

1Z0-435 Dumps

Oracle Business Process Management Suite 12c Essentials

<https://www.certleader.com/1Z0-435-dumps.html>

NEW QUESTION 1

Which two statements are correct on the use of business objects in a BPM project? (Choose two.)

- A. A business object is defined by a complex data time.
- B. Business objects are often defined in WSDL documents.
- C. A business object can inherit data and behavior from a parent business object.
- D. You can create a business object at either the project level or the process level.

Answer: BC

NEW QUESTION 2

Which two statements are true about business architecture modeling in BPM Suite? (Choose two.)

- A. It fosters a top-down approach that allows for discovery of an organization's processes.
- B. It is required before BPMN modeling can begin for a specific process.
- C. It is supported by enterprise maps, value chain models, and strategy models created in BPM Studio.
- D. It allows you to define high-level processes that span an entire organization.
- E. It uses familiar BPMN notation to graphically describe high-level process areas.

Answer: AD

Explanation:

Business Architecture is a methodology for performing high-level analysis of the business processes within your organization. These processes can be high-level processes that span an entire organization or specific, low-level processes performed within a specific group.

Business Architecture uses a top-down approach that allows for discovery of your organization's processes. You can define and evaluate high-level goals and map them to specific strategies for achieving them. You can also run reports on Business Architecture components to evaluate performance.

NEW QUESTION 3

Which two statements are true about using project data objects? (Choose two.)

- A. Any process in the project can access a project data object.
- B. The value of a project data object does not vary between processes.
- C. Project data objects can be used only as input arguments to a process.
- D. Project data objects can be used in data associations and expressions.

Answer: AD

NEW QUESTION 4

To establish the integration between BPM Suite and BAM 12c, you need to .

- A. do nothing as they are integrated out-of-the-box
- B. set the DisableProcessMetricsMBean setting to false on the SOA server
- C. set the DisableProcessMetricsMBean setting to false on the BAM server
- D. set the DisableMonitorExpressMBean setting to false on the SOA server

Answer: B

NEW QUESTION 5

Which statement is an unsupported scenario for virtualization through libOVD?

- A. Dynamic groups used to determine group membership.
- B. Users and groups used for task assignment are stored in a relational database.
- C. Users and groups used for task assignment are stored in an external LDAP server or the embedded LDAP server.
- D. Users and groups used for task assignment are stored in multiple external LDAP servers.

Answer: C

NEW QUESTION 6

At design time, web forms created by using the Web Form Designer are associated only with human tasks inside the same .

- A. process
- B. space
- C. project
- D. application

Answer: A

NEW QUESTION 7

Which statement is accurate about verbal rules and business phrases?

- A. Verbal ruled can be created in Business Process Composer, but not in BPM Studio.
- B. For a particular verbal rule, conditions and actions can include derived business phrases or user- defined business phrases, but not both.
- C. Derived business phrases are automatically created by using facts and globals in the rules dictionary.

D. Verbal rules must be created in a separate ruleset from general rules and decision tables.

Answer: BC

NEW QUESTION 8

Which human task pattern is best suited for a single approver scenario where the role is resolved through group membership? (Choose two.)

- A. User
- B. Group
- C. Initiator
- D. FYI
- E. Management

Answer: A

Explanation:

Single Approver: Use this option for a single user to act on a task. If the task is assigned to a role or group with multiple users, then one member must claim the task and act on it.

NEW QUESTION 9

What does the case engine use as the content store if a content management system is not specifically configured for case management?

- A. Oracle WebCenter Content
- B. a CMIS content store
- C. a file system
- D. a database

Answer: D

Explanation:

Case Data: the data for the case stored in the BPM database.

Reference: https://docs.oracle.com/middleware/1213/bpm/bpm-develop/case_mgmt_bpmpd.htm#BPMPD87410

NEW QUESTION 10

Which three attributes are unique to adaptive case management-based processes as compared to traditional BPMN-based processes? (Choose three.)

- A. The sequence of execution of activities is determined by process participants at run time.
- B. They are routine, well-defined, structured processes.
- C. New stakeholders, not just task participants, may be added at run time.
- D. They are exclusively event-driven.
- E. They involve human-centric processing.

Answer: ACD

NEW QUESTION 10

Which two case elements can have due dates configured? (Choose two.)

- A. Case
- B. Case data
- C. Events
- D. Milestones
- E. Activities

Answer: AB

NEW QUESTION 11

Which two can be added as members of a static approval group? (Choose two.)

- A. Users
- B. Groups
- C. Application roles
- D. other approval groups
- E. WebLogic administrators

Answer: AD

Explanation:

Members of a static approval group can be either users or other approval groups.

Reference: http://docs.tpu.ru/docs/oracle/en/fmw/11.1.1.6.0/user.1111/e15175/bpmug_ws_admin.htm

NEW QUESTION 12

Which two statements are true about BPM Suite product architecture? (Choose two.)

- A. The Process Asset Manager is a container of reusable, shared, implementation assets available to all processes within a BPM project.
- B. Business architecture modeling is supported by a third-party product that Oracle resells as part of the BPM Suite 12c product family.

- C. BPM Suite leverages SOA Suite infrastructure and tooling to support key design-time and run-time features.
- D. case Management is an Oracle add-on product to add adaptive case management support to BPM Suite.
- E. BPM Suite supports BPMN process modeling notation in both BPM Process Composer and BPM Studio.

Answer: AD

NEW QUESTION 17

Which statement is true about BPM Suite's round trip simulation feature?

- A. Round trip simulation is a feature of a Process Player.
- B. Basing a simulation on actual process runtime data can help you find bottlenecks in a process model.
- C. Unit test suites can be automatically generated based upon round trip simulation data.
- D. During round trip simulation generation, process bottlenecks are identified and highlighted on the model.

Answer: B

NEW QUESTION 19

The initial performer of a task is determined by the role associated with the swim lane in which the task is modeled except when you use a(n) _____.

- A. complex task
- B. user task
- C. FYI task
- D. group task

Answer: A

Explanation:

A complex user task uses a complex routing flow that is defined within the human task. BPM Studio offers a number of human task patterns out of the box, to make it easy to implement the most common types of human tasks. For example, the Simple pattern just assigns individual users or groups. The Management pattern is used for a sequential list of approvers up the management chain. Initiator is for the person who kicks off the process. For most of these, swimlane roles are used to determine assignments. For the Complex task, however, the swimlane is irrelevant, and routing and assignments are typically more complicated. Note: Swimlanes are the horizontal lines that run across the process editor. All flow objects must be placed within a swimlane. Swimlanes can also be used to group flow objects based on the roles defined within your process. Swimlanes that contain user tasks must have roles assigned to them. Swimlanes visually display the role responsible for performing each flow object within your process. Additionally, you can have multiple swimlanes that are assigned to the same role. Swimlanes can make your process more readable when you must use the same role in different parts of the same process.

NEW QUESTION 21

Which two modeling approaches could be used to handle exceptions thrown by a service? (Choose two.)

- A. subprocess
- B. event subprocess
- C. error and event
- D. error catch event as a boundary event on the service task

Answer: BD

Explanation:

You can handle the exceptions that occur in an activity using the following: *A boundary error catch event *An event subprocess Boundary error catch events enable you to resume the main process flow after handling the exception. If you want to reuse the exception handling flow for multiple tasks in your process, then event subprocesses are more efficient than boundary catch events. Event subprocesses enable you to define a cleaner process with less effort because the catch error event is located within the event subprocess. To reuse an exception handling flow using boundary catch events, you must define a boundary catch event for each of the tasks, and then connect those boundary events to the exception handling flow.

NEW QUESTION 25

You are analyzing the different methods available to manage the life cycle of the OWSM policies in your SOA/BPM environment. Identify two statements that correctly describe OWSM policy attachments. (Choose two.)

- A. Although you can attach and detach security policies in JDeveloper, you can detach them only in Enterprise Manager.
- B. An application developer typically uses JDeveloper to create new security policies rather than select them from a prebuilt list.
- C. When you use JDeveloper to associate a security policy with a web service, the policy is not really attached until application development.
- D. OWSM policies can be attached and detached with WLST.

Answer: CD

NEW QUESTION 28
