Why can't I find persons in the list of resources when I enter team members, planning resources, or person rate schedules?

You can't find persons in the list of resources when you enter team members, planning resources, or person rate schedules in the following situations:

- ☐ The administrator didn't assign a department while creating users. Persons must have an active assignment and be assigned to a department in Oracle Fusion Human Capital Management before they can be added as team members or entered as resources on the planning resource breakdown structure or person rate schedule.
- ☐ The resource isn't active in Oracle Fusion Human Capital Management because the current date is before the effective date of the resource. If you want to include persons who will start in the future, select the Include people with future-dated effective start dates option when you search for the person.
- ☐ Persons assigned as project managers aren't active as of the project start date.
- ☐ The assignment of the person is terminated, and an appropriate value isn't set for the number of days to display people with terminated assignments. You can set the profile value appropriately at the site profile level using the Specify Number of Days to Display People with Terminated Assignments task in the Setup and Maintenance work area.

NEW QUESTION 5

You have a small project for a period of five months. Your budget amount for each month is spread evenly and is \$1000 per month. The first month actual expense is \$800 and there is a commitment for \$600. Now you generate a forecast at the beginning of the second month. Identify the monthly Estimate-To-Complete (ETC) amount that the application would calculate for the remaining four periods, when the ETC generation method includes commitments. (Choose the best answer.)

A. 1000B.-900C.800D.600

Answer: B

Explanation:

Budget 5,000Actuals 800Commitment 600 ETC = Budget – Actuals – Commitment

ETC = 5,000-800-600 = 3,600 Budget available for next 4 months = 3,600/4 = 900/month

NEW QUESTION 6

The resource is planned to start with 10 days left in the first period and to end 20 days into the last period. For the remaining periods, the resource must be loaded on all working days of the month. You are required to distribute the budget, forecast, and planning amounts across periods based on the task duration.

Which predefined spread curve must be used to meet this requirement? (Choose the best answer.)

- A. Daily Spread Basis
- B. Back Loaded
- C. Bell Curve
- D. S-Curve
- E. Even

Answer: A

- A. work type
- B. event type
- C. cost type
- D. expenditure type

Answer: A

Explanation:

Reference https://docs.oracle.com/cloud/latest/projectcs_gs/OAPFM/OAPFM1125361.htm#OAPFM1125277 (what's a work type?)

In billing, you can use work types to classify work for the following purposes:

- ▶ To determine the default billable status of expenditure items.
- ▶ To classify cross-charge amounts into cost and revenue for cross-charge transactions.

Tip: To use work types to determine whether an expenditure item is billable you must set the profile option Work Type Derived for Expenditure Item to Yes.
