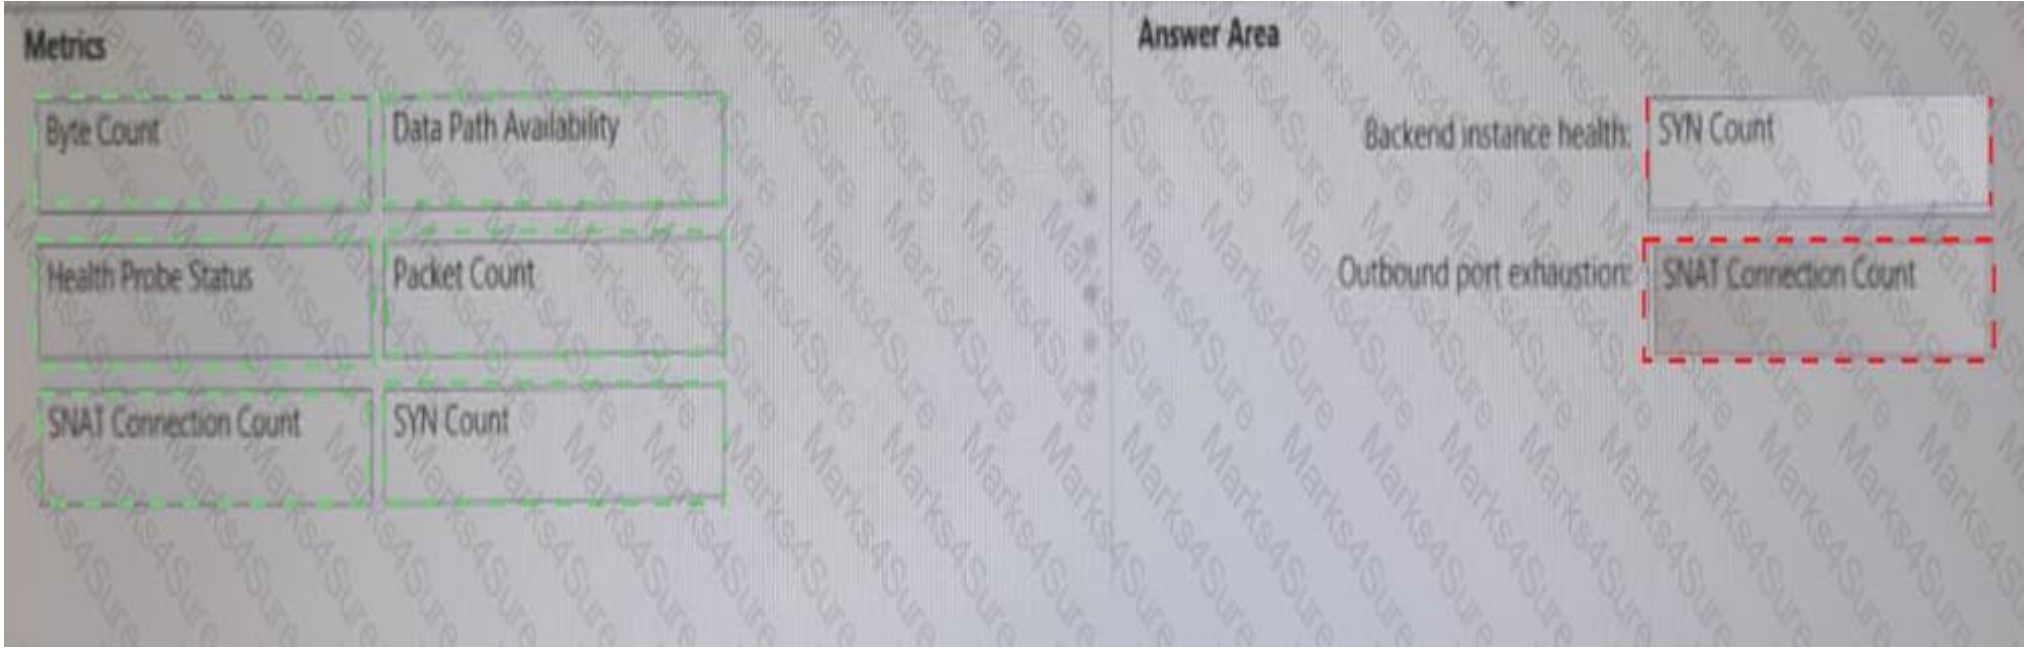

NOT: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 4

- (Exam Topic 1)

Members of the finance department for a company review and make changes to a Microsoft Excel workbook that is hosted on OneDrive. The workbook contains projected costs and revenue for a project.

You need to develop an Azure Function that ingests data from the modified workbook and places it into a Microsoft Word document.

Which two objects should you implement? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. An Excel table output binding
- B. A group conversation subscription
- C. A group subscription
- D. An auth token input binding
- E. An Excel table input binding

Answer: BE

NEW QUESTION 5

- (Exam Topic 1)

You are designing a network connectivity strategy for a new Azure subscription. You identify the following requirements

- \* The Azure virtual machines on a subnet named Subnet must be accessible only from me computers in your London office.
- \* Engineers -equ.re access to the Azure virtual machines on a subnet named Subnets over the Internet on a specific TCP/IP management port.
- \* The Azure virtual machines in the West Europe Azure region must be able to communkate on all ports to the Azure virtual machine in the North Europe Azure region.

You need to recommend which components must be used to meet me requirement

What should you include m the recommendation? To answer, drag me appropriate components .a the correct requirement. Each component may be used once, more than once.

not at all You may need to drag the split bar between panes or scroll to view content NOTE: Each correct selection is worm one point

Components	Answer Area	
An Azure ExpressRoute connection	The Azure virtual machines on Subnet1 must be accessible only from the computers in the London office:	Component
A network security group (NSG)	Engineers require access to the Azure virtual machines on Subnet2 over the Internet on a specific TCP/IP management port:	Component
A new virtual network	The Azure virtual machines in the West Europe region must be able to communicate on all ports to the Azure virtual machines in the North Europe region:	Component
A site-to-site VPN		
Virtual network peering		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Components	Answer Area	
An Azure ExpressRoute connection	The Azure virtual machines on Subnet1 must be accessible only from the computers in the London office:	A site-to-site VPN
A network security group (NSG)	Engineers require access to the Azure virtual machines on Subnet2 over the Internet on a specific TCP/IP management port:	A network security group (NSG)
A new virtual network	The Azure virtual machines in the West Europe region must be able to communicate on all ports to the Azure virtual machines in the North Europe region:	An Azure ExpressRoute connection
A site-to-site VPN		
Virtual network peering		

NEW QUESTION 6

- (Exam Topic 1)  
You configure OAuth 2 authorization in API Management as shown in the following exhibit.

Add OAuth2 service
API Management service

\* Display name

Unique name used to reference this authorization server on the p... ✓

\* Id ⓘ

✓

Description

Authorization server description

\* Client registration page URL

https://contoso.com/register ✓

Authorization grant types

☒ Authorization code
☐ Implicit
☐ Resource owner password
☐ Client credentials

\* Authorization endpoint URL

https://login.microsoftonline.com/onmicrosoft.com/ ✓

☐ Support state parameter

Authorization request method

☒ GET
☐ POST

\* Token endpoint URL

Additional body parameters using application/x-www-form-urlencoded format

Create

The selected authorization grant type is for [answer choice].

- Background services
Headless device authentication
Single page applications
Web Applications

To enable custom data in the grant flow, select [answer choice].

- Client credentials
Implicit
Resource owner password
Support state parameter

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

The selected authorization grant type is for [answer choice].

NEW QUESTION 7

- (Exam Topic 1)

You develop cloud solutions for an organization. The organization creates a mailing list for each new project that is announced to the public. You add users manually to a MailChimp list when a request email is sent to a community manager's Microsoft Office 365 email account.

You need to automate the process of adding new users to the MailChimp list by using an Azure Logic App.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Add an Office 365 Outlook create event action.

Add an Office 365 Outlook approval email action.

Add a condition.

Add an action to the If True branch that adds the user to the MailChimp list.

Create a trigger for incoming Office 365 email.

Create an Azure Logic App.

Answer area

>

<

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Actions

Add an Office 365 Outlook create event action.

Add an Office 365 Outlook approval email action.

Add a condition.

Add an action to the If True branch that adds the user to the MailChimp list.

Create a trigger for incoming Office 365 email.

Create an Azure Logic App.

Answer area

Add an Office 365 Outlook approval email action.

Add a condition.

Create an Azure Logic App.

Add an Office 365 Outlook create event action.

Create a trigger for incoming Office 365 email.

NEW QUESTION 8

- (Exam Topic 1)

You plan to deploy an API by using Azure API Management.

You need to recommend a solution to protect the API from a distribute derail of service (DDoS) attack. What should you recommend/

- A. Create network security groups (NSG)
- B. Enable rate limiting
- C. Strip the Power-By response header
- D. Enable quotas.

**Answer: A**

#### NEW QUESTION 9

- (Exam Topic 1)

You have an Azure subscription that contains a custom application named Application was developed by an external company named fabric, Ltd. Developers at Fabrikam were assigned role-based access control (RBAV) permissions to the Application components. All users are licensed for the Microsoft 365 E5 plan.

You need to recommends a solution to verify whether the Faricak developers still require permissions to Application1. The solution must the following requirements.

\* To the manager of the developers, send a monthly email message that lists the access permissions to Application1.

\* If the manager does not verify access permission, automatically revoke that permission.

\* Minimize development effort. What should you recommend?

- A. Create an Azure Automation runbook that the Get-AureADUSAppRoleAssigmetry cmdlet.
- B. In azure Active directory (Azure AD) create an access review of application1.
- C. In Azure Active Directory (AD) privileged identity Managed, create a custom roles assignment for the Application 1 resources.
- D. Create an Azure Automation runbook that runs the get-AzureRaRolesAssigned cmdlet.

**Answer: A**

#### NEW QUESTION 10

- (Exam Topic 1)

A company is developing a solution that allows smart refrigerators to send temperature information to a central location.

The solution must receive and store messages until they can be processed. You create an Azure Service Bus instance by providing a name, pricing tier, subscription, resource group, and location.

You need to complete the configuration.

Which Azure CU or PowerShell command should you run?

A)

```
New-AzureRmServiceBusQueue
-ResourceGroupName fridge-rg
-NamespaceName fridge-ns
-Name fridge-q
-EnablePartitioning $False
```

B)

```
az group create
--name fridge-rg
--location fridge-loc
```

C)

```
New-AzureRmResourceGroup
-Name fridge-rg
-Location fridge-loc
```

D)

```
connectionString=$(az servicebus namespace authorization-rule keys list
--resource-group fridge-rg
--fridge-ns fridge-ns
--name RootManageSharedAccessKey
--query primaryConnectionString --output tsv)
```

- A. Option A
- B. Option B
- C. Option C
- D. Option D

**Answer: D**

#### NEW QUESTION 10

- (Exam Topic 1)

Your company has 300 virtual machines hosted in a VMWare environment. The virtual machines vary in size and have various utilization levels.

You plan to move all the virtual machines to Azure.

You need to recommend how many and what size Azure virtual machines will be required to move the current workloads to Azure. The solution must minimize administrative effort.

What should you use to make the recommendation?

- A. Azure Cost Management
- B. Azure Migrate
- C. Azure pricing calculator
- D. Azure Advisor recommendations

**Answer: A**

#### NEW QUESTION 12

- (Exam Topic 1)

You have an on-premises network that uses an IP address space of 172.16.0.0/16. You plan to deploy 25 virtual machines to a new Azure subscription.

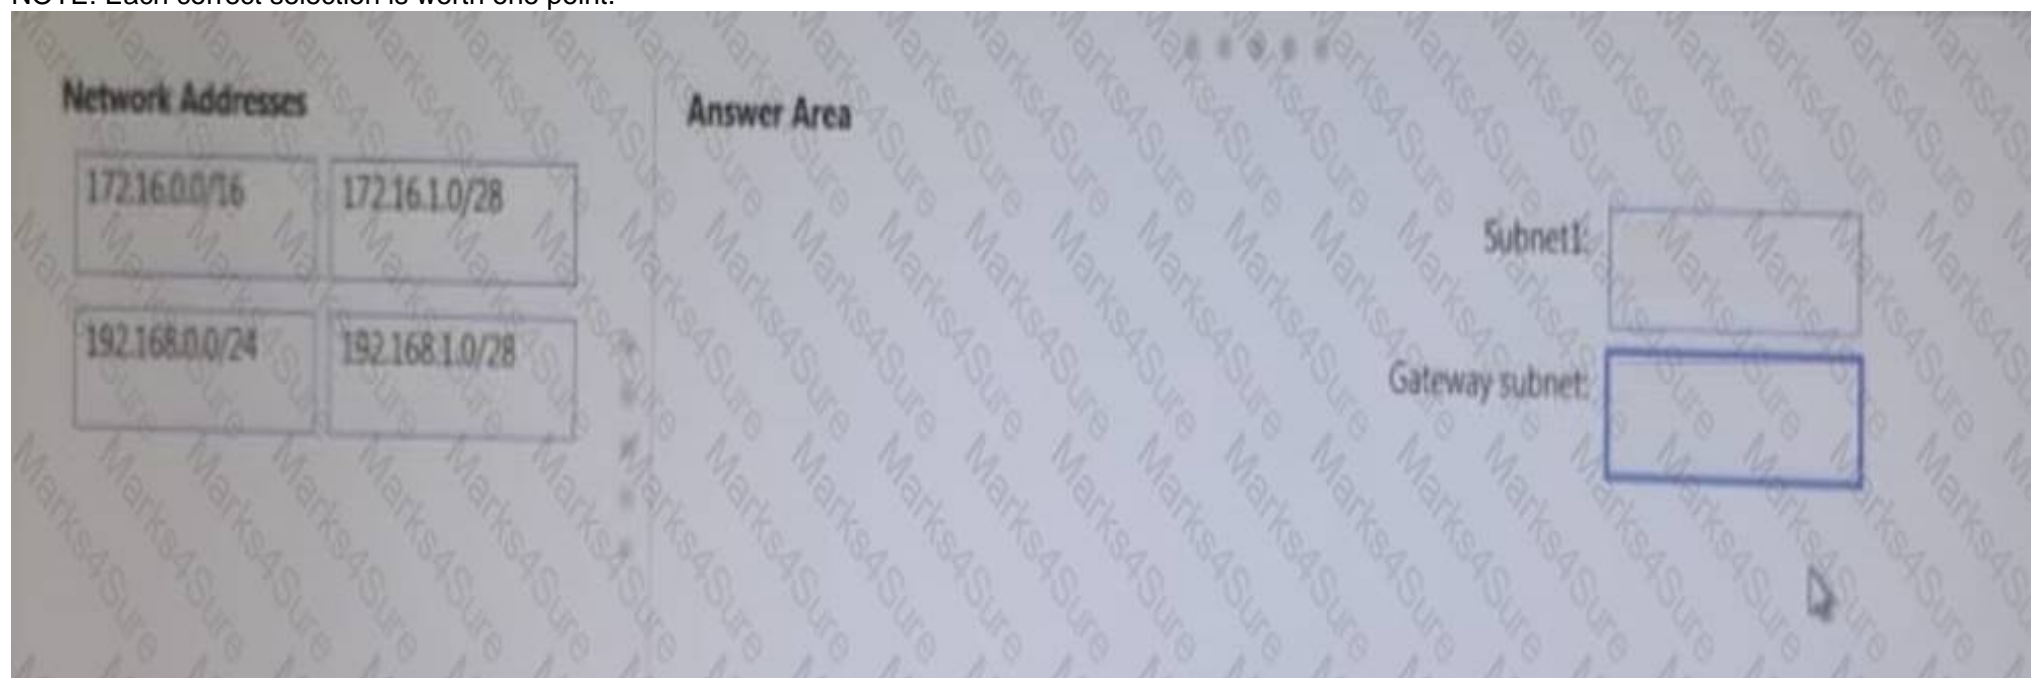

You identify the following technical requirements.

- ▶ All Azure virtual machines must be placed on the same subnet subnet1.
- ▶ All the Azure virtual machines must be able to communicate with all on-premises servers.
- ▶ The servers must be able to communicate between the on-premises network and Azure by using a site-to-site VPN.

You need to recommend a subnet design that meets the technical requirements.

What should you include in the recommendation? To answer, drag the appropriate network addresses to the correct subnet. Each network address may be used once, more than once or not at all. You may need to drag the split bar between panes or scroll to view content.

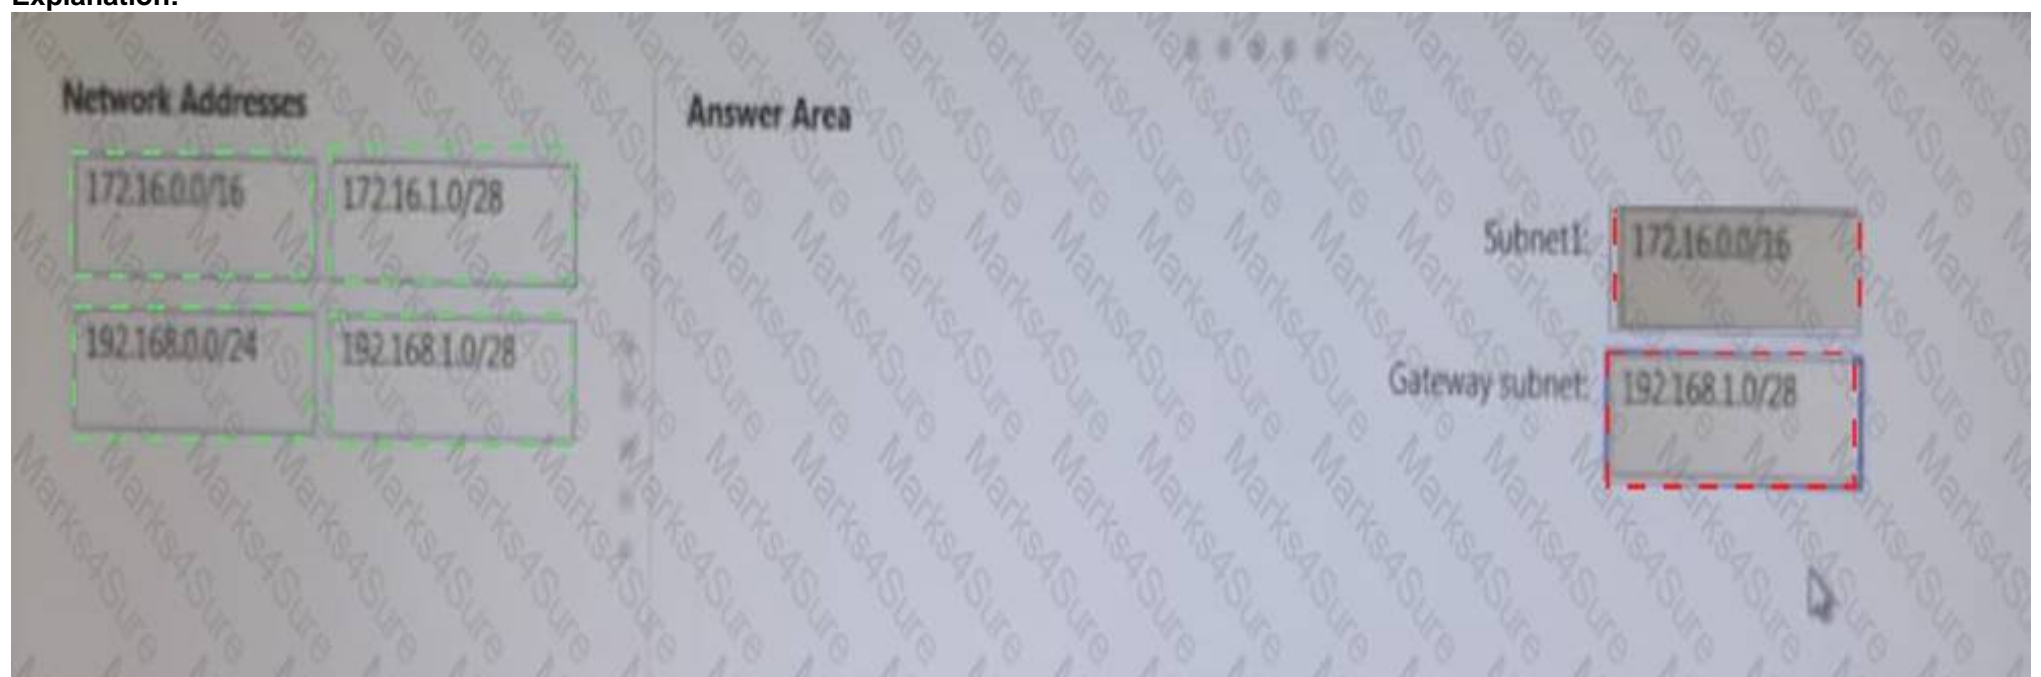

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

#### NEW QUESTION 16

- (Exam Topic 1)

Your development team plans to use an Azure subscription to test new applications. The application will reside on Azure virtual machines. The developers will be responsible for managing the subscription shared resources will be used by more than one application.

You need to recommend a deployment solution that meets the following requirements: Minimize administration effort for the developers

Ensures that the testing environment can be recreated consistently

Ensures that the testing cycle is complete, all the resources, except for the shared resources associated to each application are deleted

What should you include in the recommendation?

- A. Use JSON templates to create the resource
- B. Place the shared resources in one resource group, the application-specific resources in separate resource group.
- C. Use JSON templates to create the resource
- D. Place the shared resources in one resource group- Place all the application -specific in a resources in second resource group
- E. Use an Azure PowerShell script to create the resource
- F. Place the shared resources and the application-specific resources in the resources group.
- G. Use an Azure PowerShell script to create the resource
- H. Place the shared resources in one resource group Place the application-specific resources in separate resources groups.

**Answer: B**

#### NEW QUESTION 18

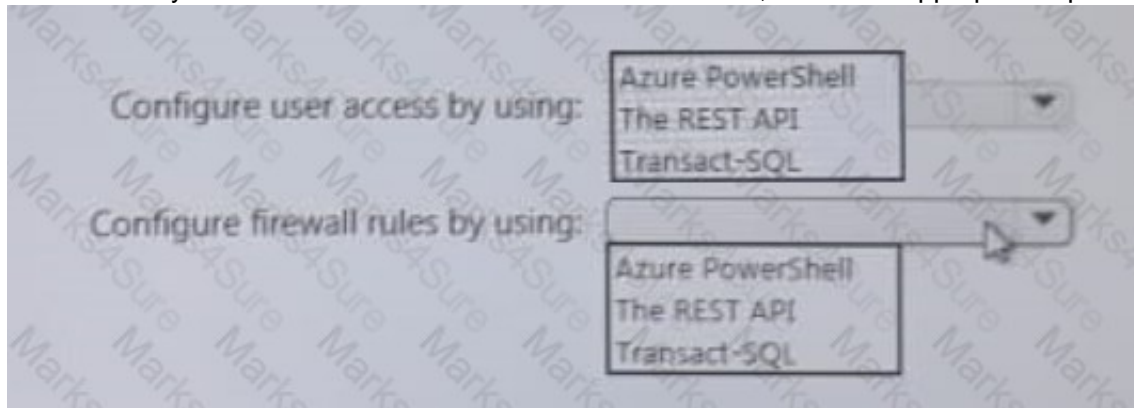

- (Exam Topic 1)

You plan to deploy logical Azure SQL Database servers to The East US Azure region and the West US Azure region. Each server will contain 20 database accessed by a different user who reads in a different on premises location. The databases will be configured to use active geo-replication.

You need to recommend a solution that meets the following requirement!;

- Restricts user access to each database
- Restricts network access to each database based on each user's respective location
- Ensures that the databases remain accessible from down applications if the local Azure region fails

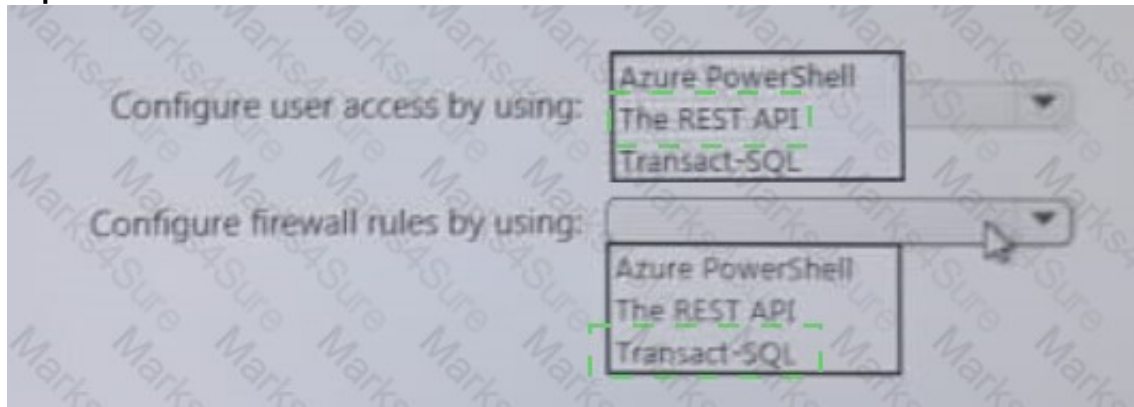

What should you include in the recommendation? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

#### NEW QUESTION 21

- (Exam Topic 1)

You plan to deploy the backup shown in the following exhibit.

Policy1

Associated items Delete Save Discard

Backup frequency

Daily 6:00 PM (UTC) Coordinated Universal Time

Retention range

☒ Retention of daily backup point

\* At 6:00 PM For 90 Day(s)

☒ Retention of weekly backup point

\* On Sunday \* At 6:00 PM For 26 Week(s)

☒ Retention of monthly backup point

Week Based Day Based

\* On First \* Day Sunday \* At 6:00 PM For 36 Month(s)

☐ Retention of yearly backup point

Use the drop-down to select the answer choice that completes each statement based on the information presented in the graphic.  
NOTE: Each correct selection is worth one point.

Virtual machines that are backed up by using the policy can be recovered for up to a maximum of [answer choice].

The minimum recovery point objective (RPO) for virtual machines that are backed up by using the policy is [answer choice].

90 days  
26 weeks  
36 months  
45 months

1 hour  
1 day  
1 week  
1 month  
1 year

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Virtual machines that are backed up by using the policy can be recovered for up to a maximum of [answer choice].

The minimum recovery point objective (RPO) for virtual machines that are backed up by using the policy is [answer choice].

90 days  
26 weeks

45 months

1 hour  
1 day  
1 week  
1 month  
1 year

NEW QUESTION 22

- (Exam Topic 1)  
You have the application architecture shown in the following exhibit.

Use the drop-down to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer Area**

To change the front end to an active/active architecture in which both regions process incoming connections, you must [answer choice]

To control the threshold for failing over the front end to the standby region, you must configure the [answer choice]

add a load balancer to each region  
 add an Azure Application Gateway to each region  
 add an Azure content delivery network (CDN)  
 modify the Traffic Manager routing method

an Application Insights availability test  
 Azure SQL Database failover groups  
 Connection Monitor in Azure Network & Virtual  
 Endpoint monitor settings in Traffic Manager

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

**Answer Area**

To change the front end to an active/active architecture in which both regions process incoming connections, you must [answer choice]

To control the threshold for failing over the front end to the standby region, you must configure the [answer choice]

add a load balancer to each region  
 add an Azure Application Gateway to each region  
 add an Azure content delivery network (CDN)  
 modify the Traffic Manager routing method

an Application Insights availability test  
 Azure SQL Database failover groups  
 Connection Monitor in Azure Network & Virtual  
 Endpoint monitor settings in Traffic Manager

#### NEW QUESTION 27

- (Exam Topic 1)

You are designing a container solution in azure that will include two containers. One container will host a web API that will be available to the public. The other container will perform health monitoring of the web API and will remain private. The two containers will be deployed together as a group.

You need to recommend a compute service for the containers. The solution must minimize costs and maintenance over head.

What should you include in the recommendation?

- A. Azure container instances
- B. Azure container Service
- C. Azure kubernetes service (aks)
- D. Azure service fabric

**Answer: D**

#### NEW QUESTION 31

- (Exam Topic 1)

You have 100 Standard F2vs-v2 Azure virtual machines. Each virtual machine has two network adapter. You need to increase the network performance of the workloads running an the virtual machine The solution must meet the following requirements.

\*The CPU-to-memory ratio must remain the same.

\*The solution must minimize costs.

What should you do?

- A. Enable SR-IOV
- B. Enable RDMA over InfiniBand.
- C. Install an additional network adapter.
- D. Configure NIC teaming.

Answer: A

Explanation:

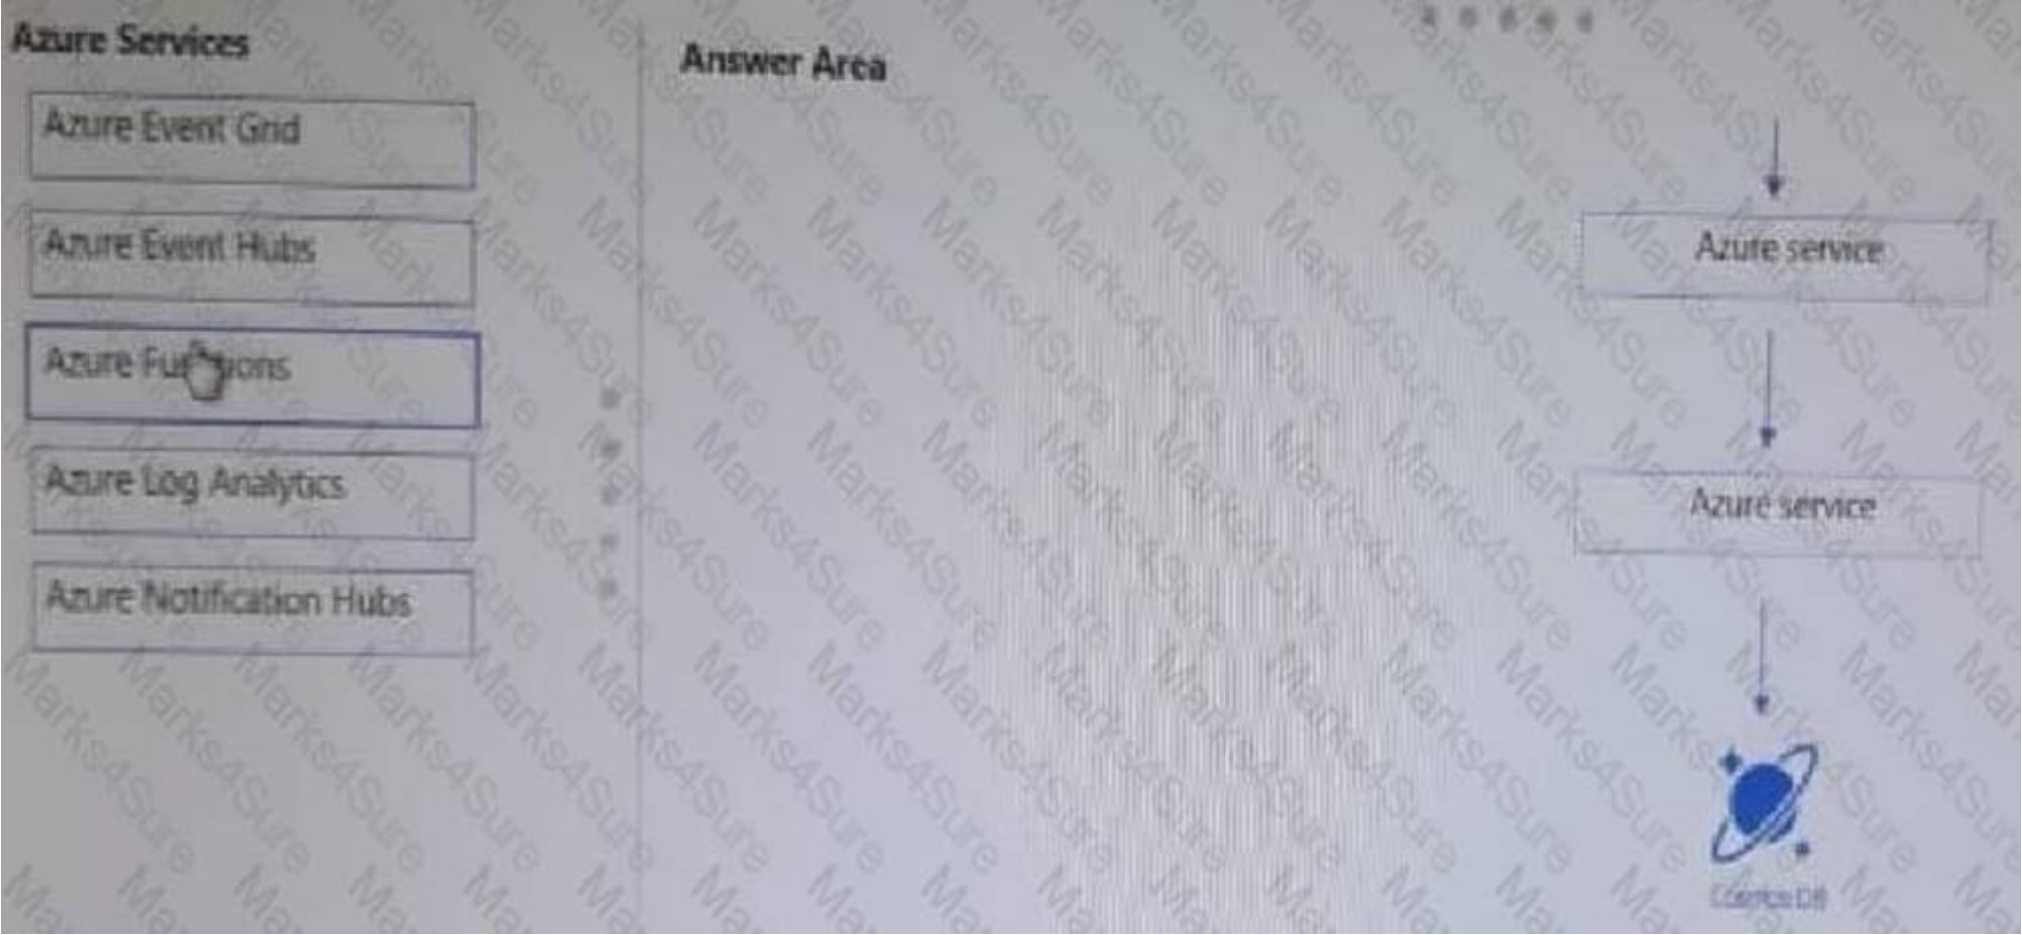

References:

<https://docs.microsoft.com/en-us/azure/virtual-network/create-vm-accelerated-networking-powershell?toc=%2fa>

NEW QUESTION 34

- (Exam Topic 1)

You need to design an architecture to capture the creation of users and the assignment of roles. The captured data must be stored in Azure Cosmos DB. Which Azure services should you include in the design? To answer, drag the appropriate services to the correct targets. Each service may be used once, more than once, or not at all. You need to drag the split bar between panes or scroll to view content.  
NOTE .Each correct selection worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 38

- (Exam Topic 1)

Your network contains an on-premises Active Directory forest. You discover that when users change jobs within your company, the membership of the user group are not updated. As a result the users can resources that are no longer relevant to their job.

You plan to integrate Active Directory and Azure Active Directory (Azure AD) by using Azure AD Connect. You need to recommend a solution to ensure that group owners are emailed monthly about the group membership they manage. What should you include in the recommendation?

- A. Azure AD Identity Protection
- B. Tenant Restrictions
- C. Azure AD access reviews
- D. conditional access policies

**Answer: C**

#### NEW QUESTION 41

- (Exam Topic 1)

Your company has an on-premises Windows HPC cluster. The cluster runs an intrinsically parallel, compute-intensive workload that performs financial risk modeling.

You plan to migrate the workload to Azure Batch.

You need to design a solution that will support the workload. The solution must meet the following requirements:

- Support the large-scale parallel execution of Azure Batch jobs.
- Minimize cost.

What should you include in the solution?

- A. low priority virtual machines
- B. burstable virtual machines
- C. Azure virtual machine sizes that support the Message Passing Interface (MPI) API
- D. Basic A-series virtual machines

**Answer: A**

#### NEW QUESTION 45

- (Exam Topic 1)

You are developing an app that references data which is shared across multiple Azure SQL databases.

The app must guarantee transactional consistency for changes across several different sharding key values. You will manage the transactions.

What should you implement?

- A. Distributed transactions coordinated by Microsoft Distributed Transaction Coordinator (MSDTC)
- B. Elastic database transactions with horizontal partitioning
- C. Server-coordinated transactions from a .NET application
- D. Elastic database transactions with vertical partitioning

**Answer: B**

#### NEW QUESTION 49

- (Exam Topic 1)

A company has an app that records and processes videos. New videos are recorded daily. The videos are displayed on the day after they are recorded, the company runs several servers that process data and encode the

videos. The processing servers use FFmpeg and proprietary software to encode and convert the videos.

The company plans to migrate the app to Azure Batch. The app must be used to process videos. Each task must run a command and output the result to a file on a destination storage account.

You create and assign values to the following variables:

```
batchAccountUrl, batchAccountName, batchAccountKey, and poolId.
```

You are reviewing code to create tasks in Azure Batch. (Line numbers are included for reference only.)

```

01 public List<CloudTask> StartTasks(List<FileTask> fileTasks, string jobId, string outputContainerSasUrl)
02 {
03     BatchSharedKeyCredentials sharedKeyCredentials =
04     new BatchSharedKeyCredentials(batchAccountUrl, batchAccountName, batchAccountKey);
05     List<CloudTask> tasks = new List<CloudTask>();
06     using (BatchClient batchClient = BatchClient.Open(sharedKeyCredentials))
07     {
08         CloudJob job = batchClient.JobOperations.CreateJob();
09         job.Id = jobId;
10         job.PoolInformation = new PoolInformation { PoolId = poolId };
11         job.Commit();
12         fileTasks.ForEach((fileTask) =>
13         {
14             string taskId = $"Task{DateTime.Now.ToFileTimeUtc().ToString()}";
15             CloudTask task = new CloudTask(taskId, fileTask.Command);
16             List<OutputFile> outputFileList = new List<OutputFile>();
17             OutputFileBlobContainerDestination outputContainer = new OutputFileBlobContainerDestination(outputContainerSasUrl);
18             outputFileList.Add(new OutputFile(fileTask.Output,
19                 new OutputFileDestination(outputContainer), new OutputFileUploadOptions(OutputFileUploadCondition.TaskSuccess)));
20             task.OutputFiles = outputFileList;
21             tasks.Add(task);
22         });
23     }
24     return tasks;
25 }
26 public class FileTask
27 {
28     public string Command { get; set; }
29     public string Output { get; set; }
30 }

```

For each of the of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

#### Answer Area

Yes

No

This code uploads the file after the task process exits, regardless of the exit code.

☐

☐

The code generates a job for each fileTask.

☐

☐

The code stores the resulting file in outputContainer.

☐

☐

You must move line 15 to 11 to ensure that outputFileList is not reset for each task.

☐

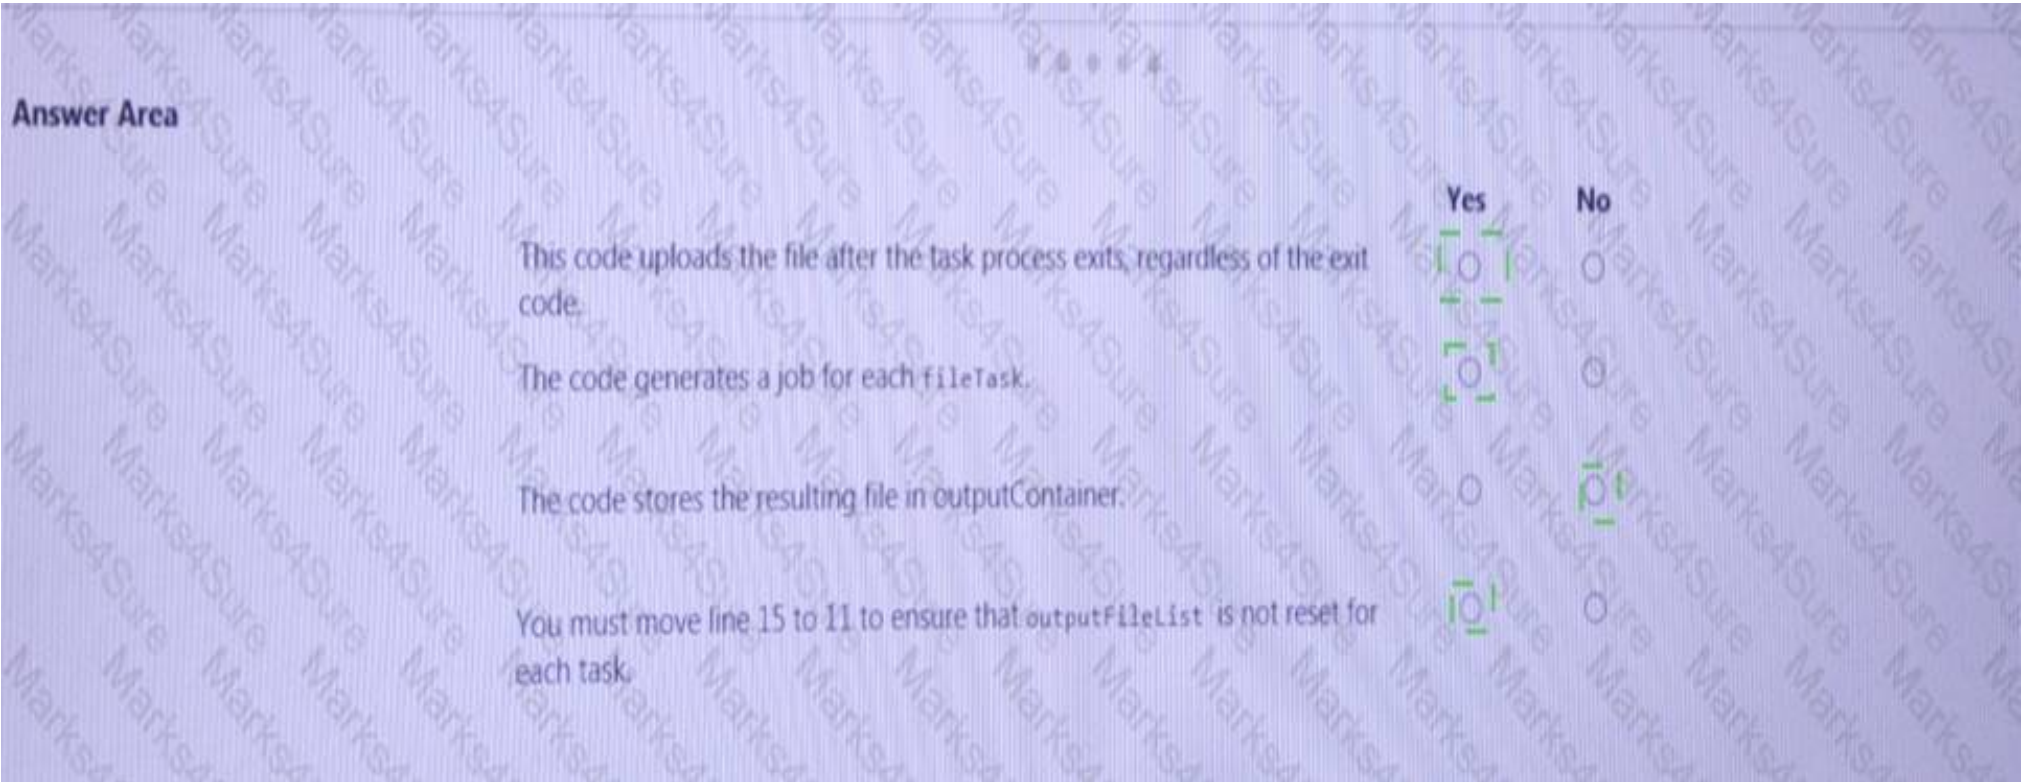

☐

- A. Mastered  
 B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 53

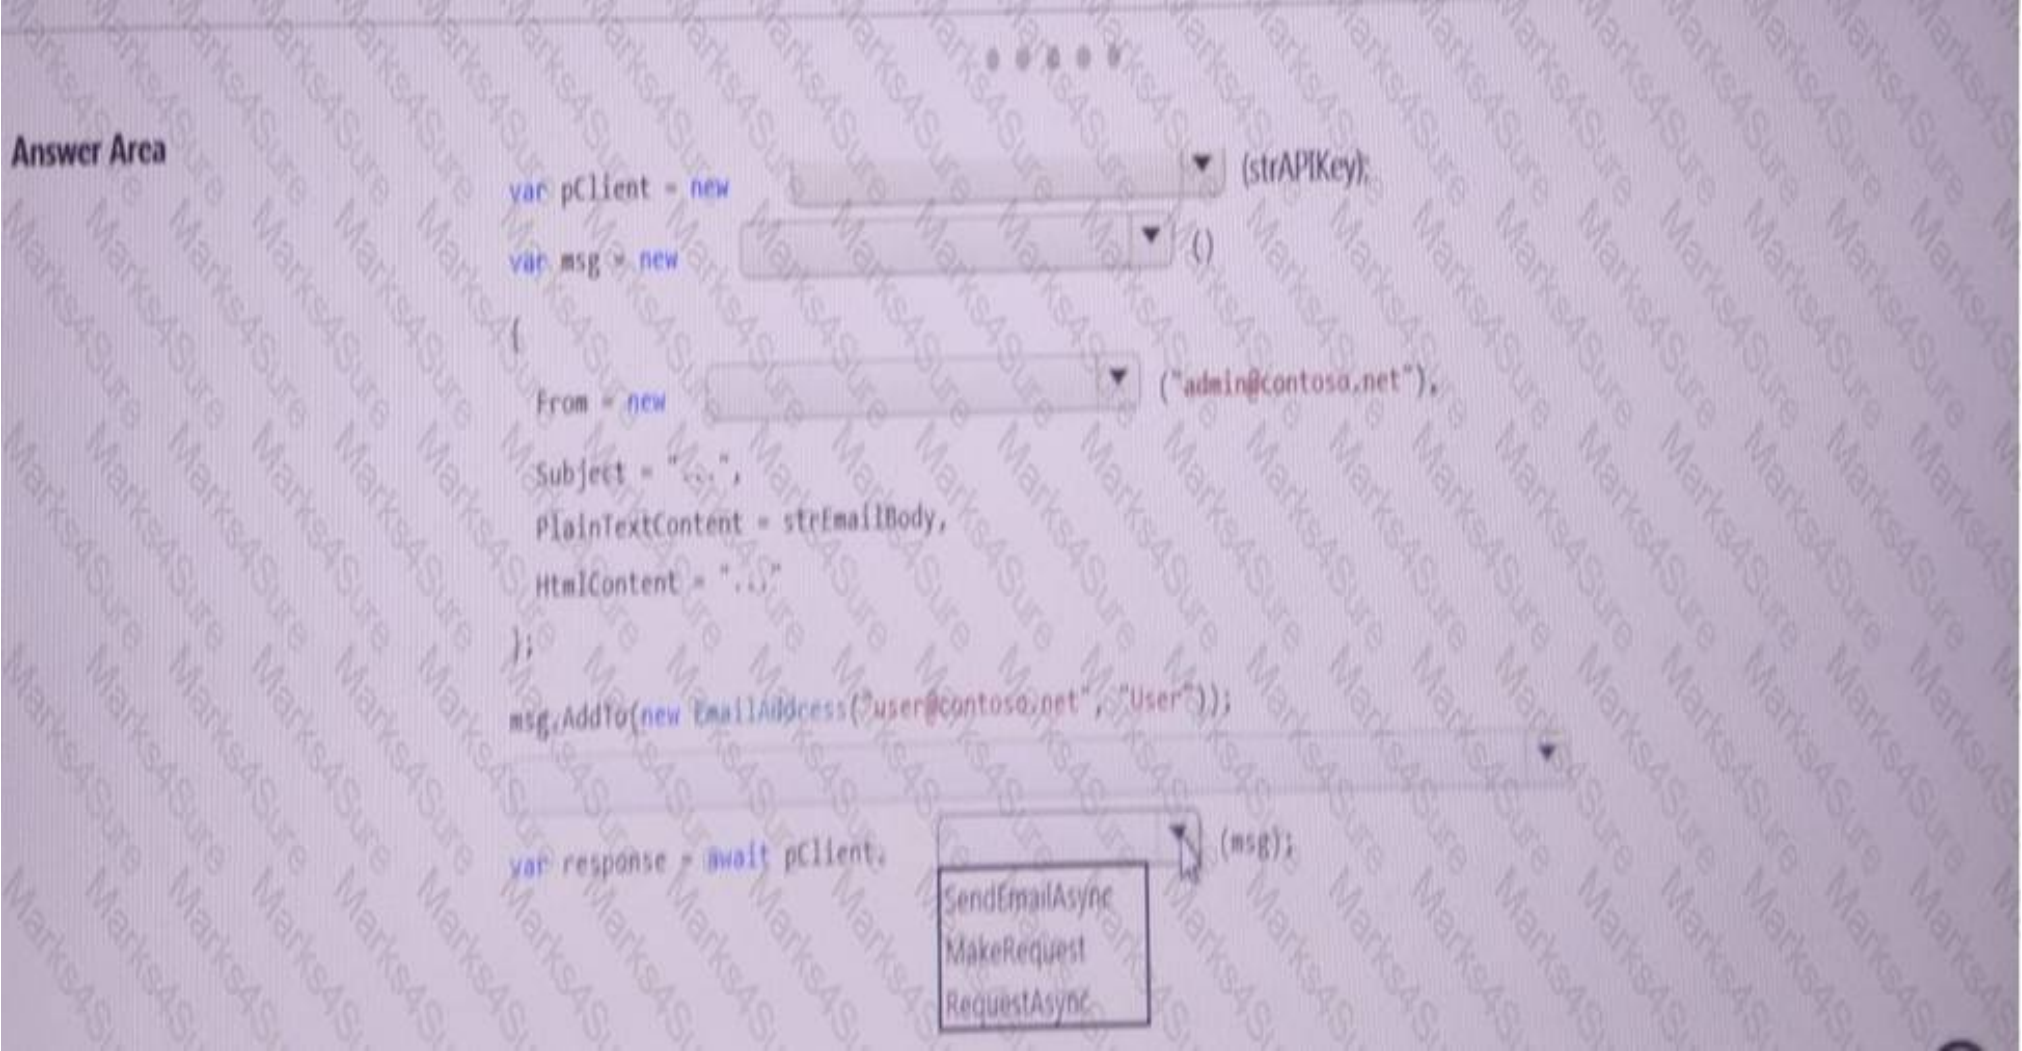

- (Exam Topic 1)

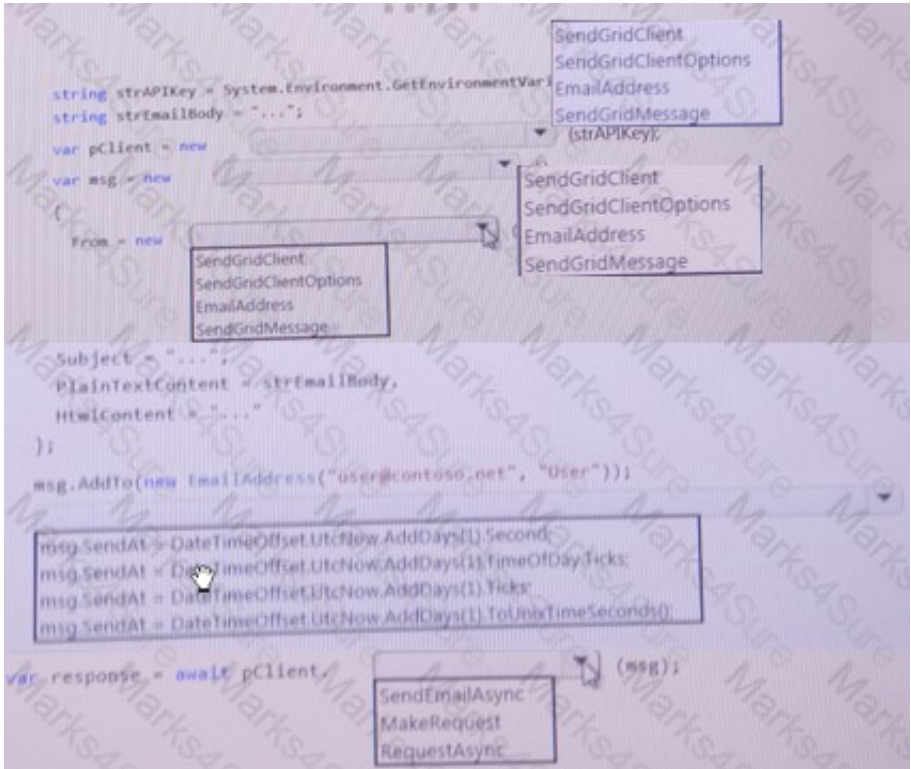

You develop solutions for a company.

The company requires an automated email solution that can be used to schedule customer emails. Emails must be sent in one day.

You need to implement the Azure Send Grid service API.

How should you complete the code? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

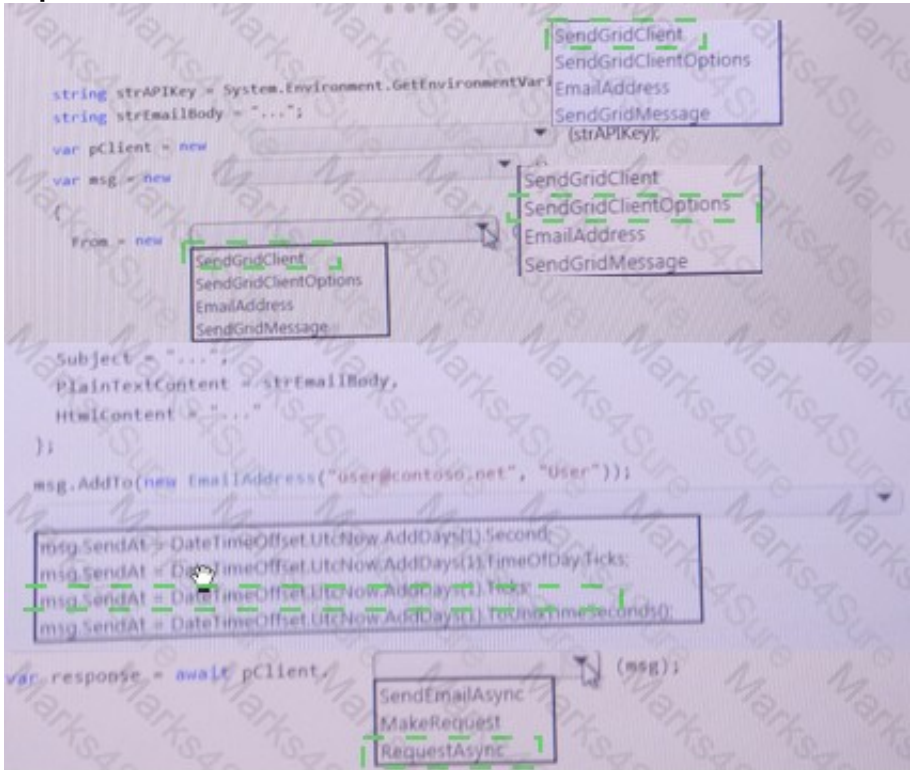

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 57

- (Exam Topic 1)

You are designing a solution that will run tasks in Azure.

You need to select the technologies and services for the solution.

What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

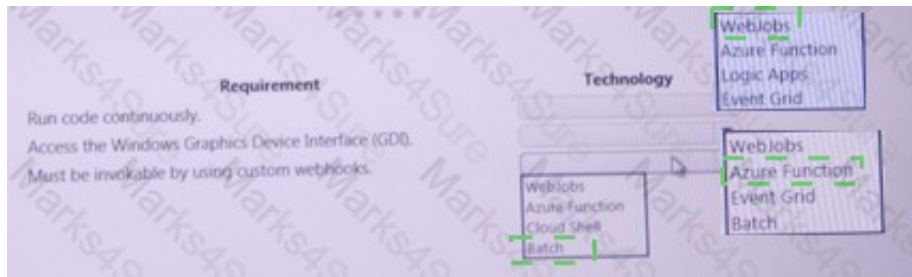

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

#### NEW QUESTION 60

- (Exam Topic 2)

Note: This question is part of a series of questions that present the same scenario.

Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. You need to meet the vendor notification requirement.

Solution: Update the Delivery API to send emails by using a cloud-based email service. Does the solution meet the goal?

- A. Yes
- B. NO

**Answer:** B

#### Explanation:

References:

<https://docs.microsoft.com/en-us/azure/api-management/api-management-howto-configure-notifications>

#### NEW QUESTION 61

- (Exam Topic 2)

You need to debug the user greeting issue. What should you use?

- A. Azure Application Insights
- B. Bot Framework Emulator
- C. Bot Framework Channel Inspector
- D. Bot Connector service
- E. Azure Compote Emulator

**Answer:** A

#### NEW QUESTION 63

- (Exam Topic 2)

You need to meet the security requirements. What should you use?

- A. HTTP Strict Transport Security (HSTS)
- B. Direct Line API
- C. Multi-Factor Authentication (MFA)
- D. Bot Framework Portal
- E. Bot Framework authentication

**Answer:** E

#### NEW QUESTION 68

- (Exam Topic 3)

You need to recommend a data storage strategy for WebApp1.

What should you include in in the recommendation?

- A. an Azure SQL Database elastic pool
- B. a vCore-baswl A/we SQL database
- C. an Azure virtual machine that runs SQL Server
- D. a fixed-size DTU AzureSQL database.

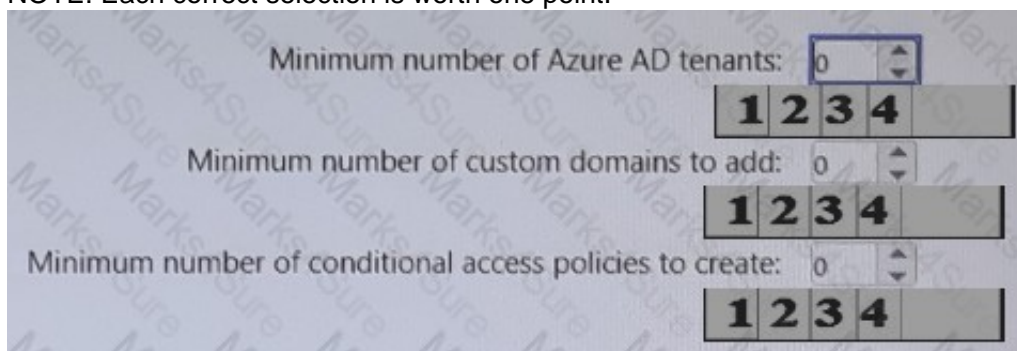

**Answer:** D

#### NEW QUESTION 72

- (Exam Topic 3)

To meet the authentication requirements of Fabrikam, what should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

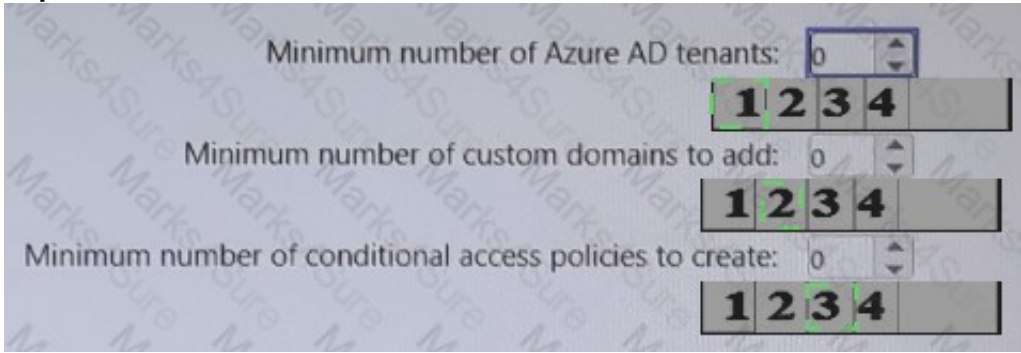

The screenshot shows three configuration fields in the Azure portal. Each field has a numeric input box and a dropdown menu with options 1, 2, 3, and 4. The first field is 'Minimum number of Azure AD tenants:' with the value '0' selected. The second field is 'Minimum number of custom domains to add:' with the value '0' selected. The third field is 'Minimum number of conditional access policies to create:' with the value '0' selected.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 77

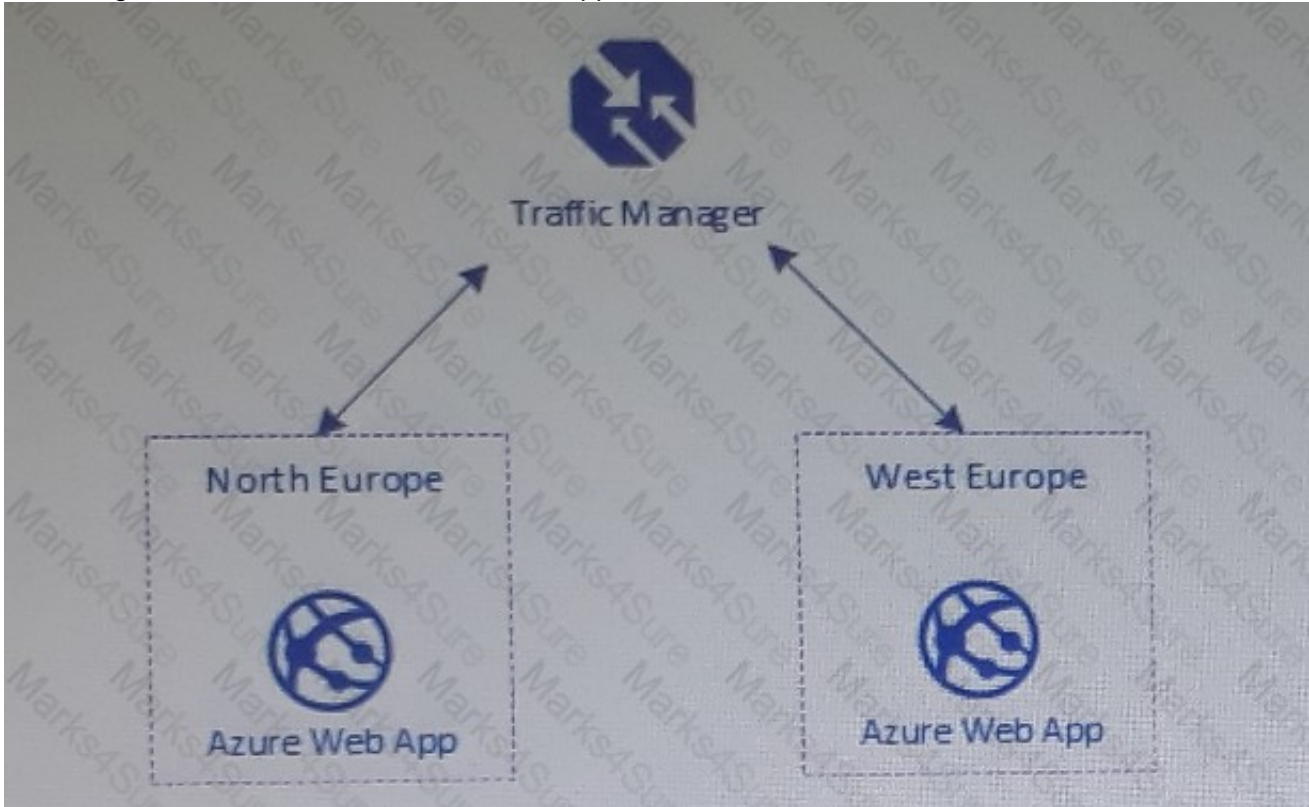

- (Exam Topic 3)  
You need to recommend a strategy for the web tier of WebApp1. The solution must minimize What should you recommend?

- A. Create a runbook that resizes virtual machines automatically to a smaller size outside of business hours.
- B. Configure the Scale Up settings for a web app.
- C. Deploy a virtual machine scale set that scales out on a 75 percent CPU threshold.
- D. Configure the Scale Out settings for a web app.

Answer: D

NEW QUESTION 81

- (Exam Topic 3)  
You design a solution for the web tier of WebApp1 as shown in the exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

Statements	Yes	No
The design supports the technical requirements for redundancy.	<input type="radio"/>	<input type="radio"/>
The design supports autoscaling.	<input type="radio"/>	<input type="radio"/>
The design requires a manual configuration if an Azure region fails.	<input checked="" type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Statements	Yes	No
The design supports the technical requirements for redundancy.	<input checked="" type="radio"/>	<input type="radio"/>
The design supports autoscaling.	<input type="radio"/>	<input checked="" type="radio"/>
The design requires a manual configuration if an Azure region fails.	<input checked="" type="radio"/>	<input type="radio"/>

#### NEW QUESTION 85

- (Exam Topic 3)

You need to recommend a strategy for migrating the database content of WebApp1 to Azure. What should you include in the recommendation?

- A. Use Azure Site Recovery to replicate the SQL servers to Azure.
- B. Use SQLServer transactional replication.
- C. Copy the BACPAC file that contains the Azure SQL database file to Azure Blob storage.
- D. Copy the VHD that contains the Azure SQL database files to Azure Blob storage

**Answer: C**

#### NEW QUESTION 90

- (Exam Topic 4)

You need to recommend a solution for the collection of security logs the middle tier of the payment processing system. What should you include in the recommendation?

- A. Azure Notification Hubs
- B. the Azure Diagnostics agent
- C. Azure Event Hubs
- D. the Azure Log Analytics agent

**Answer: B**

#### NEW QUESTION 93

- (Exam Topic 4)

You need to recommend a solution for protecting the content of the back-end tier of the payment processing system. What should you include in the recommendations?

- A. Always Encrypted with deterministic encryption
- B. Transparent Date Encryption (TDE)
- C. Azure Storage Service Encryption
- D. Always Encrypted with randomized encryption

**Answer: A**

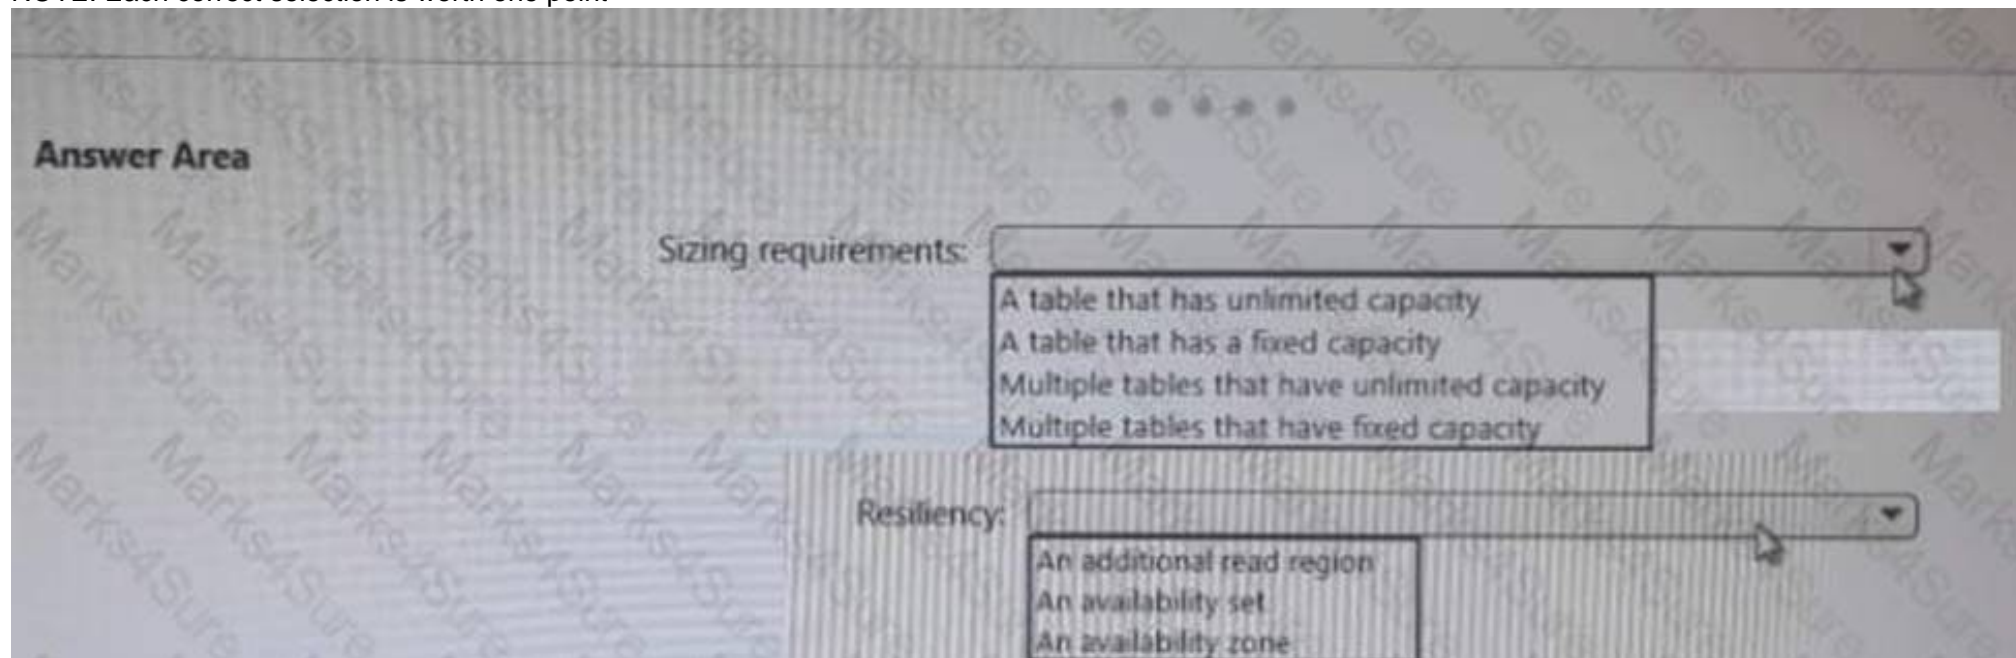

#### NEW QUESTION 94

- (Exam Topic 4)

You need to recommend a solution for data of the historical transaction query system.

What should you include in the recommendation? To answer, Select the appropriate or options in the answer area.

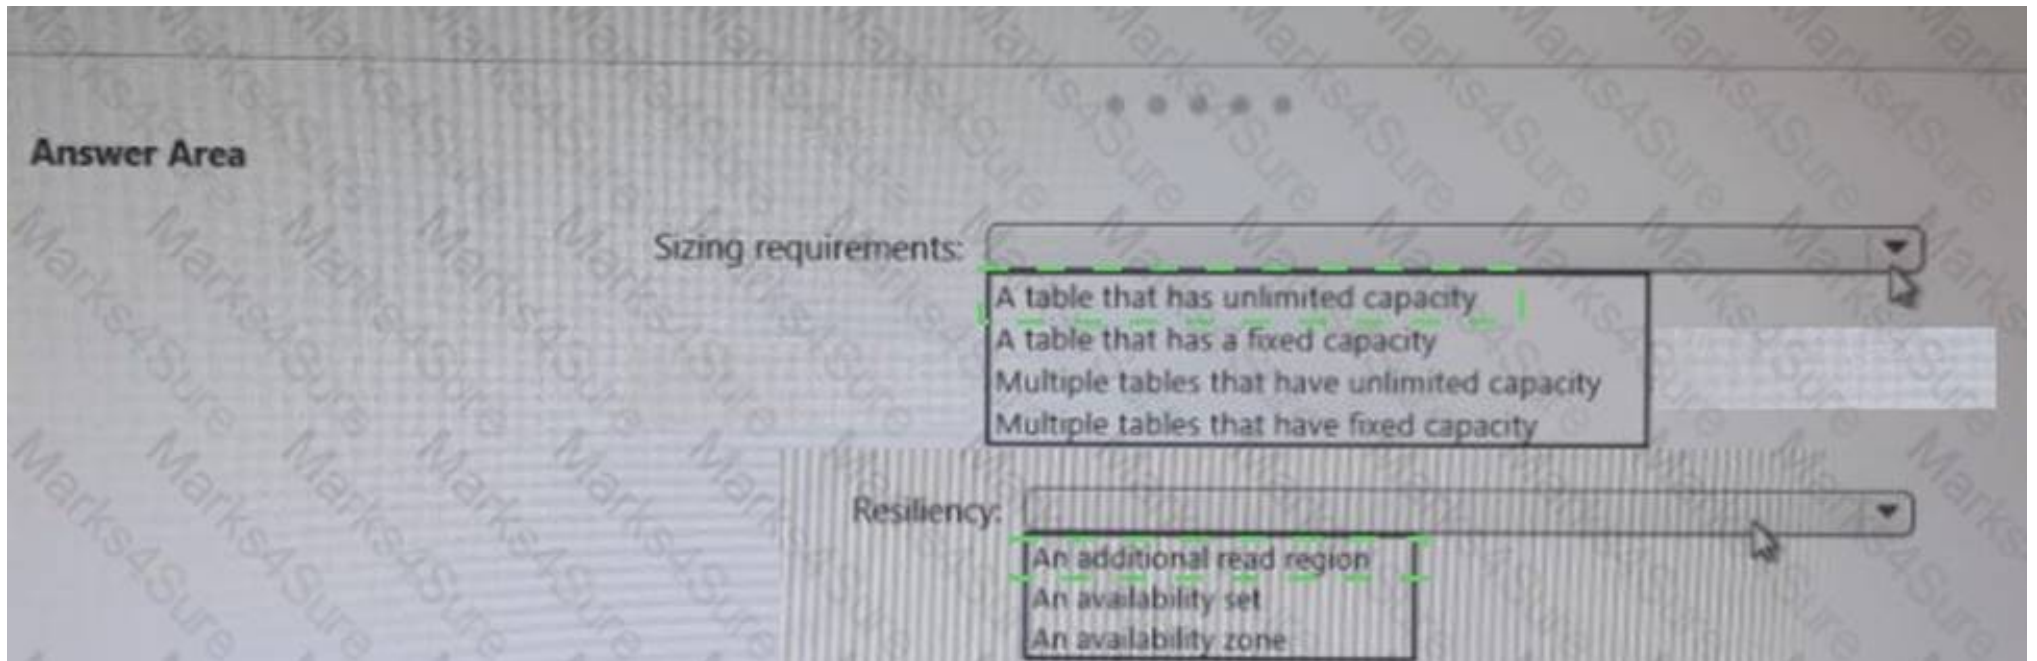

NOTE: Each correct selection is worth one point

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

#### NEW QUESTION 99

- (Exam Topic 4)

You need to recommend a backup solution for the data store of the payment processing. What should you include in the recommendation?

- A. Microsoft System Center Data Protection Manager (DPM)
- B. long-term retention
- C. a Recovery Services vault
- D. Azure Backup Server

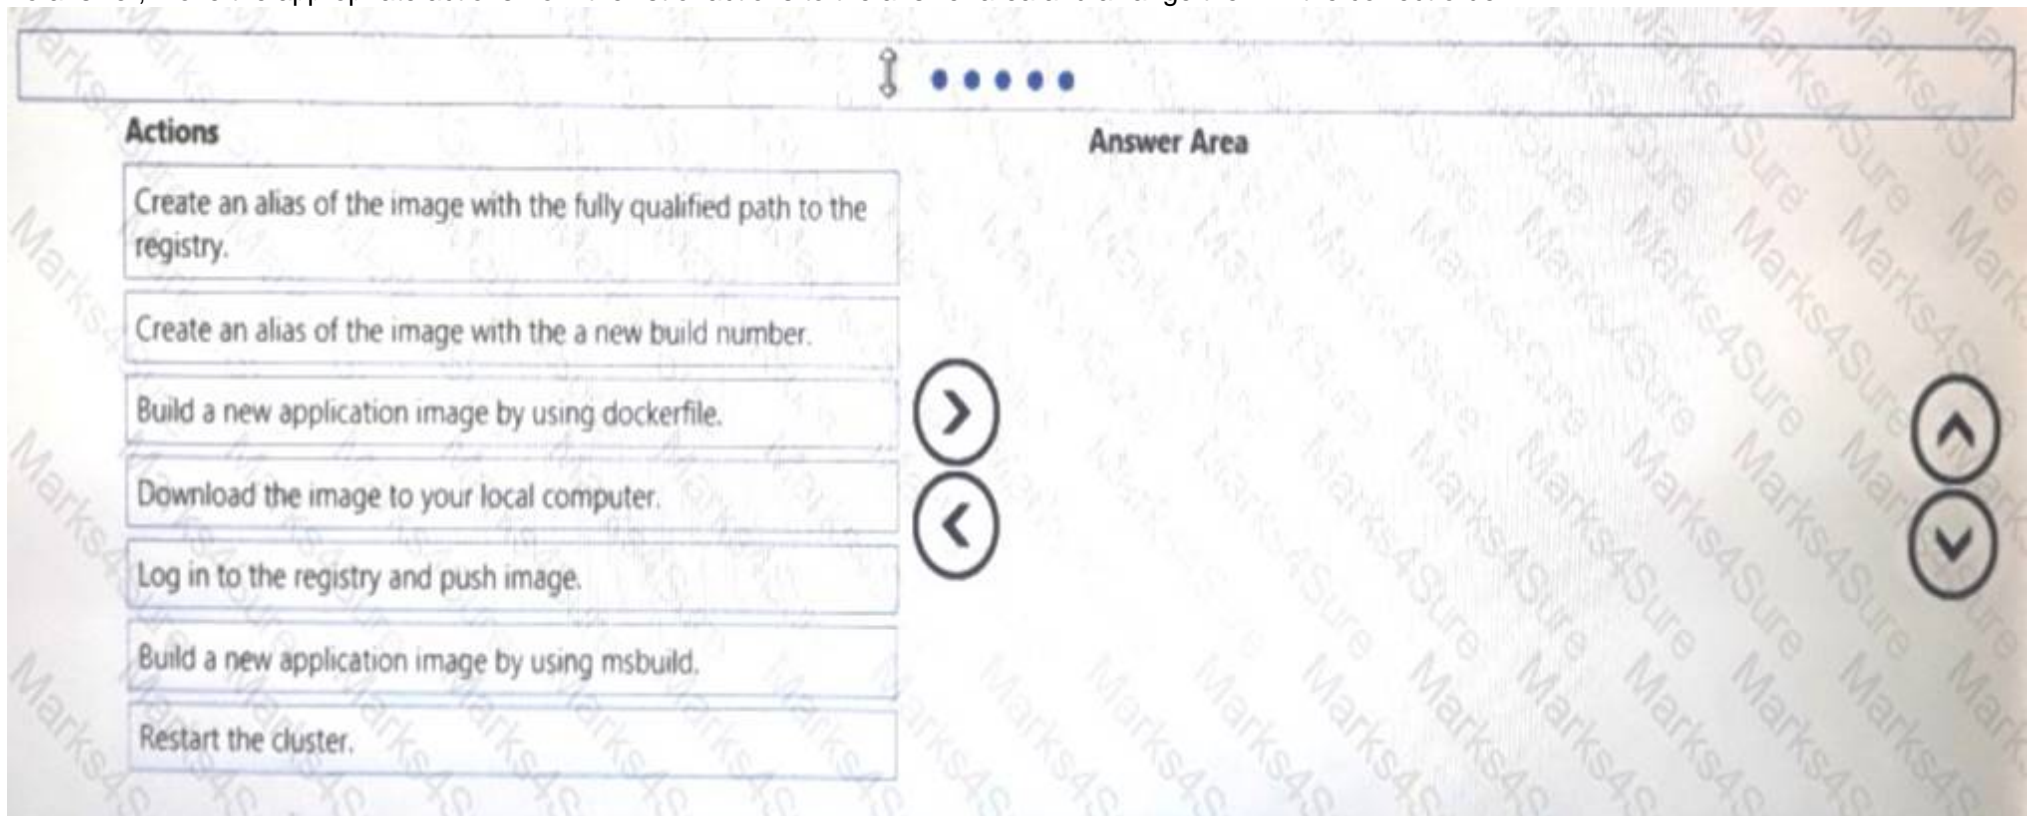

**Answer: C**

#### NEW QUESTION 100

- (Exam Topic 5)

You need to deploy a new version of the Label Maker application. Which three actions should you perform in sequence?

To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

- A. Mastered
- B. Not Mastered

**Answer: A**

#### Explanation:

Create an alias of the image with fully qualified path to the registry  
 Log in to the registry and push image  
 Restart the cluster.

#### NEW QUESTION 102

- (Exam Topic 6)

You need to resolve a notification latency issue.

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Ensure that the Azure Function is set to use a consumption plan.
- B. Set Always On to false
- C. Set Always On to true
- D. Ensure that the Azure Function is using an App Service plan.

Answer: AC

#### NEW QUESTION 104

- (Exam Topic 6)

You need to ensure that the Policy service can implement the policy actions. Which code segment should you insert at line EG07 in EventGridController.cs?

- A. 

```
if (HttpContext.Request.Headers["aeg-event-type"].FirstOrDefault() == "SubscriptionValidation")
{
    return new JsonResult(new
    {
        validationResponse = events[0]["validationCode"]
    });
}
```
- B. 

```
if (events[0]["eventType"].ToString() == "SubscriptionValidation")
{
    return new JsonResult(new
    {
        validationResponse = events[0]["validationCode"]
    });
}
```
- C. 

```
if (HttpContext.Request.Headers["aeg-event-type"].FirstOrDefault() == "SubscriptionValidation")
{
    return new JsonResult(new
    {
        validationResponse = events[0]["data"]["validationCode"]
    });
}
```
- D. 

```
if (events[0]["subject"].ToString() == "SubscriptionValidation")
{
    return new JsonResult(new
    {
        validationResponse = events[0]["data"]["validationCode"]
    });
}
```

- A. Option A  
 B. Option B  
 C. Option C  
 D. Option D

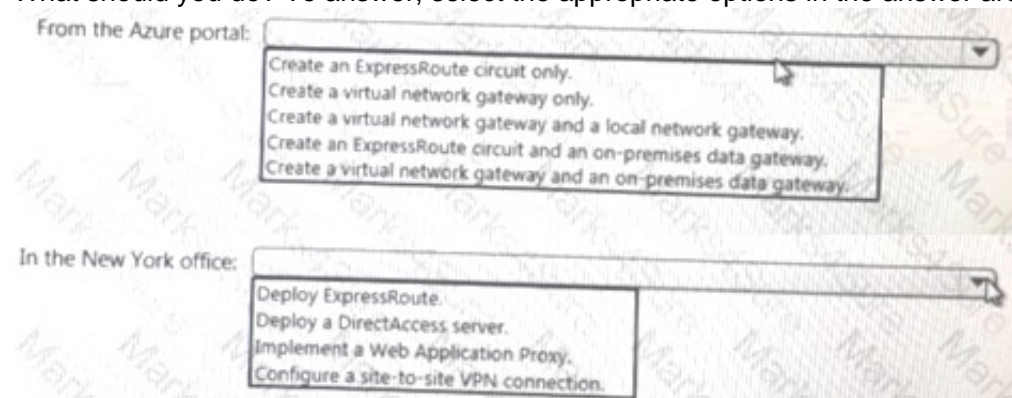

Answer: C

#### NEW QUESTION 105

- (Exam Topic 7)

You need to meet the connection requirements for the New York office.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

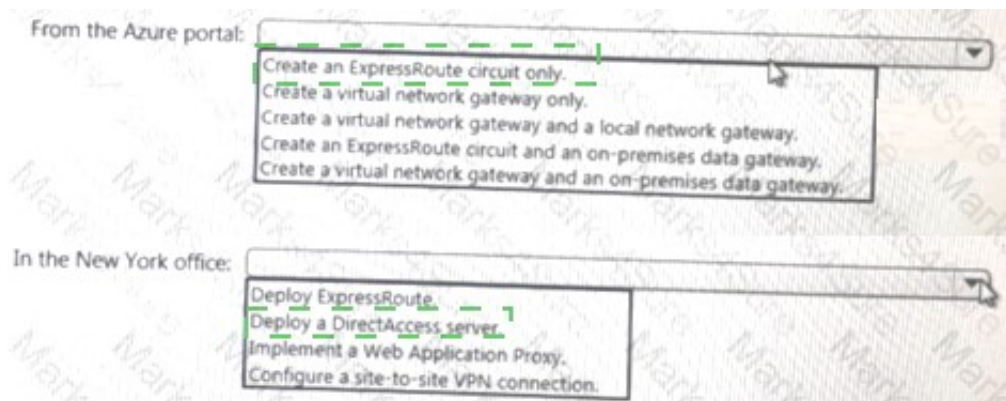

- A. Mastered  
 B. Not Mastered

Answer: A

Explanation:

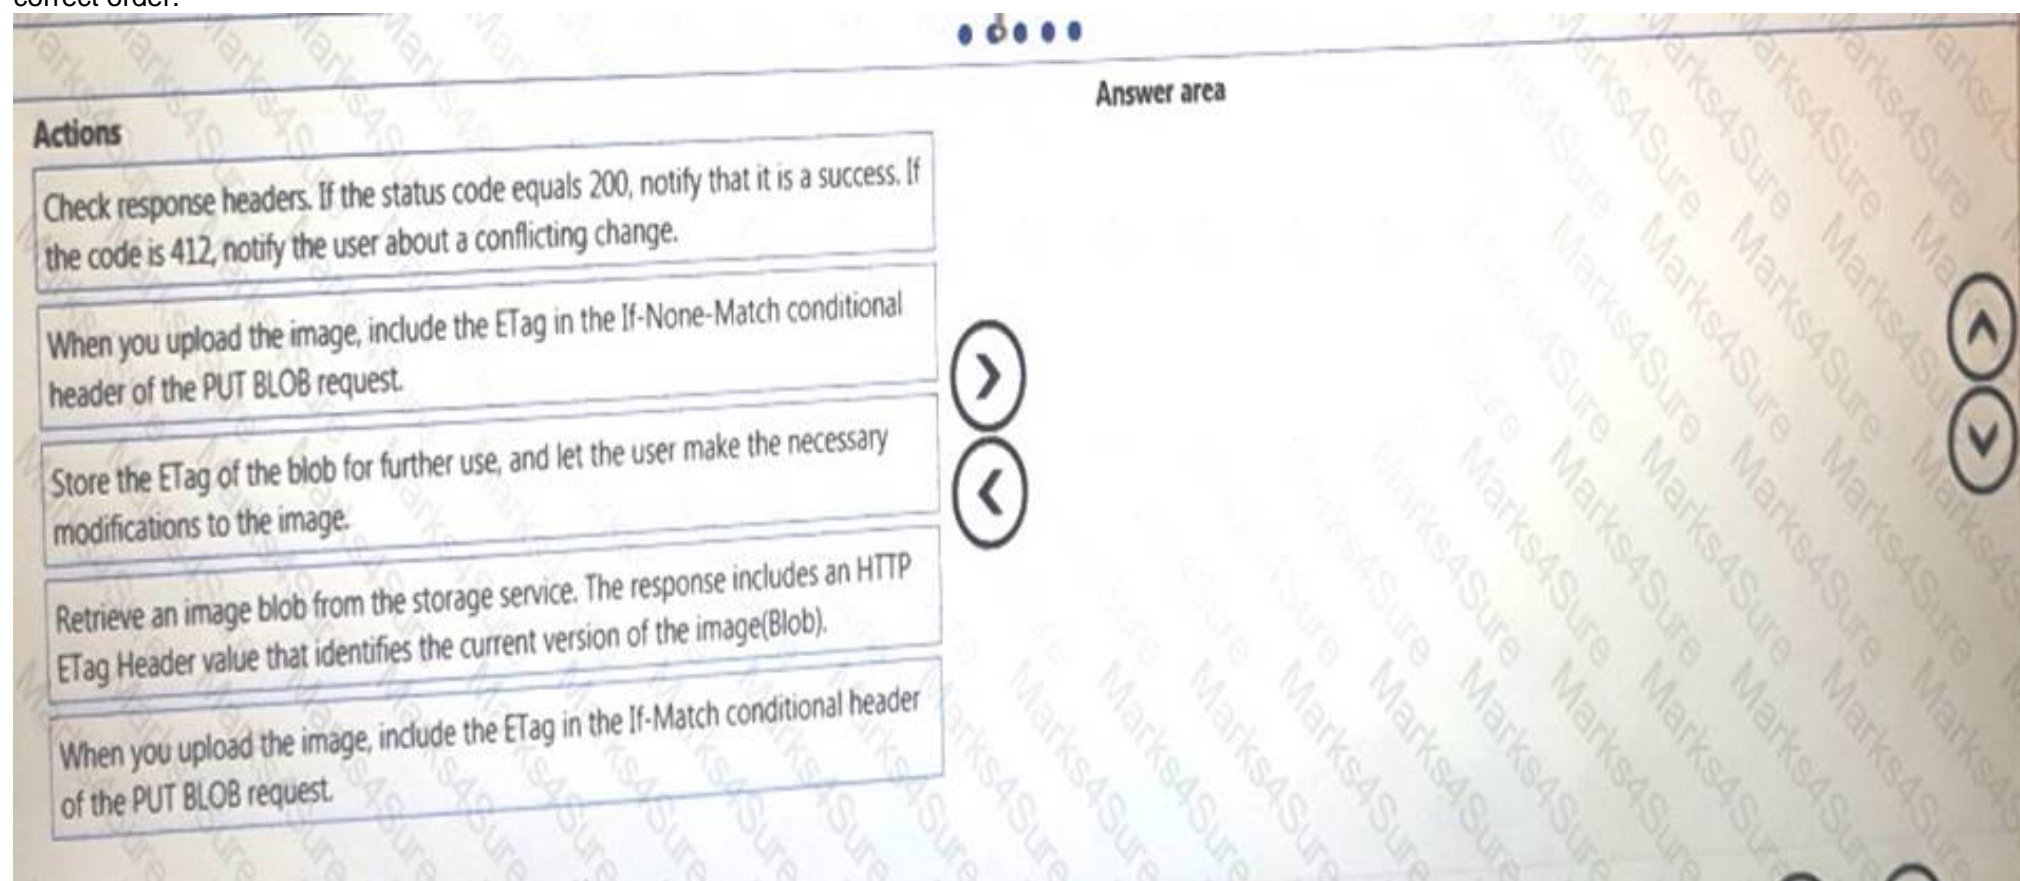

#### NEW QUESTION 110

- (Exam Topic 9)

You are creating a collaborative image hosting platform as an ASP.NET MVC web application. Users add, update, and modify images on the platform. Images are stored in Azure Blob storage.

More than one user at a time must be able to modify the same image. You need to implement optimistic concurrency for uploading images.

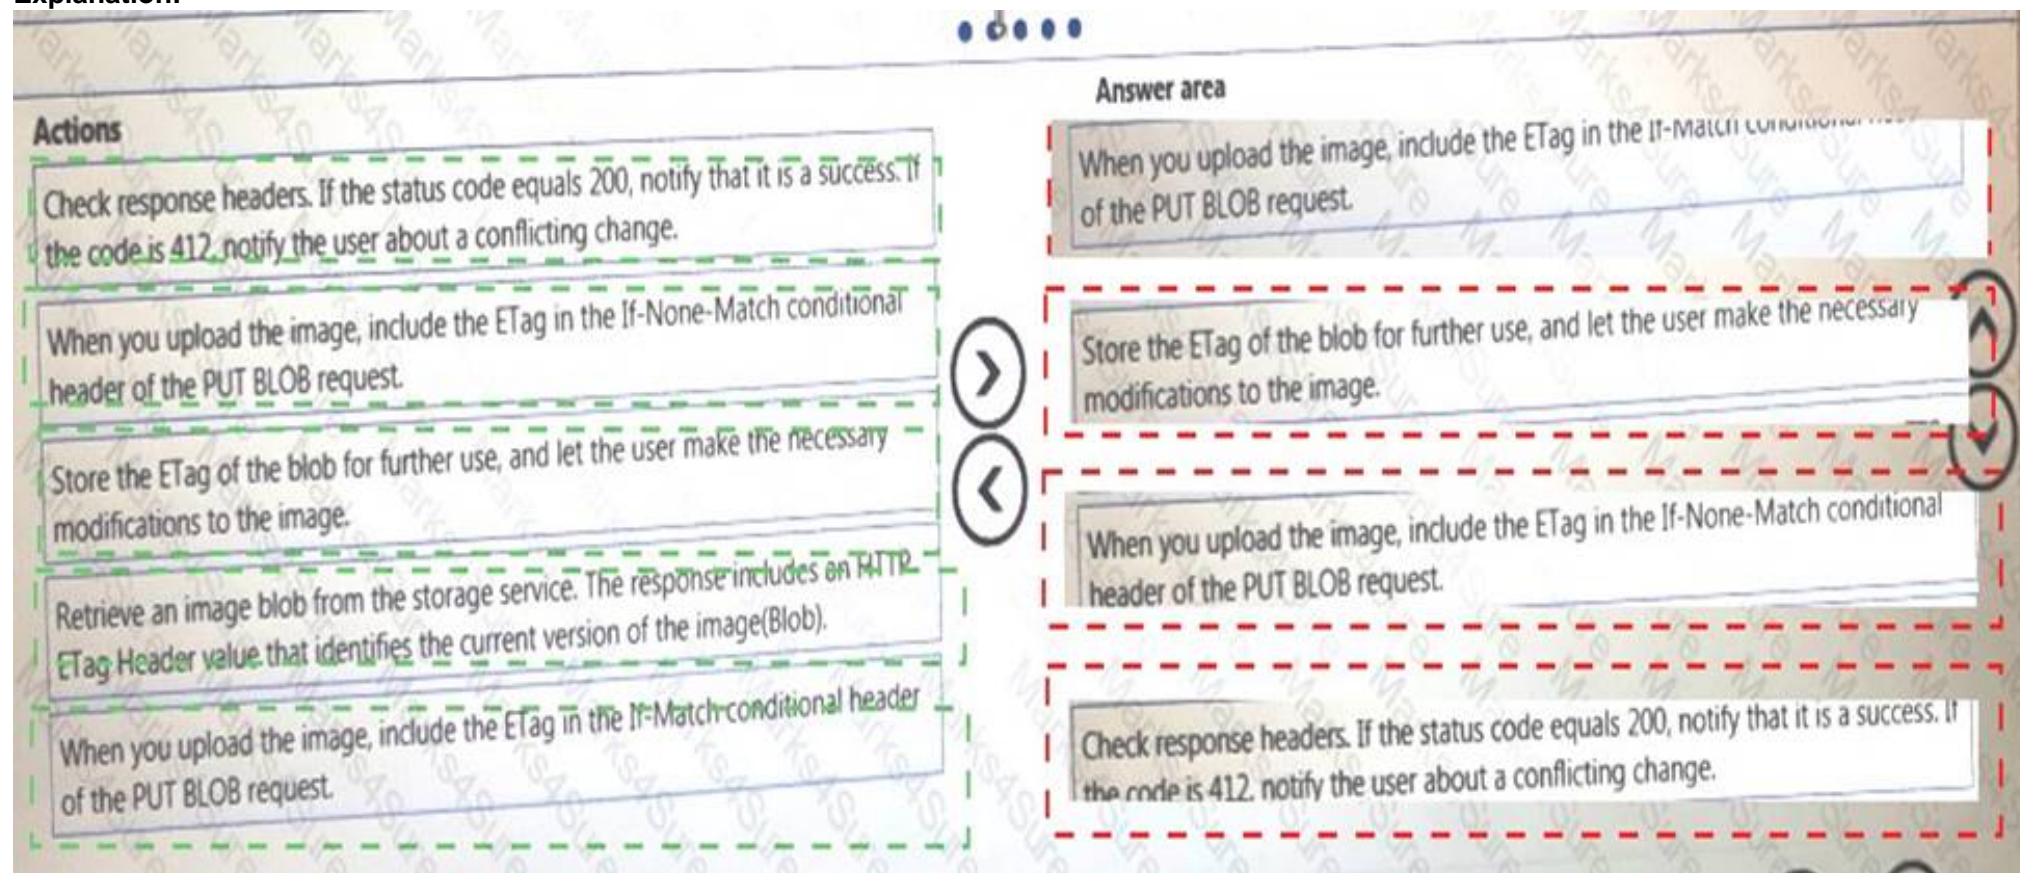

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

**NEW QUESTION 111**

- (Exam Topic 9)

You are creating an app that uses Event Grid to connect with other services. Your app's event data will be sent to a serverless function that checks compliance. This function is maintained by your company.  
 You write a new event subscription at the scope of your resource. The event must be invalidated after a specific period of time.  
 You need to configure Event Grid to ensure security.  
 What should you implement? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

**Authentication**

**Type**

WebHook event delivery

	v
SAS tokens	
Key authentication	
JWT token

**NEW QUESTION 114**

- (Exam Topic 9)

Your network contains an Active Directory domain named adatum.com and an Azure Active Directory (Azure AD) tenant named adatum.onmicrosoft.com  
 Adatum.com contains the user accounts in the following table.

Name	Member of
User1	Domain Admins
User2	Schema Admins
User3	Incoming Forest Trust Builders
User4	Replicator
User5	Enterprise Admins

Adatum.onmiaosoft.com contains the user accounts in the following table.

Name	Role
UserA	Global administrator
UserB	User administrator
UserC	Security administrator
UserD	Service administrator

You need to implement Azure AD Connect. The solution must follow the principle of least privilege. Which user accounts should you use? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

Adatum.com:

- User1
- User2
- User3
- User4
- User5

Adatum.onmicrosoft.com:

- UserA
- UserB
- UserC
- UserD

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 119

- (Exam Topic 9)

You have an Azure subscription named Subscription 1.  
In Subscription1, you create an Azure file share named share1.  
You create a shared access signature (SAS) named SAS1 as shown in the following exhibit.

Allowed services ⓘ

☐ Blob ☒ File ☐ Queue ☐ Table

Allowed resource types ⓘ

☒ Service ☒ Container ☒ Object

## NEW QUESTION 124

- (Exam Topic 9)

You are developing an Azure Function that will be triggered using a webhook from an external application. The Azure Function will receive JSON data in the body of the request.

Calling applications send an account ID as part of the URL. The number at the end of the URL is an integer. The format for the URL resembles the following: /api/account/1

The Azure Function must accept all incoming requests without requiring keys or tokens. You need to complete the attributes for the Azure Function.

How should you complete the code? To answer, select the appropriate options in the answer area.  
 NOTE: Each correct selection is worth one point.

    log.Info($"Processing item {itemToProcess.Id} for account {accountId}");
    var processedItem = DoItemProcessing(itemToProcess);
    return req.CreateResponse(HttpStatusCode.OK, processedItem);
}
```

#### NEW QUESTION 127

- (Exam Topic 9)

You are developing a Docker/Go using Azure App Service Web App for Containers. You plan to run the container in an App Service on Linux. You identify a Docker container image to use.

None of your current resource groups reside in a location that supports Linux. You must minimize the number of resource groups. You need to create the application and perform an initial deployment required.

Which three Azure CLI commands should you use to develop the solution? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

**Azure CLI Commands**

- az group update
- az webapp update
- az group create
- az appservice plan create
- az webapp create

<https://docs.microsoft.com/en-us/azure/cognitive-services/qnamaker/overview/overview>

**NEW QUESTION 129**

- (Exam Topic 9)

You plan to develop an Azure Stream Analytics job that ingests streaming data from legacy SaaS, and cloud applications. The data will be used to launch workflows which perform data analysis.

You need to select Azure resources to handle the data input and output for the solution. Which resources should you use?

- A. Input: Event Hub, output: IoT Hub
- B. Input: Blobs, output: IoT Hub
- C. Input: Event Hub, output: Service Bus
- D. Input: Event Hub, output: Azure SQL database

**Answer:** C

**NEW QUESTION 134**

- (Exam Topic 9)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals.

Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

You have an Azure Active Directory (Azure AD) tenant named Adatum and an Azure Subscription named Subscription 1. Adatum contains a group named Developers. Subscription1 contains a resource group named Dev.

You need to provide the Developers group with the ability to create Azure logic apps in the Dev resource group.

Solution: On Subscription1, you assign the DevTest Labs User role to the Developers group.

Does this meet the goal?

- A. Yes
- B. NO

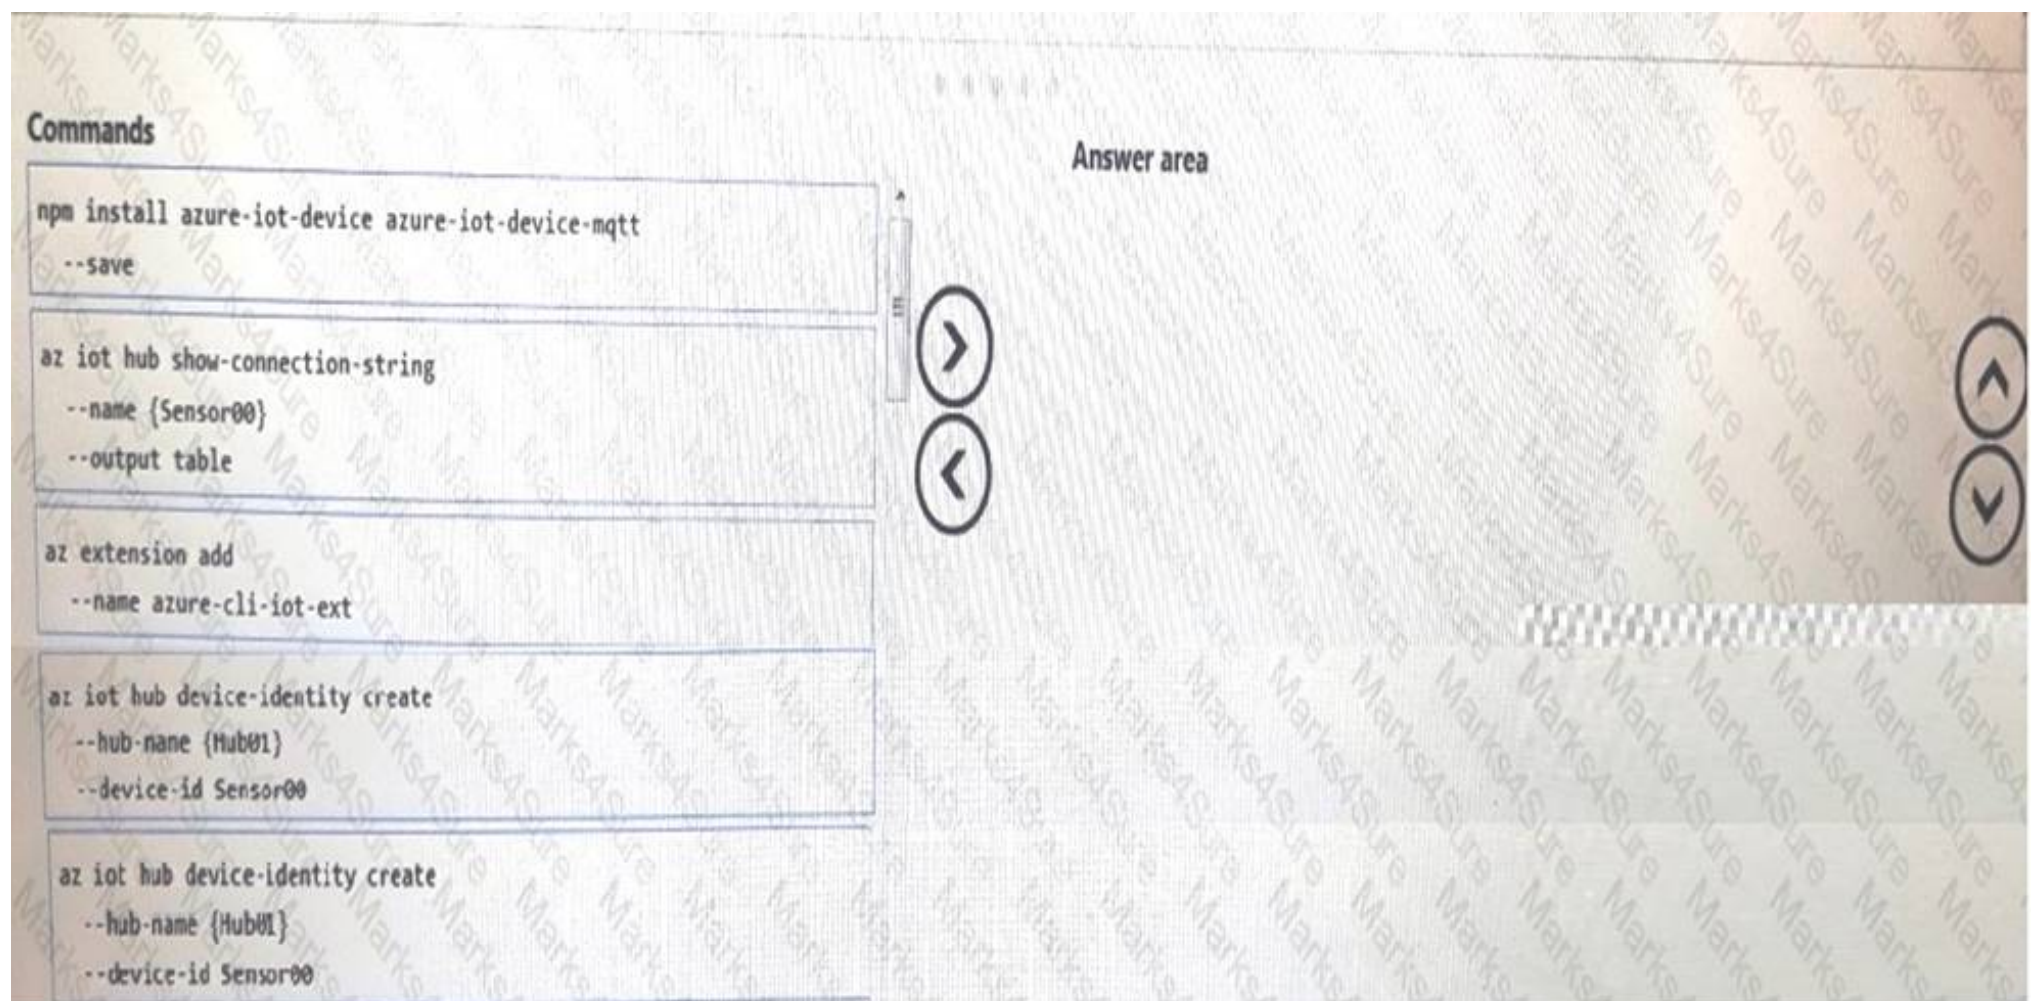

**Answer:** B

**NEW QUESTION 138**

- (Exam Topic 9)

You develop an IoT solution by using Node.js. The solution is ready to deploy to the production environment. You must implement the device twin capabilities of Azure IoT Hub. You must register a sensor named Sensor00. The IoT Hub name is Hub01.

You need to register the endpoint with ContosoHub01 so that you can configure them from your solution. Which four commands should you use to develop the solution? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

az extension add --name azure-cli-iot-ext

**NEW QUESTION 143**

- (Exam Topic 9)

You have an on-premises Hyper-V cluster. The cluster contains Hyper-V hosts that run Windows Server 2016 Datacenter. The hosts are licensed under a Microsoft Enterprise agreement that has Software Assurance.

The Hyper-V cluster contains 30 virtual machines that run Windows Server 2012 R2. Each virtual machine runs a different workload. The workloads have predictable consumption patterns.

You plan to replace the virtual machines with Azure virtual machines that run Windows Server 2016. The virtual machines will be sized according to the consumption pattern of each workload.

You need to recommend a solution to minimize the compute costs of the Azure virtual machines.

Which two recommendations should include in the solution? Each correct answer presents part of the solution? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Configure a spending limit in the Azure account center.
- B. Activate Azure Hybrid Benefit for the Azure virtual machines.
- C. Purchase Azure reserved Virtual Machine Instances for the Azure virtual machines.
- D. Create a lab in Azure DevTest Labs and place the Azure virtual machines in the lab.
- E. Create a virtual machine scale set that uses autoscaling.

**Answer:** BC

**Explanation:**

References:

<https://azure.microsoft.com/en-gb/pricing/hybrid-benefit/>

**NEW QUESTION 147**

- (Exam Topic 9)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals.

Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

You have an Azure Active Directory (Azure AD) tenant named Adatum and an Azure Subscription named Subscription. Adatum contains a group named Developers. Subscription 1 contains a resource group named Dev.

You need to provide the Developers group with the ability to create Azure logic apps in the Dev resource group.

Solution; On Dev, you assign the Logic App Contributor role to the Developers group. Does this meet the goal?

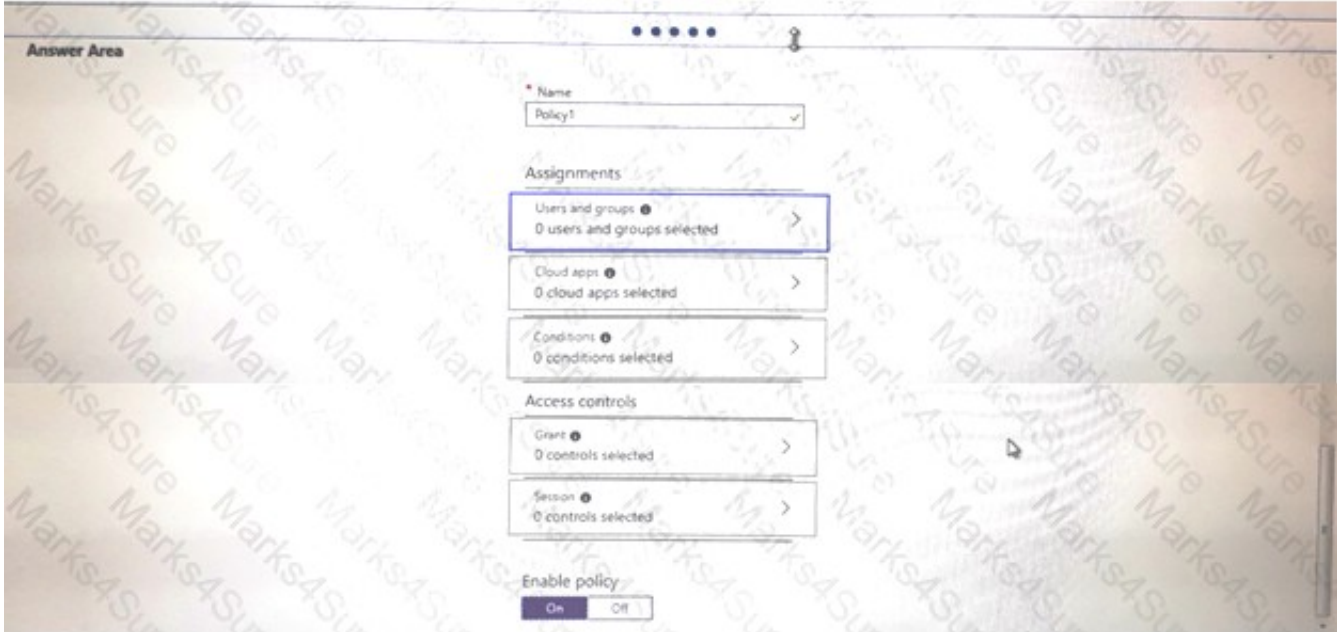

- A. Yes
- B. No

**Answer:** A

**NEW QUESTION 148**

- (Exam Topic 9)  
You have an Azure Active Directory (Azure AD) tenant.  
You need to create a conditional access policy that requires all users to use multi-factor authentication when they access the Azure portal.  
Which three settings should you configure? To answer, select the appropriate settings in the answer area. NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 152

- (Exam Topic 9)  
You develop a web app that needs to use image analysis and processing for identifying individuals. This involves rendering of large three-dimensional images stored in Azure storage and performing GRP-intensive calculations on the processed images for input into other services. Scaling and provisioning of the underlying infrastructure needs to occur during rendering and calculations as needed.  
You need to find services for the tasks that will not impact the web app.  
Which services should you use? To answer, drag the appropriate services to the correct tasks. Each service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Answer Area

Services

Azure Batch

Azure WebJobs

Azure Logic Apps

Task

Perform rendering of three-dimensional images.

Use parallel processes to complete calculations.

Service

Service

Service

NEW QUESTION 156

- (Exam Topic 9)

You have the following resource groups:

Resource group	Comments
DevServer_WestCentralUS	This resource group is located in the West Central US region and contains a single virtual machine (VM) named DevServer.  DevServer is connected to a private subnet in an Azure Virtual Network that has no internet access.
Workstation_EastUS	This resource group is located in the East US region and contains a virtual machine named DevWorkstation.  DevWorkstation is connected to a subnet in a Visual Network and is configured with a public IP address. A network security group has been configured to allow public incoming remote desktop protocol (RDP) connections to the DevWorkstation.

Developers must connect to Dev Server only through Dev Workstation. To maintain security, DevS erver must not accept connections from the internet. You need to create a private connection between the Dev Workstation and Dev St Solution: Configure an IP address on each subnet within the same address space. Does the solution meet the goal?

- A. Yes
- B. NO

Answer: B

NEW QUESTION 159

- (Exam Topic 9)

Your company has 300 virtual machines hosted in a VMWare environment. The virtual machines vary in size and have various utilization levels.

You plan to move all the virtual machines to Azure.

You need to recommend how many and what size Azure virtual machines will be required to move the current workloads to Azure. The solution must minimize administrative effort.

What should you use to make the recommendation?

- A. Azure Advisor recommendations
- B. Azure Cost Management
- C. Azure Pricing Migrate
- D. Azure Pricing calculator

Answer: C

Explanation:

References:

<https://azure.microsoft.com/en-gb/pricing/details/azure-migrate/>

NEW QUESTION 160

- (Exam Topic 9)

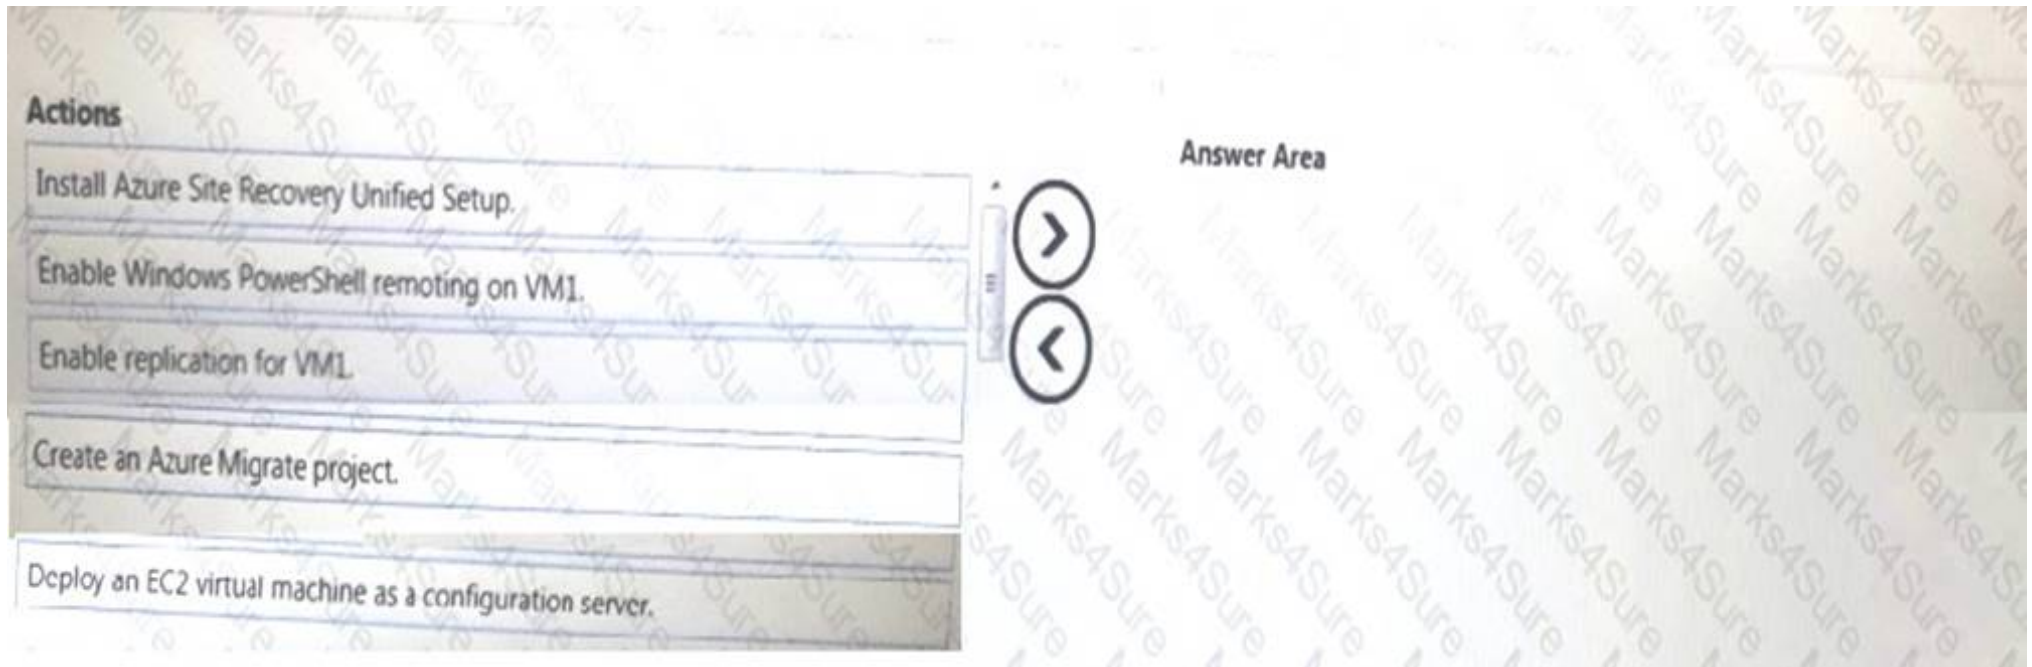

You have an Azure subscription that contains the following resources:

- a virtual network named VNet1
  - a replication policy named RepIPoHcy1
  - a Recovery Services vault named Vault1
  - an Azure Storage account named Storage1
- You have an Amazon Web Services (AWS) EC2 virtual machine named VM1 that runs Windows Server 2016.

You need to migrate VM1 to VNet1 by using Azure Site Recovery.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

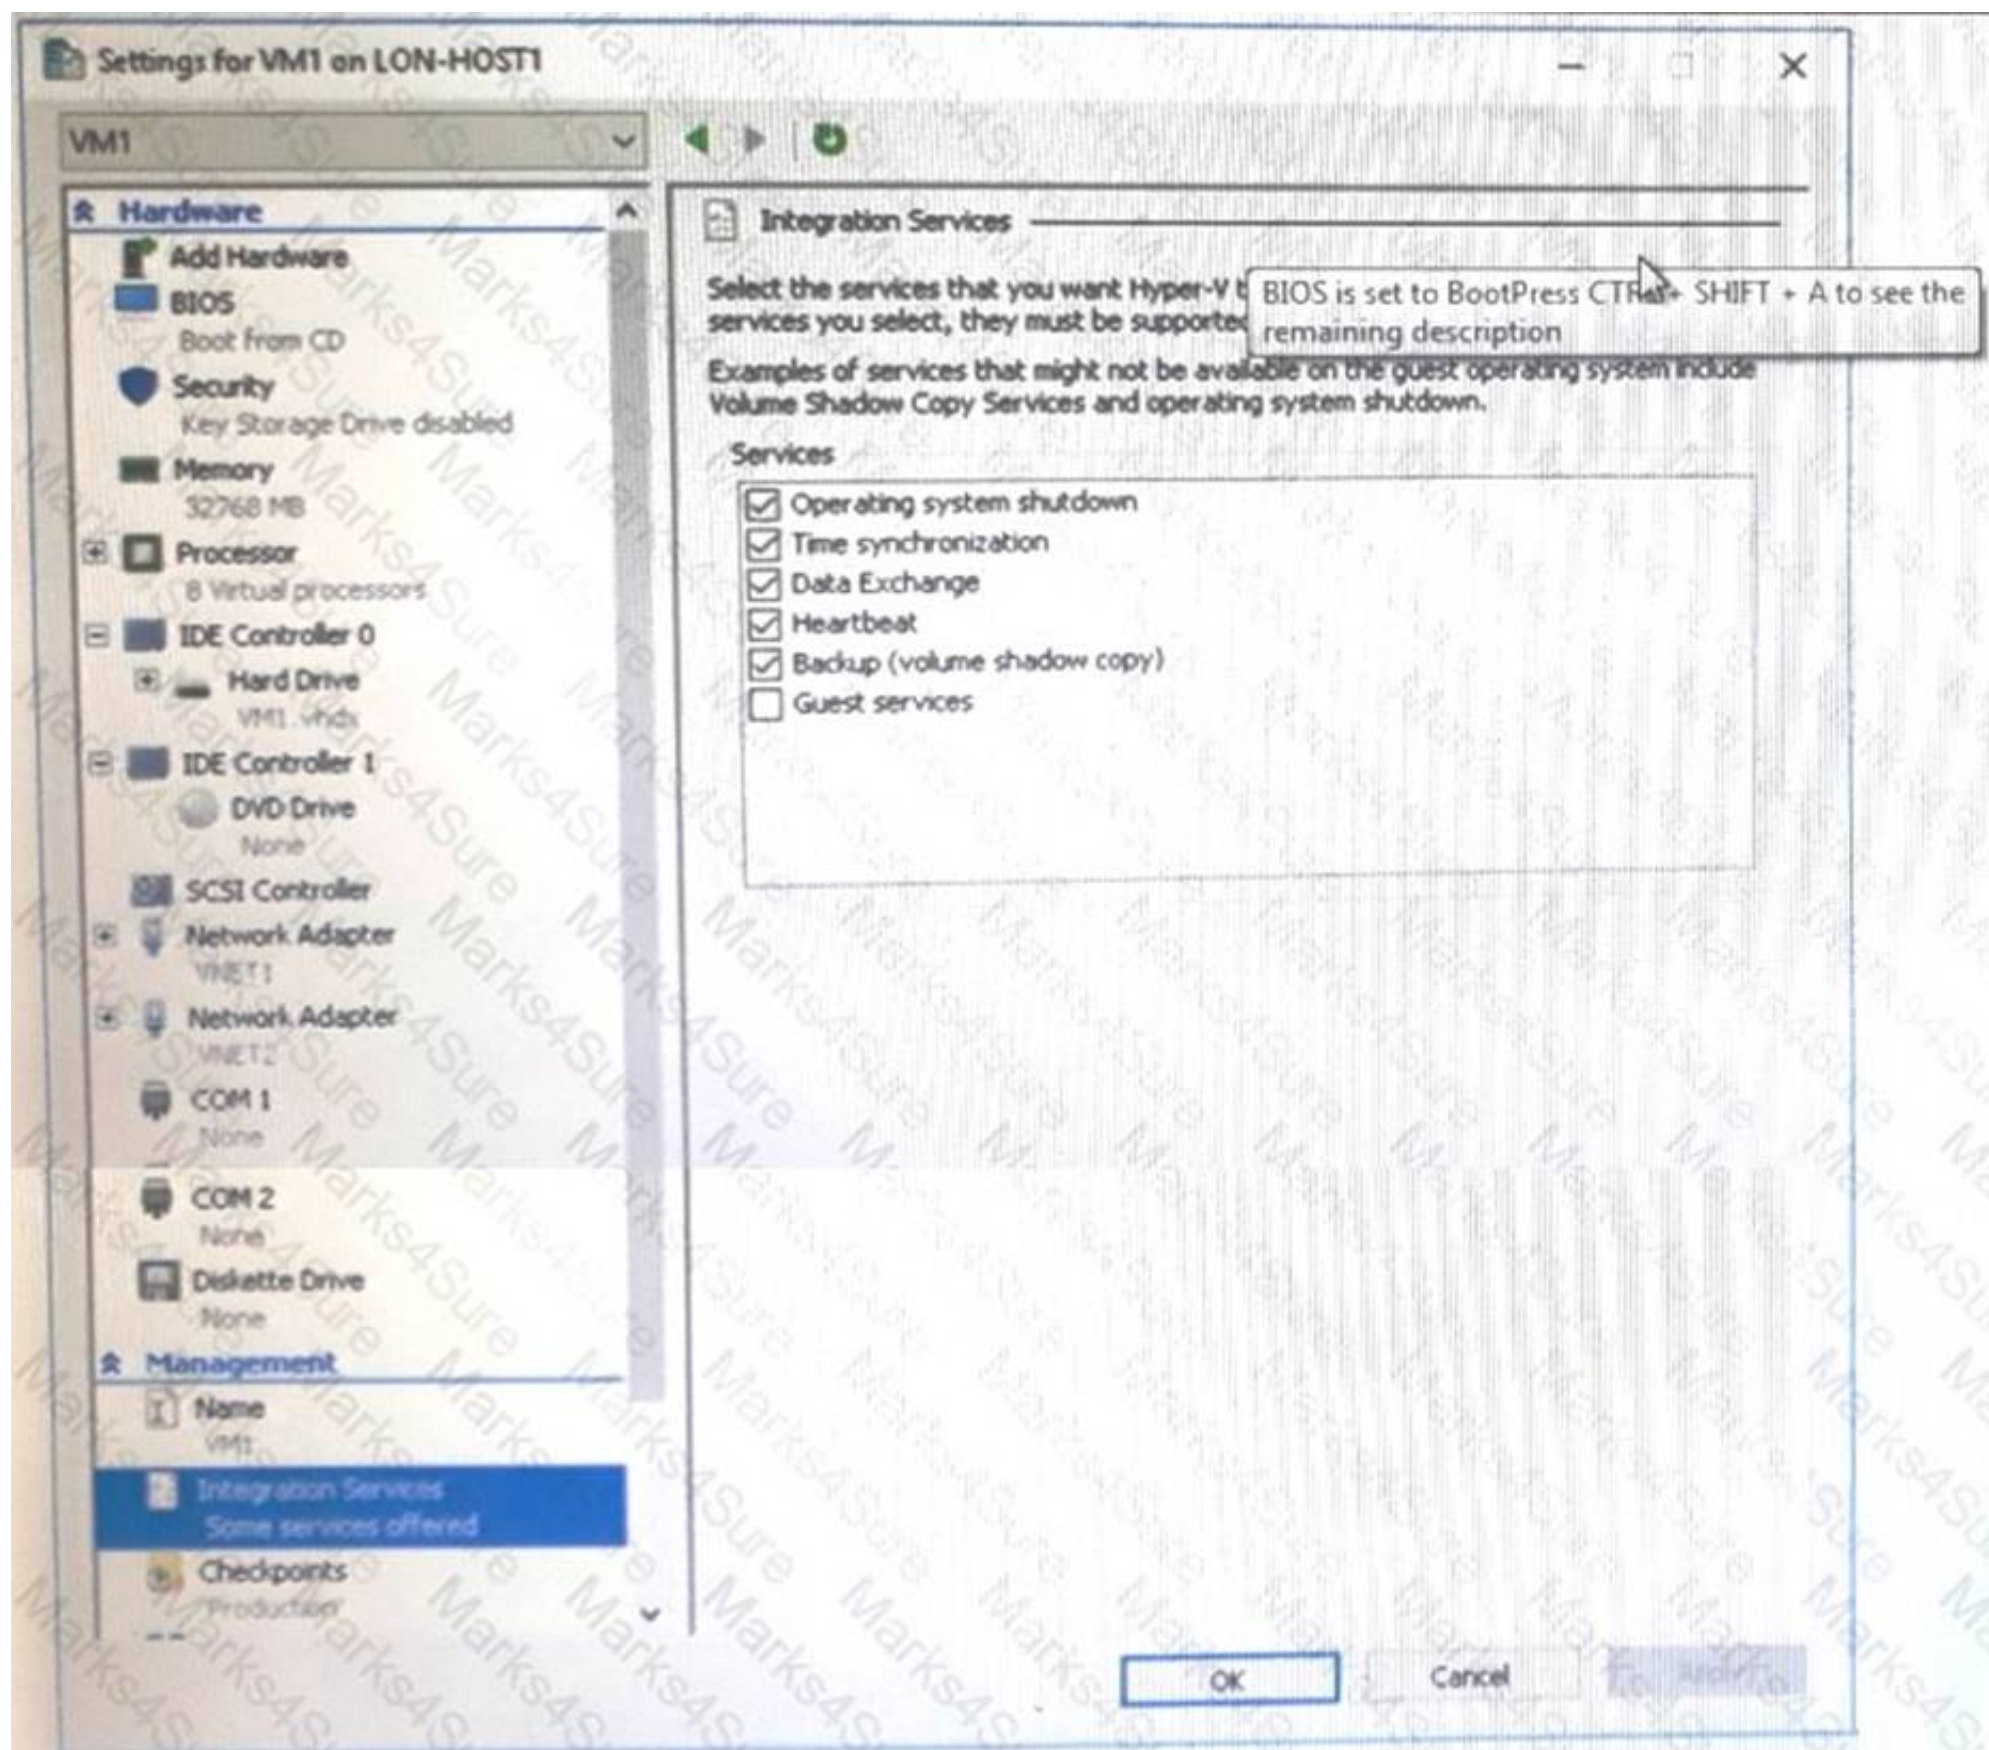

**NEW QUESTION 162**

- (Exam Topic 9)

You have an Azure subscription.

You have an on-premises virtual machine named VM1. The settings for VM1 are shown in the exhibit. (Click the Exhibit tab.)

You need to ensure that you can use the disks attached to VM1 as a template for Azure virtual machines. What should you modify on VM1?

- A. the hard drive
- B. Integration Services
- C. the memory
- D. the network adapters
- E. the processor

**Answer:** C

#### NEW QUESTION 164

- (Exam Topic 9)

You have an on-premises network that includes a Microsoft SQL Server instance named SQL1. You create an Azure Logic App named App1.

You need to ensure that App1 can query a database on SQL1.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

## Actions

## Answer Area

From an Azure virtual machine, install an on-premises data gateway.

From an on-premises computer, install an on-premises data gateway.

Create an Azure virtual machine that runs Windows Server 2016.

From the Azure portal, create an on-premises data gateway.

From the Logic Apps Designer in the Azure portal, add a connector.

- A. Mastered
- B. Not Mastered

**Answer:** A

### Explanation:

References:

<https://docs.microsoft.com/en-us/azure/logic-apps/logic-apps-gateway-connection>

### NEW QUESTION 166

- (Exam Topic 9)

A company is developing a solution that allows smart refrigerators to send temperature information to a central location.

The solution must receive and store messages until they can be processed. You create an Azure Service Bus instance by providing a name, pricing tier, subscription, resource group, and location.

You need to complete the configuration.

Which Azure CU or PowerShell command should you run?

A)

```
New-AzureRmServiceBusQueue
-ResourceGroupName fridge-rg
-NamespaceName fridge-ns
-Name fridge-q
-EnablePartitioning $False
```

B)

```
az group create
--name fridge-rg
--location fridge-loc
```

C)

```
New-AzureRmResourceGroup
-Name fridge-rg
-Location fridge-loc
```

D)

```
connectionString=$(az servicebus namespace authorization-rule keys list
--resource-group fridge-rg
--fridge-ns fridge-ns
--name RootManageSharedAccessKey
--query primaryConnectionString --output tsv)
```

- A. Option A
- B. Option B
- C. Option C
- D. Option D

Answer: D

#### NEW QUESTION 171

- (Exam Topic 9)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. You have the following resource groups:

Resource group	Comments
DevServer_WestCentralUS	This resource group is located in the West Central US region and contains a single virtual machine named DevServer.  DevServer is connected to a private subnet in an Azure Virtual Network that has no internet access.
Workstation_EastUs	This resource group is located in the East US region and contains a virtual machine named DevWorkstation.  DevWorkstation is connected to a subnet in a Virtual Network and is configured with a public IP address. A network security group has been configured to allow public incoming remote desktop protocol (RDP) connections to the DevWorkstation.

Developers must connect to DevServer only through DevWorkstation. To maintain security, DevServer must not accept connections from the internet. You need to create a private connection between the DevWokstation and DevServer.

Solution: Configure a public IP address on DevServer\_WestCentral. Configure the Network Security Group to allow all incoming ports.

Does the solution meet the goal?

- A. Yes
- B. NO

Answer: A

#### NEW QUESTION 174

- (Exam Topic 9)

You have implemented code that uses elastic transactions spanning across three different Azure SQL Database logical servers.

Database administrators report that some transactions take longer to complete than expected.

You need to use the correct tool to monitor all the transactions originating from the elastic transaction implementation.

Which tool should you use?

- A. Run the sys.dm\_tran\_active\_transactions dynamic management view.
- B. Use the dependencies section of Azure Applications Insights.
- C. Run the sys.dm\_tran\_current\_snapshot dynamic view.
- D. Run the sys.dm\_tran\_active\_snapshot\_database\_transactions dynamic management view.

Answer: A

#### Explanation:

References:

<https://docs.microsoft.com/en-us/azure/sql-database/sql-database-elastic-transactions-overview>

#### NEW QUESTION 176

- (Exam Topic 9)

A company named Contoso Ltd., has a single-domain Active Directory forest named contoso.com.

Contoso is preparing to migrate all workloads to Azure. Contoso wants users to use single sign-on (SSO) when they access cloud-based services that integrate with Azure Active Directory (Azure AD).

You need to identify any objects in Active Directory that will fail to synchronize to Azure AD due to formatting issues. The solution must minimize costs.

What should you include in the solution?

- A. Azure Advisor
- B. Password Export Server version 3.1 (PES v3.1) in Active Directory Migration Tool (ADMT)
- C. Azure AD Connect Health
- D. Microsoft Office 365 IdFix

Answer: D

#### NEW QUESTION 179

- (Exam Topic 9)

A company provides web app hosting services for customers.

You have a set of App Service Plans available to deploy resources for new projects. The available service tiers are shown in the Service Tiers exhibit. (Click the Service Tiers tab.)

# Project Table

Project	URL
Adventure Works Cycles	http://adventureworkscycles.com
Coho Vineyard	http://cohovineyard.com
Trey Research	http://treyresearch.azurewebsites.net

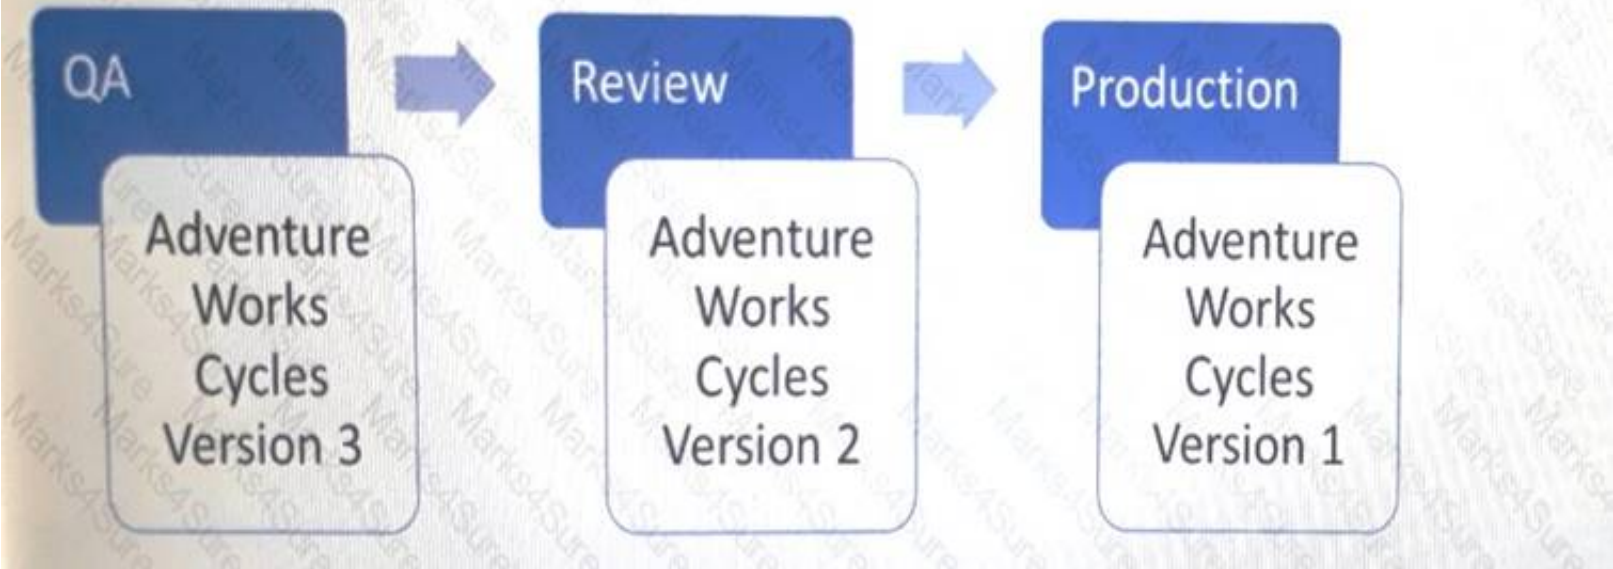

You must provision resources for the projects as shown in the Projects exhibit. (Click the Projects tab.)

## Service tiers

The Adventure Works a project requires the use of deployment slots as shown in the Deployment Slots exhibit. (Click the Deployment Slots tab.)

## Deployment Slots

You need to determine where to deploy resources for each project.  
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

	Yes	No
AdventureWorks Cycles must be hosted on one of the shared plans.	<input type="radio"/>	<input type="radio"/>
Trey Research must be hosted on one of the prototype plans.	<input type="radio"/>	<input type="radio"/>
Coho Vineyard must be hosted on one of the dedicated plans.	<input type="radio"/>	<input checked="" type="radio"/>

- A. Mastered
- B. Not Mastered

Answer: A
