## **Exam Questions 1z0-1016**

Oracle Product Hub Cloud 2018? Implementation Essentials

#### NEW QUESTION 1

You have scheduled item publication to a spoke system with specific item publication criteria and the following details:

- ▶ Day 5: Next schedule process
- ▶ Day 10: Next schedule process
- ▶ Day 15: Next schedule process

On Day 12, your customer decides to publish from Day 6.

Identify the parameters that are required to run this request and the data set that would result from this request.

- A. Set Last Publication Date as Day 6, which will publish all records updated from Day 6 up to Day 10.
- B. Set Last Publication Date as Day 1, which will publish all records updated from Day 6 up to Day 12.
- C. Set Criteria Date as Day 6, which will publish all records updated from Day 6 up to Day 10.
- D. Set Criteria Date as Day 6, which will publish all records updated from Day 6 up to Day 12.

**Answer:** C

#### NEW QUESTION 2

Your customer wants to add a new supplier to Oracle Product Hub Cloud. What steps must you complete in order to do so?

- A. Create Supplier, Create Address, Create Site, Create Site Assignments, Create Suppliers Site Contact
- B. Create Supplier, Create Site, Create Site Assignments, Create Address, Create Suppliers Site Contact
- C. Create Address, Create Supplier, Create Site Assignments, Create Site, Create Suppliers Site Contact
- D. Create Address, Create Supplier, Create Site, Create Site Assignments, Create Suppliers Site Contact
- E. Create Supplier, Create Address, Create Site Assignments, Create Site, Create Suppliers Site Contact

**Answer:** A

#### NEW QUESTION 3

One of your customer employees is assigned as an application administrator. What three functions can the employee perform using Security Console?

- A. Assign Roles to users
- B. Create customers
- C. Create Items
- D. Perform role analysis
- E. Manage users

**Answer:** BCD

#### NEW QUESTION 4

For your project, you are using Integration Cloud Service to integrate Oracle Product Hub Cloud with On-Premise Oracle E-Business Suite. Which two Integration Cloud Service adapters will be used for this integration?

- A. Oracle Logistics Adapter
- B. Oracle ERP Cloud Adapter
- C. Oracle Field Service Adapter
- D. Oracle E-Business Suite Adapter
- E. Oracle HCM Cloud Adapter

**Answer:** BE

#### NEW QUESTION 5

Your customer has created an implementation project with three offerings: Oracle Financials Cloud, Oracle Procurement Cloud, and Oracle Product Hub Cloud. Although the customer has not implemented Transactional Business Intelligence, the Implementation Manager found that tasks related to Transactional Business Intelligence are still available for all selected offerings.

Which action can the Implementation Manager take to prevent these unwanted tasks from appearing on the FSM (Functional Set up Manager) task list?

- A. Avoid provisioning the environment for Transactional Business Intelligence.
- B. Delete the unwanted Business Intelligence tasks.
- C. Avoid entering any data for these tasks.
- D. Deselect Offerings for Business Intelligence.
- E. Avoid using the Transactional Business Intelligence reports.

**Answer:** B

#### NEW QUESTION 6

Within Catalogs, which three values can be selected within the Sharing Content attribute?

- A. Categories only: Only categories without assigned items can be shared
- B. Items only: Only categories without assigned items can be shared
- C. Categories only: Only categories with assigned items can be shared
- D. Items and categories: Only one category can be shared
- E. Items and categories: All categories can be shared

F. Items only: Only categories with assigned items can be shared

**Answer:** ABE

#### NEW QUESTION 9

Your customer has been using Product Hub and has decided to extend its manufacturing operations to a new facility. They want to transfer the manufacturing of some of their existing items to this new facility. Identify the two required setups in Product Hub to support this change.

- A. Define Units of Measures
- B. Define Item Class Security
- C. Define Item or Inventory Organization
- D. Define Lifecycle Phases and Assign to Item Class
- E. Define Catalogs
- F. Define Key Flexfield for Categories

**Answer:** AE

#### NEW QUESTION 10

What are the three upload options available to add items to a batch by using the Oracle Product Hub Cloud User Interface?

- A. From an xml file by using import maps
- B. From an xml file by using iSetup
- C. From a spreadsheet by using ADFDi
- D. From a text file by using import maps
- E. From a text file by using ADFDi

**Answer:** ABD

#### NEW QUESTION 10

View the Exhibit.

**New Item Request**

Enable new item request

**Definition Workflow Details**

Actions <input type="checkbox"/> View <input type="checkbox"/> + X <input type="checkbox"/> Detach <input type="checkbox"/>									
*Step Sequence Number	Response Required From	*Assignee Type	*Assigned To	*Business Entity	*Associated Entity	All Values Required	Required Definition Values	Item Class	Inherited
10	All	Person	FAAdmin	Item operational attributes	Sales and Order Management	-	<input type="checkbox"/>	ROOT_ICC	-
10	All	Person	FAAdmin	Structure	Primary	<input checked="" type="checkbox"/>		ROOT_ICC	-
20	One	Role	Product Data Steward	Item associations	Item organization	-		ROOT_ICC	-
20	One	Role	Product Data Steward	Item associations	GTIN relationships	<input checked="" type="checkbox"/>		ROOT_ICC	-

Rows Selected 1

New Item Request workflow definition for an item class is displayed in the Exhibit. Based on this configuration, which two options are true?

- A. The Product Data Steward can define Item Organization association and GTN (Global Trade Item Number) relationships.
- B. Both FPHADMIN and the Product Data Steward can update the basic attributes of the item by default.
- C. The Product Data Steward can define Sales and Order Management and all Item operational attributes.
- D. The FPHADMIN can define Sales and Order Management attributes and item structures.

**Answer:** AB

**NEW QUESTION 11**

Your customer has items created in the master organization and the same items are available across two child organizations, each in a unique location. As part of a data governance use case, the customer wants all the attribute changes for an item to be approved by the respective location-specific Data Stewards. How would you address this requirement?

- A. By enabling Change Order Header Rule Based Single Approver at the organization level
- B. By enabling organization-specific item rules for a change order
- C. By defining propagation rules for the organization hierarchy for a change order
- D. By defining two change order types at the organization level

**Answer:** C

**Explanation:**

**NEW QUESTION 23**

Which statement is true in regard to business events?

- A. Business events are fired based on database triggers and specific to one table.
- B. Business events are used to manually trigger actions.
- C. Business events are custom codes that require scripting.
- D. Business events may not be specific to just one table, and are fired based on DML (Data Manipulation Language) operations on business objects.
- E. Business events are business rules that need to be developed.

**Answer: C**

**NEW QUESTION 25**

You are creating an implementation project and are unable to select the Item and Catalog Management functional area within the Product Management module. What would you do to fix this?

- A. Setup and Maintenance > Product Hub offering > Change Configuration > Enable Item and Catalog Management for implementation
- B. Setup and Maintenance > Product Management Offering > Change Configuration > Enable Item and Catalog Management for implementation
- C. Setup and Maintenance > Manage Item and Catalogs > Enable Item and Catalog Management for implementation
- D. Setup and Maintenance > Product Management Offering > Setup > Enable Item and Catalog Management for implementation

**Answer: B**

**NEW QUESTION 28**

Observe the Mobile Phones item class in the hierarchy shown. You are unable to perform add and remove actions for one of the security configuration rows under the Item Class People section. Identify the cause for this behavior.

- A. The selected configuration row is inherited from the Gadgets or Electronics item class.
- B. Item class security configurations cannot be modified at all.
- C. Item class security configurations can be modified only in Security Console.
- D. The item class security configuration is locked for the Mobile Phones item class.
- E. The item class security configuration cannot be modified because items already exist under the Mobile Phones item class.

**Answer: C**

**NEW QUESTION 31**

Which two entities are defined in the Define Facilities activity in a business process model?

- A. The primary accounting ledger and any secondary ledgers that provide an alternative accounting representation of the financial data
- B. The item master organization, which holds a single definition of the items that can be shared across many inventory organizations
- C. Inventory organizations, which represent facilities that manufacture or store items
- D. Reference data sharing, which determines how reference data in the applications is portioned and shared

**Answer: BC**
